## Troubleshooting

## Safety and Use
General information

Your ALCATEL ONETOUCH Fierce™ 2 is a transceiver that operates on UMTS Triband 850/1900/AWS.

Protection against theft

Your mobile phone is identified by an IMEI (mobile phone serial number) shown on the packaging label and in the product’s memory. We recommend that you note the number the first time you use your mobile phone by entering *#06# and keep it in a safe place. It may be requested by the police or your network operator if your mobile phone is stolen.

This product meets applicable national SAR limits of 1.6W/kg. The specific maximum SAR values can be found in the SAR INFORMATION section of this user guide.

When carrying the product or using it while worn on your body, either use an approved accessory such as a holster or otherwise maintain a distance of 1.5 cm from the body to ensure compliance with RF exposure requirements. Note that the product may be transmitting even if you are not making a phone call.

Your mobile

1.1 Keys and connectors
Power key
- Press: To lock or light up screen.
- Press and hold: To show the pop-up menu to select from Power off/Restart/Airplane mode and Silence/Vibrate/Ringer.
  - Press and hold when phone is off to power phone on.
  - Press and hold Power key and Volume down key to capture a screenshot.
  - Press to mute the ringtone when there’s an incoming call.

Back key
- Touch to go back to the previous screen or to close a dialog box, options menu, notifications panel, etc.

Home key
- While on any application or screen, touch to return to the Home screen.

Menu key
- Touch Menu key once to access Add widgets, Manage applications, Wallpaper and Settings options.
  - Touch and hold Menu key to access recently used apps list. Touch app icon in list to launch app, to remove an app from list swiping app icon to left or right.

Volume Keys
- In call mode adjusts the earpiece or headset volume.
- In Music/Video/Streaming mode adjusts the media volume.
- In general mode adjusts the ring tone volume.
- Mute the ringtone of an incoming call.
- In Camera mode use keys to take a photo.
- Press to light up the screen when it dims during a call.
1.2 Getting started

1.2.1 Set-up

Attaching or removing back phone cover

Inserting or removing SIM card
You must insert your SIM card to make phone calls. Before inserting/removing SIM card, ensure phone is off to prevent damage.

To install SIM card, start by sliding the metal tray up to unlock position, tray will click and release when unlocked. Place the SIM card into the slot with gold contacts facing downward. Once SIM card is placed into slot, close metal tray, then slide tray down, tray will click when locked. Reattach back cover to phone and power phone on. To remove SIM card, slide the metal SIM card tray to unlock position and gently slide the SIM card out from slot.

Installing or removing battery
Before inserting/removing battery, ensure phone is off to prevent damage.

- Install battery into slot until locked in position, then close the battery cover.
- Remove battery cover and unlock battery from slot, then remove.

Inserting or removing microSD™ card

Installing microSD card
- Power off your phone, remove back cover by pulling cover up and remove battery.
- Locate the microSD card slot located above top right corner of battery compartment.
- Insert the microSD card into the microSD slot with the gold contacts facing downward and gently push in microSD card until it locks into slot.
- Reinsert battery into battery compartment until locked in position, then reattach the battery cover.

Removing microSD card
- To remove card, remove the battery cover and battery, then slide the microSD card from slot gently.
- Reinsert battery into battery compartment until locked in position, then reattach the battery cover.
Charging battery

Connect USB Cable provided to your phone and charger, then connect charger to electric outlet. Phone charging icon will display on status bar, confirming battery charging.

The charging icon will not display if your battery is completely consumed. To reduce power consumption and energy waste, when battery is fully charged disconnect your charger from the plug; switch off Wi-Fi, GPS, Bluetooth or background-running applications when not in use; reduce the backlight time, etc.

1.2.2 Power on your phone

Hold down the Power key until the phone powers on, unlock your phone (Slide, PIN, password, pattern) if necessary, once unlocked Home screen is displayed.

If you do not know your PIN code or if you have forgotten it, contact your network operator. Do not store PIN code within your phone, instead store PIN in a location that is accessible without using phone.

Setting up your phone for the first time

The first time you power on the phone, you should set the following options:

- Touch Get started, then select the phone’s language.
- Select Input Method: Android Keyboard, Swype or Google voice typing and touch Next.
- Mobile Data Connection: Select Data preferences and touch Next.
- Select Date & Time: Automatic Time Zone will be preselected, to customize deselect this option, make changes and touch Next.
- Setup your Google account: Touch Setup now and you will be prompted to sign in to your Gmail account or create an account, once logged in touch arrow to go to next section.
- Select Wi-Fi: Touch Add network to add a new Wi-Fi, touch Back to return to previous section.
- Final screen will say Finished, touch Finished to exit screen.

If you forget your password, you can go to http://www.google.com/ to retrieve it. If you don’t own a Google Account, you are prompted to create one by touching New. Touch Not now to skip to the next step.

When phone is powered on without a SIM card inserted, you may still sign into your Google account and use some features by connecting to Wi-Fi network (refer to section 6.1.2 Wi-Fi).

1.2.3 Power off your phone

Hold down the Power key from the Home screen until the Phone options appear, select Power off.
1.3 Home screen

Home screen is provided in an extended format to allow more space for adding applications, shortcuts etc. Slide all Home screens horizontally left and right to get a complete view of the Home screens. The white squares at the lower part of the screen indicate which screen you are viewing.

Status bar
• Status/Notification indicators
• Touch and drag down to open the notifications panel.

Search bar
• Touch to enter text search screen.
• Touch to enter voice search screen.

Favorite applications tray
• Touch to enter the application.
• Touch and hold to move or change applications.

Application icon
• Touch to open applications menu.

You can bring all your favorite and most frequently used items (applications, shortcuts, folders and widgets) to your Home screens for quick access. Touch the Home key to switch to last viewed Home screen from any screen, touch Home key twice to access default Home screen.

1.3.1 Using the touchscreen

Touch
To access an application, touch it with your finger.

Touch and Hold
Touch and hold the Home screen to access the available options for setting the wallpaper.

Drag
Place your finger on any item to drag it to another location.

Slide/Swipe
Slide/swipe your finger up and down and left to right to scroll through screens, applications, web pages, etc.

Flick
Flick your finger across screen to move through screens faster.

Pinch/Spread
Place your index finger and thumb on the screen surface and draw them apart or together to scale an element on the screen.

Rotate
Automatically change the screen orientation from portrait to landscape by turning the phone sideways to have a better view.
1.3.2 Status bar

From status bar, you can view both phone status (to the right side) and notification information (to the left side).

Notifications panel
Touch and drag down the Status bar to open the Notifications panel. Touch and drag up to close it. From the Notifications panel, you can view wireless service information, access reminders/notifications and open apps.

Touch to switch to Settings shortcut panel

Touch to clear all event–based notifications (other ongoing notifications will remain)

Settings shortcut panel
Get quick access to your Google Profile or your phone’s Brightness, Wi-Fi, Mobile network, Data connection, Data Usage, Rotation, Bluetooth or Location settings using the Settings shortcut panel. Use the Settings shortcut panel to enable, disable or adjust these settings options.

Also use the Settings shortcut panel to access all setting options by selecting Settings.

Touch to return to Notifications panel view

Settings shortcut panel
Use the Settings shortcut panel to enable, disable or adjust various setting options.
1.3.3 Search bar

The phone provides a Search function which can be used to locate information within applications, the phone or the web.

- **Search by text**
  - Touch **Search bar** from the Home screen.
  - Enter the text/phrase you want to search for.
  - Touch the **Enter/Search** key on the keyboard to begin search.
  - Use bottom menu bar with filters to view search results from Web, Images, News, Maps, Shopping, Videos, Books, Apps, or Phone.

- **Search by voice**
  - Touch \ from Search bar to display a dialog screen.
  - Speak the word/phrase you want to search for. A list of search results will display for you to select from.
  - Use bottom menu bar with filters to view search results from Web, Images, News, Maps, Shopping, Videos, Books, Apps, or Phone.

1.3.4 Lock/Unlock your screen

To protect your phone and privacy, you can lock the phone screen by choosing slide or creating a variety of patterns, PIN or password.

To create a screen unlock pattern (refer to section “Screen lock” for detail settings)
- From Homescreen touch Application icon \, then touch **Settings\Security\Screen Lock**.
- Draw your own pattern.

To create a screen unlock PIN/Password
- Touch **Settings\Security\Screen Lock\PIN or Password**.
- Set your PIN or password.

To lock phone screen

Press the **Power** key once to lock the screen.
To unlock phone screen
Press the power key once to light up the screen, draw the unlock pattern you have created or enter PIN or password to unlock the screen.

If you have chosen slide as the screen lock, touch and drag the icon downward to unlock the screen.

Unlock phone screen shortcuts
Additional shortcuts are available from unlock screen: Call, Texting and Camera. While screen is locked swipe screen locked icon to any of these options to quickly access feature without needing to unlock screen.

1.3.5 Personalize your Home screen

Adding Apps and Widgets
To add an App touch the Applications icon, touch and hold an application to activate the Move mode, and drag the item to any Home screen.

Touch the Menu key and select Add widgets from menu options or press and hold an empty area on Home Screen to get instant access to Widgets menu. Touch and hold a widget to activate the Move mode and drag the item to any Home screen displayed.

While adding an application to a Home screen, drag it to the top of App info icon to view its detail information. If the application is downloaded, drag it to the top of Uninstall icon to unmount it directly.

Repositioning Apps and Widgets
Touch and hold the item to be repositioned to activate the Move mode, drag the item to the desired position and then release. You can move items both on the Home screens and in the Favorite applications tray. Hold the icon on the left or right edge of the screen to drag the item to another Home screen.

Removing Apps and Widgets
Touch and hold the item to be removed to activate the Move mode, drag the item up to Remove icon, and release after the item turns red.

Creating folders
To improve the organization of items (shortcuts or applications) on the Home screens and the Favorite applications tray, you can add them to a folder by stacking one item on top of another. To rename a folder, open folder, touch the folder’s title bar and input new name.
Wallpaper customization

Touch the Menu key on any Home screen, select Wallpaper from pop-up window to customize phone wallpaper. Gallery includes pictures you have taken, cropped or downloaded. Live wallpapers includes a scrolling list of animated wallpapers. Homescreeen wallpapers includes all preset wallpapers in the phone. Slide left and right to locate a desired mage, touch Set wallpaper to confirm.

1.3.6 Applications menu

Touch on the Home screen to enter the applications menu.

To return to the Home screen, touch the Home key.

Recently-used applications panel

To view recently-used applications touch and hold the Menu key. Touch an app in list to open application. To remove an app from list swiping app to left or right side.

1.3.7 Volume adjustment

Using volume key

Press Volume key to adjust phone volume. To active the vibrate mode, press the Volume down key until the phone vibrates, the vibrate icon will be displayed on screen and status bar. Press the Volume down key once more to active the silent mode, silent mode icon is displayed on screen and on status bar. To get quick access to silent, vibrate or sound mode, hold down power button and select corresponding icon in menu.

Using volume settings menu

To access Volume settings menu, drag down the Notifications panel and touch and then select Settings, Sound and Volumes to set media, ringtone, notifications and alarm volume preferences.

To access Volumes from home screen touch then touch Settings, select Sound and follow same steps described above.
1.4 Applications and widgets menu

The applications and widgets menus contain and provide access to all pre-installed and newly downloaded applications or widgets.

Accessing applications menu

To access the applications menu, touch \( \text{Home} \) from the Home screen.

Applications menu offers two views ALL APPS, to view all applications installed in phone, or DOWNLOADED, to view only applications downloaded from Google Play Store.

To download new applications from applications menu or Home screen touch Google Play Store icon and search for preferred applications by name, subject or category.

Accessing widgets menu

In widgets menu you will view all available widgets that can be added to your home screens.

To access the widgets menu touch the Menu key \( \text{Menu} \) and select Add widgets from menu options.

To add widget to a home screen, touch preferred home screen displayed at the top of widget menu, then touch preferred widget. Selected widget will be placed on selected home screen (if space is not available on preferred home screen a new home screen with available space for widget must be selected).

To return to Home screen from applications or widgets menu touch the Home key \( \text{Home} \) or to return to previous screen from applications or widgets menu touch Back key \( \text{Back} \).
2 Text input ..................................................

2.1 Using Onscreen Keyboard

Onscreen Keyboard settings

Touch  from the Home screen, touch Settings then select Language & input. The following keyboard & input methods will display: Android keyboard, Swype and Google voice typing. To customize any of these keyboards and input methods, touch  for options.

Adjust the Onscreen Keyboard orientation

Turn the phone sideways or upright to adjust the Onscreen Keyboard orientation. You can also adjust Onscreen Keyboard orientation by changing the settings, touch  then select Settings\Display\ Auto-rotate screen.

2.1.1 Swype keyboard

Switching keyboards from new message screen

When in new message screen, drag down the Status bar to open the Notifications panel. In the Notifications panel, touch Select input method, from this input method shortcut menu you can choose between: Android keyboard, Swype or Google voice typing.
2.2 Text messaging

Use the text messaging feature to send and receive text (SMS) and multimedia (MMS) messages.

Touch to view the whole message thread.

Touch to create a new message.

Touch to search in all messages.

Touch to access additional options.

Creating a text message

In message screen, touch the new message icon ☑️ to create a new text/multimedia message.

