Getting started

About this User guide

This is the Xperia™ E4g Dual User guide for the Android™ 4.4.4 software version. If you’re not sure which software version your device is running, you can check it via the Settings menu. For more information about software updates, see Updating your device on page 112.

To check the current software version of your device

1. From your Homescreen, tap .
2. Find and tap Settings > About phone > Android version.

Device overview
1. Charging/Notification light
2. Front camera lens
3. Proximity/Light sensor
4. Ear speaker
5. Power key
6. Volume/Zoom key
7. Main microphone
8. Second microphone
9. Camera light
10. Main camera lens
11. Headset jack
12. Port for charger/USB cable
13. Strap hole
14. Loudspeaker

Assembly

A protective plastic sheet is attached to the screen. You should peel off this sheet before using the touchscreen. Otherwise, the touchscreen might not function properly.

To remove the back cover

• Insert a fingernail into the gap (as shown in the illustration) and lift up the cover.

To attach the back cover

1. Place the back cover over the back of the device, then press down on the bottom corners to lock them into place.
2. Moving from bottom to top, press down the sides of the cover until the cover clicks into place.

To insert the micro SIM cards

• Insert the micro SIM cards into the corresponding slots with the gold-colored contacts facing down.

You must use a micro SIM card for your device to work correctly. Some standard-size SIM cards allow you to detach an integrated micro SIM card. Once you detach the micro SIM card from the standard-size SIM card, you cannot reattach it and use the standard-size SIM card again. If you do not have a micro SIM card, or if your current SIM card does not contain a
detachable micro SIM card, contact your service provider for information on how to collect or exchange your SIM card.

To insert a memory card

1. Remove the back cover.
2. Insert the memory card into the memory card slot, with the gold-colored contacts facing down.

To remove the micro SIM cards

1. Detach the back cover.
2. Drag out the micro SIM cards from their slots and remove them fully.
To remove the memory card

1. Turn off the phone, or unmount the memory card from **Settings > Storage > Unmount SD card**.
2. Remove the back cover, then draw the memory card outward to remove it.

**Screen protection**

! Before using your device, remove the transparent protection film by pulling up on the protruding tab.

It is recommended to protect your device with a Sony-branded screen cover or protector intended for your Xperia™ model. The use of third party screen protection accessories may prevent your device from working by covering sensors, lenses, speakers, or microphones and it can invalidate the warranty.

**Starting your device for the first time**

The first time you start your device, a setup guide opens to help you configure basic settings, sign in to online accounts, and personalize your device. For example, if you have a Sony Entertainment Network account, you can sign in to it here and get set up straight away.

👉 You can also access the setup guide later from the Settings menu.

**To turn on the device**

! Make sure the battery is charged for at least 30 minutes before you turn on the device for the first time.
Press and hold down the power key until the device vibrates.
Enter your SIM card PIN when requested, then tap .
Wait a while for the device to start.

Your SIM card PIN is initially supplied by your service provider, but you can change it later from the Settings menu. To correct a mistake made while entering your SIM card PIN, tap .

To turn off the device
Press and hold down the power key until the options menu opens.
In the options menu, tap Power off.
Tap OK.

It may take a while for the device to shut down.

Why do I need a Google™ account?
Your Xperia™ device from Sony runs on the Android™ platform developed by Google™. A range of Google™ applications and services is available on your device when you purchase it, for example, Gmail™, Google Maps™, YouTube™ and the Play Store™ application, which gives you access to the Google Play™ online store for downloading Android™ applications. To get the most out of these services, you need a Google™ account. For example, a Google™ account is mandatory if you want to:

- Download and install applications from Google Play™.
- Synchronize email, contacts and the calendar using Gmail™.
- Chat with friends using the Hangouts™ application.
- Synchronize your browsing history and bookmarks using the Google Chrome™ web browser.
- Identify yourself as the authorized user after a software repair using Xperia™ Companion.
- Remotely find, lock or clear a lost or stolen device using the my Xperia™ or Android™ Device Manager services.

For more information about Android™ and Google™, go to http://support.google.com.

It is crucial that you remember your Google™ account username and password. In some situations, you may need to identify yourself for security reasons using your Google™ account. If you fail to give your Google™ username and password in such situations, your device is locked. Also, if you have more than one Google™ account, make sure to enter the details for the relevant account.

To set up a Google™ account on your device
From your Homescreen, tap .
Find and tap Settings > Add account > Google.
Follow the registration wizard to create a Google™ account, or sign in if you already have an account.

You can also sign in to or create a Google™ account from the setup guide the first time you start your device. Or you can go online and create an account at www.google.com/accounts.

Charging your device
Your device has an embedded, rechargeable battery that should be replaced only by Sony or an authorized Sony repair center. You should never try to open or take apart this device yourself. Opening the device can cause damage that will void your warranty.

The battery is partly charged when the device is shipped from the factory. Depending on how long it has been in the box before you purchased it, the battery level may be quite low. It is therefore recommended that you charge the battery for at least 30 minutes before starting up your device for the first time. You can still use your device while it is charging. Read more about the battery and how to improve the performance in Battery and power management on page 114.
To charge your device

1. Plug the charger into a power outlet.
2. Plug one end of the USB cable into the charger (or into the USB port of a computer).
3. Plug the other end of the cable into the micro USB port on your device, with the USB symbol facing up. The notification light illuminates when charging begins.
4. When the device is fully charged, disconnect the cable from your device by pulling it straight outward. Make sure not to bend the connector.

If the battery is completely discharged, it may take a few minutes before the notification light illuminates and the charging icon appears.

### Battery notification light status

Learning the basics

Using the touchscreen

Tapping

- Open or select an item.
- Mark or unmark a checkbox or option.
- Enter text using the on-screen keyboard.

Touching and holding

- Move an item.
- Activate an item-specific menu.
- Activate selection mode, for example, to select several items from a list.
Pinching and spreading

- Zoom in or out on a web page, a photo, or a map.

Swiping

- Scroll up or down a list.
- Scroll left or right, for example, between Home screen panes.
Flicking

- Scroll quickly, for example, in a list or on a web page. You can stop the scrolling movement by tapping the screen.

Locking and unlocking the screen

When your device is on and left idle for a set period of time, the screen darkens to save battery power and locks automatically. This lock prevents unwanted actions on the touchscreen when you are not using it. When you buy your device, a basic screen swipe lock is already set. In other words, you have to swipe up or down on the screen to unlock it. You can later change the security settings and add other kinds of locks. See Screen lock on the 39 page.

To activate the screen
- Briefly press the power key.

To lock the screen
- When the screen is active, briefly press the power key.

Home screen

The Homescreen is the starting point for using your device. It's similar to the desktop on a computer screen. Your Home screen can have up to seven panes, which extend beyond the regular screen display width. The number of Home screen panes is represented by a series of dots at the lower part of the Home screen. The highlighted dot shows the pane that you are currently in.
To go to the Home screen

• Press 

To browse the Home screen

Home screen panes

You can add new panes to your Home screen (up to a maximum of seven panes) and delete panes. You can also set the pane that you want to use as the main Home screen pane.

To set a pane as the main Home screen pane

1  Touch and hold an empty area on your Homescreen until the device vibrates.
2  Flick left or right to browse to the pane that you want to set as your main Home screen pane, then tap 
   at the top corner of the pane.

To add a pane to your Home screen

1  Touch and hold an empty area on your Homescreen until the device vibrates.
2  Flick left or right to browse the panes, then tap 

This is an Internet version of this publication. © Print only for private use.
To delete a pane from your Home screen

1. Touch and hold an empty area on your Homescreen until the device vibrates.
2. Flick left or right to browse to the pane that you want to delete, then tap \ canceller. \n
Application screen

The Application screen, which you open from the Homescreen, contains the applications that come pre-installed on your device as well as applications that you download.

To view all applications on the Application screen

1. From your Home screen, tap the Apps button.
2. Flick left or right on the Application screen.

To open an application from the Application screen

• Flick left or right to find the application, then tap the application.

To open the Application screen menu

• When the Application screen is open, drag the left edge of the screen to the right.

To move an application on the Application screen

1. To open the Application screen menu, drag the left edge of the Application screen to the right.
2. Make sure Custom order is selected under SHOW APPS.
3. Touch and hold the application until it magnifies and the device vibrates, then drag it to the new location.

To add an application shortcut to the Home screen

1. From the Application screen, touch and hold an application icon until the screen vibrates, then drag the icon to the top of the screen. The Home screen opens.
2. Drag the icon to the desired location on the Home screen, then release your finger.

To arrange applications on the Application screen

1. To open the Application screen menu, drag the left edge of the Application screen to the right.
2. Select the desired option under SHOW APPS.

To search for an application from the Application screen

1. To open the Application screen menu, drag the left edge of the Application screen to the right.
2. Tap Search apps.
3. Enter the name of the application you want to search for.
To uninstall an application from the Application screen

1. To open the Application screen menu, drag the left edge of the Application screen to the right.
2. Tap **Uninstall**. All uninstallable applications are indicated by **X**.
3. Tap the application that you want to uninstall, then tap **Uninstall**.

**Navigating applications**

You can navigate between applications using the navigation keys, the favorites bar, and the recently used applications window, which lets you switch easily between all recently used applications. Some applications are closed when you press ✅ to exit while others are paused or continue to run in the background. If the application is paused or runs in the background, you can continue where you left off the next time you open the application.

1. **Recently used applications window** – Open a recently used application
2. **Favorites bar** – Use a shortcut to access applications or widgets
3. **Task navigation key** – Open the recently used applications window and the favorites bar
4. **Home navigation key** – Exit an application and go back to the Home screen
5. **Back navigation key** – Go back to the previous screen within an application or close the application

**To open the recently used applications window**

• Press ✅.

**To close all the recently used applications**

• Tap ✅ and then tap **Close all**.

**To open a menu in an application**

• While using the application, press ✅.

A menu is not available in all applications.

**Small apps**

Small apps are miniature apps that run on top of other applications on the same screen, to enable multi-tasking. For example, you can have a webpage open showing details of currency exchange rates, and then open the Calculator small app on top of it and...
perform calculations. You can access your small apps via the favorites bar. To download more small apps, go to Google Play™.

To open a small app
1 To make the favorites bar appear, press 📲.
2 Tap the small app that you want to open.

💡 You can open several small apps at the same time.

To close a small app
- Tap ✗ on the small app window.

To download a small app
1 From the favorites bar, tap ↑, then tap 🔁 and tap 📥.
2 Search for the small app that you want to download, then follow the instructions to download it and complete the installation.

To move a small app
- When the small app is open, touch and hold the top left corner of the small app, then move it to the desired location.

To minimize a small app
- When the small app is open, touch and hold the top left corner of the small app, then drag it to the right edge or to the bottom edge of the screen.

To rearrange the small apps in the favorites bar
- Touch and hold a small app and drag it to the desired position.

To remove a small app from the favorites bar
1 Touch and hold a small app, then drag it to 📲.
2 Tap OK.

To restore a previously removed small app
1 Open the favorites bar, then tap ↑.
2 Touch and hold the small app you want to restore, then drag it into the favorites bar.

To add a widget as a small app
1 To make the favorites bar appear, press 📲.
2 Tap ↑ > + > 🌋.
3 Select a widget.
4 Enter a name for the widget, if desired, then tap OK.

Widgets
Widgets are small applications that you can use directly on your Homescreen. They also function as shortcuts. For example, the Weather widget allows you to see basic weather information directly on your Homescreen. But when you tap the widget, the full Weather application opens. You can download additional widgets from Google Play™.
To add a widget to the Home screen
1 Touch and hold an empty area on your Homescreen until the device vibrates, then tap **Widgets**.
2 Find and tap the widget that you want to add.

To resize a widget
1 Touch and hold a widget until it magnifies and the device vibrates, then release the widget. If the widget can be resized, for example, the Calendar widget, then a highlighted frame and resizing dots appear.
2 Drag the dots inward or outward to shrink or expand the widget.
3 To confirm the new size of the widget, tap anywhere on the Homescreen.

To move a widget
• Touch and hold the widget until it magnifies and the device vibrates, then drag it to the new location.

To remove a widget
• Touch and hold the widget until it magnifies and the device vibrates, then drag it to **X** on the top of the screen.

**Shortcuts and folders**
Use shortcuts and folders to manage your applications and keep your Home screen tidy.
To add an application shortcut to your Home screen
1. Touch and hold an empty area on your Home screen until the device vibrates and the customization menu appears.
2. In the customization menu, tap Apps.
3. Scroll through the list of applications and select an application. The selected application gets added to the Home screen.

In step 3, alternatively, you can tap Shortcuts and then select an application from the list available. If you use this method to add shortcuts, some of the applications available allow you to add specific functionality to the shortcut.

To move an item on the Home screen
• Touch and hold the item until it magnifies and the device vibrates, then drag the item to the new location.

To remove an item from the Home screen
• Touch and hold an item until it magnifies and the device vibrates, then drag the item to ✗ on the top of the screen.

To create a folder on the Home screen
• Touch and hold an application icon or a shortcut until it magnifies and the device vibrates, then drag and drop it on top of another application icon or shortcut.

To add items to a folder on the Home screen
• Touch and hold an item until it magnifies and the device vibrates, then drag the item to the folder.

To rename a folder on the Home screen
1. Tap the folder to open it.
2. Tap the folder’s title bar to show the Folder name field.
3. Enter the new folder name and tap Done.

Background and themes
You can adapt the Home screen to your own style using wallpapers and different themes. You can also change the wallpaper on the lock screen.

To change your Home screen wallpaper
1. Touch and hold an empty area on your Home screen until the device vibrates.
2. Tap Wallpapers and select an option.
To set a theme
1 Touch and hold an empty area on your Homescreen until the device vibrates.
2 Tap Themes.
3 Select an option and follow the instructions in your device.

When you change a theme, the background also changes in some applications.

To change the wallpaper for the lockscreen
1 From your Homescreen, tap 📷.
2 Find and tap Settings > Personalization > Lock Screen.
3 Select an option, then follow the instructions to change your wallpaper.

Taking a screenshot
You can capture still images of any screen on your device as a screenshot. Screenshots you take are automatically saved in Album.

To take a screenshot
1 Press and hold down the power key until a prompt window appears.
2 Tap *

You can also take the screenshot by pressing the power key and volume down key at the same time until you hear a clicking sound.

To view your screenshot
- Drag the status bar fully downwards, then tap the screenshot you want to view.

You can also view your screenshots by opening the Album application.

Status and notifications
The icons in the status bar inform you of events such as new messages and calendar notifications, activities in progress such as file downloads, and status information such as battery level and signal strength. You can drag down the status bar to open the Notification panel and handle your notifications. You can also customize the icons and notifications by selecting which system icons to display in the status bar and selecting apps that are allowed to send notifications.

To open or close the Notification panel

To take action on a notification
- Tap the notification.
To dismiss a notification from the Notification panel
• Place your finger on a notification and flick left or right.

To clear all notifications from the Notification panel
• Tap Clear.

Notification light
The notification light informs you about battery status and some other events. For example, a flashing white light means there is a new message or a missed call.

**To manage notifications**

1. From your Homescreen, tap 📚.
2. Find and tap **Settings > Personalization > Manage notifications**.
3. Mark the checkboxes for the apps that are allowed to send notifications.

**Application overview**

- Use the Alarm and clock application to set various kinds of alarms.
- Use your web browser to navigate and view web pages and manage bookmarks, text and images.
- Use the Calculator application to perform basic calculations.
- Use the Calendar application to keep track of events and manage your appointments.
- Use the camera to take photos and record video clips.
- Use the Contacts application to manage phone numbers, email addresses, and other information related to your contacts.
- Access your downloaded applications, documents and pictures.
- Use the Email application to send and receive emails through both private and corporate accounts.
- Use the Facebook™ application to engage in social networking with friends, family members, and coworkers around the world.
- Browse and listen to FM radio stations.
- Use the Album application to view and work with your photos and videos.
- Use the Gmail™ application to read, write, and organize email messages.
- Search for information in your device and on the web.
- View your current location, find other locations, and calculate routes using Google Maps™.
- Go to Google Play™ to download free and paid applications for your device.
- Use the Messaging application to send and receive text and multimedia messages.
- Use the Movies application to play videos on your device and share content with your friends.
- Use the Walkman® application to organize and play music, audio books, and podcasts.
- View news stories and weather forecasts.
Make phone calls by dialing the number manually, or by using the smart dial function.

Optimize settings to suit your own requirements.

Use the Hangouts™ application to chat with friends online.

Identify music tracks that you hear playing in your surroundings, and get artist, album, and other info.

Use YouTube™ to share and view videos from around the world.

Use the Support application to access user support in the device. For example, you can access a User guide, troubleshooting information, plus tips and tricks.

Download and install new applications and updates.

Some applications are not supported or listed by all networks and/or service providers in all areas.
Downloading applications

Downloading applications from Google Play™

Google Play™ is the official online Google store for downloading applications, games, music, movies, and books. It includes both free and paid applications. Before you start downloading from Google Play™, make sure that you have a working Internet connection, preferably over Wi-Fi® to limit data traffic charges.

To use Google Play™, you need to have a Google™ account. Google Play™ may not be available in all countries or regions.

To download an application from Google Play™

1. From the Homescreen, tap 🎉.
2. Find and tap Play Store.
3. Find an item you wish to download by browsing categories, or by using the search function.
4. Tap the item to view its details, and follow the instructions to complete the installation.

Some applications may need to access data, settings, and various functions on your device in order to work properly. Only install and give permissions to applications you trust.

You can view the permissions granted to a downloaded application by tapping the application under Settings > Apps.

Downloading applications from other sources

When your device is set to allow downloads from sources other than Google Play™, you can download applications directly from other websites by following the relevant download instructions.

Installing applications of unknown or unreliable origin can damage your device. Only download applications from reliable sources. Contact the application provider if you have any questions or concerns.

To allow the download of applications from other sources

1. From your Homescreen, tap 🎉.
2. Find and tap Settings > Security.
3. Mark the Unknown sources checkbox.
4. Tap OK.

Some applications may need to access data, settings, and various functions on your device in order to work properly. Only install and give permissions to applications you trust.

You can view the permissions granted to a downloaded application by tapping the application under Settings > Apps.
Internet and networks

Browsing the web

The Google Chrome™ web browser for Android™ devices comes pre-installed in most markets. Go to http://support.google.com/chrome and click the "Chrome for Mobile" link to get more detailed information about how to use this web browser.

To browse with Google Chrome™

1. From your Homescreen, tap 🌐.
2. Find and tap 🌐.
3. If you are using Google Chrome™ for the first time, select to either sign in to a Google™ account or browse with Google Chrome™ anonymously.
4. Enter a search term or web address in the search and address field, then tap Go on the keyboard.

Internet and MMS settings

To send multimedia messages, or to access the Internet when there is no available Wi-Fi® network, you must have a working mobile data connection with the correct Internet and MMS (Multimedia Messaging Service) settings. Here are some tips:

- For most mobile networks and operators, Internet and MMS settings come pre-installed on your device. You can then start using the Internet and send multimedia messages right away.
- In some cases, you get the option to download Internet and MMS settings the first time you turn on your device when a SIM card is inserted. It is also possible to download these settings later from the Settings menu.
- You can manually add, change or delete Internet and MMS settings on your device at any time. If you change or delete an Internet or MMS setting by mistake, download the Internet and MMS settings again.
- If you cannot access the Internet over a mobile network or if multimedia messaging is not working, even though the Internet and MMS settings have been downloaded successfully to your device, refer to the troubleshooting tips for your device at www.sonymobile.com/support/ for network coverage, mobile data, and MMS issues.

To download Internet and MMS settings

1. From your Homescreen, tap 🌐.
2. Find and tap Settings > More… > Internet settings.
3. Select the SIM card, or SIM cards, for which you want to download Internet and MMS settings.
4. Tap Accept. Once the settings have been downloaded successfully, ✅ appears in the status bar and mobile data is turned on automatically.

If the settings cannot be downloaded to your device, check the signal strength of your mobile network. Move to an open location free from obstructions or get close to a window and then try again.

To check whether mobile data is turned on or off

1. From your Homescreen, tap 🌐.
2. Find and tap Settings > More… > Mobile networks.
3. Select a SIM card.
4. Check whether the Cellular data traffic checkbox is marked or not.
To add Internet and MMS settings manually
1 From your Homescreen, tap 📱.
2 Find and tap Settings > More… > Mobile networks.
3 Select a SIM card.
4 Tap Access Point Names > ±.
5 Tap Name and enter a name as desired.
6 Tap APN and enter the access point name.
7 Enter all other information as required. If you don’t know what information is required, contact your network operator for more details.
8 When you’re done, tap †, then tap SAVE.
9 To select the APN that you have just added, tap the radio button beside the name of the APN. Once selected, this APN becomes the default APN for Internet and MMS services.

To view the downloaded Internet and MMS settings
1 From your Homescreen, tap 📱.
2 Find and tap Settings > More… > Mobile networks.
3 Select a SIM card.
4 Tap Access Point Names.
5 To view more details, tap any of the available items.

❗ If you have several available connections, the active network connection is indicated by a marked button 📱.

Wi-Fi®

Use Wi-Fi® connections to surf the Internet, download applications, or send and receive email. Once you have connected to a Wi-Fi® network, your device remembers the network and automatically connects to it the next time you come within range.

Some Wi-Fi® networks require you to log in to a web page before you can get access. Contact the relevant Wi-Fi® network administrator for more information.

Available Wi-Fi® networks may be open or secured:
• Open networks are indicated by 🌐 next to the Wi-Fi® network name.
• Secured networks are indicated by 🗝 next to the Wi-Fi® network name.

 كافة من افتحت من الشبكات التي لا تبث اسم الشبكة (SSID). إذا كنت تعلم اسم الشبكة، يمكنك إضافتها بدونื่شانية إلى قائمة الشبكات المتاحة من Wi-Fi®.

To turn on Wi-Fi®
1 From your Homescreen, tap 📱.
2 Find and tap Settings.
3 Drag the slider beside Wi-Fi to the right to turn on the Wi-Fi® function.
❗ It may take a few seconds before Wi-Fi® is enabled.

To connect to a Wi-Fi® network automatically
1 From your Homescreen, tap 📱.
2 Find and tap Settings.
3 Tap Wi-Fi. All available Wi-Fi® networks are displayed.
4 Tap a Wi-Fi® network to connect to it. For secured networks, enter the relevant password. 🌐 is displayed in the status bar once you are connected.

💡 To search for new available networks, tap †, then tap Scan. If you cannot connect to a Wi-Fi network successfully, refer to the relevant troubleshooting tips for your device at www.sonymobile.com/support/.
To add a Wi-Fi® network manually
1. From your Homescreen, tap 📲.
2. Find and tap Settings > Wi-Fi.
3. Tap ☑.
4. Enter the Network name (SSID) information.
5. To select a security type, tap the Security field.
6. If required, enter a password.
7. To edit some advanced options such as proxy and IP settings, mark the Show advanced options checkbox and then edit as desired.
8. Tap Save.

Contact your Wi-Fi® network administrator to get the network SSID and password.

Increasing Wi-Fi® signal strength
There are a number of things you can do to increase the strength of a Wi-Fi® signal:
• Move your device closer to the Wi-Fi® access point.
• Move the Wi-Fi® access point away from any potential obstructions or interference.
• Don’t cover the Wi-Fi® antenna area of your device (the highlighted area in the illustration).

Wi-Fi® settings
When you are connected to a Wi-Fi® network or when there are Wi-Fi® networks available in your vicinity, it is possible to view the status of these networks. You can also enable your device to notify you whenever an open Wi-Fi® network is detected.

If you are not connected to a Wi-Fi® network, your device uses a cellular data connection to access the Internet (if you have set up and enabled a cellular data connection on your device). By adding a Wi-Fi® sleep policy, you can specify when to switch from Wi-Fi® to cellular data.

To enable Wi-Fi® network notifications
1. Turn on Wi-Fi®, if it is not already on.
2. From your Homescreen, tap 📲.
3. Find and tap Settings > Wi-Fi.
4. Press ☑.
5. Tap Advanced.
6. Mark the Network notification checkbox.

To view detailed information about a connected Wi-Fi® network
1. From the Homescreen, tap 📲.
2. Find and tap Settings > Wi-Fi.
3. Tap the Wi-Fi® network that you are currently connected to. Detailed network information is displayed.
To add a Wi-Fi® sleep policy
1. From the Homescreen, tap.
2. Find and tap Settings > Wi-Fi.
3. Press.
4. Tap Advanced.
5. Tap Keep Wi-Fi on during sleep.
6. Select an option.

Sharing your mobile data connection
You can share your device’s mobile data connection with a single computer using a USB cable. This process is called USB tethering. You can also share your device’s data connection with up to eight other devices at once by turning your device into a portable Wi-Fi® hotspot. When your device’s mobile data connection is successfully shared, the sharing devices can use your device’s data connection, for example, to surf the Internet, download applications, or send and receive emails.

!” You may need to prepare your computer to establish a network connection via USB cable. Go to www.android.com/tether to get the most current information.

To share your data connection using a USB cable
1. Deactivate all USB cable connections to your device.
2. Using the USB cable that came with your device, connect your device to a computer.
3. From your Homescreen, tap.
4. Find and tap Settings > More... > Tethering & portable hotspot.
5. Mark the USB tethering checkbox, then tap OK if prompted. 📵 is displayed in the status bar once you are connected.
6. To stop sharing your data connection, unmark the USB tethering checkbox or disconnect the USB cable.

!” You cannot share your device's data connection and SD card over a USB cable at the same time.

To use your device as a portable Wi-Fi® hotspot
1. From your Homescreen, tap.
2. Find and tap Settings > More... > Tethering & portable hotspot.
3. Tap Portable Wi-Fi hotspot settings > Configure Wi-Fi hotspot.
4. Enter the Network name (SSID) information.
5. To select a security type, tap the Security field. If required, enter a password.
6. Tap Save.
7. Tap 📵 and mark the Portable Wi-Fi hotspot checkbox.
8. If prompted, tap OK to confirm. 📵 appears in the status bar once the portable Wi-Fi® hotspot is active.
9. To stop sharing your data connection via Wi-Fi®, unmark the Portable Wi-Fi hotspot checkbox.

To rename or secure your portable hotspot
1. From the Homescreen, tap.
2. Find and tap Settings > More... > Tethering & portable hotspot.
3. Tap Portable Wi-Fi hotspot settings > Configure Wi-Fi hotspot.
4. Enter the Network name (SSID) for the network.
5. To select a security type, tap the Security field.
6. If required, enter a password.
7. Tap Save.

Controlling data usage
You can keep track of the amount of data transferred to and from your device over your mobile data or Wi-Fi® connection during a given period. For example, you can view the amount of data used by individual applications. For data transferred over your mobile
data connection, you can also set data usage warnings and limits to avoid additional charges.

! Adjusting data usage settings can help you keep greater control over data usage but cannot guarantee the prevention of additional charges.

To turn data traffic on or off
1. From your Homescreen, tap 📱.
2. Find and tap Settings > Data usage.
3. Select the SIM card that you use for data traffic.
4. Drag the slider beside Mobile data traffic to turn data traffic on or off.

⚠️ When data traffic is turned off, your device can still establish Wi-Fi®, NFC and Bluetooth® connections.

To set a data usage warning
1. Make sure cellular data traffic is turned on.
2. From your Homescreen, tap 📱.
3. Find and tap Settings > Data usage.
4. Select a SIM card.
5. To set the warning level, drag the warning line to the desired value. You receive a warning notification when the amount of data traffic approaches the level you set.

To set a cellular data usage limit
1. Make sure cellular data traffic is turned on.
2. From your Homescreen, tap 📱.
3. Find and tap Settings > Data usage.
4. Select a SIM card.
5. Mark the Limit mobile data usage checkbox if it is not marked, then tap OK.
6. To set the cellular data usage limit, drag the corresponding line to the desired value.

⚠️ Once your cellular data usage reaches the set limit, cellular data traffic on your device gets turned off automatically.

To control the cellular data usage of individual applications
1. From your Homescreen, tap 📱.
2. Find and tap Settings > Data usage.
3. Select a SIM card.
4. Find and tap the desired application.
5. Mark the Restrict background data checkbox.
6. To access more specific settings for the application (if available), tap View app settings and make the desired changes.

⚠️ The performance of individual applications may be affected if you change the related data usage settings.

To check your data usage
1. From your Homescreen, tap 📱.
2. Find and tap Settings > Data usage.
3. Tap ⏰ then tap Show Wi-Fi usage.
4. To view information about the amount of data transferred via Wi-Fi®, tap the Wi-Fi tab.
5. To view the information about the amount of data transferred via mobile data connection, tap the SIM1 tab or the SIM2 tab.

Selecting mobile networks

Your device supports the use of two different networks at the same time. You can select from the following network mode combinations when two SIM cards are inserted in your device:
• One LTE network and one GSM network
• One WCDMA network and one GSM network
• Two GSM networks

For each SIM card, you can set your device to switch automatically between mobile networks depending on which mobile networks are available where you are. You can also manually set your device to use a particular mobile network mode for each SIM card, for example, WCDMA or GSM.

Different status icons are displayed in the status bar depending on the type or mode of network that you are connected to. Refer to Status icons on page 22 to see what the different status icons look like.

To select a network mode
1 From your Homescreen, tap 📲.
2 Find and tap Settings > More… > Mobile networks.
3 Select a SIM card.
4 Tap Network mode, then select a network mode.

To select another network manually
1 From your Homescreen, tap 📲.
2 Find and tap Settings > More… > Mobile networks.
3 Select a SIM card.
4 Tap Service providers.
5 Tap Search mode, then select Manual.
6 Select a network.

! If you select a network manually, your device will not search for other networks, even if you move out of range of the manually selected network.

To activate automatic network selection
1 From your Homescreen, tap 📲.
2 Find and tap Settings > More… > Mobile networks.
3 Select a SIM card.
4 Tap Service providers.
5 Tap Search mode > Select automatic.

Virtual private networks (VPNs)

Use your device to connect to virtual private networks (VPNs), which allow you to access resources inside a secured local network from a public network. For example, VPN connections are commonly used by corporations and educational institutions for users who need to access intranets and other internal services when they are outside of the internal network, for example, when they are traveling.

VPN connections can be set up in many ways, depending on the network. Some networks may require you to transfer and install a security certificate on your device. For detailed information about how to set up a connection to your virtual private network, contact the network administrator of your company or organization.

To add a virtual private network
1 From your Homescreen, tap 📲.
2 Find and tap Settings > More… > VPN.
3 Tap +.
4 Select the type of VPN to add.
5 Enter your VPN settings.
6 Tap Save.
To connect to a virtual private network
1 From your Homescreen, tap 
2 Find and tap Settings > More… > VPN.
3 In the list of available networks, tap the VPN you want to connect to.
4 Enter the required information.
5 Tap Connect.

To disconnect from a VPN
1 Tap the status bar to open the Notification panel.
2 Tap the notification for the VPN connection to turn it off.
Synchronizing data on your device

Synchronizing with online accounts

Synchronize your device with contacts, email, calendar events, and other information from online accounts, for example, email accounts such as Gmail™ and Exchange ActiveSync, Facebook™, Flickr™, and Twitter™. You can synchronize data automatically for all accounts by activating the auto-sync function. Or you can synchronize each account manually.

To set up an online account for synchronization
1. From your Homescreen, tap \( \text{Settings} \).
2. Tap \( \text{Settings} > \text{Add account} \), then select the account you want to add.
3. Follow the instructions to create an account, or sign in if you already have an account.

To synchronize manually with an online account
1. From your Homescreen, tap \( \text{Settings} \).
2. Under \( \text{Accounts} \), select the account type, then tap the name of the account you want to synchronize with. A list of items that can be synchronized with the account appears.
3. Mark the items you want to synchronize.
4. Tap \( \text{Sync now} \).

To remove an online account
1. From your Homescreen, tap \( \text{Settings} \).
2. Under \( \text{Accounts} \), select the account type, then tap the name of the account you want to remove.
3. Tap \( \text{Remove account} \), then tap \( \text{Remove account} \) again to confirm.

Synchronizing with Microsoft® Exchange ActiveSync®

Using a Microsoft Exchange ActiveSync account, you can access your corporate email messages, calendar appointments, and contacts directly on your device. After setup, you can find your information in the Mail, Calendar, and Contacts applications.

To set up an EAS account for synchronization
1. Make sure you have your domain and server details, provided by your corporate network administrator, available.
2. From your Homescreen, tap \( \text{Settings} \).
3. Tap \( \text{Settings} > \text{Add account} > \text{Exchange ActiveSync} \).
4. Enter your corporate email address and password.
5. Tap \( \text{Next} \). Your device begins to retrieve your account information. If a failure occurs, enter the domain and server details for your account manually and then tap \( \text{Next} \).
6. Tap \( \text{OK} \) to allow your corporate server to control your device.
7. Select what data you want to sync with your device, such as contacts and calendar entries.
8. If desired, activate the device administrator to allow your corporate server to control certain security features on your device. For example, you can allow your corporate server to set password rules and set storage encryption.
9. When the setup is done, enter a name for the corporate account.

! When you change the login password for an EAS account on your computer, you have to log in again to the EAS account on your device.
To change the settings of an EAS account
1. From your Homescreen, tap 📱.
2. Tap Mail, then tap ⌚.
3. Tap Settings and select an EAS account, then change the settings of the EAS account as desired.

To set a synchronisation interval for an EAS account
1. From your Homescreen, tap 📱.
2. Tap Mail, then tap ⌚.
3. Tap Settings and select an EAS account.
4. Tap Check frequency > Check frequency and select an interval option.

To remove an EAS account
1. From your Homescreen, tap 📱 > Settings.
2. Under Accounts, tap Exchange ActiveSync, then select the EAS account you want to remove.
3. Tap ⌚, then tap Remove account.
4. Tap Remove account again to confirm.
Basic settings

Accessing settings
View and change settings for your device from the Settings menu. The Settings menu is accessible from both the Application screen and the Quick settings panel.

To open the device settings menu from the Application screen
1. From your Homescreen, tap 📱.
2. Tap Settings.

To view information about your device
1. From your Homescreen, tap 📱.
2. Find and tap Settings > About phone.

To open the Quick settings panel
• Using two fingers, drag the status bar downward.

To select which settings to display on the Quick settings panel
1. Using two fingers, drag the status bar downward, then tap Edit.
2. In the bar at the bottom of the screen, touch and hold the icon for the quick setting that you want to add, then drag and drop it in the upper part of the screen.

To rearrange the Quick settings panel
1. Using two fingers, drag the status bar downward, then tap Edit.
2. Touch and hold an icon, then move it to the desired position.
3. Tap Done.

Sound, ringtone, and volume
You can adjust the ringtone volume for incoming calls and notifications as well as for music and video playback. You can also set your device to silent mode so that it doesn't ring when you're in a meeting.

To adjust the volume levels
1. From your Homescreen, tap 📱.
2. Find and tap Settings > Sound > Volumes.
3. Drag the volume sliders to the desired positions.

You can also press the volume key up or down to adjust the ringtone and media playback volume levels, even when the screen is locked.

To set your device to vibrate mode
• Press the volume key down until 🔊 appears in the status bar.

To set your device to silent mode
1. Press the volume key down until the device vibrates and 🔇 appears in the status bar.
2. Press the volume key down again. ■ appears in the status bar.

Press the volume key up to exit silent mode.

To set your device to vibrate and ring mode
1. From your Homescreen, tap 📱.
2. Find and tap Settings > Sound.
3. Mark the Vibrate when ringing checkbox.
To set a ringtone
1. From your Homescreen, tap 📱.
2. Find and tap Settings > Sound > Phone ringtone.
3. Select a SIM card.
4. Select an option from the list or tap 📥 and select a music file that is saved to your device.
5. To confirm, tap Done.

To select the notification sound
1. From your Homescreen, tap 📱.
2. Find and tap Settings > Sound > Notification sound.
3. Select an option from the list or tap 📥 and select a music file that is saved to your device.
4. To confirm, tap Done.

- Some applications have their own specific notification sounds, which you can select from the application settings.

To enable touch tones
1. From your Homescreen, tap 📱.
2. Find and tap Settings > Sound.
3. Mark the Dialpad touch tones and Touch sounds checkboxes.

SIM card protection
You can lock and unlock each SIM card that you use in your device with a PIN (Personal Identity Number). When a SIM card is locked, the subscription linked to the card is protected against misuse, meaning that you have to enter a PIN every time you start your device.

If you enter the PIN incorrectly more times than the maximum number of attempts allowed, your SIM card will become blocked. You then need to enter your PUK (Personal Unblocking Key) and a new PIN. Your PIN and PUK are supplied by your network operator.

To set up a SIM card lock
1. From the Homescreen, tap 📱.
2. Find and tap Settings > Security > Set up SIM card lock.
3. Select a SIM card.
4. Mark the Lock SIM card checkbox.
5. Enter the SIM card PIN and tap OK. The SIM card lock is now active and you will be prompted to enter this lock every time you restart the device.

To remove a SIM card lock
1. From the Homescreen, tap 📱.
2. Find and tap Settings > Security > Set up SIM card lock.
3. Select a SIM card.
4. Unmark the Lock SIM card checkbox.
5. Enter the SIM card PIN and tap OK.

To change the SIM card PIN
1. From the Homescreen, tap 📱.
2. Find and tap Settings > Security > Set up SIM card lock.
3. Select a SIM card.
4. Tap Change SIM PIN.
5. Enter the old SIM card PIN and tap OK.
6. Enter the new SIM card PIN and tap OK.
7. Retype the new SIM card PIN and tap OK.
To unlock a blocked SIM card using the PUK code

1. Enter the PUK code and tap ↵.
2. Enter a new PIN code and tap ↵.
3. Re-enter the new PIN code and tap ↵.

! If you enter an incorrect PUK code too many times, you need to contact your network operator to get a new SIM card.

Using multiple SIM cards

Your device works with one or two SIM cards inserted. You get incoming communication to both SIM cards and you can select from which number you want to place outgoing communication. Before you can use both SIM cards, you need to enable the SIM cards in the settings menu of your device. If both SIM cards are locked with a PIN code when you turn on your device, you can choose to only unlock and use one SIM card. In other words, you can bypass one locked SIM card.

You can also forward calls that come in on SIM card 1 to SIM card 2 when SIM card 1 is unreachable, and vice versa. This function is called Dual SIM reachability. You must enable it manually. See Forwarding calls on page 51.

To enable or disable the use of two SIM cards

1. From the Homescreen, tap 📲.
2. Find and tap Settings > Dual SIM settings.
3. Mark or unmark the SIM1 and SIM2 checkboxes.

To rename a SIM card

1. From the Homescreen, tap 📲.
2. Find and tap Settings > Dual SIM settings.
3. Select a SIM card and enter a new name for it.
4. Tap OK.

To bypass a locked SIM card when both SIM cards are locked

1. Turn on your device, and select the SIM card that you want to unlock.
2. Enter the relevant PIN code and tap ↵. The selected SIM card becomes unlocked.
3. When you are prompted to enter the PIN for the second SIM card, tap Skip. The Home screen appears and you can now use the device with one SIM card enabled.

To enable a locked SIM card

1. From the Homescreen, tap 📲.
2. Find and tap Settings > Dual SIM settings.
3. Select the SIM card that is locked.
4. Enter the relevant PIN code.

! You can also enable a locked SIM card from the Notification panel.

Screen settings

To adjust the screen brightness

1. From your Home screen, tap 📲.
2. Find and tap Settings > Display > Brightness.
3. Unmark the Adapt to lighting conditions checkbox if it is marked.
4. Drag the slider to adjust the brightness.

! Lowering the brightness level increases battery performance.
To set the screen to vibrate on touch
1 From your Homescreen, tap 
2 Find and tap Settings > Sound.
3 Mark the Vibrate on touch checkbox. The screen now vibrates when you tap soft keys and certain applications.

To adjust the idle time before the screen turns off
1 From your Homescreen, tap 
2 Find and tap Settings > Display > Sleep.
3 Select an option.

To turn off the screen quickly, briefly press the power key .

Smart backlight control
The smart backlight control keeps the screen on as long as the device is held in your hand. Once you put down the device, the screen turns off according to your sleep setting.

To turn on the Smart backlight control function
1 From your Home screen, tap .
2 Find and tap Settings > Display > Smart backlight control.
3 Drag the slider beside Smart backlight control to the right.

Daydream
Daydream is an interactive screen saver that automatically displays colors, photos or a slideshow while your device is docked or charging and the screen is idle.

To activate the Daydream screen saver
1 From your Homescreen, tap .
2 Find and tap Settings > Display > Daydream.
3 Drag the slider beside Daydream to the right.

To select content for the Daydream screen saver
1 From your Homescreen, tap .
2 Find and tap Settings > Display > Daydream.
3 Drag the slider beside Daydream to the right.
4 Select what you want to display when the screen saver is active.

To set when the Daydream screen saver starts
1 From your Homescreen, tap .
2 Find and tap Settings > Display > Daydream.
3 Drag the slider beside Daydream to the right.
4 To activate the Daydream screen saver immediately, tap Start now.
5 To set automatic activation options, tap When to daydream and select an option.

Screen lock
There are several ways to lock the screen. The security level of each lock type is listed below in order of weakest to strongest:

- **Swipe**
  - no protection, but you have quick access to the Homescreen
- **Bluetooth Unlock**
  - unlocks your device by using paired Bluetooth devices
- **Face Unlock**
  - unlocks your device when you look at it
- **Pattern**
  - draw a simple pattern with your finger to unlock your device
- **PIN**
- enter a numeric PIN of at least four digits to unlock your device
  • **Password**
  - enter an alpha-numeric password to unlock your device

⚠️ It is very important that you remember your screen unlock pattern, PIN, or password. If you forget this information, it may not be possible to restore important data such as contacts and messages.

**To change screen lock type**
1. From your Homescreen, tap 📱.
2. Find and tap **Settings > Security > Screen lock**.
3. Follow the instructions in your device and select another screen lock type.

**To unlock the screen using the Bluetooth® unlock feature**

⚠️ Make sure that your device and other Bluetooth® devices are paired before you use the Bluetooth® unlock feature. For more information about pairing, see *To pair your device with another Bluetooth® device on page 101*.