When in new message screen, touch **Type name or number** line and insert contact name or phone number. You can also touch ☎️ to insert contact from People contact list. Next touch the **Type text message** line and insert text message; to add picture, video, audio, contact or calendar to text message touch attach icon 📈. Once message is complete, touch ➤ to send text message to contact.

**You can edit the text you have entered.**

- Touch and hold or double-tap within the text you would like to edit.
- Drag the tabs to change the high-lighted selection.
- The following options will show on top bar: Select all 📐, Cut 🎨, Copy 📜 and Paste 📜.
- Touch Done icon ✅ when editing is completed, to exit out of edit mode.
3 Phone calls, Call history log and People

3.1 Phone

3.1.1 Placing a call

Easily launch a call using Phone icon. Touch from the Favorite applications tray or from Applications menu to access dialing screen.

Touch to hide dialing screen and get quick access to call history log, favorite contacts and all contacts.

Touch to access Call history log.

Touch to add the phone number input to Contacts

Touch to delete the incorrect digit(s).

Dial Pad.

To input phone number choose from the following options: enter the desired number directly into dial pad, select a contact from People menu option or select contact from Call history log by touching , then touch to place the call.

If you make an error when inputting a phone number, you can delete the incorrect digit(s) by touching .

To hang up a call, touch or the Power key.

International call

To dial an international call, touch and hold to enter “+”, then enter the international country prefix followed by the full phone number and finally touch .

Emergency call

If your phone has network coverage, dial emergency number and touch to make an emergency call. This works even without a SIM card and without typing the PIN code.

3.1.2 Answering or rejecting a call

When you receive a call, touch .

• Slide the green icon rightward to answer;
• Slide the red icon leftward to reject;
• Slide the icon upward to reject a call and send a preset text message.

To mute incoming calls, press the Volume up/down key.
3.1.3 Accessing your voicemail

Voicemails are recorded messages left by incoming callers when calls are missed or forwarded to voicemail.

To access your voicemail, touch and hold D on Phone dial pad.

To set up voicemail touch and hold D to call voicemail. Follow the prompts to set up your voicemail account.

If you receive a voicemail, a voicemail icon 📞 appears on the Status bar. Open the Notifications panel, touch New voicemail to access.

3.1.4 Visual Voicemail

Visual Voicemail allows users to view, listen and save all voicemails in any order directly from the phone, without the need of calling the voicemail system.

- From the Home screen or Applications menu, tap 📩.
- The inbox with all voicemail messages will be displayed. If this is the first time accessing Visual Voicemail, you may be prompted to enter a new PIN code and tap Next to activate Visual Voicemail.
- Tap on voicemail to listen to it.

3.1.5 Resetting your voicemail password

If you forget your voicemail password, you can reset it to the last four digits of your phone number. To start reset enter #793# into dial pad, touch ✆ to dial, remain looking at your screen and a message will display confirming reset of voicemail password to last four digits of your phone number, select OK when displayed and reset is completed.

3.1.6 During a call

To adjust the volume during a call, press the Volume up/down key on right side of phone.

Touch to end the current call.

Touch to display dial pad.

Touch to activate speaker mode during a call. Touch this icon again to deactivate speaker mode.

Touch to mute the current call. Touch this icon again to unmute the call.

Touch to hold the current call. Touch this icon again to retrieve the call.

Touch Menu icon 🛑 to Add call.

To avoid misoperation on touch screen during a call, screen will be locked automatically when you put the phone close to your ear; touch screen will be unlocked when phone is taken away from your ear.
3.1.7 Call settings

When in Phone screen or dial pad screen, touch the Menu key  ➡️, then select Settings to access the following options:

RINGTONE & VIBRATE

Phone ringtone Touch to select incoming call ringtone.
Vibrate when ringing Mark the checkbox to enable vibrate when phone is ringing.

OTHER CALL SETTING

Voicemail
Service Opens a dialog box where you can select your carrier’s voicemail service or another service.
Setup If you are using your carrier’s voicemail service, this opens a dialog box where you can enter your voicemail phone number to manage and listen to voicemails.
Sound Touch to select incoming voicemail ringtone.
Vibrate Mark the checkbox to enable vibrate when received a new voicemail.

Vibrating after connected
Mark the checkbox to enable vibration when the call is connected.

Dial pad touch tones
Mark the checkbox, there is a sound when touch dial pad.

Quick responses
Touch to edit quick responses which will be used when you reject a call with a message.

Fixed Dialing Numbers
Touch to enable FDN (fixed dialing numbers) and to add phone numbers to FDN list.

Dual mic noise reduction
Mark the checkbox to turn on dual mic for noise reduction.

TTY mode
Turn on TTY mode to enable deaf or mute to communicate by typing in phone.

Hearing aids
Mark the checkbox to turn on hearing aid compatibility.

Wi-Fi Calling
Touch to activate or inactivate Wi-Fi calling.

Call forwarding
Touch to forward all calls or configure how your calls are forwarded when you are busy, unanswered or unreachable.

Additional settings

Caller ID Opens a dialog box where you can set whether your phone number is displayed when making calls.
Call waiting Mark the check box to notify you of a new incoming call.

INTERNET CALL SETTINGS

SIP Accounts
Touch to add or setup SIP account.

Use Internet calling
Touch to select when to use Internet calling.

IMS Account
Touch to enable or disable IMS service capability.
3.2 Wi-Fi Calling

Wi-Fi Calling lets you make and receive voice calls and text/multimedia messages over your Wi-Fi network when your phone is connected to a Wi-Fi network and registered with your wireless carrier’s network for Wi-Fi Calling.

When your phone is connected to Wi-Fi network, you will see ☑️ at the top of your screen. Now you are able to use your device for calling and messaging even if you have no cellular coverage.

Touch to make calls over Wi-Fi when connected to Wi-Fi network.

Enter the desired number into dial pad or select a contact from Contacts or Call history by sliding or touching tabs, then touch ☑️ to place the call.

When the handset loses Wi-Fi coverage, any active call will drop and the phone will connect to the cellular network if available.

To make Wi-Fi Calling a default setting on your phone, select this option from Wi-Fi Calling Settings (Touch and hold the Menu key from the Home Screen, then select Settings\More...\Wi-Fi Calling or to access from the Dial screen, touch ☐ then touch Settings\Other settings\Wi-Fi Calling).

For more information you can find tutorial and top questions by Settings\More...\Wi-Fi Calling\Help.

Calls and messages made over Wi-Fi will be charged like cellular calls.

3.3 Call history log

You can access your call history log by touching ☑️ from the Dial screen. Touch ☑️ on the right side of contact/number to place a call directly. There are three kinds of calls in Call history logs:

- ✓ Incoming calls (blue arrows)
- ➱ Outgoing calls (green arrows)
- ✈ Missed calls (red arrows)

Touch a contact or number to view information or further operations.

You can view detailed call information, launch a new call, send messages, or add numbers to People (only available for unsaved phone numbers), etc.

Touch the photo ☑️ to open the Quick Contact panel.

To clear the entire call history log, touch Menu icon ☐ and select clear call history, touch OK to confirm.

To delete individual call history logs, touch call log to open log screen and then hit Menu icon ☐ and touch OK to confirm.

3.4 People

The People app provides you with quick access to all your contacts.

3.4.1 Accessing your contacts

To access your contacts, touch the People ☑️ icon located in your Favorite applications tray or Applications menu.
Touch to view your favorite contacts.

Touch icon to open Quick Contact panel.

Touch to view your contact groups.

Touch to view the contact’s detailed information.

Touch to search in Contacts.

Touch to add a new contact.

Touch Menu icon to display contacts list option menu.

Following actions are enabled:

- **Contacts to display** Choose contacts to display.
- **Import/Export** Import, export or share contacts between phone, SIM card or microSD card.
- **Delete** Select and delete unwanted contacts.
- **Accounts** Manage the synchronization settings for different accounts.
- **Settings**
  - **Sort list by** Touch to display contact information by first or last name.
  - **View contact names as** Touch to view contact names by first or last name.
- **Add another field** Touch to add a new label.

3.4.2 Managing contact groups

Contact groups help you organize your contacts. You can add, remove and view groups in the **Contact group** screen.

Touch the icon to view local groups. To create a new group, touch the icon, enter the new name and touch **Done** to confirm.

3.4.3 Adding a contact

Touch the icon in the contact list to create a new contact.

You are asked to enter contact’s name and other contact information. By scrolling up and down the screen, you can move from one field to another.

If you want to add more information, touch **Add another field** to add a new category.

When finished, touch **Done** to save.

To exit without saving, you can touch Menu icon and then touch **Discard**.
Add to/remove from Favorites
To add a contact to favorites, touch a contact to view details then touch ★ to add the contact to favorites.

To remove a contact from favorites, touch ★ in contact details screen.

3.4.4 Editing your contacts
To edit contact information, touch the Menu icon in the contact details screen, then touch Edit. When finished, touch Done.

Delete a contact
To delete a contact, touch Menu icon and Delete from contacts list screen. Pick the contact you want to remove and touch Done to confirm. Touch Select all to delete all contacts, touch again the checkbox or touch Back key to cancel the selected one.

The contact you have deleted will also be removed from other applications on the phone or web the next time you synchronize your phone.

3.4.5 Communicating with your contacts
From the contacts list, you can communicate with your contacts by making a call or exchanging messages.
To launch a call to a contact, touch the contact to enter the detail screen, then touch the number.
To send a message to a contact, touch the contact to enter the detail screen, then touch the icon on the right side of the number.

Use Quick contact for Android
Touch a contact's picture to open Quick Contact for Android, then you can touch the number or the icon for the way you want to connect.

The icons available on Quick Contact panel depend on the information you have for the contact and the applications and accounts on your phone.
3.4.6 Contacts importing, exporting and sharing

This phone enables you to import contacts from SIM/storage and export contacts to storage which can then be used to back up your information.

From Contacts screen, touch Menu icon \( \mathcal{B} \) to open options menu, touch Import/Export, then select Import from storage, Export to storage or Share visible contacts.

To import/export a single contact from/to storage or account, choose a target storage device, select the contact you want to import/export, touch Done to confirm.

To import/export all contacts from/to storage or, choose a target storage device, touch Select all and Done to confirm.

You can share a single contact or contacts with others by sending the contact’s vCard to them via Bluetooth, Gmail, etc.

Touch a contact you want to share, touch Menu icon \( \mathcal{B} \) and Share from contact details screen, then select the application to perform this action.

3.4.7 Displaying contacts

You can configure which group of contacts, for each account, you want to display in the Contacts list. Touch Menu icon \( \mathcal{B} \) and touch Contacts to display from contacts list screen, then you can choose contacts to display.

Touch Menu icon \( \mathcal{B} \) and Settings, you can sort list by first or last name, as well as view contact names by first or last name.

3.4.8 Joining/Separating contacts

To avoid duplication, you can add any new contact information to existing contacts in a single action.

Touch the contact which you want to add information to, touch Menu icon \( \mathcal{B} \) and touch Edit, then touch Menu icon \( \mathcal{B} \) again and touch Join.

At this time, you are required to select the contact whose information you want to join with the first contact. The information from the second contact is added to the first one, and the second contact will no longer be displayed in the Contacts list.

To separate contact information, touch the contact whose information you want to separate, touch Menu icon \( \mathcal{B} \) and touch Edit, then touch Menu icon \( \mathcal{B} \) again and touch Separate, touch OK to confirm.

3.4.9 Accounts

Contacts, data or other information can be synchronized from multiple accounts, depending on the applications installed on your phone.

To add an account, touch Application icon \( \mathcal{B} \) from Homescreen and touch \( \mathcal{B} \) to enter Settings, then touch Add account; or from Contacts screen, touch \( \mathcal{B} \) and select Add new account.

You are required to select the kind of account you are adding, like Google, Corporate, etc.

As with other account set-ups, you need to enter detailed information, like username, password, etc.

You can remove an account and all associated information from the phone. Open the Settings screen, touch the account you want to delete, touch the Menu icon \( \mathcal{B} \) and Remove account, then confirm.

Sync manually
You can also synchronize an account manually on Account screen, touch an account in the list, then touch Menu icon \( \mathcal{B} \) and Sync now.
4 Messaging, Email

4.1 Messaging

You can create, edit and receive SMS and MMS messages with this phone.

To access this feature, touch Application icon from the Home screen, then select Messaging.

All messages you receive or send out can be saved in phone memory or SIM card. To view messages stored in SIM card, touch Menu icon from Messaging screen, then touch Settings | Manage SIM card messages.

4.1.1 Write message

In message screen, touch the new message icon to write text/multimedia messages.

To communicate with a saved contact, touch contact photo to open Quick Contact panel. For unsaved contacts, touch default photo to add the number to your Contacts.

Sending a text message

Enter the mobile phone number of the recipient in the To bar or touch to add recipients, touch Type message bar to enter text message. When finished, touch to send the text message.

An SMS message of more than 160 characters will be charged as several SMS. When the total number of characters you have entered is approaching the 160-character limit, a counter will appear on the lower right corner below Send option of the text box to remind you how many characters are allowed to be entered in one message.

Specific letters (accent) will increase the size of the SMS, which may cause multiple SMS to be sent to your recipient.

Sending a multimedia message

MMS enables you to send video clips, images, photos, animations, slides and sounds to other compatible mobiles and e-mail addresses.

An SMS will be converted to MMS automatically when media files (image, video, audio, slides, etc.) are attached or subject or email addresses are added.