1. From your Home screen, tap 📱, then find and tap **Settings > Security**.
2. Tap **Screen lock > Bluetooth unlock**.
3. Tap **Continue** and select the device that you want to use to unlock the screen, then tap **Continue**.
4. Choose an option as the backup lock to unlock the screen when no Bluetooth® devices are connected.
5. In other Bluetooth® devices, find and tap the name of your device under **Settings > Bluetooth > Paired devices**. When **Connected** appears on the Bluetooth® devices, press the power key on your device immediately.

⚠️ If your device is disconnected from other Bluetooth® devices, you need to unlock the screen using a PIN or a Pattern.

**To set up the Face Unlock feature**
1. From your Homescreen, tap 📱 > **Settings > Security > Screen lock**.
2. Tap **Face Unlock**, then follow the instructions in your device to capture a photo of your face.
3. After your face is successfully captured, tap **Continue**.
4. Select a backup unlock method and follow the instructions in the device to complete the setup.

⚠️ For best results, capture your face in an indoor area that is well lit but not too bright, and hold the device at eye level.

**To unlock the screen using the Face Unlock feature**
1. Activate the screen.
2. Look at your device from the same angle you used to capture your Face Unlock photo.

⚠️ If the Face Unlock feature fails to recognize your face, you must use the backup unlock method to unlock the screen.

**To create a screen lock pattern**
1. From your Homescreen, tap 📱.
2. Find and tap **Settings > Security > Screen lock > Pattern**.
3. Follow the instructions on your device.

⚠️ If your lock pattern is rejected five times in a row when you try to unlock your device, you must wait 30 seconds and then try again.
To change the screen lock pattern

1. From your Home screen, tap 📱.
2. Find and tap **Settings > Security > Screen lock**.
3. Draw your screen unlock pattern.
4. Tap **Pattern** and follow the instructions on your device.

To create a screen lock PIN

1. From your Home screen, tap 📱.
2. Find and tap **Settings > Security > Screen lock > PIN**.
3. Enter a numeric PIN.
4. If necessary, tap ⬅️ to minimize the keyboard.
5. Tap **Continue**.
6. Re-enter and confirm your PIN.
7. If necessary, tap ⬅️ to minimize the keyboard.
8. Tap **OK**.

To create a screen lock password

1. From your Home screen, tap 📱 > **Settings > Security > Screen lock > Password**.
2. Enter a password.
3. If necessary, tap ⬅️ to minimize the keyboard.
4. Tap **Continue**.
5. Re-enter and confirm your password.
6. If necessary, tap ⬅️ to minimize the keyboard.
7. Tap **OK**.

To view notifications from the lock screen

1. From the lock screen, drag the status bar downwards.
2. Tap the notification that you want to view.

⚠️ You can only view notifications from the lock screen when you lock your screen with the Swipe mode.

### Language settings

You can select a default language for your device and change it again at a later time. You can also change the writing language for text input. See *Personalizing the Xperia keyboard* on page 46.

**To change the language**

1. From the Home screen, tap 📱.
2. Find and tap **Settings > Language & input > Language**.
3. Select an option.
4. Tap **OK**.

⚠️ If you select the wrong language and cannot read the menu texts, find and tap 📜️. Then select the text beside 📜️ and select the first entry in the menu that opens. You can then select the language you want.

### Date and time

You can change the date and time on your device.

**To set the date manually**

1. From the Home screen, tap 📱.
2. Find and tap **Settings > Date & time**.
3. Unmark the **Automatic date & time** checkbox, if it is marked.
4. Tap **Set date**.
5. Adjust the date by scrolling up and down.
6. Tap **Set**.
To set the time manually
1. From your Homescreen, tap
2. Find and tap Settings > Date & time.
3. Unmark the Automatic date & time checkbox if it is marked.
4. Tap Set time.
5. Scroll up or down to adjust the hour and minute.
6. If applicable, scroll up to change AM to PM, or vice versa.
7. Tap Set.

To set the time zone
1. From your Homescreen, tap
2. Find and tap Settings > Date & time.
3. Unmark the Automatic time zone checkbox, if it is marked.
4. Tap Select time zone.
5. Select an option.

Enhancing the sound output
You can enhance the sound output that comes from the speakers in your device using features such as Clear Phase™ and xLOUD™ technology.

Using Clear Phase™ technology
Use Clear Phase™ technology from Sony to automatically adjust the sound quality coming from your device’s internal speakers and get a cleaner, more natural sound.

To enhance the speaker sound quality using Clear Phase™
1. From your Homescreen, tap
2. Find and tap Settings > Sound.
3. Mark the Clear Phase™ checkbox.

! The activation of the Clear Phase™ feature has no effect on voice communication applications. For example, there is no change in the voice call sound quality.

Using xLOUD™ technology
Use xLOUD™ audio filter technology from Sony to enhance the speaker volume without sacrificing quality. Get a more dynamic sound as you listen to your favorite songs.

To enhance the speaker volume using xLOUD™
1. From your Homescreen, tap
2. Find and tap Settings > Sound.
3. Mark the xLOUD™ checkbox.

! The activation of the xLOUD™ feature has no effect on voice communication applications. For example, there is no change in the voice call sound quality.
Typing text

On-screen keyboard
You can enter text with the on-screen QWERTY keyboard by tapping each letter individually, or you can use the Gesture input feature and slide your finger from letter to letter to form words. If you prefer to use a smaller version of the on-screen keyboard and input text using only one hand, you can activate the one-handed keyboard instead.

You can select up to three languages for text input. The keyboard detects the language you are using and predicts the words for that language as you type. Some applications open the on-screen keyboard automatically, for example, email and text messaging applications.

1. Delete a character before the cursor.
2. Enter a carriage return or confirm text input.
3. Enter a space.
4. Personalize your keyboard. This key disappears after the keyboard is personalized.
5. Display numbers and symbols. For even more symbols, tap + symbol.
6. Switch between lower-case 🌞, upper-case 🌞, and caps 🌞. For some languages, this key is used to access extra characters in the language.

To display the on-screen keyboard to enter text
• Tap a text entry field.

To use the on-screen keyboard in landscape orientation
• When the on-screen keyboard is displayed, turn the device sideways.

⚠️ You may need to adjust the settings in some applications to enable landscape orientation.

To enter text character by character
1. To enter a character visible on the keyboard, tap the character.
2. To enter a character variant, touch and hold a regular keyboard character to get a list of available options, then select from the list. For example, to enter "é," touch and hold "e" until other options appear, then, while keeping your finger pressed on the keyboard, drag to and select "é."

To enter a period
• After you enter a word, double-tap the space bar.
To enter text using the Gesture input function
1 When the on-screen keyboard is displayed, slide your finger from letter to letter to trace the word that you want to write.
2 After you finish entering a word, lift up your finger. A word suggestion appears based on the letters that you have traced.
3 If the word that you want does not appear, tap $\text{X}$ to see other options and select accordingly. If the desired option does not appear, delete the entire word and trace it again, or enter the word by tapping each letter individually.

To change the Gesture input settings
1 When the on-screen keyboard is displayed, tap $\text{X}$.
2 Tap $\text{X}$, then tap Keyboard settings.
3 To activate or deactivate the Gesture input function, mark or unmark the Gesture input checkbox.

To use the one-handed keyboard
1 Open the on-screen keyboard in portrait mode, then tap $\text{X}$.
2 Tap $\text{X}$, then tap One-handed keyboard.
3 To move the one-handed keyboard to the left or right side of the screen, tap $\text{X}$ or $\text{X}$ accordingly.

$\text{X}$ To return to using the full on-screen keyboard, tap $\text{X}$.

Phonepad
The Phonepad is similar to a standard 12-key telephone keypad. It gives you predictive text and multi-tap input options. You can activate the Phonepad text input method via the keyboard settings. The Phonepad is only available in portrait orientation.

1 Choose a text input option. You can tap each character once and use word suggestions, or keep tapping the key until the desired character is selected.
2 Delete a character before the cursor.
3 Enter a carriage return or confirm text input.
4 Enter a space.
5 Display symbols and smileys.
6 Display numbers.
7 Change the character case and turn on the caps lock.

To open the Phonepad for the first time
1 Tap a text entry field, then tap $\text{X}$.
2 Tap $\text{X}$, then tap Keyboard settings.
3 Tap Portrait keyboard, then select the Phonepad option.
To enter text using the Phonepad

- When appears in the Phonepad, tap each character key only once, even if the letter you want is not the first letter on the key. Tap the word that appears or tap to view more word suggestions and select a word from the list.
- When appears in the Phonepad, tap the on-screen key for the character you want to enter. Keep tapping this button until the desired character is selected. Then do the same for the next character you want to enter, and so on.

To enter numbers using the Phonepad

- When the Phonepad is displayed, tap . A Phonepad with numbers appears.

To insert symbols and smileys using the Phonepad

1. When the Phonepad is displayed, tap . A grid with symbols and smileys appears.
2. Scroll up or down to view more options. Tap a symbol or smiley to select it.

**Entering text using voice input**

When you enter text, you can use the voice input function instead of typing the words. Just speak the words that you want to enter. Voice input is an experimental technology from Google™, and is available for a number of languages and regions.

**To enable voice input**

1. When you enter text using the on-screen keyboard, tap .
2. Tap , then tap Keyboard settings.
3. Mark the Google™ voice typing key checkbox.
4. Tap to save your settings. A microphone icon appears on your on-screen keyboard.

**To enter text using voice input**

1. Open the on-screen keyboard.
2. Tap . When appears, speak to enter text.
3. When you're done, tap again. The suggested text appears.
4. Edit the text manually if necessary.

To make the keyboard appear and enter text manually, tap .

**Editing text**

You can select, cut, copy and paste text as you write. You can access the editing tools by double-tapping the entered text. The editing tools then become available via an application bar.

**Application bar**

1. Close the application bar
2. Select all text
3. Cut text
4. Copy text
5. Paste text

only appears when you have text saved on the clipboard.
To select text
1 Enter some text, then double-tap the text. The word you tap gets highlighted by tabs on both sides.
2 Drag the tabs to the left or right to select more text.

To edit text
1 Enter some text, then double-tap the entered text to make the application bar appear.
2 Select the text that you want to edit, then use the tools in the application bar to make your desired changes.

Personalizing the Xperia keyboard
When entering text using the on-screen keyboard, you can access keyboard and other text input settings that help you, for example, to set options for writing languages, text prediction and correction, automatic spacing, and quick periods. The keyboard can use data from Email and other applications to learn your writing style. There is also a Personalization guide that runs you through the most basic settings, to get you started quickly.

To access the on-screen keyboard settings
1 When you enter text using the on-screen keyboard, tap 📂.
2 Tap ☐, then tap Keyboard settings and change the settings as desired.
3 To add a writing language for text input, tap Writing languages and mark the relevant checkboxes.
4 Tap OK to confirm.

To change the word suggestion settings
1 When you enter text using the on-screen keyboard, tap 📂.
2 Tap ☐, then tap Keyboard settings > Word suggestions.
3 Select an option.

To choose an input method
1 When you enter text using the on-screen keyboard, drag the status bar downward to open the Notification panel, then tap 📂.
2 Select an option.

To use your writing style
1 When you enter text using the on-screen keyboard, tap 📂.
2 Tap ☐, then tap Keyboard settings > Use my writing style and select a source.

To select a keyboard layout variant

! Layout variants for the on-screen keyboard may not be available for all writing languages.

1 When you enter text using the on-screen keyboard, tap 📂.
2 Tap ☐, then tap Keyboard settings.
3 Tap Writing languages, then tap ☐.
4 Select a keyboard layout variant.
5 Tap OK to confirm.
Calling

Making calls

You can make a call by manually dialing a phone number, by tapping a number saved in your contacts list, or by tapping the phone number in your call log view. You can also use the smart dial feature to quickly find numbers from your contacts list and call logs. To make a video call, you can use the Hangouts™ instant messaging and video chat application on your device. See Instant messaging and video chat on the 63 page.

1. Open your contacts list
2. View your call log entries
3. View your favorite contacts
4. View all contact groups saved to your device
5. Delete number
6. Dial pad
7. View more options
8. Call button
9. Hide or show the dialer

To make a call by dialing
1. From your Homescreen, tap 📞.
2. Find and tap Phone.
3. Enter the number of the recipient and tap 📞.

To make a call using smart dial
1. From your Homescreen, tap 📞.
2. Find and tap Phone.
3. Use the dialpad to enter letters or numbers that correspond to the contact you want to call. As you enter each letter or number, a list of possible matches appears.
4. Tap the contact you want to call.
To make an international call
1 From your Homescreen, tap 📞.
2 Find and tap Phone.
3 Touch and hold 0 until a “+” sign appears.
4 Enter the country code, area code (without the initial zeros) and phone number, then tap 😊.

To add a direct dial number to your Homescreen
1 Touch and hold an empty area on your Homescreen until the device vibrates and the customization menu appears.
2 In the customization menu, tap Apps > Shortcuts.
3 Scroll through the list of applications and select Direct dial.
4 Select the contact and the number that you want to use as the direct dial number.

Showing or hiding your phone number
You can select to show or hide your phone number on call recipients' devices when you call them.

To show or hide your phone number
1 From the Homescreen, tap 📞.
2 Find and tap Settings > Call.
3 Select a SIM card.
4 Tap Additional settings > Caller ID.

Receiving calls

To answer a call

To decline a call

To mute the ringtone for an incoming call
• When you receive the call, press the volume key.

Using the answering machine
You can use the answering machine application in your device to answer calls when you are busy or miss a call. You can enable the automatic answering function and determine how many seconds to wait before the calls get answered automatically. You can also manually route calls to the answering machine when you are too busy to answer them. And you can access messages left on your answering machine directly from your device.

Before using the answering machine, you must record a greeting message.

To record a greeting message for the answering machine
1 From your Homescreen, tap 📞.
2 Find and tap Settings > Call.
3 Select a SIM card.
4 Tap Answering Machine > Greetings.
5 Tap Record new greeting and follow the on-screen instructions.
To enable automatic answering
1. From your Homescreen, tap ☰.
2. Find and tap Settings > Call.

* If you don’t set a time delay for the automatic answering of calls, the default value is used.

To reject a call with the answering machine
1. When an incoming call arrives, drag Response options upward, then select Reject with Answering Machine.

To set a time delay for automatic answering
1. From your Homescreen, tap ☰.
2. Find and tap Settings > Call.
4. Tap Pick up after.
5. Adjust the time by scrolling up and down.
6. Tap Done.

To listen to messages on the answering machine
1. From your Homescreen, tap ☰.
2. Find and tap Settings > Call.
3. Select a SIM card.
5. Select the voice message you want to listen to.

* You can also listen to answering machine messages directly from the call log by tapping ☰.

Rejecting a call with a text message
You can reject a call with a text message. When you reject a call with such a message, the message is automatically sent to the caller and stored in the Messaging conversation with the contact.
You can select from a number of predefined messages available on your device, or you can create a new message. You can also create your own personalized messages by editing the predefined ones.

To reject a call with a text message
1. When an incoming call arrives, drag Response options upward, then tap Reject with message.
2. Select a predefined message or tap ☰ and write a new message.

To reject a second call with a text message
1. When you hear repeated beeps during a call, drag Reject with message upward.
2. Select a predefined message or tap ☰ and write a new message.

To edit the text message used to reject a call
1. From your Homescreen, tap ☰.
2. Find and tap Settings > Call > General > Reject call with message.
3. Tap the message that you want to edit, then make the necessary changes.
4. Tap OK.
### Ongoing calls

**To change the ear speaker volume during a call**
- Press the volume key up or down.

**To activate the screen during a call**
- Briefly press ( ).

### Using the call log

In the call log, you can view missed calls 📞, received calls 📞 and dialed calls 📞.

**To view your missed calls**
1. When you have missed a call, 📞 appears in the status bar. Drag the status bar downwards.
2. Tap **Missed call**.

**To call a number from your call log**
1. From your Homescreen, tap 📞.
2. Find and tap **Phone**. The call log view appears on the upper part of the screen.
3. To call a number directly, tap the number. To edit a number before calling, touch and hold the number, then tap **Edit number before call**.

! You can also call a number by tapping 📞 > **Call back**.

**To add a number from the call log to your contacts**
1. From your Homescreen, tap 📞.
2. Find and tap **Phone**. The call log view appears on the upper part of the screen.
3. Touch and hold the number, then tap **Add to Contacts**.
4. Tap the desired contact, or tap **Create new contact**.
5. Edit the contact details and tap **Done**.
To hide the call log
1. From your Homescreen, tap 📲.
2. Find and tap Phone.
3. Tap ⏯️ > Hide call log.

Forwarding calls
You can forward calls, for example, to another phone number, or to an answering service. You can also forward calls that come in on SIM card 1 to SIM card 2 when SIM card 1 is unreachable, and vice versa. This function is called Dual SIM reachability. You must enable it manually.

To forward calls
1. From your Homescreen, tap 📲.
2. Find and tap Settings > Call.
3. Select a SIM card.
4. Tap Call forwarding and select an option.
5. Enter the number you want to forward calls to, then tap Enable.

To turn off call forwarding
1. From your Homescreen, tap 📲.
2. Find and tap Settings > Call.
3. Select a SIM card.
4. Tap Call forwarding.
5. Select an option, then tap Disable.

To enable the Dual SIM reachability function
1. From your Homescreen, tap 📲.
2. Find and tap Settings > Dual SIM settings > Dual SIM reachability.
3. Drag the slider beside Dual SIM reachability to the right.

Restricting calls
You can block all or certain categories of incoming and outgoing calls. If you have received a PIN2 code from your service provider, you can also use a list of Fixed Dialing Numbers (FDNs) to restrict outgoing calls. If your subscription includes a voicemail service, you can send all incoming calls from a specific contact directly to voicemail. If you want to block a certain number, you can go to Google Play™ and download applications that support this function.

FDN is not supported by all network operators. Contact your network operator to verify if your SIM card or network service supports this feature.

To block incoming or outgoing calls
1. From your Homescreen, tap 📲.
2. Find and tap Settings > Call.
3. Select a SIM card.
4. Tap Call Barring, then select an option.
5. Enter the password and tap Enable.

When you set up call blocking for the first time, you need to enter a password to activate the call blocking function. You must use this same password later if you want to edit call blocking settings.
To enable or disable fixed dialing
1 From your Homescreen, tap 📞.
2 Find and tap Settings > Call.
3 Select a SIM card.
4 Tap Fixed dialing numbers.
5 Tap Activate fixed dialing or Deactivate fixed dialing.
6 Enter your PIN2 and tap OK.

To access the list of accepted call recipients
1 From your Homescreen, tap 📞.
2 Find and tap Settings > Call.
3 Select a SIM card.
4 Tap Fixed dialing numbers > Fixed dialing numbers.

To change the SIM card PIN2
1 From the Homescreen, tap 📞.
2 Find and tap Settings > Call.
3 Select a SIM card.
4 Tap Fixed dialing numbers > Change PIN2.
5 Enter the old SIM card PIN2 and tap OK.
6 Enter the new SIM card PIN2 and tap OK.
7 Confirm the new PIN2 and tap OK.

To send incoming calls from a specific contact directly to voicemail
1 From your Homescreen, tap 📞.
2 Find and tap 📞.
3 Select the contact for which you want to direct all incoming calls automatically to voicemail.
4 Tap 📞 > 📧.
5 Mark the checkbox beside All calls to voicemail.
6 Tap Done.

Multiple calls
If you have activated call waiting, you can handle multiple calls at the same time. When it is activated, you will be notified by a beep if you receive another call.

To activate or deactivate call waiting
1 From your Homescreen, tap 📞.
2 Find and tap Settings > Call.
3 Select a SIM card.
4 Tap Additional settings.
5 To activate or deactivate call waiting, tap Call waiting.

To answer a second call and put the ongoing call on hold
• When you hear repeated beeps during a call, drag ⟈ to the right.

To reject a second call
• When you hear repeated beeps during a call, drag ⟈ to the left.

To make a second call
1 During an ongoing call, tap 📞.
2 Enter the number of the recipient and tap ✆. The first call is put on hold.

To answer a third call and end the ongoing call
• When the third call comes in, tap End current call and answer.

To reject a third call
• When the third call comes in, tap Decline incoming call.
To switch between multiple calls
• To switch to another call and put the current call on hold, tap Switch to this call.

Conference calls
With a conference or multiparty call, you can have a joint conversation with two or more people.

! For details about the number of participants that you can add to a conference call, contact your network operator.

To make a conference call
1 During an ongoing call, tap .
2 Dial the number of the second participant and tap . The first participant is put on hold.
3 Tap \(\text{to add the second participant to the conference call.}
4 Repeat steps 1 to 3 to add more call participants.

To have a private conversation with a conference call participant
1 During an ongoing conference call, tap Manage.
2 Tap the telephone number of the participant that you want to have a private conversation with.
3 To end the private conversation and return to the conference call, tap .

To release a participant from a conference call
1 During an ongoing conference call, tap Manage.
2 Tap next to the participant you want to release.

To end a conference call
• During the conference call, tap End conference call.

Voicemail
If your subscription includes a voicemail service, callers can leave voice messages for you when you can’t answer calls. Your voicemail service number is normally saved on your SIM card. If not, you can get the number from your service provider and enter it manually.

To enter your voicemail number
1 From the Homescreen, tap .
2 Find and tap Settings > Call.
3 Select a SIM card.
4 Tap Voicemail > Voicemail settings > Voicemail number.
5 Enter your voicemail number.
6 Tap OK.

To call your voicemail service
1 From your Homescreen, tap .
2 Find and tap Phone.
3 Touch and hold 1.

Emergency calls
Your device supports international emergency numbers, for example, 112 or 911. You can normally use these numbers to make emergency calls in any country, with or without a SIM card inserted if you are within range of a network.
To make an emergency call
1 From your Homescreen, tap 📲.
2 Find and Tap Phone.
3 Enter the emergency number and tap 📞. To delete a number, tap ✗.

Tip: You can make emergency calls when no SIM card is inserted or when outgoing calls are barred.

To make an emergency call while the SIM card is locked
1 From the lock screen, tap Emergency call.
2 Enter the emergency number and tap 📞.
Contacts

Transferring contacts
There are several ways to transfer contacts to your new device. You can sync contacts from an online account or import contacts directly from another device.

Transferring contacts using a computer
Xperia™ Transfer is an application that helps you to collect contacts from your old device and transfer them to your new device. Xperia™ Transfer, which you can access from within the Xperia™ Companion computer program, supports mobile devices that run on iOS/iCloud and Android™. If you are switching from an iOS device, the App Matching feature suggests the Android equivalents of your iOS apps.

To use Xperia™ Transfer, you need:
• An Internet-connected computer.
• Your new Android™ device.
• A USB cable for your new Android™ device.
• Your old device.
• A USB cable for your old device.

You may not need your old device. For iOS devices, you can connect directly to iCloud or use a local backup. For previously owned Sony devices you can use local backups.

To transfer contacts to your new device
1 Search and download Xperia™ Companion (on a PC or Mac® computer) from http://support.sonymobile.com/global-en/tools/xperia-companion if the software is not already installed.
2 After successful installation, open the Xperia™ Companion software, then click Xperia™ Transfer and follow the relevant instructions to transfer your contacts.

Transferring contacts using an online account
If you sync the contacts in your old device or your computer with an online account, for example, Google Sync™, Facebook™, or Microsoft® Exchange ActiveSync®, you can transfer your contacts to your new device using that account.

To synchronize contacts to your new device using a synchronization account
1 From your Homescreen, tap , then tap .
2 Tap , then tap Settings > Accounts & sync.
3 Select the account that you want to sync your contacts with, then tap > Sync now.

You need to be signed in to the relevant sync account before you can sync your contacts with it.

Other methods for transferring contacts
There are several other ways to transfer contacts from your old device to your new device. For example, you can copy contacts to a memory card, use Bluetooth® technology, or save contacts to a SIM card. For more specific information about transferring the contacts from your old device, refer to the relevant User guide.

To import contacts from a memory card
1 From your Homescreen, tap , then tap .
2 Press , then tap Import contacts > SD card.
3 Select the files that you want to import and tap OK.
To import contacts using Bluetooth® technology
1. Make sure you have the Bluetooth® function turned on and that your device is set to visible.
2. When you are notified of an incoming file to your device, drag the status bar downward and tap the notification to accept the file transfer.
3. Tap Accept to start the file transfer.
4. Drag the status bar downward. When the transfer is complete, tap the notification.
5. Tap the received file.

To import contacts from a SIM card
! You may lose information or get multiple contact entries if you transfer contacts using a SIM card.
1. From your Homescreen, tap 🔄, then tap 📞.
2. Tap 📞, then tap Import contacts.
3. Select a SIM card.
4. To import an individual contact, find and tap the contact. To import all contacts, tap Import all.

Searching and viewing contacts

1. Contacts, Calling, Favorites, and Groups tabs
2. Edit and view medical and emergency contact information
3. View contact details
4. Jump to contacts starting with the selected letter
5. Access communication options for the contact
6. Search for contacts
7. Add a contact
8. View more options

To search for a contact
1. From your Homescreen, tap 🔄, then tap 📞.
2. Tap 📞 and enter a phone number, name, or other information in the Search contacts field. The result list is filtered as you enter each character.
To select which contacts to display in the Contacts application
1. From your Homescreen, tap \( \text{app} \), then tap \( \text{app} \).
2. Press \( \text{app} \), then tap Filter.
3. In the list that appears, mark or unmark the desired options. If you have synchronized your contacts with a synchronization account, that account appears in the list. To further expand the list of options, tap the account.

Adding and editing contacts

To add a contact
1. From your Homescreen, tap \( \text{app} \), then tap \( \text{app} \).
2. Tap \( \text{app} \).
3. If you have synchronized your contacts with one or more accounts and you are adding a contact for the first time, you must select the account you want to add this contact to. Alternatively, tap Phone contact if you only want to use and save this contact on your device.
4. Enter or select the desired information for the contact.
5. When you are done, tap Done.

! After you select a synchronization account in step 3, that account will show as the default account offered the next time you add a contact. When you save a contact to a particular account, that account will show as the default account to save to the next time you add a contact. If you have saved a contact to a particular account and want to change it, you need to create a new contact and select a different account to save them to.

★ If you add a plus sign and the country code before a contact’s phone number, you do not have to edit the number again when you make calls from other countries.

To edit a contact
1. From your Homescreen, tap \( \text{app} \), then tap \( \text{app} \).
2. Tap the contact that you want to edit, then tap \( \text{app} \).
3. Edit the desired information.
4. When you are done, tap Done.

★ Some synchronization services do not allow you to edit contact details.

To associate a picture with a contact
1. From your Homescreen, tap \( \text{app} \), then tap \( \text{app} \).
2. Tap the contact that you want to edit, then tap \( \text{app} \).
3. Tap \( \text{app} \) and select a method for adding the contact picture.
4. After you add the picture, tap Done.

★ You can also add a picture to a contact directly from the Album application. If you want to add a picture that is saved to an online account, you must download the picture first.

To personalize the ringtone for a contact
1. From your Homescreen, tap \( \text{app} \), then tap \( \text{app} \).
2. Tap the contact that you want to edit, then tap \( \text{app} \).
3. Tap \( \text{app} \) > Set ringtone.
4. Select an option from the list or tap \( \text{app} \) to select a music file saved to your device, then tap Done.
5. Tap Done.

To delete contacts
1. From your Homescreen, tap \( \text{app} \), then tap \( \text{app} \).
2. Touch and hold the contact that you want to delete.
3. To delete all contacts, tap the downward arrow to open the drop-down menu, then select Mark all.
4. Tap \( \text{app} \), then tap Delete.
To edit contact information about yourself
1. From your Homescreen, tap 📱, then tap 📱.
2. Tap Myself, then tap 📱.
3. Enter the new information or make the changes you want.
4. When you are done, tap Done.

To create a new contact from a text message
1. From your Homescreen, tap 📱, then find and tap 📱.
2. Tap 📱 > Save.
3. Select an existing contact, or tap Create new contact.
4. Edit the contact information and tap Done.

Adding medical and emergency contact information

You can add and edit ICE (In Case of Emergency) information in the Contacts application. You can enter medical details, such as allergies and medications that you are using, plus information about relatives and friends who can be contacted in case of an emergency. After setup, your ICE information can be accessed from the security lockscreen. This means that even if the screen is locked, for example, by a PIN, pattern, or password, emergency personnel can still retrieve your ICE information.

To show your medical and personal information as part of the ICE information
1. From your Homescreen, tap 📱, then tap 📱.
2. Tap ICE – In Case of Emergency.
3. Tap 📱, then mark the Show personal information checkbox.

To enter your medical information
1. From your Homescreen, tap 📱, then tap 📱.
2. Tap ICE – In Case of Emergency.
3. Tap 📱 then tap Edit medical info.
4. Edit the desired information.
5. When you are done, tap Done.
To add a new ICE contact

1. From your Homescreen, tap 📲, then tap 📲.
2. Tap **ICE – In Case of Emergency**, then tap 📲.
3. If you have synchronized your contacts with one or more accounts and you are adding a contact for the first time, you must select the account you want to add this contact to. Alternatively, tap **Phone contact** if you only want to use and save this contact on your device.
4. Enter or select the desired information for the contact.
5. When you are done, tap **Done**.

* The ICE contact must have at least a phone number which emergency personnel can call. If your device is locked by a security screen lock, emergency personnel can only see the phone number of the ICE contact, even if there is other information entered in the Contacts application about the contact.

To use existing contacts as ICE contacts

1. From your Homescreen, tap 📲, then tap 📲.
2. Tap **ICE – In Case of Emergency**, then tap 📲.
3. Mark the contacts you want to use as ICE contacts.
4. When you are done, tap **Done**.

* The ICE contacts you select must have at least a phone number which emergency personnel can call. If your device is locked by a security screen lock, emergency personnel can only see the phone number of the ICE contacts, even if there is other information entered in the Contacts application about the contacts.

To make your ICE information visible from the security lockscreen

1. From your Homescreen, tap 📲, then tap 📲.
2. Tap **ICE – In Case of Emergency**.
3. Tap 📲, then tap **Settings**.
4. Mark the **ICE in lock screen** checkbox.

* Your ICE information is visible from the security lockscreen by default.

To enable calls to ICE contacts from the security lock screen

1. From your Homescreen, tap 📲, then tap 📲.
2. Tap **ICE – In Case of Emergency**.
3. Tap 📲, then tap **Settings**.
4. Mark the **Enable call in ICE** checkbox.

* Some networks and/or service providers may not support ICE calls.

Favorites and groups

Contacts that you mark as favorites appear under the favorites tab in the Contacts application along with your most frequently called contacts or "top contacts". This way you get quicker access to these contacts. You can also assign contacts to groups, to get quicker access to a group of contacts from within the Contacts application.

To mark or unmark a contact as a favorite

1. From the Homescreen, tap 📲, then tap 📲.
2. Tap the contact you want to add to or remove from your favorites.
3. Tap ⭐.

To view your favorite contacts and top contacts

1. From your Homescreen, tap 📲, then tap 📲.
2. Tap ⭐.
To assign a contact to a group
1 In the Contacts application, tap the contact that you want to assign to a group.
2 Tap \( \text{Groups} \), then tap the bar directly under Groups.
3 Mark the checkboxes for the groups you want to add the contact to.
4 Tap Done.

Sending contact information

To send your business card
1 From your Homescreen, tap \( \text{Myself} \), then tap \( \text{Myself} \).
2 Tap Myself.
3 Press \( \text{Send} \), then tap Send contact > OK.
4 Select an available transfer method and follow the on-screen instructions.

To send a contact
1 From your Homescreen, tap \( \text{Myself} \), then tap \( \text{Myself} \).
2 Tap the contact whose details you want to send.
3 Press \( \text{Send} \), then tap Send contact > OK.
4 Select an available transfer method and follow the on-screen instructions.

To send several contacts at once
1 From your Homescreen, tap \( \text{Myself} \), then tap \( \text{Myself} \).
2 Press \( \text{Mark} \), then tap Mark several.
3 Mark the contacts you want to send, or select all if you want to send all contacts.
4 Tap \( \text{Select} \), then select an available transfer method and follow the on-screen instructions.

Avoiding duplicate entries in the Contacts application

If you synchronize your contacts with a new account or import contact information in other ways, you could end up with duplicate entries in the Contacts application. If this happens, you can join such duplicates to create a single entry. And if you join entries by mistake, you can separate them again later.

To link contacts
1 From your Homescreen, tap \( \text{Myself} \), then tap \( \text{Myself} \).
2 Tap the contact that you want to link with another contact.
3 Press \( \text{Link} \), then tap Link contact.
4 Tap the contact whose information you want to join with the first contact, then tap OK to confirm. The information from the first contact is merged with the second contact, and the linked contacts are displayed as one contact in the Contacts list.

To separate linked contacts
1 From your Homescreen, tap \( \text{Myself} \), then tap \( \text{Myself} \).
2 Tap the linked contact that you want to edit, then tap Unlink contact > Unlink.

Backing up contacts

You can use a memory card to back up contacts. See Transferring contacts on page 55 for more information about how to restore contacts to your device.

To export all contacts to a memory card
1 From your Homescreen, tap \( \text{Myself} \), then tap \( \text{Myself} \).
2 Press \( \text{Export} \), then tap Export contacts > SD card.
3 Tap OK.
Messaging and chat

Reading and sending messages

The Messaging application shows your messages as conversations, which means that all messages to and from a particular person are grouped together. To send multimedia messages, you need the correct MMS settings on your device. See Internet and MMS settings on page 27.

! The number of characters that you can send in a single message varies depending on the operator and the language you use. The maximum size of a multimedia message, which includes the size of added media files, is also operator dependent. Contact your network operator for more information.

1 Go back to the list of conversations
2 Call the message sender
3 View options
4 Sent and received messages
5 Send a completed message using SIM card 1
6 Send a completed message using SIM card 2
7 Add attachments
8 Attach a location
9 Attach a handwritten note or image
10 Take a photo and attach it
11 Attach a photo saved on your device
12 Text entry field
To create and send a message
1. From your Homescreen, tap 📱, then find and tap 📧.
2. Tap ✍.
3. Enter the recipient’s name or phone number, or other contact information that you have saved about the recipient, then select from the list that appears. If the recipient is not listed as a contact, enter the recipient’s number manually.
4. Tap Write message and enter your message text.
5. If you want to add an attachment, tap 📥 and select an option.
6. To send the message, tap Send.

If you exit a message before sending, it gets saved as a draft. The conversation gets tagged with the word Draft.

To read a received message
1. From your Homescreen, tap 📱, then find and tap 📧.
2. Tap the desired conversation.
3. If the message is not yet downloaded, tap and hold the message, then tap Download message.

All received messages are saved by default to the device memory.

To reply to a message
1. From your Homescreen, tap 📧, then find and tap 📧.
2. Tap the conversation containing the message.
3. Enter your reply and tap Send.

To forward a message
1. From your Homescreen, tap 📧, then find and tap 📧.
2. Tap the conversation containing the message you want to forward.
3. Touch and hold the message you want to forward, then tap Forward message.
4. Enter the recipient’s name or phone number, or other contact information that you have saved about the recipient, then select from the list that appears. If the recipient is not listed as a contact, enter the recipient’s number manually.
5. Edit the message, if necessary, then tap Send.

To save a file contained in a message you receive
1. From your Homescreen, tap 📧, then find and tap 📧.
2. Tap the conversation you want to open.
3. If the message has not been downloaded yet, tap and hold the message, then tap Download message.
4. Touch and hold the file you want to save, then select the desired option.

Organizing your messages

To delete a message
1. From your Homescreen, tap 📧, then find and tap 📧.
2. Tap the conversation containing the message you want to delete.
3. Touch and hold the message you want to delete, then tap Delete message > Delete.

To delete conversations
1. From your Homescreen, tap 📧, then find and tap 📧.
2. Tap 📧 then tap Delete conversations.
3. Mark the checkboxes for the conversations that you want to delete, then tap 📧 > Delete.
To star a message
1. From your Homescreen, tap , then find and tap .
2. Tap the conversation you want to open.
3. In the message you want to star, tap ★.
4. To unstar a message, tap ★.

To view starred messages
1. From your Homescreen, tap , then find and tap .
2. Tap  to tap Starred messages.
3. All starred messages appear in a list.

To search for messages
1. From your Homescreen, tap , then find and tap .
2. Tap  then tap Search.
3. Enter your search keywords. The search results appear in a list.

Calling from a message

To call a message sender
1. From your Homescreen, tap , then find and tap .
2. Tap a conversation.
3. Tap  .
4. Tap  .

To save a sender's number as a contact
1. From your Homescreen, tap , then find and tap .
2. Tap  > Save.
3. Select an existing contact, or tap Create new contact.
4. Edit the contact information and tap Done.

Messaging settings

To change your message notification settings
1. From your Homescreen, tap , then find and tap .
2. Tap  then tap Settings.
3. Select a SIM card.
4. To set a notification sound, tap Notification sound. then select an option or tap  and select a music file that is saved to your device.
5. To confirm, tap Done.
6. For other notification settings, check or uncheck the relevant checkboxes.

To turn the delivery report function on or off for outgoing messages
1. From your Homescreen, tap , then find and tap .
2. Tap  then tap Settings.
3. Select a SIM card.
4. Mark or unmark the Delivery report checkbox as desired.

! After the delivery report function is turned on, a check mark is displayed in messages that have been successfully delivered.

Instant messaging and video chat
You can use the Google Hangouts™ instant messaging and video chat application on your device to chat with friends who also use the application on computers, Android™ devices and other devices. You can turn any conversation into a video call with several friends, and you can send messages to friends even when they are offline. You can also view and share photos easily.
Before you start using Hangouts™, make sure that you have a working Internet connection and a Google™ account. Go to http://support.google.com/hangouts and click the "Hangouts on your Android" link to get more detailed information about how to use this application.

⚠️ The video call function only works on devices with a front camera.

**To use the Hangouts™ application**

1. From your Homescreen, tap 📲 .
2. Find and tap Hangouts.
Email

Setting up email

Use the email application in your device to send and receive email messages through your email accounts. You can have one or several email accounts at the same time, including corporate Microsoft Exchange ActiveSync accounts.

To set up an email account
1. From your Homescreen, tap 📧.
2. Find and tap Mail.
3. Follow the instructions that appear on the screen to complete the setup.

For some email services, you may need to contact your email service provider for information on detailed settings for the email account.

To add an extra email account
1. From your Homescreen, tap 📧.
2. Find and tap Mail.
3. Tap ☰, then tap Settings > Add account.
4. Enter the email address and password, then tap Next. If the settings for the email account cannot be downloaded automatically, complete the setup manually.
5. When you are finished, tap Next.

Sending and receiving email messages

1. View a list of all email accounts and recent folders
2. Write a new email message
3. Search for email messages
4. Access settings and options
5. List of email messages

To download new email messages
- When the email inbox is open, swipe downward on the message list.

Before trying to download new email messages, make sure you have a working data connection. For more information about ensuring successful data connections, see Internet and MMS settings on page 27.
To read your email messages
1. From your Homescreen, tap 📬.
2. Find and tap Mail.
3. If you are using several email accounts, tap ☰ and select the account that you want to check, then tap Inbox in the drop down menu. If you want to check all your email accounts at once, tap ☰, then tap Combined inbox in the drop down menu.
4. In the email inbox, scroll up or down and tap the email message that you want to read.

To create and send an email message
1. From your Homescreen, tap 📬, then find and tap Mail.
2. If you are using several email accounts, tap ☰ and select the account from which you want to send the email, then tap Inbox in the drop down menu.
3. Tap ☰, then type the recipient's name or email address, or tap ☰ and select one or more recipients from your Contacts list.
4. Enter the email subject and message text, then tap ✉.

To reply to an email message
1. In your email inbox, find and tap the message that you want to reply to, then tap Reply or Reply all.
2. Enter your reply, then tap ✉.

To forward an email message
1. In your email inbox, find and tap the message that you want to forward, then tap Forward.
2. Enter the recipient's email address manually, or tap ☰ and select a recipient from your Contacts list.
3. Enter your message text, then tap ✉.

To view an email message attachment
1. Find and tap the email message containing the attachment that you want to view. Email messages with attachments are indicated by 📥.
2. After the email message opens, tap Load. The attachment starts to download.
3. After the attachment finishes downloading, tap View.

To save a sender's email address to your contacts
1. Find and tap a message in your email inbox.
2. Tap the name of the sender, then tap OK.
3. Select an existing contact, or tap Create new contact.
4. Edit the contact information, if desired, then tap Done.

Email preview pane
A preview pane is available for viewing and reading your email messages. Once activated, you can use it to view both the email message list and one selected email message at the same time.
To change the email preview pane settings
1. From your Homescreen, tap , then find and tap Mail.
2. Tap Settings > Split view.
3. Select an option, or a combination of options, then tap OK.

To read email messages using the preview pane
1. Make sure the preview pane is activated.
2. Open your email inbox.
3. Scroll up or down and tap the email message that you want to read.
4. To view the email message in fullscreen format, tap the split bar (located between the email list and the email body).
5. To return to the regular inbox view, tap the split bar again.

Organizing your email messages

To sort your emails
1. From your Homescreen, tap .
2. Find and tap Mail.
3. If you are using several email accounts, tap and select the account that you want to sort, then tap Inbox in the drop down menu. If you want to sort all your email accounts at once, tap , then tap Combined inbox.
4. Tap , then tap Sort.
5. Select a sorting option.

To search for emails
1. From your Homescreen, tap , then find and tap Mail.
2. If you are using several email accounts, tap and select the name of the account that you want to check, then tap Inbox in the drop down menu. If you want to search all your email accounts at once, tap , then tap Combined view.
3. Tap .
4. Enter your search text, then tap on the keyboard.
5. The search result appears in a list sorted by date. Tap the email message that you want to open.

To view all folders for one email account
1. From your Homescreen, tap , then find and tap Mail.
2. If you are using several email accounts, tap , and select the account you want to check.
3. Under the account that you want to check, select Show all folders.

To delete an email message
• In your email inbox, flick the message that you want to delete to the right.

To move an email message to another folder
1. In your email inbox, flick the message that you want to move to the left.
2. Tap Move, then select a folder.

Email account settings

To remove an email account from your device
1. From your Homescreen, tap .
2. Find and tap Mail.
3. Press , then tap Settings.
4. Select the account you want to remove.
5. Tap Delete account > OK.
To change the inbox check frequency
1 From your Homescreen, tap .
2 Find and tap Mail.
3 Tap Settings.
4 Select the account for which you want to change the inbox check frequency.
5 Tap Check frequency > Check frequency and select an option.