To send a multimedia message, enter the recipient’s phone number in the To bar, touch Type message bar to enter the text of the message. Touch Menu icon to open the option menu, touch Add subject to insert a subject, and touch to attach picture, video, audio or file.

When finished, touch to send the multimedia message.
Attach options:

- **Pictures**  Provides access to Gallery application or File manager to select a picture as attachment.
- **Capture picture**  Provides access to Camera to capture a new picture to attach.
- **Videos**  Provides access to Gallery application or File manager to select a video as attachment.
- **Capture video**  Provides access to Video Camera to record a new video to attach.
- **Audio**  Provides access to Ringtones or Audio to select a ringtone, music track or audio file as attachment.
- **Record audio**  Launches voice message recorder to record a voice message to attach.
- **Slideshow**  Launches Slide show edit screen, touch **Add slide** to create a new slide, and touch currently existing slide to edit it (see following picture). Touch Menu icon to get more actions, like setting the slide duration, add music, etc.
- **Contact**  Provides access to People application to select one or more contact(s) to attach.
- **Calendar**  Provides access to Calendar to select events to attach.

Slide show edit screen

- Touch to go to previous or next slide.
- Touch to review the current slide.
- Touch to edit the title of this slide.

4.1.2 Manage messages

When receiving a message, an icon will appear on status bar as notification. Drag down the status bar to open the Notifications panel, touch the new message to open and view. You can also access messages using Messaging application, touch message to open for viewing.

Messages are displayed in conversational order.

To reply to a message touch the current message to enter message-composing screen, enter the text, then touch to send.

Touch and hold an SMS message in message details screen, the following message options are available:

- **Copy text**  This option displays when the message is an SMS message. Use this option to copy current message text and paste in new message.
- **Forward**  Touch to forward the message to another recipient.
- **Lock/Unlock**  Touch to lock/unlock the message so it can’t/can be deleted if you reach maximum number of stored messages.
- **Copy message to SIM card**  This option displays when the message is an SMS. Touch to save the message to SIM card.
- **View details**  Touch to view message details.
- **Delete**  Deletes current message.
4.1.3 Adjust message settings

Adjust message settings from Messaging application screen, touch Menu icon and touch Settings.

**SMS Enabled**
- Touch to setup your default SMS app.

**Alphabet management**
- Touch to select *Super compact*, precise mode or auto format.

**Storage**
- **Message Font size** Touch to set message font size.
- **Delete old messages** Select to delete old messages when the maximum number of stored messages is reached.
- **Text message limit** Touch to set the number of text messages to be saved per conversation.
- **Multimedia message limit** Touch to set the number of multimedia messages to be saved per conversation.

**Text (SMS) Messages**
- **Delivery reports** Select to request a delivery report for each text message you send.
- **Message template** Touch to compose new message template or edit preset message template.
- **Manage SIM card messages** Touch to manage the messages stored in SIM card.
- **SMS storage location** Touch to select phone or SIM card to store messages.
- **Long SMS to MMS** Mark the checkbox to active long SMS will send as MMS.
- **SMS service center** Touch to view or edit SMS service center number.
- **SMS signature**
  - **SMS signature** Mark the checkbox to enable add signature in SMS.
  - **Edit SMS signature** When SMS signature active, touch it to edit SMS signature text.
Multimedia (MMS) Messages
• Delivery reports
  Select to request a delivery report for each multimedia message you send.
• Read reports
  Select to request a report on whether each recipient has read a multimedia message sent by you.
• Auto-retrieve
  Select to download the full MMS message (including message body and attachment) automatically to your phone. Otherwise, download only the MMS message header.
• Roaming auto-retrieve
  Select to download the full MMS message (including message body and attachment) automatically when roaming. Otherwise, download only the MMS message header to avoid extra charges.
• Creation mode
  Select creation mode as restricted, warning or free.
• Maximum message size
  Select to edit the message size, but it should not be more than 1024KB.

Notifications
• Notifications
  Select to display message notifications in status bar.
• Sound
  Touch to select a ringtone as a new message notification tone.
• Vibrate
  When a message comes, select as always vibrate, only vibrate when silent or never vibrate.

Cell broadcast setting
• Normall Cell broadcast
  Mark the checkbox to enable receipt of cell broadcast messages.
• Select CB ringtone
  Touch to select a ringtone for cell broadcast messages.
• Cell broadcast settings
  Touch to select cell broadcast channel, language, and check channel list.

4.2 Gmail/Email
The first time you set up your phone, you can select to use an existing Gmail or to create a new Email account.

4.2.1 Gmail
As Google's web-based email service, Gmail is configured when you first set up your phone. Gmail on your phone can be automatically synchronized with your Gmail account on the web. Unlike other kinds of email account, each message and its replies in Gmail are grouped in your inbox as a single conversation; all emails are organized by labels instead of folders.

To access Gmail
From the Home screen, touch the Application icon to enter the applications list, then touch Gmail.

To create and send emails
• Touch the icon from Inbox screen.
• Enter recipient(s)'s email address in To field, and if necessary, touch Menu icon and touch Add Cc/Bcc to add a copy or a blind copy to the message.
• Enter the subject and the content of the message.
• Touch Menu icon and select Attach file to add an attachment.
• Finally, touch the icon to send.
  • If you do not want to send the mail out right away, you can touch Menu icon and touch Save draft or touch Back key to save a copy. To view the draft, touch the icon, then select Drafts.

If you do not want to send or save the mail, you can touch Menu icon and then touch Discard.

To add a signature to emails, touch Menu icon and Settings from mail creating screen, choose an account, then touch Signature.
To receive and read your emails

When a new email arrives, you will be notified by a ringtone or vibration, and an icon will appear on Status bar.

Touch and drag down the Status bar to display the Notifications panel, touch the new email to view. Or you can also access the Gmail Inbox label and touch the new mail to view.

You can search for an email by sender, subject, label, etc.
- Touch the icon from Inbox screen.
- Enter the keyword you want to search for in the searching box and touch the key in the software keyboard.

To reply or forward emails

When viewing an email, you will see further options at the center of the conversation.

• Touch to add the mail to Starred label.
• Touch to enter text-inputting mode, enter the message you want to reply, then touch icon to send this message to one single recipient.
• Reply all Touch beside Reply icon and then touch Reply all to enter text-inputting mode, enter the message you want to reply, then touch icon to send this message to one single recipient or all people in a mail loop.
• Forward Touch beside Reply icon and then touch Forward to forward the message to another person. You are required to enter the new recipient’s email address and then touch .
• Print Touch beside Reply icon and then touch Print to save and print the mail.

Managing Gmals by Labels

To conveniently manage conversations and messages, you can organize them using a Label.

To label a conversation when reading a conversation’s messages, touch the icon and select Change labels to assign to the conversation.

To view conversations by labels when viewing your inbox or another conversation list, touch the icon , then touch a label to move the mail to another label.

Mark the checkbox to select email to activate batch mode, and produce the following options:

• Touch to archive the email message.
• Touch to delete the email message.
• Touch to mark an email message as read or unread.
• Move to Touch to move the mail to system or labels.
• Mark important To Mark the email as important or not important.
• Mute To mute the entire conversation. When muted, new mails related to this conversation will not be displayed in Inbox, but archived.
• Report spam To report the email message/conversation as spam.
• Report phishing To report the email message/conversation as phishing.
To manage Gmail settings, touch Menu icon and Settings in Inbox screen.

General settings

- Archive & delete actions
  Mark the checkbox to choose if show archive & delete actions.
- Swipe to archive
  Mark the checkbox, swipe the conversation to left in conversation list screen will archive it.
- Sender image
  Mark the checkbox, sender's image will show beside name in conversation list.
- Reply all
  Touch to mark the checkbox to make the default responding to messages.
- Auto-fit messages
  Mark the checkbox to shrink messages to fit the screen and allow zooming.
- Auto-advance
  Touch to select which screen to show after you delete or archive a conversation.
- Message actions
  Touch to show/hide message actions at the top of the screen.
- Confirm before deleting
  Mark the checkbox to confirm before deleting emails.
- Confirm before archiving
  Mark the checkbox to confirm before archiving emails.
- Confirm before sending
  Mark the checkbox to confirm before sending emails.

Touch an account, the following settings will show:

- Inbox type
  To set this inbox as the default one or priority one.
- Inbox categories
  To set these inbox categories, new mails will store in different categories auto.
- Notifications
  Select to activate notification when a new email arrives.
- Inbox sound & vibrate
  Touch to set Ringtone, Vibrate and Notify once.
- Signature
  To add a signature text to the end of each mail you send.
- Vacation responder
  Touch to add and edit auto responder when on vacation.
- Gmail sync
  Touch to turn on/off Gmail sync.
- Days of mail to sync
  Touch to set the duration of days for mail sync.
- Manage labels
  Touch to open the Label screen, where you can manage synchronization and notifications.
- Download attachments
  Mark the checkbox to auto download attachments to recent messages via Wi-Fi.
- Images
  Touch to set always show image or ask before showing.

4.2.2 Email

In addition to your Gmail account, you can also set-up external POP3, IMAP or Exchange email accounts in your phone.

To access this function, touch Application icon from the Home screen, then select Email.
An email wizard will guide you through the steps to set-up an email account.
  - Enter the email address and password of the account you want to set-up and touch Next.
If the account you entered is not provided by your service provider, you will be prompted to go to the email account settings screen to enter settings manually. Or you can touch Manual setup to directly enter the incoming and outgoing settings for the email account you are setting up.

Enter the account name and display name in outgoing emails.

To add another email account, you can touch Menu icon \[ \text{Menu icon} \] and Settings. Touch Add account on the right of the title to create.

To create and send emails

- Touch the icon \[ \text{from} \] Inbox screen.
- Enter recipient(s) email address(es) in To field.
- If necessary, touch Menu icon \[ \text{and} \] touch Add Cc/Bcc to add a copy or a blind copy to the message.
- Enter the subject and the content of the message.
- Touch Menu icon \[ \text{and} \] touch Attach file to add an attachment.
- Finally, touch \[ \text{to send}. \]
- If you do not want to send the mail right away, you can touch Menu icon \[ \text{and} \] Save draft or touch Back key to save a copy.

4.3 Hangouts

Google’s instant messaging service, Google Hangouts, lets you communicate with your friends whenever they are connected to this service.

To access this feature and sign in, touch Application icon \[ \text{from the Home screen, then touch} \] Hangouts. All friends added by using Google Hangouts from the web or phone will be displayed in your friends list.

4.3.1 Chatting with your friends

To start a chat, touch the name of a friend in your Friends list, then enter your message and finally touch . You can invite other friends to join in a group chat by touching Menu key and New group Hangout and then selecting the friend you want to add. To start a chat, touch the name of a friend in your Friends list, then enter your message and finally touch .

4.3.2 To add a new friend

From the Friends list, touch the icon to add a new friend. Enter the name, email, number or Circle of the friend you want to add, and if the friend is not yet on Hangouts, the system will require to send invite by telling the friend via SMS or Gmail. A notification with this invitation will be showed in your friend's messaging or Gmail.

If your friends invite you to do video talk or they send you message in the first time, you could select Decline or Reply in response by touching Menu key and Hangout requests.

4.3.3 To start and close a chat

Touch one friend from friends list, you could send messages to your friends or have a video call; After you join Google+, you could send pictures to everyone in the Google hangouts.

When you want to end a chat, touch Back key from Chatting screen directly.

If you want to sign out, touch Menu key and Settings\Sign out.
4.3.4 To manage your friends
Besides adding new friends to your friends list, the following actions are available for your choice:

- To view all friends: By default, all your friends are displayed in Friends list. Touch your friend could start the conversation directly. Touch and hold the friend to activate archive and delete.

Enter a number and the arithmetic operation to be performed, enter the second number, then touch “=” to display the result. Touch to delete digits one by one, touch and hold to delete all at one time.

When some numbers or operations have been entered, touch and hold the entering bar to open a menu offering these further operations:

- **Cut**  To cut selected text
- **Copy**  To copy selected text
- **Paste**  To paste what you have previously copied to the entering bar

(1) Option will not appear unless copy or cut operation has been made.
Getting connected........................................

To connect to the internet with this phone, you can use EDGE/HSPA/3G/4G networks or Wi-Fi, whichever is most convenient.

6.1 Connecting to the Internet

6.1.1 EDGE/HSPA/3G/4G

The first time you turn on your phone with SIM card inserted, it will automatically configure network service: EDGE, HSPA, 3G or 4G. If the network is not connected, you can touch on Notifications panel.

To check the network connection you are using, touch the Application icon from Homescreen and touch to access Settings, then touch More...|Mobile networks|Access Point Names or Network operators.

To create a new access point

A new EDGE/HSPA/3G/4G network connection can be added to your phone with the following steps:

• Touch the Application icon from Homescreen and touch to access Settings.
• Touch More...|Mobile networks|Access Point Names
• Then touch icon .
• Enter the required APN information.
• When finished, touch Menu icon and touch Save.

To activate/deactivate Data roaming

When roaming, you can decide to connect/disconnect to a data service.

• Touch the Application icon from Homescreen and touch to access Settings.
• Mobile networks|Data roaming.
• Mark/Unmark the Data roaming checkbox to activate or deactivate data roaming.
• When Data roaming is deactivated, you can still perform data exchange with a Wi-Fi connection (refer to “6.1.2 Wi-Fi”).

6.1.2 Wi-Fi

Using Wi-Fi, you can connect to the Internet when your phone is within range of a wireless network. Wi-Fi can be used on your phone even without a SIM card inserted.

To turn Wi-Fi on and connect to a wireless network

• Touch the Application icon from Homescreen and touch to access Settings.
• Touch the switch beside Wi-Fi to turn on/off Wi-Fi.
• Touch Wi-Fi, the detailed information of detected Wi-Fi networks is displayed.
• Touch a Wi-Fi network to connect. If the network you selected is secured, you are required to enter a password or other credentials (you may contact your network operator for details). When finished, touch Connect.

To activate notification when a new network is detected

When Wi-Fi is on and the network notification is activated, the Wi-Fi icon will appear on the status bar whenever the phone detects an available wireless network within range. The following steps activate the notification function when Wi-Fi is on:

• Touch the Application icon from Homescreen and touch to access Settings.
• Touch Wi-Fi. Then touch Menu icon and Advanced from Wi-Fi screen.
• Mark/Unmark the Network notification checkbox to activate/deactivate this function.
To add a Wi-Fi network

When Wi-Fi is on, you may add new Wi-Fi networks according to your preference.

- Touch the Application icon  from Homescreen and touch + to access Settings.
- Touch Wi-Fi, and then touch + to add network.
- Enter the name of the network and any required network information.
- Touch Save.

When successfully connected, your phone will be connected automatically the next time you are within range of this network.

To forget a Wi-Fi network

The following steps prevent automatic connections to networks which you no longer wish to use.

- Turn on Wi-Fi, if it’s not already on.
- In the Wi-Fi screen, touch & hold the name of the saved network.
- Touch Forget network in the dialog that opens.

6.2 Chrome...........................................................................................

Using Chrome, you can enjoy surfing the Web.

To access this function, touch Application icon  from the Home screen, then touch Chrome.

6.3 Connecting to Bluetooth® devices (1)

Bluetooth is a short-range wireless communication technology that you can use to exchange data, or connect to other Bluetooth devices for various uses.

To access this function, touch the Application icon  from Homescreen and touch to access Settings\Bluetooth.

To turn on Bluetooth

- Touch the Application icon  from Homescreen and touch to access Settings.
- Scroll to Bluetooth and move switch beside Bluetooth to right position to activate.

To make your phone more recognizable, you can change your phone name which is visible to others.

- Touch the Application icon  from Homescreen and touch to access Settings.
- Touch Bluetooth.
- Touch Menu icon and Rename phone.
- Enter a name, and touch Rename to confirm.

To make device visible

- Touch the Application icon  from Homescreen and touch to access Settings.
- Touch Bluetooth.
- Touch your device to make it visible or invisible.
- Touch Menu icon and Visibility timeout to select the visible time.

(1) You are recommended to use ALCATEL ONETOUCH Bluetooth® headsets, which have been tested and proved compatible with phone. You can go to www.alcatelonetouch.com for more information about ALCATEL ONETOUCH Bluetooth® headset.
To pair/connect your phone with a Bluetooth device
To exchange data with another device, you need to turn Bluetooth on and pair your phone with the Bluetooth device with which you want to exchange data.

- Touch the Application icon 📱 from Homescreen and touch 📱 to access Settings.
- Touch Bluetooth
- Touch SEARCH FOR DEVICES
- Touch a Bluetooth device you want to be paired with in the list.
- If the pairing is successful, your phone connects to the device.

To disconnect/unpair from a Bluetooth device
- Touch the Settings icon 📲 beside the device you want to unpair.
- Touch Unpair to confirm.

6.4 Connecting to a computer
With the USB cable, you can transfer media files and other files between your microSD card/phone’s internal storage and the computer.
Before using MTP or PTP you should firstly mark USB debugging.
- To access this function, touch Settings\About phone, then touch Build number 7 times. Now you may touch Settings\Developer options\USB debugging.

To connect your phone to the computer:
- Use the USB cable that came with your phone to connect the phone to a USB port on your computer. You will receive a notification that the USB is connected.
- If you use MTP or PTP, your phone will be automatically connected.

Before using MTP, make sure that the driver (Windows Media Player 11 or above version) has been installed.

To format a microSD card
- Touch the Application icon 📱 from Homescreen and touch 📱 to access Settings.
- Touch Storage.
- Touch Erase SD card. On the screen a popup warns you that formatting the microSD card will erase its contents, touch Erase SD card.

6.5 Sharing your phone's mobile data connection
You can share your phone’s mobile data connection with a single computer via a USB cable(USB tethering) or with up to eight devices at once by turning your phone into a portable Wi-Fi hotspot.

The functions below may incur additional network charges from your network operator. Extra fees may also be charged in roaming areas.

To share your phone’s data connection via USB
Use the USB cable that along with your phone to connect the phone to a USB port on your computer.
- Touch the Application icon 📱 from Homescreen and touch 📱 to access Settings.
- Touch More...\Tethering & Mobile Hotspot.
- Mark/unmark the checkbox of USB tethering to activate/deactivate this function.

To share your phone’s data connection as a portable Wi-Fi hotspot
- Touch the Application icon 📱 from Homescreen and touch 📱 to access Settings.
- Touch More...\Tethering & Mobile Hotspot.
- Mark/unmark the checkbox of Mobile Hotspot to activate/deactivate this function.
To rename or secure your portable hotspot

When Portable Wi-Fi hotspot is activated, you could change the name of your phone’s Wi-Fi network (SSID) and secure its Wi-Fi network.

• Tethering & Mobile Hotspot and touch to access Settings.
• Touch More...Tethering & Mobile Hotspot.
• Touch Wi-Fi Hotspot Settings to change the network SSID or set your network security.
• Touch Save.

6.6 Connecting to virtual private networks

Virtual private networks (VPNs) allow you to connect to the resources inside a secured local network from outside network. VPNs are commonly deployed by corporations, schools, and other institutions so that their users can access local network resources when not inside that network, or when connected to a wireless network.

To add a VPN

• Touch the Application icon from Homescreen and touch to access Settings.
• Touch More...VPN, then touch .
• In the screen that opens, follow the instructions from your network administrator to configure each component of the VPN settings.
• Touch Save.

The VPN is added to the list on the VPN settings screen.

Before adding a VPN, you should set a lock screen pattern, PIN code or password for your phone.

To connect/disconnect to a VPN

To connect to a VPN:

• Touch the Application icon from Homescreen and touch to access Settings.
• Touch More...VPN.
• VPNs you have added are listed; touch the VPN you want to connect with.
• In the dialog that opens, enter any requested credentials and touch Connect.

To disconnect:
• Open the Notifications panel and touch the resulting notification for the VPN disconnection.

To edit/delete a VPN

To edit a VPN:

• Touch the Application icon from Homescreen and touch to access Settings.
• Touch More...VPN.
• VPNs you have added are listed; touch & hold the VPN you want to edit.
• Touch Edit profile.
• After finished, touch Save.

To delete:
• Touch and hold the VPN you want to delete, in the dialog that opens, touch Delete profile.
Google Play Store (1) ............................

Google Play Shop is an online software store, where you can download and install applications and games to your Android Powered Phone.

To open Google Play Shop:
• Touch Application icon from the Home screen, then touch Play Store.
• For the first time you access Google Play Shop, a screen with terms of service pops up for your attention, touch Accept to continue.

Touch Menu icon  then touch Help to enter Google Play Shop help page for more information on this function.

7.1 Locate the item you want to download and install

Google Play Shop home page provides several ways to find applications. It showcases applications and games in categorized listings.

Touch on top right screen and My apps to see all your downloads.

Touch a category on Google Play Shop screen to browse its contents. You can also select a subcategory if there is any. Within each category you can select to view items sorted by Top free, Top new free, etc.

Touch the Google Play Shop icon on the top left of the screen or touch Back key to return to the previous screen.

7.2 Download and install

To download & install:
• Navigate to the item you want to download, and select to enter the details screen from which you can read its description, overall rating or comments, view developer’s information, etc.
• Touch INSTALL to preview the functions and data the application can access on your phone if you install it.
• Touch ACCEPT.
• The progress of the download will show on the details screen, touch to stop downloading the item. You can also access this screen through Notification panel.
• After download and installation have finished, you will see a notification icon on the status bar.

Be especially cautious with applications that have access to many functions or to a significant amount of your data. Once you accept, you are responsible for the results of using this item on your phone.
To open the application you have downloaded:
• On Google Play Shop screen, touch Menu icon " and My apps.
• Touch the installed application in the list, then touch OPEN.

To buy an application(1)
On Google Play Shop, some applications are labeled as free, while some of them are to be paid for before downloading and installing:
• Touch the application you want to buy.
• Touch the price on the up-right of the screen to preview the functions and data the application can access on your phone if you install it.
• Touch Continue to confirm.
• When making your first purchase, you are required to input your credit card information and to log in to Google payment and billing service.
• If your account has multiple credit card accounts, select one to proceed.
• Select the Terms of service link and read the document. When finished, touch Back key.
• Mark the checkbox if you agree with the terms of service.
• Touch Buy now at the bottom of the screen.

When finished, Android downloads the application.

To request a refund
If you are not satisfied with the application, you can ask for a refund within 15 minutes of the purchase. Your credit card will not be charged and the application will be removed. If you change your mind, you can install the application again, but you will not be able to request a refund.
• Touch icon " and My apps from Google Play Shop screen.
• Touch the application that you want to uninstall and refund.
• Touch Refund to uninstall the application and refund. If the button becomes Uninstall, your trial period has expired.
• In the survey form, select the answer that best matches your reason, and touch OK.

(1) Google Paid applications may not be available to users in some countries.

7.3 Manage your downloads
After you downloaded and installed an application, the following further operations are available for your selection.

View
On Google Play Shop screen, touch icon " and My apps.

Uninstall
On Google Play Shop screen, touch icon " and My apps. Touch the application you want to uninstall to enter the details screen, touch UNINSTALL, and finally touch OK to confirm.

Refund
On Google Play Shop screen, touch icon " and My apps. Touch the application you want to uninstall for a refund, touch Refund, and finally touch OK to confirm.

Update notification
On Google Play Shop screen, touch icon " and SETTINGS!Notifications to enable update notification.

Auto update
To auto update all installed applications, touch icon " and My apps from Google Play Shop screen. Touch Settings!Auto-update apps to enable this function.

Rate and review
Open the details screen for an application, touch the stars ★★★★★ under Rate this app to award and input comments, touch OK to confirm.

Flag
You can report an inappropriate application to Google Play Shop by flagging it. Open the details screen for the application, scroll to the bottom and touch Flag as inappropriate, enter the reason and finally touch Submit.
8 Multimedia applications

8.1 Camera

Your phone is fitted with a Camera for taking photos and shooting videos.

Before using the Camera, please ensure that a microSD card, where all pictures and videos are stored, is correctly installed.

To access this function, touch Application icon from the Home screen and then touch Camera.

To take a picture
The screen acts as the viewfinder. First position the object or landscape in the viewfinder, touch the screen to focus if necessary, touch icon to take picture, picture will save automatically.

To shoot a video
Switch Camera mode to Video mode. First position the object or landscape in the viewfinder, and touch icon to start recording. Touch icon to stop recording. The video will be automatically saved.

Further operations when viewing a picture/video you have taken
• Slide the capture screen to left to access Gallery.
• Touch the Back key to return to Camera or Camcorder.
8.1.1 Settings in framing mode

Before taking a photo/shooting a video, touch the icon to adjust a number of settings in framing mode.

Camera settings

- HDR Touch to turn on HDR (High-Dynamic Range) function. HDR photos can better reflect the visual effects people have in the real environment by synthesizing images under different exposure time. The phone will then automatically save the original photos and HDR ones.

- Panorama Touch to turn on panorama function. Press the Shutter button or the Volume key to start taking panoramic photo and move the phone towards your capture direction and overlap the two lines. Once the nine slots below the screen are filled, the phone will automatically save the photo.

- Burst shot Touch to turn on burst shot. Press and hold the Shutter button or the Volume key to start taking maximum 10 pieces of photos.

- Wide screen Touch to enable wide screen when as a viewfinder.

- Tap shooting Touch to enable tap the screen to take a photo.

- Shutter sound Touch to turn on/off shutter sound.

- Picture size Touch to setup picture size as Large, Medium or Small.

- Self timer Touch to turn on/off Photographing self timer and set count down time.

Touch the icon to set Store location, Shutter sound, Picture size, ISO, etc.

Camcorder settings:

- Video quality Touch to setup video quality as Fine, High or Medium.

8.2 Gallery

Gallery acts as a media player for you to view photos and playback videos. In addition, a set of further operations to pictures and videos are available for your choice.

To access this function, touch Application icon from the Home screen, then touch Gallery.

Touch to open camera.

Touch to change and combine pictures(max 9) with different mode.

Touch the album to spread it apart.

Slide left or right to view more albums.
To view a picture/play a video
Pictures and videos are displayed by albums in Gallery.
 contacted

Touch to return to gallery’s main screen
Slide left or right to view more pictures.

- Touch an album and all pictures or videos will spread the screen.
- Touch the picture/video directly to view or play it.
- Slide left/right to view previous or next pictures/videos.

Working with pictures
You can work with pictures by rotating or cropping them, sharing them with friends, setting them as contact photo or wallpaper, etc.

Locate the picture you want to work on, touch the picture from full-screen picture view. Slide the picture bar below left and right to select one, touch icon to share the picture, touch icon and OK to delete the picture.