To set an Out of Office auto-reply in an Exchange Active Sync account
1 From your Homescreen, tap , then find and tap Mail.
2 Press , then tap Settings.
3 Select the EAS (Exchange Active Sync) account for which you want to set an Out of Office auto-reply.
4 Tap Out of office.
5 Drag the slider beside Out of office to the right to turn on the function.
6 If needed, mark the Set time range checkbox and set the time range for the auto reply.
7 Enter your Out of Office message in the body text field.
8 Tap OK to confirm.

Gmail™
If you have a Google™ account, you can use the Gmail™ application to read and write email messages.

1 View a list of all Gmail accounts and recent folders
2 Write a new email message
3 Search for email messages
4 Access settings and options
5 List of email messages

To learn more about Gmail™
• When the Gmail application is open, drag the left edge of the screen to the right, and then find and tap Help.
Music

Transferring music to your device

There are different ways to transfer music from a computer to your device:

- For Windows® only: Connect the device and computer using a USB cable and then drag and drop the music files directly into the file manager application on the computer. See Managing files using a computer on page 117.
- If the computer is a PC, you can use the Media Go™ application from Sony and organize your music files, create playlists, subscribe to podcasts, and more. To learn more and download the Media Go™ application, go to http://mediago.sony.com/enu/features.
- You can use the Xperia™ Companion software to transfer your media files between the computer and your device. To learn more and download Xperia™ Companion, go to www.sonymobile.com/global-en/tools/xperia-companion.

! The Music may not support all music file formats. For more information about supported file formats and the use of multimedia (audio, image and video) files, download the White Paper for your device at www.sonymobile.com/support.

Listening to music

Use the Walkman® application to listen to your favorite music and audio books.

1. Open the Walkman® homescreen menu
2. Search all songs saved to your device
3. View the current play queue
4. Album art (if available)
5. Tap to go to the previous song in the play queue
   Touch and hold to rewind within the current song
6. Play or pause a song
7. Tap to go to the next song in the play queue
   Touch and hold to fast forward within the current song
8. Shuffle songs in the current play queue
9. Repeat all songs in the current play queue
10. Progress indicator – Drag the indicator or tap along the line to fast forward or rewind
11. Total length of current song
12. Elapsed time of current song
Walkman® homescreen

1. Drag the left edge of the screen to the right to open the Walkman® homescreen menu
2. Scroll up or down to view content
3. Play a song using the Walkman® application
4. Return to the Walkman® music player screen

To play a song using the Walkman® application
1. From your Homescreen, tap \(\text{Walkman}\), then find and tap \(\text{Walkman}\).
2. Drag the left edge of the screen to the right.
3. Select a music category.
4. Tap a song to play it.

⚠️ You might not be able to play copyright-protected items. Please verify that you have necessary rights in material that you intend to share.

To find song-related information online
• While a song is playing in the Walkman® application, tap Album art and then tap the Infinite button \(\text{∞}\).

🌟 The Infinite button \(\text{∞}\) gives you access to online resources related to the song, such as videos on YouTube™, song lyrics, and artist information on Wikipedia.

To adjust the audio volume
• Press the volume key.

To minimize the Walkman® application
• When a song is playing, tap \(\text{Walkman}\) to go to the Homescreen. The Walkman® application stays playing in the background.

To open the Walkman® application when it is playing in the background
1. While a song is playing in the background, tap the \(\text{Walkman}\) to open the recently used applications window.
2. Tap the Walkman® application.

Walkman® homescreen menu

The Walkman® homescreen menu gives you an overview of all the songs on your device. From here you can manage your albums and playlists, and you can organize your music by mood and tempo using SensMe™ channels.

To open the Walkman® home screen menu
1. From your Homescreen, tap \(\text{Walkman}\), then find and tap \(\text{Walkman}\).
2. Drag the left edge of the screen to the right.
To return to the Walkman® homescreen
- When the Walkman® homescreen menu is open, tap Home.
- When the Walkman® homescreen menu is open, tap on the screen to the right of the menu.

To update your music with the latest information
1. From the Walkman® homescreen, tap $.$
2. Tap Download music info > Start. Your device searches online and downloads the latest available album art and song information for your music.

Tip: The SensMe™ channels application is activated when you download music information.

To enable the SensMe™ channels application
- From the Walkman® homescreen, tap $,$ then tap Download music info > Start.

Tip: This application requires a cellular or Wi-Fi® network connection.

To edit music information
1. From the Walkman® application, tap $.$
2. Tap Edit music info.
3. Enter the new information or make the changes you want.
4. When you are done, tap Save.

To delete a song
1. From the Walkman® homescreen menu, browse to the song that you want to delete.
2. Touch and hold the song title, then tap Delete from the list that appears.
3. Tap Delete again to confirm.

Playlists
On the Walkman® homescreen, you can create your own playlists from the music that is saved on your device.

To create your own playlists
1. From the Walkman® homescreen, touch and hold the name of the album or song that you want to add to a playlist.
2. In the menu that opens, tap Add to... > Create new playlist.
3. Enter a name for the playlist and tap OK.

Tip: You can also tap the album art and then tap $+$ to create a new playlist.

To play your own playlists
1. Open the Walkman® homescreen menu, then tap Playlists.
2. Under Playlists, select the playlist that you want to open.
3. If you want to play all songs, tap Shuffle all.

To add songs to a playlist
1. From the Walkman® homescreen, browse to the song or album that you want to add to a playlist.
2. Touch and hold the song or the album title, then tap Add to....
3. Tap the name of the playlist you want to add the album or song to. The album or song is added to the playlist.

To remove a song from a playlist
1. In a playlist, touch and hold the title of the song that you want to delete.
2. Tap Delete from playlist.

Tip: You might not be able to delete a song that is saved on the memory card or on your device's internal storage.
To delete a playlist
1 Open the Walkman® homescreen menu, then tap Playlists.
2 Touch and hold the playlist that you want to delete.
3 Tap Delete.
4 Tap Delete again to confirm.

⚠️ You cannot delete smart playlists.

Sharing music

To share a song
1 From the Walkman® homescreen, browse to the song or album that you want to share.
2 Touch and hold the song title, then tap Share.
3 Select an application from the list, then follow the on-screen instructions.

💡 You can also share albums and playlists in the same way.

Enhancing the sound

To improve the sound quality using the equalizer
1 When the Walkman® application is open, tap 🎧.
2 Tap Settings > Sound enhancements.
3 To adjust the sound manually, drag the frequency band buttons up or down. To adjust the sound automatically, tap ⬇️ and select a style.

To turn on the Surround sound feature
1 When the Walkman® application is open, tap 🎧.
2 Tap Settings > Sound enhancements > Settings > Surround sound (VPT).
3 Select a setting, then tap OK to confirm.

Visualizer

The Visualizer adds visual effects to your songs as you play them. The effects for each song are based on the characteristics of the music. They change, for example, in response to changes in the music’s volume, rhythm, and frequency level. You can also change the background theme.

To turn on the Visualizer
1 In the Walkman® application, tap 🎧.
2 Tap Visualizer.

💡 Tap the screen to switch to full-screen view.

To change the background theme
1 In the Walkman® application, tap 🎧.
2 Tap Visualizer.
3 Tap 🎧 > Theme and select a theme.

Recognizing music with TrackID™

Use the TrackID™ music recognition service to identify a song you hear playing in your surroundings. Just record a short sample of the song and you’ll get artist, title, and album info within seconds. You can purchase a song identified by TrackID™, and you can view TrackID™ charts to see what TrackID™ users around the globe are searching for. For best results, use TrackID™ in a quiet area.
1 View TrackID™ options
2 Drag the left edge of the screen to the right to open the TrackID™ homescreen menu
3 Identify the music that you are listening to

The TrackID™ application and the TrackID™ service are not supported in all countries/regions or by all networks and/or service providers in all areas.

To identify music using TrackID™ technology
1 From your Homescreen, tap 
2 Find and tap TrackID™, then hold your device close to the music source.
3 Tap 🎼. If the song is recognized by the TrackID™ service, the results appear on the screen.

👉 To return to the TrackID™ start screen, tap ↪

TrackID™ homescreen menu

The TrackID™ homescreen menu gives you an overview of all the songs you have recorded and identified using the TrackID™ service. From here you can also view your songs based on current music charts and search history.

1 Create an online TrackID™ profile
2 Open the TrackID™ application
3 View the search result history
4 View current music charts

To view artist information for a song
• After a song has been recognized by the TrackID™ application, tap Artist info.
To delete song from the track history

1. Open the TrackID™ application, then tap History.
2. Touch and hold the name of the song that you want to delete, then tap Delete.
FM radio

Listening to the radio

The FM radio in your device works like any FM radio. For example, you can browse and listen to FM radio stations and save them as favorites. You must connect a wired headset or headphones to your device before you can use the radio. This is because the headset or headphones act as an antenna. After one of these devices is connected, you can then switch the audio to the speaker, if desired.

To listen to the FM radio
1. Connect a headset or a set of headphones to your device.
2. From your Homescreen, tap 🎧.
3. Find and tap FM radio 🎧. The available channels appear as you scroll through the frequency band.

⚠️ When you start the FM radio, available channels appear automatically. If a channel has RDS information, it appears a few seconds after you start listening to the channel.

To move between radio channels
• Drag the frequency band left or right.

To start a new search for radio channels
1. When the radio is open, press ¶.
2. Tap Search for channels. The radio scans the whole frequency band, and all available channels are displayed.
To switch the radio sound to the speaker
1 When the radio is open, press ⚫.
2 Tap **Play in speaker**.

To switch the sound back to the wired headset or headphones, press ⚫ and tap **Play in headphones**.

To identify a song on the FM radio using TrackID™
1 While the song is playing on your device’s FM radio, tap ⚫, then select **TrackID™**.
2 A progress indicator appears while the TrackID™ application samples the song. If identification is successful, you are presented with a result or a list of possible results.
3 To return to the FM Radio, tap ⬅️.

The TrackID™ application and the TrackID™ service are not supported in all countries/regions, or by all networks and/or service providers in all areas.

**Favorite radio channels**

To save a channel as a favorite
1 When the radio is open, navigate to the channel that you want to save as a favorite.
2 Tap ⚫.
3 Enter a name and select a color for the channel, then press **Save**.

To listen to a favorite radio channel
1 Tap ⚫.
2 Select an option.

To remove a channel as a favorite
1 When the radio is open, navigate to the channel that you want to remove.
2 Tap ⭐, then tap **Delete**.

**Sound settings**

To switch between mono and stereo sound mode
1 When the radio is open, press ⚫.
2 Tap **Enable stereo sound**.
3 To listen to the radio in mono sound mode again, press ⚫ and tap **Force mono sound**.

To select the radio region
1 When the radio is open, press ⚫.
2 Tap **Set radio region**.
3 Select an option.

To adjust the Visualizer
1 When the radio is open, tap ⚫.
2 Tap **Visualizer**.
3 Select an option.
Camera

Taking photos and recording videos

1. Zoom in or out
2. Main camera screen
3. View photos and videos
4. Take photos or record video clips
5. Go back a step or exit the camera
6. Change capturing mode settings
7. Access camera settings and shortcuts
8. Front camera

To take a photo from the lock screen
1. To activate the screen, briefly press the power key.
2. To activate the camera, touch and hold and drag upwards.
3. After the camera opens, tap.

To take a photo by touching the screen
1. Activate the camera.
2. Tap and tap and drag upwards.
3. Drag the slider beside Touch capture to the right.
4. Point the camera toward the subject.
5. To activate auto focus, touch and hold a spot on the screen. When the focus frame turns blue, lift your finger to take the photo.

To take a photo by tapping the on-screen camera button
1. Activate the camera.
2. Point the camera toward the subject.
3. Tap the on-screen camera button. The photo is taken as soon as you release your finger.

To take a self-portrait using the front camera
1. Activate the camera.
2. Tap.
3. To take the photo, tap the on-screen camera button. The photo is taken as soon as you release your finger.

To use the still camera flash
1. When the camera is open, tap.
2. Select your desired flash setting.
3. Take the photo.
To use the zoom function

• When the camera is open, press the volume key up or down.
• When the camera is open, pinch in or pinch out on the camera screen.

To record a video
1 Activate the camera.
2 Point the camera toward the subject.
3 To start recording, tap .
4 To pause when recording a video, tap . To resume recording, tap .
5 To stop recording, tap .

To take a photo when recording a video
• To take a photo when recording a video, tap . The photo is taken as soon as you release your finger.

To view your photos and videos
1 Activate the camera, then tap a thumbnail to open a photo or video.
2 Flick left or right to view your photos and videos.

To delete a photo or recorded video
1 Browse to the photo or video that you want to delete.
2 Tap the screen to make appear.
3 Tap .
4 Tap Delete to confirm.

Face detection
You can use face detection to bring an off-center face into focus. The camera automatically detects up to five faces, indicated by white frames. A colored frame shows which face has been selected for focus. Focus is set to the face closest to the camera. You can also tap one of the frames to select which face should be in focus.

To turn on face detection
1 Activate the camera.
2 Tap , then select .
3 Tap $ then tap .
4 Tap Focus mode > Face detection.

To take a photo using face detection
1 When the camera is open and Face detection turned on, point the camera at your subject. Up to five faces can be detected, and each detected face is framed.
2 Tap the frame you want to select for focus. Do not tap if you want the camera to select focus automatically.
3 A colored frame shows which face is in focus. Tap the screen to take the photo.

Using Smile Shutter™ to capture smiling faces
Use Smile Shutter™ technology to photograph a face just as it smiles. The camera detects up to five faces and selects one face for smile detection and auto-focus. When the selected face smiles, the camera automatically takes a photo.

To turn on Smile Shutter™
1 Activate the camera.
2 Tap $ then tap .
3 Tap Smile Shutter and select a smile level.
To take a photo using Smile Shutter™

1. When the camera is open and Smile Shutter™ is turned on, point the camera at your subject. The camera selects which face to focus on.
2. The face selected appears inside a colored frame and the photo is taken automatically.
3. If no smile is detected, tap the screen to take the photo manually.

Adding the geographical position to your photos

Turn on geotagging to add the approximate geographical location (a geotag) to photos when you take them. The geographical location is determined either by wireless networks or GPS technology.

When 📍 appears on the camera screen, geotagging is turned on but the geographical position has not been found. When 🗺️ appears, geotagging is turned on and the geographical location is available, so your photo can get geotagged. When neither of these two symbols appears, geotagging is turned off.

To turn on geotagging

1. From your Homescreen, tap 🏠.
2. Tap Settings > Location.
3. Drag the slider beside Location to the right.
4. Activate the camera.
5. Tap 📷, then tap 🕰.
6. Drag the slider beside Geotagging to the right.

General camera settings

Capturing mode settings overview

- Auto Scene Recognition
  Optimize your settings to suit any scene.
- Manual
  Adjust camera settings manually.
- Face in picture
  Take photos using the front and rear cameras at the same time.
- Live on YouTube
  Broadcast live video to YouTube™.
- AR effect
  Take photos or videos with virtual scenes and characters.
- Creative effect
  Apply effects to photos or videos.
- Timeshift burst
  Find the best photo from a burst of images.
- Social live
  Broadcast live video to Facebook™.
- Sweep Panorama
  Take wide-angle and panoramic photos.
- Sound Photo
  Take photos with background sound.
- AR fun
  Play with virtual objects in your camera viewfinder and enrich your photos or videos.
- Portrait retouch
  Take photos with real-time portrait styles.
Auto scene recognition

Auto scene recognition mode detects the conditions you are shooting in and automatically adjusts the settings to ensure that you take the best photo possible.

Manual mode

Use Manual mode when you want to manually adjust your camera settings for photos and videos.

AR effect

You can apply AR (augmented reality) effects to your photos or videos and make them more fun. When using the camera, this setting lets you integrate 3D scenes into your photos or videos. Just select the scene you want and adjust its position in the viewfinder.

Creative effect

You can apply different effects on your photos or videos. Add a Nostalgic effect to make photos look older, or a Sketch effect for a more fun image.

Sweep Panorama

You can take wide-angle and panoramic photos from the horizontal or vertical direction in an easy press-and-sweep motion.

To take a panoramic photo
1. Activate the camera.
2. Tap 📹, then select 📹.
3. To select a shooting direction, tap 📹.
4. Tap the screen and move the camera slowly and steadily to the direction of movement indicated on the screen.

Timeshift burst

The camera takes a burst of 31 photos in a window of two seconds— one second before and after you tap the on-screen camera button. So you can go back and find the perfect image.

To use Timeshift burst
1. Activate the camera.
2. Tap 📹, then select 📹.
4. Scroll through the thumbnails and select the photo that you want to save, then tap 📷.

Social live

Social live is a camera shooting mode that lets you stream video live to your Facebook™ page. You just need to have an active internet connection and be logged into Facebook™. Videos can be up to 10 minutes long.

To broadcast live video using Social live
1. Activate the camera.
2. Tap 📹, then select 📹.
3. Log in to your Facebook™ account.
4. Tap 📹 to start broadcasting.
5. To take a photo during the broadcast, tap 📷.
6. To stop broadcasting, tap 📷.

Face in

You can use the Face in mode to turn on the front and main cameras at the same time, so you can take a photo of yourself together with the subject.
Portrait retouch

Use this feature to apply touch-up effects to portrait photos as you take them to ensure the best results.

To use the Portrait retouch feature

1. Activate the camera.
2. Tap ☰, then tap 📷.
3. To display the style selector, swipe upward on the screen, then select a portrait style for your photos.
4. To hide the style selector, tap the screen or swipe downward.
5. To display the frame selector, swipe to the left, then select a decorative frame.
6. To hide the frame selector, tap the camera screen or swipe to the right.

Downloading camera applications

You can download free or paid camera applications from Google Play™ or other sources. Before you start downloading, make sure that you have a working Internet connection, preferably over Wi-Fi® to limit data traffic charges.

To download camera applications

1. Open the camera application.
2. Tap ☰, then tap DOWNLOADABLE.
3. Select the application that you want to download, and follow the instructions to complete the installation.

Quick launch

Use Quick launch settings to launch the camera when the screen is locked.

- **Launch only**: After you drag ☰ upward, the main camera is launched from sleep mode.
- **Launch and capture**: After you drag ☰ upward, the still camera is launched from sleep mode and a photo is captured.
- **Launch and record video**: After you drag ☰ upward, the video camera is launched from sleep mode and starts recording.
- **Off**

Geotagging

Tag photos with details of where you took them.

Touch capture

Identify a focus area, and then touch the camera screen with your finger. The photo is taken as soon as you release your finger.

Sound

Choose to turn on or turn off the shutter sound.

Data storage

You can choose to save your data either to a removable SD card or to your device’s internal storage.

- **Internal storage**: Photos or videos are saved on the device memory.
- **SD card**: Photos or videos are saved on the SD card.
White balance
This function adjusts the color balance according to the lighting conditions. The white balance setting icon  is available on the camera screen.

- **Auto**
  Adjusts the color balance automatically to suit the lighting conditions.

- **Incandescent**
  Adjusts the color balance for warm lighting conditions, such as under light bulbs.

- **Fluorescent**
  Adjusts the color balance for fluorescent lighting.

- **Daylight**
  Adjusts the color balance for sunny outdoor conditions.

- **Cloudy**
  Adjusts the color balance for a cloudy sky.

! This setting is only available in Manual capturing mode.

Still camera settings
To adjust the still camera settings
1 Activate the camera.
2 To display all settings, tap .
3 Select the setting you want to adjust, then edit as desired.

Still camera settings overview
Resolution
Choose between several resolutions and aspect ratios before taking a photo. A photo with a higher resolution requires more memory.

- **5MP**
  2560×1920(4:3)
  5-megapixel resolution with 4:3 aspect ratio. Suitable for photos you want to view on non-widescreen displays or print in high resolution.

- **3MP**
  2560×1440(16:9)
  3-megapixel resolution with 16:9 aspect ratio. Suitable for photos you want to view on widescreen displays.

- **2MP**
  1920×1088(16:9)
  2-megapixel resolution with 16:9 aspect ratio. Suitable for photos you want to view on widescreen displays.

- **2MP**
  1600×1200(4:3)
  2-megapixel resolution with 4:3 aspect ratio. Suitable for photos you want to view on non-widescreen displays or print in high resolution.

- **VGA**
  640×480(4:3)
  VGA format with 4:3 aspect ratio.

! This setting is only available in Manual capturing mode.

Self timer
With the self-timer you can take a photo without holding the device. Use this function to take self-portraits, or group photos where everyone can be in the photo. You can also use the self-timer to avoid shaking the camera when taking photos.

- **On (10 sec.)**
  Set a 10-second delay from when you tap the camera screen until the photo is taken.
On (2 sec.)
Set a 2-second delay from when you tap the camera screen until the photo is taken.

Off
The photo is taken as soon as you tap the camera screen.

Smile Shutter™
Use the Smile Shutter™ function to determine what kind of smile the camera reacts to before taking a photo.

Focus mode
The focus function controls which part of a photo should be sharp. When continuous autofocus is on, the camera keeps adjusting focus so the area within the colored focus frame stays sharp.

Single autofocus
The camera automatically focuses on the selected subject. Continuous autofocus is on. Touch and hold the camera screen until the yellow focus frame turns blue, indicating that the focus is set. The photo is taken when you release your finger.