Touch icon and choose Edit to edit a picture.

1 Touch to exit edit mode.
2 Touch to save the picture when the edit is done.
3 Touch to share the picture.
4 Touch to crop, rotate or sharpen the picture.
5 Touch to see more beauty options: Dermabrasion, Whitening, Complexion.
6 Touch to adjust the color: Saturation, Brightness, Contrast and Smart fill light.
7 Touch to see more picture effects: LOMO, Portrait, Fashion and Art.
8 Touch to choose a frame for the picture.
9 Touch to add a mosaics on picture.
10 Touch to input word on picture. You can choose the word style and set the words as a conversation.
11 Touch to set Bokeh. You can choose circle bokeh or line bokeh.

Batch operation
Gallery provides a multi-select function, so that you can work with pictures/videos in batches.

Open the main Gallery window or an album, touch menu icon and Select album or Select item to activate batch operation mode (you can also touch and hold one album/picture), then touch albums/pictures you want to work on. Touch icon to perform further actions, like delete and rotate. Touch to share selected ones.
8.3 YouTube

YouTube is an online video-sharing service where the user can download, share and view videos. It supports a streaming function that allows you to start watching videos almost as soon as they begin downloading from the Internet.

To access this function, touch Application icon \( \text{YouTube} \) from the Home screen, then touch YouTube.

As an online video service, your phone must have a network connection to access YouTube.

All videos in YouTube are grouped into several categories, like , etc.

Touch to search for a video.

Touch to play the video and to show more information

By touching Menu icon \( \text{YouTube} \) from YouTube screen, you can set General settings and Search settings for YouTube. For details about these features, please visit the YouTube website: www.YouTube.com

8.3.1 Watch videos

Touch a video to play it. In the Playing screen, you can view information and video comments, and also browse links to related videos. You can also rate, share, label as favorite, create a new playlist, etc from this screen.

To exit video playing screen, touch Back key to return to the video list.

8.4 Music

Using this menu, you can play music files stored on the microSD card in your phone. Music files can be downloaded from computer to microSD card using a USB cable.

To access this function, touch Application icon \( \text{Music} \) from the Home screen, then touch Music.

You will find four categories in which all songs are classified: Artists, Albums, Songs and Playlists. Touch the icons to view the category. Touch Menu key \( \text{Music} \) and Shuffle all to shuffle all songs.

8.4.1 Playing music

Touch a song or touch Play from drop-down menu to play the song.

\( \text{1} \) Touch to play the current playlist in shuffle mode (tracks are played in random order).
\( \text{2} \) Touch to select repeat mode: Repeating all songs, Repeating current song, or Repeat is off.
\( \text{3} \) Touch to skip to the previous track in the album, playlist, or shuffle.
\( \text{4} \) Touch to skip to the next track in the album, playlist, or shuffle.
\( \text{5} \) Touch to pause/resume playback.
\( \text{6} \) Touch to show the displaying song.
While playing songs with Play Music, the operation of pause, play or skip is still available even if the screen is locked.

Adjust sound effects
Touch Menu icon and Sound effects from Now playing screen to enable and adjust sound effects.

Working with playlists
Playlists allow you to conveniently organize all songs stored in the SD card.
You can create a new playlist, add a song to the list, and delete or rename a playlist.

To create a playlist
Touch Recently added from Playlists screen, touch and then Save as playlist, enter the name and finally touch Save.

To delete a playlist
Touch and hold a playlist to show the menu, then touch Delete.

To rename a playlist
Touch and hold a playlist to show the menu, then touch Rename. When finished, touch Save to confirm.

8.5 Video Player

To access this function, touch Application icon from the Home screen, then touch Video Player.

Video Player is a small built-in video player that lists all your videos.
Touch an item from the list to play. While playing, use Pause, Forward and Back functional icons as required, touch a point on the timeline to jump to and play from.

9 Google Maps

9.1 Get My Location

9.1.1 Choose a data source to decide My Location
Touch the Application icon from Homescreen and touch to access Settings, touch Location.
Touch the switch beside Location to turn on Location.

9.1.2 Open Google Maps and view My Location
Touch Application icon from the Home screen, then touch Maps.
Touch icon on the map to view My Location.
The map will then center on a blue dot with a blue circle around. Your actual position is within the blue circle.
To move the map, drag the map with your finger.

To zoom in and out of a map, pinch or spread your fingers, or you can also zoom in by double-tapping a location on screen.

To clear the map history, touch Menu icon  and then touch Settings|Maps history, touch .

9.2 Search for a location

While viewing a map, touch the search icon  to activate search function.

In the search box, enter an address, a city or a local business.

Touch the icon  to search, and in a while your search results will appear on the map as red dots. You can touch one to show a label.

9.3 Star a location

Just like bookmarking a web address on the Internet, you can star any position on the map for later use.

9.3.1 How to star (or unstar) a location

Touch & hold a location on a map

Touch the address rectangle that opens

Touch to show more information

Touch the gray star at the top of the screen to star the location. (Or touch a gold star to unstar that location.)

9.3.2 View a list of starred items

Touch  at the upper-right corner, and touch Saved places.

The list of your starred items and their addresses opens.

Touch a location in the list to view it.

9.4 Get driving, public transportation or walking directions

9.4.1 Get suggested routes for your trip

Touch icon  from Maps screen.
• Touch enter bar or the triangle to edit your start point by one of the following methods: entering an address, using My Location, selecting a start point on a map, selecting a starred item, selecting an address from your contacts or using search history.

• Do likewise for your end point.

• To reverse directions, touch ﬂ.

• Then select a transport mode: driving by car, using public transportation, or walking directions.

• A couple of suggested routes will appear in a list. Touch an route to star navigation.

**9.4.2 Preview suggested routes and decide on a route more preferable or feasible to you**

You can preview each turn in your route in Navigation, Satellite, and other views. Slide the suggested route up you can view the directions turn-by-turn.

9.4.3 Search for locations along your route

Please refer to “9.2 Search for a location” for detailed information.

9.5 Arrangement of Layers

Layers allow you to view locations and additional information overlaid on the map. You can add multiple layers or remove only certain layers so you control exactly what information you want visible on the map at one time.

9.5.1 To view multiple layers

Touch Menu key ℹ from Maps screen. All available layers are listed (like Traffic, Satellite, Public transit, etc), select one to view.

When selecting a more preferable or feasible route, distance and time will be the two most important factors for your evaluation. Distance and estimated time will be displayed at the top of the directions screen.
10 Others

10.1 File Manager

To access this function, touch Application icon from the Home screen, then touch File Manager.

File Manager works with both external SD card and internal SD card.

File Manager displays all data stored on both microSD cards, including applications, media files: videos, pictures or audios you have captured; other data transferred via Bluetooth, USB cable, etc.

When you download an application from PC to microSD card, you can locate the application on File Manager, then touch it to install it in your phone.

File Manager allows you to perform and be really efficient with the following common operations: create (sub) folder, open folder/file, view, rename, move, copy, delete, play, share, etc.

10.2 Sound Recorder

To access this function, touch Application icon from the Home screen, then touch Sound Recorder.

Sound Recorder allows you to record voice/sound for seconds/hours.

10.3 FM Radio

Your phone is equipped with a radio (1) with RDS (2) functionality. You can use the application as a traditional radio with saved channels or with parallel visual information related to the radio program on the display if you turn to stations that offer Visual Radio service.

To access this function, touch Application icon from the Home screen, then touch Radio.

To use it, you must plug in your headset, which works as an antenna connected with your phone.

(1) The quality of the radio depends on the coverage of the radio station in that particular area.
(2) Depending on your network operator and market.
Available options:
• Save channel  Save the current tuned station to the channels list.
• Audio mode  Listen to the radio using loudspeaker or headset.
• Delete  Delete the channel
• Enter frequency  Turn off the radio.
• Station Info  Mark the checkbox to show station info.
• Exit  Turn off the radio

10.4 Setup ........................................................................................................
To access this function, touch the Application icon  from the Home screen, then touch Setup Wizard.

Setup helps set up your phone in multiple ways: language, data connection, account setup, etc. This will also be performed the first time you power on your phone.

10.5 Other applications (1) ............................................................................
The previous applications in this section are preinstalled on your phone. To read a brief introduction of the preinstalled 3rd party applications, please refer to the leaflet provided with the phone. You can also download thousands of 3rd party applications by going to Google Play Store on your phone.

---

Settings ..............................................................................................................
Touch Application icon  from homescreen and touch  to access Settings.

11.1 Wi-Fi
Using Wi-Fi you can now surf the Internet without using your SIM card whenever you are in range of a wireless network. The only thing you have to do is to enter the Wi-Fi screen and configure an access point to connect your phone to the wireless network.

For detailed instructions on using Wi-Fi, please refer to “6.1.2 Wi-Fi”.

11.2 Bluetooth
Bluetooth allows your phone to exchange data (videos, images, music, etc.) in a small range with another Bluetooth supported device (phone, computer, printer, headset, car kit, etc.).

For more information on Bluetooth, please refer to “6.3 Connecting to Bluetooth devices”.

11.3 Data usage
To enable/disable mobile data by touching the switch .

Mark the checkbox of Set mobile data limit, then you can drag the limit line and the warning line according to your limitation. Your mobile data connection will be disabled when the specified limit is reached. You can also choose a data usage cycle to view the statistics and related applications of used data by your phone.

(1) Application availability depends on country and operator.
Touch the Menu icon and you can view more settings related to your data usage.

Data usage is measured by your phone, and your carrier may count differently. Please consider using a conservative limit.

11.4 More...

11.4.1 Airplane mode
Mark the checkbox of Airplane mode to simultaneously disable all wireless connections including Wi-Fi, Bluetooth and more.

11.4.2 Tethering & portable hotspot
This function allows you to share your phone’s mobile data connection via USB or as a portable Wi-Fi access point (Please refer to “6.5 Sharing your phone’s mobile data connection”).

11.4.3 VPN
A mobile virtual private network (mobile VPN or mVPN) provides mobile devices with access to network resources and software applications on their home network, when they connect via other wireless or wired networks. Mobile VPNs are used in environments where workers need to keep application sessions open at all times, throughout the working day, as the user connects via various wireless networks, encounters gaps in coverage, or suspend-and-resumes their devices to preserve battery life. A conventional VPN cannot survive such events because the network tunnel is disrupted, causing applications to disconnect, time out, fail, or even the computing device itself to crash.

For more information on VPN, please refer to “6.6 Connecting to virtual private networks”.

11.4.4 Mobile networks
- Data enabled
Mark to enable data access over Mobile network.
- Data connection reminder
Mark to show the message when data connection on.
- Data roaming
Mark to allow data connection when roaming.
- Preferred network type
Select preferred network mode such as GSM or WCDMA.
- Access Point Names
You can select your preferred network with this menu.
- Network operators
You can select a network operator.

11.4.5 Emergency alert settings
- Show extreme threats
Mark the checkbox to display alerts for extreme threats to life and property.
- Show severe threats
Mark the checkbox to display alerts for severe threats to life and property.
- Show AMBER alerts
Mark the checkbox to display child abduction emergency bulletins.
- Alert tone
Touch to preview emergency alert tone.
• Vibration
Touch to preview emergency alert vibration.

11.5 Sound
• Volume
Touch to adjust volume of media, ringtone, alarms.

• Phone ringtone
Touch to set your default incoming call ringtone.

• Vibrate when ringing
Mark the check box to vibrate phone for incoming calls.

• Default notification sound
Touch to set your default notification ringtone.

• Dial pad touch tones
Mark the check box to enable playing tones when using dial pad.

• Touch sounds
Mark the checkbox to enable playing tone when touch any items.

• Screen lock sound
Mark the check box to enable sounds to play when locking and unlocking the screen.

• Vibrate on touch
Mark the checkbox to enable vibrate when touch any items.

11.6 Display
• Brightness
Touch to adjust the brightness of the screen.

• Wallpaper
Touch to set the wallpaper.

• Auto Rotate screen
Touch to select whether rotate screen automatically or not.

• Sleep
Touch to set screen timeout.

• Daydream
Touch to enable day dream function, and setup each day dream mode.

• Font size
Touch to set the fond size.

11.7 Battery
In battery management screen, touch one category, then you can view specific power consumption.
You can adjust power use via the screen brightness or screen timeout in Display screen. You can also set your phone to saving mode or ultimate saver mode and in the latter mode, only four functions can be used including Phone, Contacts, Messaging and Calendar.

11.8 Apps
You use the Manage applications settings to view details about the applications installed on your phone, to manage their data and force them to stop, and to set whether you want to permit installation of applications that you obtain from web sites and emails.

Manage Apps
• Downloaded: Touch to manage and remove installed applications.
• Running: Touch to view and control currently running service.
11.9 Location

Access to my location

Touch the switch to enable to use information from Wi-Fi and mobile networks to determine your approximate location, for use in Google Maps, when you search, and so on. When you select this option, you're asked whether you consent to share your location anonymously with Google's location service.

GPS satellites

Check to use your phone's global positioning system (GPS) satellite receiver to pinpoint your location within an accuracy as close as several meters ("street level"). The process of accessing the GPS satellite and setting your phone's precise location for the first time will require up to 5 minutes. You will need to stand in a place with a clear view of the sky and avoid moving. After this, GPS will only need 20-40 seconds to identify your precise location.