Face detection
The camera automatically detects up to five human faces, indicated by frames on the screen. The camera automatically focuses on the nearest face. You can also select which face to focus on by tapping it on the screen. When you tap the camera screen, a blue frame shows which face is selected and in focus. Face detection cannot be used for all scene types. Continuous autofocus is on.

Touch focus
Touch a specific area on the camera screen to set the area of focus. Continuous autofocus is off. Touch and hold the camera screen until the yellow focus frame turns blue, indicating that the focus is set. The photo is taken when you release your finger.

Object tracking
When you select an object by touching it in the viewfinder, the camera tracks it for you.

! This setting is only available in Manual capturing mode.

HDR
Use the HDR (High Dynamic Range) setting to take a photo against strong backlight or in conditions where the contrast is sharp. HDR compensates for the loss of detail and produces a picture that is representative of both dark and bright areas.

! This setting is only available in Manual capturing mode.

ISO
You can reduce image blurring caused by dark conditions or moving subjects by increasing the ISO sensitivity.

Auto
Sets the ISO sensitivity automatically.

100
Sets the ISO sensitivity to 100.

200
Sets the ISO sensitivity to 200.

400
Sets the ISO sensitivity to 400.

800
Sets the ISO sensitivity to 800.

1600
Sets the ISO sensitivity to 1600.

! This setting is only available in Manual capturing mode.
Metering
This function automatically determines a well-balanced exposure by measuring the amount of light striking the image you want to capture.

Center
Adjusts the exposure to the center of the image.

Average
Calculates the exposure based on the amount of light striking the whole image.

Spot
Adjusts the exposure in a very small part of the image that you want to capture.

! This setting is only available in Manual capturing mode.

Image stabilizer
When taking a photo, it can be difficult to hold the device steady. The stabilizer helps you by compensating for small movements of the hand.

! This setting is only available in Manual capturing mode.

Preview
You can choose to preview photos or videos just after you shoot them.

Unlimited
The preview of the photo or video appears after you shoot it.

5 seconds
The preview of the photo or video appears for 5 seconds after you shoot it.

3 seconds
The preview of the photo or video appears for 3 seconds after you shoot it.

Edit
The photo or video opens for editing after you shoot it.

Off
The photo or video is saved after you shoot it, and no preview appears.

Face registration
You can register faces with the Camera application so that the viewfinder automatically focuses on these faces when they appear in the viewfinder.

Flash
Use the flash to take photos when lighting conditions are poor or when there is a backlight. The following options are available when you tap the flash icon in the camera screen:

Auto
The camera automatically determines if the lighting conditions require the use of a flash.

Fill flash
Use this setting when the background is brighter than the subject. This removes unwanted dark shadows.

Red-eye reduction
Reduces the red color of eyes when taking a photo.

Off
The flash is turned off. Sometimes photo quality can be better without the flash, even if lighting conditions are poor. Taking a good photo without using the flash requires a steady hand. Use the self-timer to avoid blurred photos.

Flashlight
A torch or camera light is turned on when you take photos.
Scene selection

Use the Scene selection feature to quickly set up the camera for common situations using pre-programmed scenes. The camera determines a number of settings for you to fit the selected scene, ensuring the best possible photo.

- **Off**
  The Scene selection feature is off and you can take photos manually.

- **Soft skin**
  Take photos of faces using an enhanced beauty effect.

- **Soft snap**
  Use for shooting photos against a soft background.

- **Anti motion blur**
  Use for minimizing camera shake when shooting a slightly dark scene.

- **Landscape**
  Use for landscape photos. The camera focuses on distant objects.

- **Backlight correction HDR**
  Use to improve details in high contrast shots. The built-in backlight correction analyzes the image and automatically adjusts it to give you a perfectly lit shot.

- **Night portrait**
  Use for portrait photos taken at night or in poorly lit environments. Due to the long exposure time, the camera must be held still or placed on a stable surface.

- **Night scene**
  Use when taking photos at night or in poorly lit environments. Due to the long exposure time, the camera must be held still or placed on a stable surface.

- **Hand-held twilight**
  Use for taking hand-held low-light photos with reduced noise and blur.

- **High sensitivity**
  Use for taking photos without a flash under low light conditions. Reduces blur.

- **Gourmet**
  Use for shooting food arrangements in bright color.

- **Pet**
  Use for taking photos of your pet. Reduces blur and red eyes.

- **Beach**
  Use for taking photos of seaside or lakeside scenes.

- **Snow**
  Use in bright environments to avoid overexposed photos.

- **Party**
  Use for indoor photos in poorly lit environments. This scene picks up indoor background lighting or candlelight. Due to the long exposure time, the camera must be held still or placed on a stable surface.

- **Sports**
  Use for taking photos of fast-moving objects. Short exposure time minimizes motion blurring.

- **Document**
  Use for photos of text or drawings. Gives the photo increased, sharper contrast.

- **Fireworks**
  Use for taking photos of fireworks in all their glory.

This setting is only available in Manual capturing mode.

Video camera settings

To adjust the video camera settings

1. Activate the camera.
2. Tap one of the settings icons on the screen.
3. To display all settings, tap §
4. Select the setting that you want to adjust, then make your changes.
Video camera settings overview

Video resolution
Adjust the video resolution for different formats.

Full HD
1920×1088 (16:9)
Full HD (Full High Definition) format with 16:9 aspect ratio.

HD
1280×720(16:9)
HD (High Definition) format with 16:9 aspect ratio.

VGA
640×480(4:3)
VGA format with 4:3 aspect ratio.

MMS
Record videos suitable for sending in multimedia messages. The recording time of this video format is limited so that video files can fit in a multimedia message.

! These settings are only available in Manual capturing mode.

Self timer
With the self-timer you can record a video without holding the device. Use it to record group videos where everyone can be in the video. You can also use the self-timer to avoid shaking the camera when recording videos.

On (10 sec.)
Set a 10-second delay from when you tap the camera screen until the video begins to record.

On (2 sec.)
Set a 2-second delay from when you tap the camera screen until the video begins to record.

Off
The video begins to record as soon as you tap the camera screen.

Smile Shutter™ (video)
Use the Smile Shutter™ function to determine what kind of smile the camera reacts to before recording a video.

Focus mode
The focus setting controls which part of a video should be sharp. When continuous autofocus is on, the camera keeps adjusting focus so that the area within the white focus frame stays sharp.

Single autofocus
The camera automatically focuses on the selected subject. Continuous autofocus is on.

Face detection
The camera automatically detects up to five human faces, indicated by frames on the screen. The camera automatically focuses on the nearest face. You can also select which face to focus on by tapping it on the screen. When you tap the camera screen, a yellow frame shows which face is selected and in focus. Face detection cannot be used for all scene types. Continuous autofocus is on.

Object tracking
When you select an object by touching it in the viewfinder, the camera tracks it for you.

! This setting is only available in Manual capturing mode.

Metering
This function automatically determines a well-balanced exposure by measuring the amount of light striking the image you want to capture.
Center
Adjusts the exposure to the center of the image.

Average
Calculates the exposure based on the amount of light striking the whole image.

Spot
Adjusts the exposure in a very small part of the image that you want to capture.

This setting is only available in Manual capturing mode.

Video stabilizer
When recording a video, it can be difficult to hold the device steady. The stabilizer helps you by compensating for small movements of the hand.

Microphone
Select whether to pick up the surrounding sound when recording videos.

Preview
You can choose to preview videos just after you shoot them.

On
The preview of the video appears after you shoot it.

Edit
The video opens for editing after you shoot it.

Off
The video is saved after you shoot it, and no preview appears.

Flash
Use the flash light to record videos when lighting conditions are poor or when there is a backlight. The video flash icon is only available on the video camera screen. Note that the video quality can sometimes be better without a light even if lighting conditions are poor.

Scene selection
The Scene selection feature helps you quickly set up the camera for common situations using pre-programmed video scenes. The camera determines a number of settings for you to fit the selected scene, ensuring the best possible video.

Off
The Scene selection feature is off and you can shoot videos manually.

Soft snap
Use for shooting videos against soft backgrounds.

Landscape
Use for videos of landscapes. The camera focuses on distant objects.

Night
When turned on, light sensitivity is increased. Use in poorly lit environments. Videos of fast moving objects may get blurred. Hold your hand steady, or use a support. Turn off night mode when lighting conditions are good to improve the video quality.

Beach
Use for videos of seaside or lakeside scenes.

Snow
Use in bright environments to avoid overexposed videos.
Sports
Use for videoing fast-moving objects. Short exposure time minimizes motion blurring.

Party
Use for indoor videos in poorly lit environments. This scene picks up indoor background lighting or candlelight. Videos of fast moving objects may get blurred. Hold your hand steady, or use a support.

! This setting is only available in Manual capturing mode.
Photos and videos in Album

Viewing photos and videos

Use the Album application to view photos and play videos that you’ve taken with your camera, or to view similar content that you’ve saved to your device. All photos and videos are displayed in a chronologically ordered grid.

1. Tap the icon to open the Album home screen menu
2. View menu options
3. A slideshow of all your images, or the ones you added to favorites
4. Drag the left edge of the screen to the right to open the Album home screen menu
5. The date of items in the group
6. Tap a photo or video to view it
7. Scroll up or down to view content

To view photos and videos

1. From your Homescreen, tap 📷.
2. Find and tap Album.
3. Tap a photo or video that you want to view, then tap Album > Just once.
4. Flick left to view the next photo or video. Flick right to view the previous photo or video.

If you want to change an application you have chosen as the default to always open photos or videos, tap Settings > Apps and swipe over to the All tab, then select the application and tap Clear defaults under Launch by default.

If the screen orientation does not change automatically when you turn your device sideways, mark the Auto-rotate screen checkbox under Settings > Display > Screen rotation.

To change the size of the thumbnails

- When viewing thumbnails of photos and videos in Album, spread two fingers apart to zoom in, or pinch two fingers together to zoom out.

To zoom a photo

- When you are viewing a photo, spread two fingers apart to zoom in, or pinch two fingers together to zoom out.
To watch a slideshow of your photos
1 When you are viewing a photo, tap the screen to display the toolbars, then tap \( \text{Slideshow} \) to start playing all the photos in an album.
2 Tap a photo to end the slideshow.

To play a video
1 In Album, find and tap the video that you want to play.
2 Tap \( \text{Movies} \), then tap \( \text{Just once} \).
3 If the playback controls are not displayed, tap the screen to display them. To hide the controls, tap the screen again.

To pause a video
1 When a video is playing, tap the screen to display the controls.
2 Tap \( \) .

To fast forward and rewind a video
1 When a video is playing, tap the screen to display the controls.
2 Drag the progress bar marker left to rewind, or right to fast forward.

To adjust the volume of a video
• Press the volume key.

Sharing and managing photos and videos
You can share photos and videos that you’ve stored on your device. You can also manage them in different ways. For example, you can work with photos in batches, delete photos and link them to contacts.

❗ You might not be able to copy, send, or transfer copyright-protected items. Also, some items may not send if the file size is too large.

To share a photo or video
1 In Album, find and tap the photo or video that you want to share.
2 Tap the screen to display the toolbars, then tap \( \).
3 Tap the application that you want to use to share the photo, then follow the steps to send it.

To use a photo as a contact picture
1 When you are viewing a photo, tap the screen to display the toolbars, then tap \( \text{Use as} \) > \( \text{Contact picture} \).
2 If asked, select \( \text{Contacts} \) > \( \text{Just once} \), then select a contact.

To use a photo as wallpaper
1 When you are viewing a photo, tap the screen to display the toolbars, then tap \( \text{Use as} \) > \( \text{Wallpaper} \).
2 Follow the instructions on the screen.

To rotate a photo
1 When you are viewing a photo, tap the screen to display the toolbars, then tap \( \).
2 Select \( \text{Rotate} \). The photo is saved in the new orientation.

To delete a photo or video
1 When you are viewing a photo, tap the screen to display the toolbars, then tap \( \text{Delete} \).
2 Tap \( \text{Delete} \).
To work with batches of photos or videos in Album

1 When viewing thumbnails of photos and videos in Album, tap \(\square\) then tap Select items.
2 Tap the items that you want to work with. Selected items are indicated by a blue frame.
3 Use the tools in the toolbars to work with your selected items.

’ ’ To activate selection mode, you can also touch and hold an item until its frame turns blue. Then you can tap other items to select them.

Analyzing photos with faces in Album

You can analyze any photos on your device that feature people's faces. Once activated, the photo analysis feature stays on, and new photos get analyzed as they are added. After running an analysis, you can then group all photos of the same person in one folder.

To turn on the photo analysis feature

1 From your Homescreen, tap \(\square\).
2 Find and tap Album.
3 Drag the left edge of the Album home screen to the right, then tap Faces. All photos on your device get analyzed and grouped in the Unnamed faces folder.

To name a face

1 In the Faces tile, tap the Unnamed faces folder, then browse to the Other faces folder and choose the face that you want to name.
2 Tap Add name.
3 Type a name, then tap Done > Add as new person.

To edit a face name

1 When you are viewing a face in full-screen view, tap the screen to display the toolbars, then tap \(\square\) > Edit name tags.
2 Tap OK.
3 Tap the name of the face that you want to edit.
4 Edit the name, then tap Done > Add as new person.

Editing photos with the Photo editor application

You can edit and apply effects to original photos that you’ve taken with your camera. For example, you can change the light effects. After you save the edited photo, the original unchanged version of the photo remains on your device.

To edit a photo

• When you are viewing a photo, tap the screen to display the toolbars, then tap \(\square\).

To crop a photo

1 When you are viewing a photo, tap the screen to display the toolbars, then tap \(\square\).
2 If prompted, select Photo editor > Just once.
3 Tap \(\square\) > Crop.
4 Select an option.
5 To adjust the crop frame, touch and hold the edge of the crop frame. When the squares at the edges disappear, drag inward or outward to resize the frame.
6 To resize all sides of the crop frame at the same time, touch and hold one of the four corners to make the squares at the edges disappear, then drag the corner accordingly.
7 To move the crop frame to another area of the photo, touch and hold inside the frame, then drag it to the desired position.
8 Tap Apply.
9 To save a copy of the photo as you cropped it, tap Save.
To apply special effects to a photo

1. When you are viewing a photo, tap the screen to display the toolbars, then tap 📷.
2. If prompted, select Photo editor > Just once.
3. Tap 🎨, then select an option.
4. Edit the photo as desired, then tap Save.

Editing videos with the Movie Creator application

You can edit videos that you've taken with your camera. For example, you can trim a video to the desired length or adjust the speed of a video. After you save the edited video, the original unchanged version of the video remains on your device.

To trim a video

1. While the video is playing, tap the screen to display the toolbars, then tap 📷 > Trim.
2. To move the trim frame to another part of the timeline, touch and hold the edge of the trim frame and drag it to the desired position, then tap Apply.
3. To save a copy of the trimmed video, tap Save.

To adjust the speed of a video

1. While the video is playing, tap the screen to display the toolbars, then tap 📷 > Speed.
2. Select an option, then touch and hold the edge of the timeline and drag it to the desired position and tap Apply
3. To save a copy of the edited video, tap Save.

Hiding photos and videos

You can hide any photos and videos from the Album homescreen. Once photos and videos are hidden from the Album homescreen, they can only be viewed from the Hidden folder.

To hide a photo or video

1. In Album, find and tap the photo or video that you want to hide.
2. Tap the screen to display the toolbars, then tap 📷.
3. Tap Hide > OK.

To view your hidden photos and videos

1. In Album, drag the left edge of the Album homescreen to the right, then tap Hidden.
2. Tap a photo or video to view it.
3. Flick left to view the next photo or video. Flick right to view the previous photo or video.

To unhide a photo or video

1. In Album, drag the left edge of the Album homescreen to the right, then tap Hidden.
2. Tap a photo or video that you want to unhide.
3. Tap the screen to display the toolbars, then tap 📷.
4. Tap Don't hide.

Album homescreen menu

Through the Album homescreen menu you can browse to all your photo albums, including albums of photos and videos taken with the camera as well as content that you share online via services such as PlayMemories Online, Picasa™, and Facebook. Once you are logged in to such services, you can manage content, comment on photos and videos, and view comments from friends. From the Album application, you can also add
geotags to photos, perform basic editing tasks, and use methods such as Bluetooth® wireless technology and email to share content.

The PlayMemories Online service is not available in all countries or regions.

**To view photos from online services in Album**

1. From your Homescreen, tap 🎨.
2. Find and tap Album, then drag the left edge of the Album homescreen to the right.
3. Tap the desired online service, then follow the on-screen instructions to get started. All available online albums that you have uploaded to the service are displayed.
4. Tap any album to view its content, then tap a photo in the album.
5. Flick left to view the next photo or video. Flick right to view the previous photo or video.

**Viewing your photos on a map**

Adding location information to photos is referred to as geotagging. You can view and tag your photos on a map and show friends and family where you were when you took a particular photo. See [Adding the geographical position to your photos](#) on page 79 for more information.

💡 If you have turned on location detection and activated geotagging in the camera, you can tag your photos directly for map viewing at a later stage.
1 View geotagged photos in Globe view
2 Search a location on the map
3 View menu options
4 Double tap to zoom in. Pinch to zoom out. Drag to view different parts of the map
5 A group of photos and/or videos geotagged with the same location
6 Thumbnails of the selected group of photos and/or videos. Tap an item to view it in full screen

* If several photos were taken at the same location, only one of them appears on the map. The total number of photos appears in the top right corner, for example, 🗺. To view all photos in the group, tap the cover photo and then tap one of the thumbnails at the bottom of the screen.

To add a geotag to a photo
1 When you are viewing a photo, tap the screen to display the toolbars, then tap **Tap to set location** to open the map screen.
2 Find and tap the desired location to put the photo on the map.
3 To adjust the location of the photo, tap the location on the map where you want to move the photo to.
4 When you are done, tap **OK** to save the geotag and return to the photo viewer.

To view geotagged photos on a map
1 From your Homescreen, tap 🗺.
2 Find and tap **Album**.
3 Drag the left edge of the Album home screen to the right, then tap **Places**.
4 Tap the photo that you want to view on a map.

To view geotagged photos on a globe
1 From your Homescreen, tap 🗺.
2 Find and tap **Album**.
3 Drag the left edge of the Album home screen to the right, then tap **Places** > 🗺.
4 Tap the photo that you want to view on a globe.

To change the geotag of a photo
1 When viewing a photo on the map in Album, touch and hold the photo until its frame turns blue, then tap the desired location on the map.
2 Tap **OK**.

To change the map view
* When viewing the map in Album, tap 🗺, then select **Classic view** or **Satellite view**.
Videos

Watching videos in the Movies application

Use the Movies application to play movies and other video content that you’ve saved or downloaded to your device. The Movies application also helps you get poster art, plot summaries, genre info, and director details for each movie. You can also play your movies on other devices that are connected to the same network or saved in the cloud.

⚠ Some video files may not be playable in the Movies application.

1 View menu options
2 Display the most recently played video
3 Drag the left edge of the screen to the right to browse all downloaded and saved videos
4 Tap to play saved or downloaded video files
5 Scroll up or down to view content

To play a video in Movies

1 From your Homescreen, tap 🎥, then find and tap Movies.
2 Find and tap the video that you want to play. If the video is not displayed on the screen, drag the left edge of the screen to the right to open the Movies homescreen menu, then find and tap the video that you want to play.
3 To display or hide the controls, tap the screen.
4 To pause playing, tap 🕳️. To resume playing, tap 🕳️.
5 To rewind, drag the progress bar marker to the left. To fast forward, drag the progress bar marker to the right.

To play a video on an external device

1 When the video is playing, tap the screen to display all the controls.
2 Tap ₹ > Throw.
3 Select an external device on which to play the video. If there is no external device available, follow the on-screen instructions to add one.

To change settings in Movies

1 From your Homescreen, tap 🎥, then find and tap Movies.
2 Tap ₹ > Settings, then change the settings as desired.
To change the sound settings while a video is playing
1 While a video is playing, tap the screen to display the controls.
2 Tap ✎, then tap Sound settings.
3 Mark the checkboxes for the sound settings that you want to activate.
4 When you’re finished, tap OK.

To share a video
1 When a video saved under Movies or TV shows is playing, tap ✎, then tap Share.
2 Tap the application that you want to use to share the selected video, then follow the relevant steps to send it.

Transferring video content to your device
Before you start using the Movies application, it’s a good idea to transfer movies, TV shows and other video content to your device from other devices, such as a computer. There are several ways to transfer your content:
• For Windows® only: Connect your device to a computer using a USB cable and drag and drop the video files directly using the file manager application on the computer. See Managing files using a computer on page 117.
• If you have a PC or an Apple® Mac® computer, use Xperia™ Companion to organize content and transfer video files to your device.

Managing video content

To get movie information manually
1 Make sure your device has an active data connection.
2 From your Homescreen, tap 🎥, then find and tap Movies.
3 Tap All in the My Collection tab to browse to the thumbnail of a file that you want to get information about.
4 Touch and hold the thumbnail for the video, then tap Search for info.
5 If prompted, allow your device to download video details using your mobile data connection.
6 In the search field, enter keywords for the video, then tap the confirm key on the keyboard. All matches are displayed in a list.
7 Select a search result, then tap Done. The download of the information begins.
8 You can get information about newly added videos automatically every time the Movies application opens if you mark the Get video details checkbox under Settings. Data transmission charges may apply.
9 If the downloaded information is not correct, search again using different keywords.

To clear information about a video
1 From your Homescreen, tap 🎥, then find and tap Movies.
2 Drag the left edge of the screen to the right to open the Movies homescreen menu, then browse through the different categories and to the video file that you want to edit.
3 Touch and hold the video thumbnail, then tap Clear info.

To delete a video
1 From your Home screen, tap 🎥, then find and tap Movies.
2 Drag the left edge of the screen to the right to open the Movies homescreen menu, then browse through the different categories and to the video file that you want to delete.
3 Touch and hold the video thumbnail, then tap Delete from the list that appears.
4 Tap Delete again to confirm.
Connectivity

Mirroring the screen of your device wirelessly on a TV

You can use the Screen mirroring feature to show the screen of your device on a TV or other large display without using a cable connection. Wi-Fi Direct™ technology creates a wireless connection between the two devices, so you can sit back and enjoy your favorite photos from the comfort of your couch. You can also use this feature to listen to music from your device via the TV's speakers.

⚠️ Your TV must support screen mirroring based on Wi-Fi CERTIFIED Miracast™ for the functionality described above to work. If your TV does not support screen mirroring, you may need to purchase a wireless display adapter separately.

⚠️ When using screen mirroring, the image quality may sometimes be negatively impacted if there is interference from other Wi-Fi® networks.

To mirror the screen of your device on a TV screen

1. TV: Follow the instructions in the User guide of your TV to turn on the screen mirroring function.
2. Your device: From your Homescreen, tap 📱.
3. Find and tap Settings > Xperia™ Connectivity > Screen mirroring.
4. Tap Start.
5. Tap OK and select a device.

⚠️ When using screen mirroring, do not cover the Wi-Fi antenna area of your device.

⚠️ Your TV must support screen mirroring based on Wi-Fi CERTIFIED Miracast™ for the functionality described above to work.

To stop screen mirroring between devices

1. From your Homescreen, tap 📱.
2. Find and tap Settings > Xperia™ Connectivity > Screen mirroring.
3. Tap Disconnect, then tap OK.

Sharing content with DLNA Certified™ devices

You can view or play media content saved to your device on other devices such as, for example, a TV, or a computer. Such devices must be DLNA Certified™ by the Digital Living Network Alliance and all devices must be connected to the same Wi-Fi® network in order for content to be shared. You can also view or play content from other DLNA Certified™ devices on your device.

After you set up the sharing of content between devices, you can, for example, listen to music files stored on your home computer from your device, or view photos taken with your device's camera on a large-screen TV.

Playing files from DLNA Certified™ devices on your device

When you play files from another DLNA Certified™ device on your device, this other device acts as a server. In other words, it shares content over a network. The server device must have its content sharing function enabled and give access permission to your device. It also must be connected to the same Wi-Fi® network as your device.
To play a shared track on your device
1. Make sure the devices that you want to share files with are connected to the same Wi-Fi® network as your device.
2. From your Homescreen, tap 📅, then find and tap 📅.
3. Drag the left edge of the Walkman® home screen to the right, and tap Devices.
4. Select a device from the list of connected devices.
5. Browse the folders of the connected device and select the track that you want to play. The track starts playing automatically.

To play a shared video on your device
1. Make sure the devices that you want to share files with are connected to the same Wi-Fi® network as your device.
2. From your Homescreen, tap 📅, then find and tap Movies.
3. Drag the left edge of the Movies home screen to the right, and tap Devices.
4. Select a device from the list of connected devices.
5. Browse the folders of the connected device and select the video that you want to play.

To view a shared photo on your device
1. Make sure the devices that you want to share files with are connected to the same Wi-Fi® network as your device.
2. From your Homescreen, tap 📅, then find and tap Album.
3. Drag the left edge of the Album home screen to the right, and tap Devices.
4. Select a device from the list of connected devices.
5. Browse the folders of the connected device and select a photo to view it.

Playing files from your device on DLNA Certified™ devices
Before you can view or play media files from your device on other DLNA Certified™ devices, you must set up file sharing on your device. The devices that you share content with are called client devices. For example, a TV, computer or tablet can act as client devices. Your device works as a media server when it makes content available to client devices. When you set up file sharing on your device, you must also give access permission to client devices. After you do so, such devices appear as registered devices. Devices that are waiting for access permission are listed as pending devices.

To set up file sharing with other DLNA Certified™ devices
1. Connect your device to a Wi-Fi® network.
2. From your Homescreen, tap 📅, then find and tap 📅.
3. Tap 📅, then tap Media server.
4. To turn on the Share media function, drag the slider. 📅 appears in the status bar. Your device can now work as a media server.
5. Connect your computer or other devices to the same Wi-Fi® network as your device.
6. A notification appears in the status bar of your device. Open the notification and set access permissions for each device.

! The instructions for setting up file sharing using DLNA™ differ depending on the client device. Refer to your client device User guide for more information. If the device cannot connect to a client on the network, check if your Wi-Fi® network is working.

✨ You can also access the Media server menu under Settings > Xperia™ Connectivity > Media server. If you close the Media server view, the file sharing function stays running in the background.

To stop sharing files with other DLNA Certified™ devices
1. From your Homescreen, tap 📅.
2. Find and tap Settings > Xperia™ Connectivity > Media server.
3. Drag the slider beside Share media to the left.
To set access permissions for a pending device
1. From your Homescreen, tap 📱.
2. Find and tap Settings > Xperia™ Connectivity > Media server.
3. Select a device from the Pending devices list.
4. Select an access permission level.

To change the name of a registered device
1. From your Homescreen, tap 📱.
2. Find and tap Settings > Xperia™ Connectivity > Media server.
3. Select a device from the Registered devices list, then select Change name.
4. Enter a new name for the device.

To change the access level of a registered device
1. From your Homescreen, tap 📱.
2. Find and tap Settings > Xperia™ Connectivity > Media server.
3. Select a device from the Registered devices list.
4. Tap Change access level and select an option.

To get help about sharing content with other DLNA Certified™ devices
1. From your Homescreen, tap 📱.
2. Find and tap Settings > Xperia™ Connectivity > Media server.
3. Tap 📈.

Playing files on a Digital Media Renderer device
Using DLNA™ technology, you can push media content saved on your device to another device connected to the same Wi-Fi® network. The other device must be able to function as a Digital Media Renderer (DMR) device and render or play content received from your device. A TV with DLNA features or a PC running Windows® 7 or higher are examples of DMR devices.

⚠ The settings for enabling the Digital Media Renderer may vary depending on the device. Refer to the user guide of the DMR device for more information.

⚠ Content secured with Digital Rights Management (DRM) cannot be played on a Digital Media Renderer device using DLNA™ technology.

To view photos or videos from your device on a DMR device
1. Make sure that you have correctly set up the DMR device and that it is connected to the same Wi-Fi® network as your device.
2. From your Homescreen, tap 📱.
3. Find and tap Album.
4. Browse and open the photos or videos that you want to view.
5. Tap the screen to display the toolbar, then tap 📸 and select a DMR device that you want to share your content with. The selected content start playing in chronological order on the device that you select.
6. To disconnect from the DMR device, tap 📸 and select Disconnect. The file stops playing on the DMR device but continues playing on your device.

ᅬ You can also share a video from the Movies application on your device by tapping the video and then tapping 📸.
To play a music track from your device on a DMR device
1. Make sure that you have correctly set up the DMR device and that it is connected to the same Wi-Fi® network as your device.
2. From your Homescreen, tap Bluetooth®, then find and tap Bluetooth®.
3. Select a music category and browse to the track that you want to share, then tap the track.
4. Tap Bluetooth® and select a DMR device to share your content with. The track plays automatically on the device that you select.
5. To disconnect from the DMR device, tap Bluetooth® and select your device. The track stops playing on the DMR device but continues playing on your device.

Bluetooth® wireless technology
Use the Bluetooth® function to send files to other Bluetooth®-compatible devices, or to connect to hands-free accessories. Bluetooth® connections work better within 33 feet (10 meters), with no solid objects in between. In some cases you have to manually pair your device with other Bluetooth® devices.

! Interoperability and compatibility among Bluetooth® devices can vary.

To turn on the Bluetooth® function and make your device visible
1. From your Homescreen, tap Bluetooth®.
2. Find and tap Settings.
3. Tap the on-off switch beside Bluetooth® so the Bluetooth® function is turned on.
5. Tap your device name to make your device visible to other Bluetooth® devices.

To adjust your device's visibility time to other Bluetooth® devices
1. From your Homescreen, tap Bluetooth®.
2. Find and tap Settings > Bluetooth.
3. Press Settings and select Visibility timeout.
4. Select an option.

Naming your device
You can give your device a name. This name is shown to other devices after you have turned on the Bluetooth® function and your device is set to visible.

To give your device a name
1. Make sure the Bluetooth® function is turned on.
2. From your Homescreen, tap Bluetooth®.
3. Find and tap Settings > Bluetooth®.
4. Tap Settings and select Rename phone.
5. Enter a name for your device.
6. Tap Rename.

Pairing with another Bluetooth® device
When you pair your device with another device, you can, for example, connect your device to a Bluetooth® headset or a Bluetooth® car kit and use these other devices to share music.

Once you pair your device with another Bluetooth® device, your device remembers this pairing. When pairing your device with a Bluetooth® device, you may need to enter a passcode. Your device will automatically try the generic passcode 0000. If this does not work, refer to the user guide for your Bluetooth® device to get the device passcode. You
do not need to re-enter the passcode the next time you connect to a previously paired Bluetooth® device.

! Some Bluetooth® devices, for example, most Bluetooth® headsets, require you to both pair and connect with the other device.

! You can pair your device with several Bluetooth® devices, but you can only connect to one Bluetooth® profile at the same time.

To pair your device with another Bluetooth® device
1 Make sure the device you want to pair with has the Bluetooth® function activated and is visible to other Bluetooth® devices.
2 From your device’s Homescreen, tap 📱.
3 Find and tap Settings > Bluetooth.
4 Drag the slider beside Bluetooth to turn on the Bluetooth® function. A list of available Bluetooth® devices appears.
5 Tap the Bluetooth® device you want to pair with.
6 Enter a passcode, if required, or confirm the same passcode on both devices.

To connect your device to another Bluetooth® device
1 From your Homescreen, tap 📱.
2 Find and tap Settings > Bluetooth.
3 Tap the Bluetooth® device you want to connect to.

To unpair a Bluetooth® device
1 From your Homescreen, tap 📱.
2 Find and tap Settings > Bluetooth.
3 Under Paired devices, tap ☒ beside the name of the device you want to unpair.
4 Tap Unpair.

Sending and receiving items using Bluetooth® technology
Use Bluetooth® technology to share items with other Bluetooth® compatible devices such as phones or computers. You can send and receive the following kinds of items:

- Photos and videos
- Music and other audio files
- Web pages

To send items using Bluetooth™
1 Receiving device: Make sure the Bluetooth™ device that you want to send the item to has Bluetooth™ turned on and is visible to other Bluetooth™ devices.
2 In the sending device, open the application which contains the item you want to send and scroll to the item.
3 Depending on the application and the item you want to send, you may need to, for example, touch and hold the item, open the item, or press 📱. Other ways to send an item may exist.
4 Select a share or send menu item.
5 In the menu that appears, select Bluetooth.
6 Turn on Bluetooth™, if you are asked to do so.
7 Tap the name of the receiving device.
8 Receiving device: If asked, accept the connection.
9 If asked, enter the same passcode on both devices, or confirm the suggested passcode.
10 Receiving device: Accept the incoming item. If needed, drag the status bar downward to find the notification.
To receive items using Bluetooth®

1 Make sure that the Bluetooth® function is on and is visible to other Bluetooth® devices.
2 The sending device now starts sending data to your device.
3 If prompted, enter the same passcode on both devices, or confirm the suggested passcode.
4 When you are notified of an incoming file to your device, drag the status bar downward and tap the notification to accept the file transfer.
5 Tap Accept to start the file transfer.
6 To view the progress of the transfer, drag the status bar downward.
7 To open a received item, drag the status bar downward and tap the relevant notification.

To view files you have received using Bluetooth®

1 From your Homescreen, tap 📲.
2 Find and tap Settings > Bluetooth.
3 Press 📦 and select Show received files.
Smart apps and features that save you time

Controlling accessories and settings with Smart Connect

Use the Smart Connect application to set what happens in your device when you connect or disconnect an accessory. For example, you can decide to always start the FM radio application when you connect a headset.

You can also set Smart Connect to read out incoming text messages. Or you can use the application to set a specific action or a group of actions to launch on your device at certain times of the day. For example, when you connect your headset between 7am and 9am, you can decide that:

- The Walkman® application starts.
- The web browser opens the morning paper.
- The ring volume is set to vibrate.

With Smart Connect, you can also manage accessories such as SmartTags and SmartWatch. Refer to the User guide of the specific accessory for more information.

1. Tap to display all added devices
2. Add a device or an event
3. View menu options
4. Tap to display all added events
5. Tap to activate an event
6. Tap to view details of an event
To create a Smart Connect event
1 From your Homescreen, tap  📱, then find and tap  📱.
2 If you are opening Smart Connect for the first time, tap OK to close the introduction screen.
3 On the Events tab, tap  EVENTS.
4 If you are creating an event for the first time, tap OK again to close the introduction screen.
5 Add conditions you want to trigger the event under. A condition could be the connection with an accessory, or a specific time interval, or both.
6 Tap  ➔ to continue.
7 Add what you want to happen when you connect an accessory, and set other settings as desired.
8 Tap  ➔ to continue.
9 Set an event name, then tap Finish.
âm To add a Bluetooth® accessory, you have to first pair it with your device.

To edit a Smart Connect event
1 Start the Smart Connect application.
2 On the Events tab, tap an event.
3 If the event is switched off, drag the slider to the right to turn it on.
4 Tap Edit, then adjust the settings as desired.

To delete an event
1 Start the Smart Connect application.
2 On the Events tab, touch and hold the event you want to delete, then tap Delete event.
3 Tap Delete to confirm.
âm You can also open the event you want to delete, then tap  📱 > Delete event > Delete.

To set Smart Connect to read out incoming text messages
1 Start the Smart Connect application.
2 Tap  📩 then tap Settings.
3 Mark the checkbox beside Text to speech, then confirm activation, if necessary.
âm If this feature is turned on, all incoming messages are read aloud. To protect your privacy, you may need to turn off this feature if you are using your device in a public place or at work, for example.

Managing devices
Use the Smart Connect application to manage a range of smart accessories that you can connect to your device, including SmartTags, SmartWatch, and Smart Wireless Headset pro from Sony. Smart Connect downloads any necessary applications and also finds third-party applications, when available. Previously connected devices show in a list that allows you to get more information about the features of each device.

To pair and connect an accessory
1 Start the Smart Connect application. If you are opening Smart Connect for the first time, tap OK to close the introduction screen.
2 Tap Devices, then tap  ➔.
3 Tap OK to start searching for devices.
4 In the search result list, tap the name of the device that you want to add.

To adjust the settings for a connected accessory
1 Pair and connect the accessory with your device.
2 Start the Smart Connect application.
3 Tap Accessories, then tap the name of the connected accessory.
4 Adjust the desired settings.
Travel and maps

Using location services

Location services allow applications such as Maps and the camera to use information from Wi-Fi® networks as well as Global Positioning System (GPS) information to determine your approximate location. If you’re not within a clear line of sight to GPS satellites, your device can determine your location using the Wi-Fi® function.

In order to use your device to find out where you are, you need to enable location services.

To enable location services
1 From your Homescreen, tap 📱.
2 Find and tap Settings > Location.
3 Drag the slider beside Location to the right.
4 Tap Agree to confirm.

To allow Google apps to access your location
1 Make sure you are signed in to your Google™ account from your device.
2 From your Homescreen, tap 📱.
3 Find and tap Settings > Google > Location.
4 Drag the slider beside Location to the right.
5 Tap Agree to confirm.

Improving GPS accuracy

The first time you use the GPS function in your device, it can take 5 to 10 minutes for your location to be found. To help the search, make sure you have a clear view of the sky. Stand still and don’t cover the GPS antenna (the highlighted area in the image). GPS signals can pass through clouds and plastic, but not through most solid objects such as buildings and mountains. If your location isn’t found after a few minutes, move to another location.

Google Maps™ and navigation

Use Google Maps™ to track your current location, view real-time traffic situations, and receive detailed directions to your destination.

When you view a map, you use data traffic to get an Internet connection, and data is transferred to your device. So it’s a good idea to save a map and make it available offline before you take a trip. This way, you can avoid high roaming costs.

! The Google Maps™ application requires the use of an Internet connection when used online. You may incur data connection charges when you connect to the Internet from your device.
Contact your network operator for more information. The Google Maps™ application may not be available in every market, country, or region.

1. Enter an address or name to search for a location, for example, a restaurant’s name or address.
2. Select a transportation mode and get directions to your destination.
3. View your account profile.
4. Location mark - shows a searched location on the map.
5. Show your current location.
6. View help and options.

To show your location on the map
1. From your Homescreen, tap 🏠.
2. Find and tap Maps, then tap 📧.

To search for a location
1. From your Homescreen, tap 🏠.
2. Find and tap Maps.
3. In the search field, enter the name of the location you want to find.
4. Tap the Enter key on the keyboard to start the search, or select a suggested location from the list. If the search is successful, the location is indicated by 📍 on the map.

To get directions
1. While viewing a map, tap 🏵.
2. Select a transportation mode, then enter your starting point and your destination. The recommended routes appear in a list.
3. Tap an option from the list of recommended routes to view the directions on a map.

To make a map available offline
1. While viewing a map, tap the search field.
2. Scroll to the bottom and tap Make this map area available offline. The area shown on the map gets saved to your device.

To learn more about Google Maps™
• When you use Google Maps™, tap 3, then tap Help.

Using data traffic when traveling
When you travel outside of your home cellular network, you might need to access the Internet using cellular data traffic. In this case, you need to activate data roaming on your device. It is recommended to check the relevant data transmission charges in advance.
To activate or deactivate data roaming

1. From your Homescreen, tap 📱.
2. Find and tap Settings > More... > Mobile networks.
3. Select a SIM card.
4. Mark or unmark the Data roaming checkbox.

⚠️ You can’t activate data roaming when mobile data is turned off.

Airplane mode

In Airplane mode, the network and radio transceivers are turned off to prevent disturbance to sensitive equipment. However, you can still play games, listen to music, watch videos and other content, as long as all this content is saved on your memory card or internal storage. You can also be notified by alarms, if alarms are activated.

💡 Turning on Airplane mode reduces battery consumption.

To turn on Airplane mode

1. From your Homescreen, tap 📱.
2. Find and tap Settings > More....
3. Mark the Airplane mode checkbox.

💡 You can also press and hold down the power key (✓) and then select Airplane mode in the menu that opens.
Calendar and alarm clock

Calendar

Use the Calendar application to manage your time schedule. If you have signed in to and synchronized your device with one or several online accounts that include calendars, for example, your Google™ account or Xperia™ with Facebook account, then calendar events from these accounts will also appear in the Calendar application. You can select which calendars you want to integrate into the combined Calendar view.

When an appointment time approaches, your device plays a notification sound to remind you. Also, 🔔 appears in the status bar.

To create a calendar event
1. From your Homescreen, tap 🔙, then tap Calendar.
2. Tap ●.
3. If you have synchronized your calendar with one or more accounts, select the account you want to add this event to. If you only want to add this event on your device, tap Device calendar.
4. Enter or select the desired information and add attendees to the event.
5. To save the event and send out invitations, tap Done.

To view a calendar event
1. From your Homescreen, tap 🔙, then tap Calendar.
2. Tap the event you want to view.

To view multiple calendars
1. From your Homescreen, tap 🔙, then find and tap Calendar.
2. Tap 📅, then mark the checkboxes for the calendars you want to view.

To zoom the calendar view
* When the Week or the Day view is selected, pinch the screen to zoom in.
To display national holidays in the Calendar application
1. From your Homescreen, tap 📅, then tap Calendar.
2. Tap ☰, then tap Settings.
3. Tap National holidays.
4. Select an option, or a combination of options, then tap OK.

To display birthdays in the Calendar application
1. From your Homescreen, tap 📅, then tap Calendar.
2. Tap ☰, then tap Settings.
3. Drag the slider beside Birthdays to the right.
4. Tap Birthdays, then select the contact group you want to display birthdays for.

To display weather forecasts in the Calendar application
1. From your Homescreen, tap 📅, then tap Calendar.
2. Tap ☰, then tap Settings.
3. Drag the slider beside Weather forecast to the right.
4. If location services are disabled, tap Home location, then search for the city that you want to add.

For more information about how to enable location services, see Using location services on page 105.

To change weather forecast settings in the Calendar application
1. From your Homescreen, tap 📅, then tap Calendar.
2. Tap ☰, then tap Settings.
3. Tap Weather forecast.
4. Adjust the settings as desired.

Alarm and clock
You can set one or several alarms and use any sound saved on your device as the alarm signal. The alarm does not sound if your device is turned off. But it does sound when the device is set to silent mode.