11.10 Security

screen lock

- None Touch to disable screen unlock security.
- Slide Touch to enable slide unlock mode.
- Face Unlock Touch to unlock your phone's screen by looking at it.
- Pattern Touch to draw pattern to unlock screen.
- PIN Touch to enter a numeric PIN to unlock screen.
- Password Touch to enter a password to unlock screen.

Owner info

Touch to input owner information which will display on the lock screen.

Encrypt phone

Require a numeric PIN or passwords to decrypt your phone each time you power it on.

Make passwords visible

Mark the checkbox to show passwords as you type.

App options

Touch to view app detail information.

Unknown sources

Mark the checkbox to permit installation of applications that you obtain from web sites, emails, or other locations other than Google Play Store.

To protect your phone and personal data, download applications only from trusted sources, such as Google Play Store.

Verify apps

Mark the checkbox to disallow or warn before installation of apps that may cause harm.

Trusted credentials

Touch to display trusted CA certificates.

Install from SD card

Touch to install encrypted certificates from the microSD card.
Clear credentials
Touch to remove all certificates.

11.11 Storage
Use these settings to monitor the total and available space on your phone and on your microSD card; to manage your microSD card; and if necessary, to reset the phone, erasing all of your personal information.

Internal storage
This menu displays the amount of internal phone storage in different colors. The available space will be shown in black, which shows the amount of internal phone storage used by the operating system, its components, applications (including those you downloaded), permanent and temporary data.

If a warning message comes up saying that phone memory is limited, you are required to free up space by deleting some unwanted applications, downloaded files, etc.

SD card
Lists the amount of space on any microSD card installed in your phone and the amount you can use to store applications, videos, music, and other files. You can touch one category to access the function and learn more in details

Mount/Unmount SD card
You must mount the microSD card before using applications and files in it, or formatting the microSD card. Unmount the microSD card from your phone so that you can safely remove it when the phone is on.

Format SD card
Permanently format everything on a microSD card and prepares it for use with your phone.

11.12 Battery
In battery screen you can view the battery usage data since you last connected the phone to a power source. The screen also shows your battery status and how long it has been used since last charging. Touch one category, then you can learn its specific power consumption.

You can adjust power use via the screen brightness or screen timeout in Display screen.

11.13 Apps
You use the Applications settings to view details about the applications installed on your phone, to manage their data and force them to stop, and to set whether you want to permit installation of applications that you obtain from web sites and emails.

11.14 Location
Mode
Touch to choose location mode as High accuracy, Battery saving and Device only.

Recent location requests
This menu displays the amount of apps recently request location access service.

Location Service
Touch to enter Google location settings. The settings options available or not depends on area.

11.15 Security
Encrypt phone
You can encrypt your accounts, settings, download apps and their data, media and other files by touching Encrypt phone.
Set up SIM card lock
Mark the checkbox of **Lock SIM card** to lock the SIM card with PIN code.

Touch **Change SIM PIN** to change the PIN code.

Make passwords visible
Mark the checkbox to show passwords as you type.

Device administrators
Touch to view or deactivate device administrators.

App ops
Touch to view or change app permissions.

Unknown sources
Mark the checkbox to permit installation of applications that you obtain from websites, emails, or other locations other than Google Play Store.

To protect your phone and personal data, download applications only from trusted sources, such as Google Play Store.

Verify apps
Mark the checkbox to prevent or warn you before installing apps which might cause harm.

Trusted credential
Touch to display trusted CA certificates.

Install from SD card
Touch to install encrypted certificates from the microSD card.

Clear credential
Touch to remove all credentials.

11.16 Language & input
Use the Language & input settings to select the language for the text on your phone and for configuring the onscreen keyboard. You can also configure voice input settings and the pointer speed.

Language
Touch to select the language and the region you want.

Spell checker
Mark it to enable spell checker when input text via Android keyboard. Touch the **✓** besides it to enter settings.

Personal dictionary
Touch to open a list of the words you’ve added to the dictionary. Touch a word to edit or delete it. Touch the add button (+) to add a word.

Default
Touch to select a default input method. Touch **Set up input methods** to show all input methods. Touch the settings icon to configure a certain input method.

Android keyboard
The Android keyboard settings apply to the onscreen keyboard that is included with your phone. The correction and capitalization features affect only the English version of the keyboard. Available options are as follows:

- **Input languages**
  Touch to set input language.
• Auto-capitalization
Mark the checkbox to have the onscreen keyboard automatically capitalize the first letter of the first word after a period, the first word in a text field, and each word in name fields.

• Vibrate on keypress
Mark the checkbox to have the phone vibrate briefly each time you touch a key on the onscreen keyboard.

• Sound on keypress
Mark the checkbox to play a brief sound each time you touch a key on the onscreen keyboard.

Popup on keypress
Mark the checkbox to popup the key that you touched.

• Voice input key
Touch to activate/inactivate voice input key.

• Add-on dictionaries
Touch to view add-on dictionaries in other languages.

• Block offensive words
Mark the checkbox to block potentially offensive words.

• Auto correction
Touch to turn on/off auto correction, or you can also adjust the sensitivity of correction.

• Show correction suggestions
Touch to show or not the correction suggestions while typing.

• Next-word suggestion
Mark the checkbox to enable use the previous word in making suggestion.

• Advanced settings
Touch to view more advanced settings for android keyboard, such as Key pop-up dismiss delay, Suggest Contact name, and etc.

Swype
• Settings
Touch to enter basic settings, Prediction, Voice and Handwriting.

• Vibrate on keypress
Mark the checkbox to vibrate when keypressing.

• Sound on keypress
Mark the checkbox to play a brief sound each time you touch a key on the onscreen keyboard.

• Popup on keypress
Mark the checkbox to popup the key that you touched.

• Long press delay
Touch to set up the time when select alternate characters

• Show complete trace
Mark the checkbox to display the complete Swype path.

• Auto-correction
Touch to turn on/off auto correction, or you can also adjust the sensitivity of correction.

• Auto-capitalization
Mark the checkbox to automatically capitalize the first letter in a sentence.

• Auto-spacing
Mark the checkbox to automatically insert spaces between words.

• Next word prediction
Mark the checkbox to show predict words based on previously entered text.

• Show Voice key
Mark the checkbox to show voice key.

• Enable handwriting
Mark the checkbox to enable handwriting.

• Themes
• Portrait keyboard
  Touch to set portrait keyboard display as Full screen, Mini left or Mini right.

• Landscape keyboard
  Touch to set landscape keyboard display as Full screen, Mini left, Mini right or Split.

• Keyboard height
  Touch to set height of portrait keyboard and landscape keyboard.

• Word choice list font size
  Touch to set the font size of words in choice list.

My words
Touch to setup dictionary and date management.

Languages
Touch to enter select keyboard language and download languages.

• Gestures
  Touch to learn Swype gestures on the keyboard, these gestures can help you quickly accomplish common tasks.

Help
• How to Swype
  Touch to view how to use Swype.

• Show help tips
  Mark the checkbox to turn on helpful tips from Swype.

Google voice tips
• Choose input languages
  Mark the checkbox to set Google voice typing automatically.

• Block offensive words
  Mark the checkbox to hide recognized offensive text.

• Offline speech recognition
  Touch to manage downloaded languages.

Voice search
• Language
  Set voice search language.

• “OK Google” hotword detection
  Touch to enable function that say “OK Google” to launch voice search.

• Speech output
  Select speech output as always, informative only or hands-free only.

• Block offensive words
  Mark the checkbox to hide recognized offensive voice results.

• Offline speech recognition
  Touch to manage downloaded languages.

• Personalized recognition
  Mark the checkbox to active improve speech recognition accuracy.

• Bluetooth headset
  Mark the checkbox to active records audio through Bluetooth headset if Bluetooth is available.

Text-to-speech settings
• Preferred engine
  Touch to choose a preferred text-to-speech engine, touch the settings icon to show more choices for each engine.

• Speech rate
  Touch to open a dialog where you can select how quickly you want the synthesizer to speak.

• Listen to an example
Touch to play a brief sample of the speech synthesizer, using your current settings.

**Pointer speed**

Touch to open a dialog where you can change the pointer speed, touch **OK** to confirm.

### 11.17 Backup and reset

**Back up my data**

Mark the checkbox to back up your phone's settings and other application data to Google Servers, with your Google Account. If you replace your phone, the settings and data you've backed up are restored onto the new phone for the first time you sign in with your Google Account. If you mark this option, a wide variety of settings and data are backed up, including your Wi-Fi passwords, bookmarks, a list of the applications you've installed, the words you've added to the dictionary used by the onscreen keyboard, and most of the settings that you configure with the Settings application. If you unmark this option, you stop backing up your settings and any existing backups are deleted from Google Servers.

**Back up account**

Touch to back up your account.

**Automatic restore**

Mark the checkbox to restore back up settings or other data.

**Factory data reset**

Erase all of your personal data from internal phone storage, including information about your Google Account, any other accounts, your system and application settings, and any downloaded applications. Resetting the phone does not erase any system software updates you've downloaded or any files on your microSD card, such as music or photos. If you reset the phone in this way, you're prompted to re-enter the same kind of information as when you first started Android.

When you are unable to power on your phone, there is another way to perform a factory data reset by using hardware keys. Press the **Volume up** key and the **power** key at the same time until the screen lights up. You will be prompted for language, use volume up and down keys to navigate up and down, press power button to enter Recovery Mode. The next screen will offer various options, select **wipe data/factory reset**.

### 11.18 Add account

Use the Add account to add, remove, and manage your Google and other supported accounts. You can also use these settings to control how and whether all applications send, receive, and synchronize data on their own schedules, and whether all applications can synchronize user data automatically.

Gmail, Google Calendar, and other applications may also have their own settings to control how they synchronize data; see the sections on those applications for details.

Touch an account to see all sync options. Mark the checkbox to permit applications to synchronize data on their own schedule. You can also touch the **Menu** key and **Sync now** to synchronize data for the chosen items of that account.

### 11.19 Date & time

Use Date & Time settings to customize your preferences for how date and time are displayed.

**Automatic date & time**

Mark the checkbox to use network provided time or use GPS provided time.

**Automatic time zone**

Mark the checkbox to use network-provided time zone. Or unmark to set all values manually.

**Set date**

Touch to open a dialog where you can manually set the phone’s date.
11.20 Accessibility
You use the Accessibility settings to configure any accessibility plug-ins you have installed on your phone.

Talkback
Touch to turn on/off the function which provides spoken feedback to help blind and low-vision users.

Captions
Touch to enable captions, and set the language, text size and style of it.

Magnification gestures
Touch the \( \text{\textdollar} \) to turn on the function. When this feature is turned on, you can zoom in and out by triple-tapping the screen.

Large text
Mark the checkbox to enlarge the screen text.

Power button ends call
Mark the checkbox to end a call by pressing Power key during the call.

Auto-rotate Orientation
Mark the checkbox to rotate screen automatically.

Speak passwords
Mark the checkbox to speak passwords while typing.

Accessibility shortcut
Touch the \( \text{\textdollar} \) to turn on/off this function. When this feature is turned on, you can quickly enable accessibility features in two steps.

Touch & hold delay
Touch to adjust the duration of touch and hold delay. This function enables your phone to differ touch and touch & hold, which may avoid incorrect operations.

11.21 Printing
Your device support print the docs by Cloud print. Touch \( \text{\textdollar} \) to turn on/off the cloud print.
When this feature turned on, touch Cloud print to scan available printers, and then choose a available printer to save the documents. From printer list screen, touch \( \text{\textdollar} \) and then touch Add printer to add more printer via access website. Touch \( \text{\textdollar} \) and then touch Settings, several options are available.
11.22 Developer options

To access this function, touch Settings\About phone, then touch Build number 7 times. Now Development is available.

The Developer options screen contains settings that are useful for developing Android applications. For full information, including documentation of the Android applications and development tools, see the Android developer web site (http://developer.android.com).

Take bug report
Touch to select to collect information about your current device state and send as an email message.

Desktop backup password
Touch to set/change/remove desktop full backup password.

Stay awake
Mark the checkbox to prevent the screen from dimming and locking when the phone is connected to a charger or to a USB device that provides power. Don’t use this setting with a static image on the phone for long periods of time, or the screen may be marked with that image.

Select runtime
Touch to select runtime mode, use Dalvik or ART.

Enable Bluetooth HCI snoop log
Mark the checkbox to active capture all Bluetooth HCI packets in a file.

Process Stats
Touch to view geeky states about running processes.

Enable QuickBoot mode
Mark the checkbox to active put device into QuickBoot mode.

USB debugging
Mark the checkbox to permit debugging tools on a computer to communicate with your phone via a USB connection.

Revoke USB debugging authorization
Touch it to revoke access to USB debugging from all computer you have previously authorized, touch OK to confirm.

Power menu bug report
Mark the checkbox to select option in power menu for submitting a bug report.

Allow mock locations
Mark the checkbox to permit a development tool on a computer to control where the phone believes it is located, rather than using the phone’s own internal tools for this purpose.

Select debug app
Touch to select debug app.

Wait for debugger
Mark the checkbox to active debugged applications waits for debugger to attach before executing.

Verify apps over USB
Mark the checkbox to check apps over USB.
Wireless display certification
Mark the checkbox to active show options for wireless display certification.

Show touches
Mark the checkbox to show visual feedback for touches.

Pointer location
Mark the checkbox to show current touch data.

Show surface updates
Mark the checkbox to show flash entire window surfaces when they update.

Show layout bounds
Mark the checkbox to show clip bounds, margins, etc.

Force RTL layout direction
Mark the checkbox to active force screen layout direction to RTL for all locales.

Window animation scale
Touch to adjust the animation scale for your window.

Transition animation scale
Touch to adjust the animation scale while performing transition.

Animator duration scale
Touch to adjust the animation duration scale.

Force GUP rendering
Mark the checkbox to force use 2D hardware acceleration in applications.

Show GPU view updates
Mark the checkbox to show GPU view updates.

Show hardware layers updates
Mark the checkbox to show hardware layers updates.

Show GPU overdraw
Mark the checkbox to show GPU overdraw.

Force 4x MSAA
Mark the checkbox to enable 4x MSAA.

Disable HW overlays
Mark the checkbox to select to always use GPU for screen compositing.

Strict mode enabled
Mark the checkbox to enable strict mode. After enabled, the screen will flash when applications do long operations on the main thread.

Show CPU usage
Mark the checkbox to show current CPU usage.

Profile GPU rendering
Mark the checkbox to use 2D hardware acceleration in applications.
Enable OpenGL traces
Touch to adjust OpenGL traces.

Don’t keep activities
Mark the checkbox to destroy all activities as soon as you leave.

Background process limit
Touch to change the limit for background processes.

Show all ANRs
Mark the checkbox to show “Application Not Responding” dialog for background applications.

12.23 Regulatory & Safety
This contains information about product model name, manufacturer name, IMEI and information of certifications.

12.24 About phone
This contains information about things ranging from Legal information, Model number, Firmware version, Baseband version, Kernel version, Build number to those listed below:

Software updates
Touch to check for Software updates.

Status
This contains the status of the Battery status, Battery level, My phone number, Network, Signal strength, etc.

Legal information
Touch to view legal information.

12 Making the most of your phone ............

12.1 FOTA Upgrade
Using FOTA Upgrade tool you can update your phone’s software.

To access System Updates, please open Settings\About phone\System updates. Touch Check for updates, and the phone will search for the latest software. If you want to update the system, please touch the button Download, after it’s done please touch Install to complete the upgrade. Now your phone’s software will have the latest version.

You should turn on data connection or Wi-Fi before searching for updates. Settings for auto-check intervals and reminders about upgrades are also available once you restart the phone.

If you have chosen auto-check, when the system discovers the new version, the icon will appear in the status bar. Touch the notification to access the System Updates directly.
TCT Mobile (US), Inc. warrants to the original retail purchaser of this wireless device that should this product or part thereof during normal consumer usage and condition be proven to be defective in material or workmanship that results in product failure within the first twelve (12) months from the date of purchase as shown on your original sales receipt from an authorized sales agent. Such defect(s) will be repaired or replaced (with new or rebuilt parts) at the company’s option without charge for parts or labor directly related to the defect(s). Batteries, power adapters, and other accessories sold as in box items are also warranted against defects and workmanship that results in product failure within the first twelve (12) month period from the date of purchase. This warranty extends to products purchased and sold within the United States.

The limited warranty for your wireless device will be voided if any of the following conditions occur:

- Non-compliance with the instructions for use or installation, or with technical and safety standards applicable in the geographical area where your phone is used;
- Connection to any equipment not supplied or not recommended by TCT Mobile (US), Inc.;
- Modification or repair performed by individuals not authorized by TCT Mobile (US), Inc. or its affiliates;
- Changes to the device operating system by the user or third party applications;
- Acts of god such as inclement weather, lightning, power surges, fire, humidity, infiltration of liquids or foods, chemical products, download of files, crash, high voltage, corrosion, oxidation;
- Removal or altering of the wireless device’s event labels or serial numbers (IMEI);
- Damage from exposure to water or other liquids, moisture, humidity, excessive temperatures or extreme environmental conditions, sand, excess dust and any condition outside the operating guidelines;
- Defects in appearance, cosmetic, decorative or structural items such as framing and non-operative parts;
- Damage as result of physical abuse regardless of cause.

There are no express warranties, whether written, oral or implied, other than this printed limited warranty or the mandatory warranty provided by your jurisdiction. In no event shall TCT Mobile (US), Inc. or any of its affiliates be liable for incidental or consequential damages of any nature whatsoever, including but not limited to commercial loss, to the full extent those damages can be disclaimed by law. Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitation of the duration of implied warranties, so the preceding limitations or exclusions may not apply to you.

How to obtain Support: Contact the customer care center by calling (855-368-0829) or going to (http://www.alcatelonetouch.com/usa/). We have placed many self-help tools that may help you to isolate the problem and eliminate the need to send your wireless device in for service. In the case that your wireless device is no longer covered by this limited warranty due to time or condition, you may utilize our out of warranty repair options.

How to obtain Hardware Service within the terms of this warranty: Create a user profile (alcatel.finetw.com) and then create an RMA for the defective device. Ship the device with a copy of the original proof of purchase (e.g. original copy of the dated bill of sale, invoice) with the owner’s return address (No PO Boxes accepted), wireless carrier’s name, alternate daytime phone number, and email address with a complete problem description. Only ship the device. Do not ship the SIM card, memory cards, or any other accessories such as the power adapter. You must properly package and ship the wireless device to the repair center. TCT Mobile (US), Inc. is not responsible for devices that do not arrive at the service center or are damaged in transit. Insurance is recommended with proof of delivery. Upon receipt, the service center will verify the warranty conditions, repair, and return your device to the address provided in the RMA. Check the warranty repair status by going online with the RMA number on web portal.
Troubleshooting

Before contacting the service center, you are advised to follow the instructions below:

- You are advised to fully charge (充) the battery for optimal operation.
- Avoid storing large amounts of data in your phone as this may affect its performance.
- Use Factory data reset and the upgrade tool to perform phone formatting or software upgrading (to reset factory data, hold down the Power key and the Volume up key at the same time). ALL User phone data: contacts, photos, messages and files, downloaded applications will be lost permanently.

and carry out the following checks:

My phone is frozen or cannot be switched on
- Check the battery power level, charge for at least 20 minutes.
- If it still does not work, please reset the phone using the Power key and the Volume up key.

My phone has not responded for several minutes
- Restart your phone by pressing and holding the Power key.

My phone turns off by itself
- Check that your screen is locked when you are not using your phone, and make sure the Power key is not mis-contacted due to unlocked screen.
- Check the battery charge level.

My phone cannot charge properly
- Make sure that your battery is not completely discharged; if the battery power is empty for a long time, it may take around 20 minutes to display the battery charger indicator on the screen.
- Make sure charging is carried out under normal conditions (0°C (32°F) to +40°C (104°F)).
- When abroad, check that the voltage input is compatible.

My phone cannot connect to a network or “No service” is displayed
- Try connecting at a later time if the network is overloaded.

My phone cannot connect to the Internet
- Check that the IMEI number (press *#06#) is the same as the one printed on your warranty card or box.
- Make sure that the internet access service of your SIM card is available.
- Check your phone’s Internet connecting settings.
- Make sure you are in a place with network coverage.
- Try connecting at a later time or another location.

Invalid SIM card
- Make sure the SIM card has been correctly inserted (see “Inserting or removing the SIM card”).
- Make sure the chip on your SIM card is not damaged or scratched.
- Make sure the service of your SIM card is available.

Unable to make outgoing calls
- Make sure you have dialed a valid number and have touched (呼).
- For international calls, check the country and area codes.
- Make sure your phone is connected to a network, and the network is not overloaded or unavailable.
- Check your subscription status with your operator (credit, SIM card valid, etc.).
- Make sure you have not barred outgoing calls.
- Make sure that your phone is not in airplane mode.

Unable to receive incoming calls
- Make sure your phone is switched on and connected to a network (check for overloaded or unavailable network).
- Make sure your subscription status with your operator (credit, SIM card valid, etc.).
- Make sure you have not forwarded incoming calls.
- Make sure that you have not barred certain calls.
- Make sure that your phone is not in airplane mode.

The caller’s name/number does not appear when a call is received
- Check that you have subscribed to this service with your operator.
- Your caller has concealed his/her name or number.
I cannot find my contacts
- Make sure your SIM card is not broken.
- Make sure your SIM card is inserted properly.
- Import all contacts stored in SIM card to phone.

The sound quality of the calls is poor
- You can adjust the volume during a call by pressing the Volume Up/Down key.
- Check the network strength.
- Make sure that the receiver, connector or speaker on your phone is clean.

I am unable to use the features described in the manual
- Check with your operator to make sure that your subscription includes this service.
- Make sure this feature does not require an ALCATEL ONETOUCH accessory.

When I select a number from my contacts, the number cannot be dialed
- Make sure that you have correctly recorded the number in your file.
- Make sure that you have selected the country prefix when calling a foreign country.

I am unable to add a contact in my contacts
- Make sure that your SIM card contacts are not full; delete some files or save the files in the phone contacts (i.e. your professional or personal directories).

My callers are unable to leave messages on my voicemail
- Contact your network operator to check service availability.

I cannot access my voicemail
- Make sure your operator’s voicemail number is correctly entered in "Voicemail number".
- Try later if the network is busy.

I am unable to send and receive MMS
- Check your phone memory availability as it might be full.
- Contact your network operator to check service availability and check MMS parameters (see “4.1.3 Adjust message settings”).
- Verify the server center number or your MMS profile with your operator.
- The server center may be swamped, try again later.

SIM card PIN locked
- Contact your network operator to obtain the PUK code (Personal Unblocking Key).

I am unable to connect my phone to my computer
- Check that your USB driver is installed properly.
- Check that you have marked the checkbox of USB debugging (See 11.19 Developer options)
- Make sure that you’re using the right cable from the box.

I am unable to download new files
- Make sure there is sufficient phone memory for your download.
- Check your subscription status with your operator.

The phone cannot be detected by others via Bluetooth
- Make sure that Bluetooth is turned on and your phone is visible to other users (see “6.3 Connecting to Bluetooth devices”).
- Make sure that the two phones are within Bluetooth’s detection range.

How to make your battery last longer
- Make sure you follow the complete charge time (minimum 2.5 hours).
- After a partial charge, the battery level indicator may not be exact. Wait for at least 20 minutes after removing the charger to obtain an exact indication.
- Switch on the backlight upon request.
- Extend the email auto-check interval for as long as possible.
- Update news and weather information on manual demand, or increase their auto-check interval.
- Exit background-running applications if they are not being used for a long time.
- Deactivate Bluetooth, Wi-Fi, or GPS when not in use.

The phone will become warm following prolonged calls, game playing, internet surfing or running other complex applications.
- This heating is a normal consequence of the CPU handling excessive data. Ending above actions will make your phone return to normal temperatures.
Safety and Use.................................................................

We recommend that you read this chapter carefully before using your phone. The manufacturer disclaims any liability for damage, which may result as a consequence of improper use or use contrary to the instructions contained herein.

EXPOSURE TO RADIO FREQUENCY SIGNALS
Your wireless handheld telephone is a low power radio transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals. In August 1996, the Federal Communications Commission (FCC) adopted RF exposure guidelines with safety levels for handheld wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies:

1: American National Standards Institute.
3: International Commission on Nonionizing Radiation Protection.

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C95.1).

The design of your phone complies with the FCC guidelines (and those standards).

ANTENNA SAFETY
Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could impair call quality, damage the phone, or result in violation of FCC regulations. Please contact your local dealer for replacement antenna.

Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with the skin, a minor burn may result. Please contact your local dealer for replacement antenna.

DRIVING SAFETY
Talking on the phone while driving is extremely dangerous and is illegal in some states. Remember, safety comes first. Check the laws and regulations on the use of phones in the areas where you drive. Always obey them. Also, if using your phone while driving, please:

• Give full attention to driving. Driving safely is your first responsibility.
• Use hands-free operation, if available.
• Pull off the road and park before making or answering a call, if driving conditions so require.

To avoid interfering with blasting operations, turn your phone OFF when in a “blasting area” or in areas posted: “Turn off two-way radio.”

Electronic Devices
Your wireless handheld telephone is a low power radio transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals. Most modern electronic equipment is shielded from RF energy. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone. Therefore, use of your phone must be restricted in certain situations.

PACEMAKERS
The Health Industry Manufacturers Association recommends that a minimum separation of six (6”) inches be maintained between a handheld wireless phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research. Persons with pacemakers:

• ALWAYS keep the phone more than six inches from your pacemaker when the phone is turned on.
• Do not carry the phone in a breast pocket.
• Use the ear opposite the pacemaker to minimize the potential for interference.
• If you have any reason to suspect that interference is taking place, turn your phone OFF immediately.

HEARING AIDS
Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult your service provider (or call the customer service line to discuss alternatives).

OTHER MEDICAL DEVICES
If you use any other personal medical device, consult the manufacturer of your device to determine if they are adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information. Turn your phone OFF in healthcare facilities when any regulations posted in these areas instruct you to do so. Hospitals or healthcare facilities may be using equipment that could be sensitive to external RF energy.

VEHICLES
RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

POSTED FACILITIES
Turn your phone OFF where posted notices so require.

OTHER SAFETY GUIDELINES
AIRCRAFT
FCC regulations prohibit using your phone while in the air. Turn your phone OFF before boarding an aircraft. Always request and obtain prior consent and approval of an authorized airline representative before using your phone aboard an aircraft.
Always follow the instructions of the airline representative whenever using your phone aboard an aircraft, to prevent any possible interference with airborne electronic equipment.

BLASTING AREAS
To avoid interfering with blasting operations, turn your phone OFF when in a “blasting area” or in areas posted: “Turn off two-way radio.” Obey all signs and instructions.
SAFETY INFORMATION FOR FCC RF EXPOSURE

WARNING! READ THIS INFORMATION BEFORE USING

CAUTIONS

In August 1996 the Federal Communications Commission (FCC) of the United States with its action in Report and Order FCC 96-326 adopted an updated safety standard for human exposure to radio frequency electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies.

The design of this phone complies with the FCC guidelines and these international standards.

BODY-WORN OPERATION

This device was tested for typical body-worn operations with the back of the phone kept 1.5 cm from the body. To maintain compliance with the FCC RF exposure guidelines, use only FCC authorized belt-clips, holsters and similar accessories with a maximum separation distance of 1.5 cm between the user’s body and the back of the phone, including the antenna.

PRECAUTIONS

1. This product complies with the requirements of the FCC Rules and Regulations Part 68 and the requirements adopted by the ACTA. The label on the back of your phone provides, among other information, a FCC Registration Number, ringer equivalence number (REN) and the manufacturer’s name and address. If requested, this information must be provided to your telephone company.

2. The REN is useful in determining the quantity of devices that may be connected to your telephone line. Excessive RENs on your telephone line may result in the inability to successfully complete a telephone call, or in a reduction in the quality of the telephone call. In most, but not all areas, the sum of the RENs should not exceed five (5). To be certain of the number of devices that may be connected to your line, as determined by the total RENs, contact your telephone company.

3. If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this equipment does not affect its performance. If you have questions about what will affect the performance of your alarm system, consult your alarm company.

4. Please connect only FDA approved cords and accessories to your device. The use of non-certified accessories could invalidate any warranty apply, and could be dangerous.

5. The maximum allowable SAR values for this device are 1.166 W/kg (body-worn) and 0.776 W/kg (ear), when tested in accordance with the guidelines adopted by the FCC.

6. The SAR values for various cellphones and at various positions, they all meet the government requirement for RF exposure.

7. The 96-326 adopted an updated safety standard for human exposure to radio frequency electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies.

8. Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

SAR INFORMATION

THIS MODEL PHONE MEETS THE GOVERNMENT’S REQUIREMENTS FOR EXPOSURE TO RADIO WAVES.

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based upon standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. * Tests for SAR are conducted with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limits established by the applicable government agency for safe exposure. The tests are performed in positions and locations (e.g., as the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for use at the ear is 0.776 W/kg and when worn on the body is 1.464 W/kg, as described in this user guide, is 1.166 W/kg. (Body-worn measurements differ among phone models, depending upon available accessories and FCC requirements). While there may be differences between the SAR levels of various cellphones and at various positions, they all meet the government requirement for RF exposure.

For body-worn operation, the cellphone meets FCC RF exposure guidelines provided that it is used with a non-metallic accessory with the handset at least 10 mm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of http://www.fcc.gov/oet/ea after searching on JYCBLADE.

Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) website at http://www.phonefacts.net.

* In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

HEARING AID COMPATIBILITY (HAC) FOR WIRELESS TELECOMMUNICATIONS DEVICES

OUR COMMITMENT

We believe that all of our customers should be able to enjoy the benefits of digital wireless technologies. We are committed to providing a selection of compatible devices for our customers who wear hearing aids.

THIS PHONE HAS A HAC RATING OF M4/T4. Reference ANSI C63.19-2011

FCC ID: RAD475

WHAT IS HEARING AID COMPATIBILITY?

The Federal Communications Commission has implemented rules and a rating system designed to enable people who wear hearing aids to more effectively use these wireless telecommunications devices. The standard for compatibility of digital wireless phones with hearing aids is set forth in American National Standard Institute (ANSI) standard C63.19-2011. There are two sets of ANSI standards with ratings from one to four (four being the best rating): an “M” rating for reduced interference making it easier to hear conversations on the phone when using the hearing aid microphone, and a “T” rating that enables the phone to be used with hearing aids operating in the telecoil

129

130
mode thus reducing unwanted background noise.

**How Will I Know Which Wireless Phones Are Hearing Aid Compatible?**

The Hearing Aid Compatibility rating is displayed on the wireless phone box. A phone is considered Hearing Aid Compatible for acoustic coupling (microphone mode) if it has an “M3” or “M4” rating. A digital wireless phone is considered Hearing Aid Compatible for inductive coupling (telecoil mode) if it has a “T3” or “T4” rating. This phone has been tested and rated for use with hearing aids for some of the wireless technologies that it uses. However, there may be some newer wireless technologies used in this phone that have not been tested yet for use with hearing aids. It is important to try the different phone thoroughly and in different locations, using your hearing aid or cochlear implant, to determine if you hear any interfering noise. Consult your service provider about its return and exchange policies and for information on hearing aid compatibility.

**How Will I Know If My Hearing Aid Will Work with a Particular Digital Wireless Phone?**

You’ll want to try a number of wireless phones so that you can decide which works the best with your hearing aids. You may also want to talk with your hearing aid professional about the extent to which your hearing aids are immune to interference, if they have wireless phone shielding, and whether your hearing aid has a HAC rating.

**More Information About Hearing Aids and Digital Wireless Phone**

- Gallaudet University, RERC – http://tap.gallaudet.edu/voice

**FDA Consumer Update**

U.S. Food and Drug Administration – Center for Devices and Radiological Health Consumer Update on Wireless Phones

1. Do wireless phones pose a health hazard?

The available scientific evidence does not show that any health problems are associated with using wireless phones. There is no proof, however, that wireless phones are absolutely safe. Wireless phones emit low levels of radiofrequency energy (RF) in the microwave range while being used. They also emit very low levels of RF when in the idle mode. Whereas high levels of RF can produce health effects (by heating tissue), exposure to low level RF that does not produce heating effects causes no known adverse health effects. Many studies of low level RF exposures have not found effects. Some studies have suggested possible effects, but such findings have not been confirmed by additional research. In some cases, other researchers have had difficulty in reproducing those studies, or in determining the reasons for inconsistent results.

2. What is FDA’s role concerning the safety of wireless phones?

Under the law, FDA does not review the safety of radiation-emitting consumer products such as wireless phones before they can be sold, used in research, or imported into the country. However, FDA does coordinate the efforts of the federal agencies that have responsibility for different aspects of RF safety to ensure the protection of the public health.

- Cooperate in providing users of wireless phones with the best possible information on possible effects of wireless phone use on human health.
- Provide updates on research developments and regulatory actions as they occur.

3. What research is needed to decide whether RF exposure from wireless phones poses a health risk?

The so-called “cordless phones,” which have a base unit connected to the telephone wiring in a house, typically operate at far lower power levels, and thus produce far lower RF exposures than do the wireless phones themselves, the RF exposures that people get from these base stations are typically thousands of times lower than those they can get from wireless phones. Base stations have not been shown to pose any health hazard, but this is not the subject of the safety questions discussed in this document.

3.1 What kinds of phones are the subject of this update?

The term “wireless phone” refers here to hand-held wireless phones with built-in antennas, often called “cell,” “mobile,” or “PCS” phones. These types of wireless phones can expose the user to measurable radiofrequency energy (RF) because of the short distance between the phone and the user’s head. These RF exposures are limited by Federal Communications Commission safety guidelines that were developed with the advice of FDA and other federal health and safety agencies. When the phone is located at greater distances from the user, the exposure to RF is drastically lower because a person’s RF exposure decreases rapidly with increasing distance from the source. The so-called “cordless phones,” which have a base unit connected to the telephone wiring in a house, typically operate at far lower power levels, and thus produce RF exposures far below the FCC safety limits.

4. What are the results of the research done already?

The research done thus far has produced conflicting results, and many studies have suffered from flaws in their research methods. Animal experiments investigating the effects of radiofrequency energy (RF) exposures characteristic of wireless phones have yielded conflicting results, and some findings have not been confirmed by additional research. In some cases, other researchers have had difficulty in reproducing those studies, or in determining the reasons for inconsistent results.

5. What is the association between wireless phones and cancer?

The research done thus far has produced conflicting results, and many studies have suffered from flaws in their research methods. Animal experiments investigating the effects of radiofrequency energy (RF) exposures characteristic of wireless phones have yielded conflicting results, and some findings have not been confirmed by additional research. In some cases, other researchers have had difficulty in reproducing those studies, or in determining the reasons for inconsistent results.

6. What is the association between wireless phones and other health outcomes?

The research done thus far has produced conflicting results, and many studies have suffered from flaws in their research methods. Animal experiments investigating the effects of radiofrequency energy (RF) exposures characteristic of wireless phones have yielded conflicting results, and some findings have not been confirmed by additional research. In some cases, other researchers have had difficulty in reproducing those studies, or in determining the reasons for inconsistent results.
10. What about children using wireless phones?

The scientific evidence does not show a danger to users of wireless phones, including children and teenagers. If you want to take steps to lower exposure to radiofrequency energy (RF), the measures described above would apply to children and teenagers using wireless phones. Reducing the time of wireless phone use and increasing the distance between the user and the RF source will reduce RF exposure. Some groups sponsored by other national governments have advised that children be discouraged from using wireless phones at all. For example, the government in the United Kingdom distributed leaflets containing such a recommendation in December 2000. They noted that no evidence exists that using a wireless phone causes brain tumors or other ill effects. Their recommendation to limit wireless phone use by children was strictly precautionary; it was not based on scientific evidence that any health hazard exists.

11. What about wireless phone interference with medical equipment?

Radiofrequency energy (RF) from wireless phones can interact with some electronic devices. For this reason, FDA helped develop a detailed technical standard to prevent potential interactions of wireless phones with other devices, such as hearing aids, pacemakers, and cardiac defibrillators. This standard, the “Recommended Practice for Determining the Spatial-Peak Specific Absorption Rate (SAR) in the Human Body Due to Wireless Telephones,” was developed by the Institute of Electrical and Electronic Engineers (IEEE). The standard was approved by the IEEE in 2000. FDA continues to monitor the use of wireless phones for possible interactions with other medical devices. Should harmful interference be found, FDA will conduct testing to assess the interference and work to resolve the problem.

12. Where can I find additional information?

For additional information, refer to the following resources:

- Federal Communications Commission (FCC) RF Safety Program (http://www.fcc.gov/oet/rfsafety)
- National Council on Radiation Protection and Measurement (http://www.ncrponline.org)
- World Health Organization (WHO) International EMF Project (http://www.who.int/peh-emf/en/)
- National Radiological Protection Board (UK) (http://www.hpa.org.uk/radiation)

Avoid POTENTIAL HEARING LOSS

Prolonged exposure to loud sounds (including music) is the most common cause of preventable hearing loss. Some scientific research suggests that using portable audio devices, such as portable music players and cellular telephones, at high volume settings for long durations may lead to permanent noise-induced hearing loss. This includes the use of headphones (including headsets, earbuds and Bluetooth® or other wireless devices). Exposure to very loud sound has also been associated in some studies with tinnitus (a ringing in the ear), hypersensitivity to sound and distorted hearing. Individual susceptibility to noise-induced hearing loss and other potential hearing problems varies. The amount of sound produced by a portable audio device varies depending on the nature of the sound, the device, the device settings and the headphones. You should follow some commonsense recommendations when using any portable audio device:

- Set the volume in a quiet environment and select the lowest volume at which you can hear adequately.
- When using headphones, turn the volume down if you cannot hear the people speaking near you or if the person sitting next to you can hear the music.
- Do not turn the volume up to block out noisy surroundings. If you choose to listen to your portable device in a noisy environment, use noise-canceling headphones to block out background environmental noise.
- Limit the amount of time you listen. As the volume increases, less time is required before your hearing could be affected.
- Avoid using headphones after exposure to extremely loud noises, such as concerts, that might cause temporary hearing loss.

AVOID POTENTIAL HEARING LOSS

If you use a headset and carry the wireless phone away from your body or use a wireless phone connected to a Bluetooth® or other wireless devices). Exposure to very loud sound has also been associated in some studies with tinnitus (a ringing in the ear), hypersensitivity to sound and distorted hearing. Individual susceptibility to noise-induced hearing loss and other potential hearing problems varies. The amount of sound produced by a portable audio device varies depending on the nature of the sound, the device, the device settings and the headphones. You should follow some commonsense recommendations when using any portable audio device:
hearing loss might cause unsafe volumes to sound normal.

• Do not listen at any volume that causes you discomfort. If you experience ringing in your ears, hear muffled speech or experience any temporary hearing difficulty after listening to your portable audio device, discontinue use and consult your doctor.

FCC COMPLIANCE INFORMATION
This device complies with Part 15 of FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received. Including interference that may cause undesired operation.

INFORMATION TO THE USER
This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
• Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet of a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for assistance.

CAUTION: Changes or modification not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment. Connecting of peripherals requires the use of grounded shielded signal cables.

INFORMATION ABOUT SAFEGUARDING HANDSETS
We encourage customers to take appropriate measures to secure their handsets and invite them to take advantage of the features available on this handset to help secure it from theft and/or unauthorized use and access. This handset has a locking function (e.g., user-defined codes or patterns) that can serve as a first line of defense against unauthorized use or access to stored information. Your service provider may also offer remote locking and wiping capabilities as an additional service against theft, contact your service provider for availability of this service.