The alarm time format displayed is the same as the format you select for your general time settings, for example, 12-hour or 24-hour.
To set a new alarm
1. From your Home screen, tap 📱.
2. Find and tap Alarm & clock.
3. Tap +.
4. Tap Time and adjust the time by scrolling up and down.
5. Tap Set.
6. If desired, edit other alarm settings.
7. Tap Done.

To snooze an alarm when it sounds
• Tap Snooze.

To turn off an alarm when it sounds
• Slide 🔄 to the right.

To edit an existing alarm
1. Open the Alarm & clock application, then tap the alarm you want to edit.
2. Make the desired changes.
3. Tap Done.

To turn an alarm on or off
• Open the Alarm & clock application, then drag the slider next to the alarm to the on or off position.

To delete an alarm
1. Open the Alarm & clock application, then touch and hold the alarm that you want to delete.
2. Tap Delete alarm, then tap Yes.

To set the sound for an alarm
1. Open the Alarm and clock application, then tap the alarm you want to edit.
2. Tap Alarm sound and select an option, or tap 🎵 to select from your music files.
3. Tap Done twice.

To set a recurring alarm
1. Open the Alarm & clock application, then tap the alarm you want to edit.
2. Tap Repeat.
3. Mark the checkboxes for the desired days, then tap OK.
4. Tap Done.

To activate the vibrate function for an alarm
1. Open the Alarm & clock application, then tap the alarm you want to edit.
2. Mark the Vibrate checkbox.
3. Tap Done.

To set alarms to sound when the device is in silent mode
1. Open the Alarm & clock application, then tap the alarm you want to edit.
2. Mark the Alarm in silent mode checkbox, then tap Done.
Support and maintenance

Support for your device
Use the Support application in your device to search a User guide, read troubleshooting guides, and find information about software updates and other product-related information.

To access the Support application
1 From your Homescreen, tap 📷.
2 Find and tap 🛠️, then select the required support item.

⚠ Make sure that you have a working Internet connection, preferably over Wi-Fi®, to limit data traffic charges when using the Support application.

Help in menus and applications
Some applications and settings have help available in the options menu, which is normally indicated by 📖 in the specific applications.

Help us improve our software
You can enable the sending of usage info from your device so that Sony Mobile can receive anonymous bug reports and statistics that help improve our software. None of the information gathered includes personal data.

To allow the sending of usage info
1 From your Homescreen, tap 📷.
2 Find and tap Settings > About phone > Usage info settings.
3 Mark the Send usage info checkbox if it is not already marked.
4 Tap Agree.

Computer tools
There are a number of tools available to help you connect your device to a computer and manage content such as contacts, movies, music, and photos.

Xperia™ Companion
Xperia™ Companion is a computer software with a collection of tools and applications you can use when you connect your device to a computer. With Xperia™ Companion, you can:

• Update or repair your device’s software.
• Transfer content from your device using Xperia™ Transfer.
• Back up and restore content on your computer.
• Sync multimedia content – camera content, music and playlists between your device and computer.
• Browse files on your device.

To use Xperia™ Companion, you need an Internet-connected computer running one of the following operating systems:

• Microsoft® Windows® 7 or later
• Mac OS® X 10.8 or later

Media Go™ for Microsoft® Windows®

The Media Go™ application for Windows® computers helps you transfer photos, videos and music between your device and a computer. To read more about how to use the Media Go™ application, go to http://mediago.sony.com/enu/features.

To use the Media Go™ application, you need one of these operating systems:

* Microsoft® Windows® 10
* Microsoft® Windows® 8 / 8.1
* Microsoft® Windows® 7
* Microsoft® Windows Vista®

Updating your device

You should update the software on your device to get the latest functionality, enhancements and bug fixes in order to ensure optimal performance. When a software update is available, a notification appears in the status bar. You can also check for new updates manually.

The easiest way to install a software update is to do it wirelessly from your device. However, some updates are not available for wireless download. You then need to use the Xperia™ Companion software on a PC or on an Apple® Mac® computer to update your device.

For more information about software updates, go to www.sonymobile.com/update.

Insufficient remaining storage capacity may prevent updates. Ensure you have sufficient storage capacity before attempting to update.

To check for new software

1. From your Home screen, tap .
2. Find and tap Update Center.

Updating your device wirelessly

Use the Update Center application to update your device wirelessly. It handles both application updates and system updates and can also facilitate the download of new applications developed for your device. The updates that you can download over a mobile network depend on your operator. It is recommended to use a Wi-Fi® network instead of a mobile network to download new software so that you can avoid data traffic costs.

To download and install a system update

1. From your Home screen, tap .
2. Find and tap Update Center.
3. Select the desired system update, then tap Download.
4. When the download is finished, tap Install and follow the on-screen instructions to complete the installation.

To download and install an application update

1. From your Home screen, tap .
2. Find and tap Update Center.
3. Select the desired application update, then tap Update. The update installs automatically after download.

To install a new application

1. From your Home screen, tap .
2. Find and tap Update Center.
3. Select the desired application, then tap Install. The application installs automatically after download.
To download and install a system update from the Notifications panel
1 Drag the status bar downwards to open the Notifications panel.
2 Scroll down and select the desired system update, then tap Download.
3 When the download is finished, tap Install and follow the on-screen instructions to complete the installation.

To download and install an application update from the Notifications panel
1 Drag the status bar downwards to open the Notifications panel.
2 Scroll down and select the desired application update, then tap Update. The update installs automatically after download.

To install a new application from the Notifications panel
1 Drag the status bar downwards to open the Notifications panel.
2 Scroll down and select the desired application, then tap Install. The new application installs automatically after download.

Updating your device using a computer
You can download and install software updates on your device using a computer with an Internet connection. You need a USB cable and a PC or an Apple® Mac® computer running the Xperia™ Companion software.

⚠️ If you don’t have the Xperia™ Companion software installed on the relevant computer, connect your device to the computer using a USB cable and follow the on-screen installation instructions.

To update your device using a computer
1 Make sure you have the Xperia™ Companion software installed on your PC or Apple® Mac® computer.
2 Using a USB cable, connect your device to the computer.
3 Computer: Launch the Xperia™ Companion software. After a few moments, the computer detects your device and searches for new software.
4 Computer: If a new software update is detected, a popup window appears. Follow the on-screen instructions to run the relevant software updates.

⚠️ When you connect the device to the computer via a USB cable, you are prompted to install the software, or cancel, unless you have previously selected Do not show again.

Finding a lost device

If you have a Google™ account, the my Xperia web service can help you locate and secure your device if you ever lose it. You can:
• Locate your device on a map.
• Sound an alert, even if the device is in silent mode.
• Remotely lock the device and make the device display your contact information to anyone who finds it.
• As a last resort, remotely clear the internal and external memory of the device.

⚠️ The my Xperia service may not be available in all countries/regions.
To activate the my Xperia service

1. From your Homescreen, tap 📲.
2. Find and tap Settings > Security > my Xperia > Activate.
3. Mark the checkbox, then tap Accept.
4. If prompted, sign in to your Sony Entertainment Network account, or create a new one if you don’t have one.
5. Enable locations services on your device if this function is not already enabled.

To verify that the my Xperia service can locate your device, go to myxperia.sonymobile.com and sign in using either the Google™ account or the Sony Entertainment Network account that you have set up on your device.

Finding the identification number of your device

Your device has a unique ID (identification) number. On your device, this number is referred to as the IMEI (International Mobile Equipment Identity). You should keep a copy of this number. You may require it, for example, when you access the Xperia™ Care support service and need to register your device. Also, if your device is stolen, some network providers can use this number to stop the device from accessing the network in your country.

To view your IMEI number

1. Remove the cover to view your IMEI number.
2. Open the phone dialer on your device and enter *#06#.

To view your IMEI number in the device

1. From your Homescreen, tap 📲.
2. Find and tap Settings > About phone > Status.
3. Select the SIM card, then scroll to IMEI to view the IMEI number.

Battery and power management

Your device has an embedded battery. You can keep track of your battery consumption and see which applications are using the most power. You can remove or restrict apps and activate a number of power saving modes to get more out of your battery. You can also view an estimate of how much battery time is left and adjust your battery settings to improve performance and make your battery last longer.
To manage your battery consumption

1. From your Homescreen, tap 📱.
2. Find and tap Settings > Power management > App power consumption. An overview appears showing applications that have high data traffic rates or that you have not used for a long time.
3. Review the information, then act as required, for example, to uninstall an application or restrict its usage.

To view which applications use the most battery power

1. From your Homescreen, tap 📱.
2. Find and tap Settings > Power management > Battery usage.

To view the estimated battery time

1. From your Homescreen, tap 📱.
2. Find and tap Settings > Power management.

Power-saving modes

There are several power-saving modes available for you to use if you want to make your battery last longer:

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>STAMINA mode</td>
<td>Disables Wi-Fi® and mobile data when the screen is turned off, and restricts hardware performance. ＋ appears in the status bar when this mode takes effect.</td>
</tr>
<tr>
<td>Ultra STAMINA mode</td>
<td>Limits your device’s functionality for core tasks such as making phone calls and sending SMS messages. appears in the status bar once this mode is activated.</td>
</tr>
<tr>
<td>Low battery mode</td>
<td>Modifies your device’s behavior, for example, to adjust screen brightness and the screen timeout setting, when the battery level drops below a certain percentage. appears in the status bar when this mode takes effect.</td>
</tr>
<tr>
<td>Location-based Wi-Fi</td>
<td>Sets your device to only activate the Wi-Fi® function when it comes within range of a saved Wi-Fi® network.</td>
</tr>
<tr>
<td>Queue background data</td>
<td>Optimizes outgoing traffic when the screen is off by sending data at pre-defined intervals.</td>
</tr>
</tbody>
</table>

To activate a power saving mode

1. From your Homescreen, tap 📱.
2. Find and tap Settings > Power management.
3. To activate your preferred mode, drag the relevant slider to the right or mark the relevant checkbox and then confirm, if necessary.
4. If no slider or checkbox is available, tap the name of the mode that you want to activate, then confirm, if necessary.

STAMINA mode feature overview

STAMINA mode has several features that allow you to optimize your battery performance:

<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Extended standby</td>
<td>Prevents applications from using data traffic by disabling Wi-Fi® and mobile data when the screen is off. You can exclude some applications and services from being paused when this feature is active.</td>
</tr>
<tr>
<td>STAMINA clock</td>
<td>Keeps network connections paused in situations where you frequently press the power key to check the time.</td>
</tr>
<tr>
<td>Extended usage</td>
<td>Restricts hardware performance when you are using your device.</td>
</tr>
</tbody>
</table>

To activate STAMINA mode features

1. From your Homescreen, tap 📱.
2. Find and tap Settings > Power management, then tap STAMINA mode.
3. Activate STAMINA mode if it is deactivated.
4. Mark the checkboxes beside the features that you want to activate, then tap Activate, if prompted.
To select which applications to run in STAMINA mode

1. From your Homescreen, tap 📱.
2. Find and tap **Settings > Power management**, then tap **STAMINA mode**.
3. Activate STAMINA mode if it is deactivated.
4. Make sure that the **Extended standby** checkbox is marked, then tap **Apps active in standby > Add applications**.
5. Scroll left or right to view all applications and services, then mark the relevant checkboxes for the applications that you want to run.
6. When you’re finished, tap **Done**.

### Memory and storage

Your device has different types of memory and storage options.

- **The internal storage** is about 4.5 GB and is used to store downloaded or transferred content along with personal settings and data. Some examples of data stored to the internal storage are alarm, volume and language settings; email; bookmarks; calendar events; photos; videos and music.
- You can use a removable **memory card** with a storage capacity of up to 32 GB to get more storage space. Media files and some apps (with their data) can be moved to this type of memory to free up internal storage. Some apps, such as the Camera app, can save data directly to a memory card.
- The **dynamic memory (RAM)** is about 1 GB and cannot be used for storage. RAM is used to handle running applications and the operating system.

! You may have to purchase a memory card separately.

Read more about the use of memory in Android devices by downloading the white paper for your device at [www.sonymobile.com/support](http://www.sonymobile.com/support).

### Improving memory performance

The memory in your device tends to fill up as a result of normal usage. If the device starts to slow down, or applications suddenly shut down, you should consider the following:

- Always have more than 250 MB of free internal storage and more than 100 MB of free RAM available.
- Close down running applications that you are not using.
- Clear the memory cache for all applications.
- Uninstall downloaded applications that you don’t use.
- Move applications to the memory card if the internal storage is full.
- Transfer photos, videos, and music from the internal memory to the memory card.
- If your device can’t read content on the memory card, you may need to format the card. Note that all content on the card gets erased when you format it.

To view the memory status

1. From your Homescreen, tap 📱.
2. Find and tap **Settings > Storage**.

To view the amount of free and used RAM

1. From your Homescreen, tap 📱.
2. Find and tap **Settings > Apps > Running**.

To clear the memory cache for all applications

1. From your Homescreen, tap 📱.
2. Find and tap **Settings > Storage**.
3. Tap **Cached data > OK**.

! When you clear the memory cache, you don't lose any important information or settings.
To transfer media files to the memory card
1 Make sure you have a memory card inserted in your device.
2 From your Homescreen, tap 📱.
3 Find and tap Settings > Storage > Transfer data to SD card.
4 Mark the file types you want to transfer to the memory card.
5 Tap Transfer.

To move apps to the memory card
1 From your Homescreen, tap 📱.
2 Find and tap Settings > Apps.
3 Select the app that you want to move, then tap Move to SD card.

! Some apps cannot be moved to the memory card.

To stop applications and services from running
1 From your Homescreen, tap 📱.
2 Find and tap Settings > Apps > Running.
3 Select an application or service, then tap Stop.

To format the memory card
1 From your Homescreen, tap 📱.
2 Find and tap Settings > Storage > Erase SD card.
3 To confirm, tap Erase SD card > Erase everything

! All content on the memory card gets erased when you format it. Be sure to make backups of all data that you want to save before formatting the memory card. To back up your content, you can copy it to a computer. For more information, see Managing files using a computer on the 117 page.

Managing files using a computer

Use a USB cable connection between a Windows® computer and your device to transfer and manage your files. Once the two devices are connected, you can drag and drop content between your device and the computer, or between your device’s internal storage and SD card, using the computer’s file explorer.

If you have a PC or an Apple® Mac® computer, you can use Xperia™ Companion to access the file system of your device.

Transferring files using Media transfer mode via Wi-Fi®

You can transfer files between your device and other MTP compatible devices, such as a computer, using a Wi-Fi® connection. Before connecting, you first need to pair the two devices. If you’re transferring music, video, pictures or other media files between your device and a computer, it’s best to use the Media Go™ application on the computer. Media Go™ converts media files so that you can use them on your device.

! In order to use this feature, you need a Wi-Fi® enabled device that supports Media transfer, for example, a computer running Microsoft® Windows Vista® or Windows® 7.

To prepare to use your device wirelessly with a computer
1 Make sure Media transfer mode is enabled on your device. It is normally enabled by default.
2 Make sure the Wi-Fi® function is turned on.
3 From your Homescreen, tap 📱.
4 Find and tap Settings > Xperia™ Connectivity > USB Connectivity.
5 Tap Pair with PC, then tap Next.
6 Follow the on-screen instructions to complete the setup process.
To connect wirelessly to a paired device
1 Make sure Media transfer mode is enabled on your device. It is normally enabled by default.
2 Make sure the Wi-Fi® function is turned on.
3 From your Homescreen, tap 📱.
4 Find and tap Settings > Xperia™ Connectivity > USB Connectivity.
5 Select the paired device that you want to connect to, then tap Connect.

To disconnect from a paired device
1 From your Homescreen, tap 📱.
2 Find and tap Settings > Xperia™ Connectivity > USB Connectivity.
3 Select the paired device that you want to disconnect.
4 Tap Disconnect.

To remove a pairing with another device
1 From your Homescreen, tap 📱.
2 Find and tap Settings > Xperia™ Connectivity > USB Connectivity.
3 Select the paired device that you want to remove.
4 Tap Unpair.

Backing up and restoring content
Generally, you should not save photos, videos and other personal content solely on the internal memory of your device. If something should happen with the hardware, or if your device is lost or stolen, the data stored on its internal memory is gone forever. It is recommended to use the Xperia™ Companion software to make backups which save your data safely to a computer, that is, an external device. This method is especially recommended if you are updating your device software to a newer Android version.

Using the Backup & Restore application, you can make a quick online backup of basic settings and data with your Google™ account. You can also use this application to back up data locally, for example, to the SD card in your device or to an external USB storage device.

It is very important that you remember the password that you set when you make a data backup. If you forget the password, it may not be possible to restore important data such as contacts and messages.

Backing up data to a computer
Use the Xperia™ Companion software to back up data from your device to a PC or an Apple® Mac® computer. These backup applications let you back up the following types of data:
• Contacts and call logs
• Messages
• Calendar
• Settings
• Media files such as music and videos
• Photos and images

To back up your data using a computer
1 Make sure that the Xperia™ Companion software is installed on the PC or Apple® Mac® computer.
2 Connect your device to the computer using a USB cable.
3 Computer: Open the Xperia™ Companion software. After a few moments, the computer detects your device.
4 Select Backup on the main screen.
5 Follow the on-screen instructions to back up data from your device.
To restore your data using a computer

1. Make sure that the Xperia™ Companion software is installed on the PC or on the Apple® Mac® computer.
2. Connect your device to the computer using a USB cable.
3. Computer: Open the Xperia™ Companion software.
4. Click Restore.
5. Select a backup file from the backup records, then tap Restore and follow the on-screen instructions to restore data to your device.

Backing up data with the Backup & Restore application

! Depending on the version of the Backup & Restore application that's installed on your device, you may not be able to back up and restore data between different Android versions, for example, when updating from Android version 4.3 to version 4.4. However, if you are running version 2.0 (or later) of the Backup & Restore application, you can restore your data between such updates. You can check the version of the Backup & Restore application under Settings > Apps > All > Backup & restore.

Using the Backup & Restore application, you can back up data manually or turn on the automatic backup function to save data periodically.

The Backup & Restore application is recommended for backing up data before you do a factory data reset. With this application you can back up the following types of data to an SD card in your device:

- Bookmarks
- Call logs
- Contacts
- Conversations
- Calendar data

To set up the automatic backup function

1. If you are backing up to an SD card, make sure the SD card is properly inserted in your device.
2. From your Homescreen, tap 🌍.
3. Find and tap Backup & Restore.
4. To enable the automatic backup function, drag the slider to the right.
5. To select a backup frequency, tap ⬆️, then select the desired backup frequency.
6. To select where to save backup files, tap 📚 ➜ ➕.
7. To select the types of data to back up, mark the relevant checkboxes.
8. To save your settings, tap 📩.

To back up content manually

1. If you are backing up to an SD card, make sure the SD card is properly inserted in your device.
2. From your Homescreen, tap 🌍.
3. Find and tap Backup & Restore.
4. Tap Manual backup, then select a backup destination and the data types that you want to back up.
5. Tap Continue.
6. After the data is backed up, tap Finish.
To restore backed-up content
1 If you are restoring content from an SD card, make sure the SD card is properly
inserted in your device.
2 From your Homescreen, tap ⌁.
3 Find and tap Backup & Restore.
4 Tap Restore data now, then select a restore source and the data types that you
want to restore.
5 Tap Continue.
6 After the content is restored, tap Finish.

Remember that any changes that you make to your data and settings after you create a
backup, including any applications you download, get deleted during a restore procedure.

Running diagnostic tests on your device
The Xperia™ Diagnostics application can test a specific function or run a full diagnostic
test to check if your Xperia™ device is working properly.

Xperia™ Diagnostics can:
• Assess potential hardware or software issues on your Xperia™ device.
• Analyze how well applications perform on your device.
• Log the number of dropped calls during the previous 10 days.
• Identify installed software and provide useful details about your device.

The Xperia™ Diagnostics application is pre-installed on most Android™ devices from Sony. If
the Diagnostics option is not available under Settings > About phone, you can download a
light version from Google Play™.

To run a specific diagnostic test
1 From your Homescreen, tap ⌁.
2 Find and tap Settings > About phone > Diagnostics > Test device.
3 Select a test from the list.
4 Follow the instructions and tap Yes or No to confirm if a feature works.

To run all diagnostic tests
1 From your Homescreen, tap ⌁.
2 Find and tap Settings > About phone > Diagnostics > Test device > Run all.
3 Follow the instructions and tap Yes or No to confirm if a feature works.

To view test results
1 From your Homescreen, tap ⌁.
2 Find and tap Settings > About phone > Diagnostics > Test results.
3 Tap a date to display results for tests performed on that day.

To view details about your device
1 From your Homescreen, tap ⌁.
2 Find and tap Settings > About phone > Diagnostics > Device facts.

Restarting and resetting your device
You can force your device to restart or shut down in situations where it stops responding
or won’t restart normally. No settings or personal data get deleted.

You can also reset your device to its original factory settings. This action is sometimes
necessary if your device stops functioning properly, but note that if you want to keep any
important data, you have to first back up this data to a memory card or other non-
internal memory. For more information, see Backing up and restoring content on
page 118.
If your device fails to power on or you want to reset your device's software, you can use Xperia™ Companion to repair your device. For more information on using Xperia™ Companion, see Computer tools.

- Your device may fail to restart if the battery level is low. Connect your device to a charger and try restarting again.

**To force your device to restart**

1. Press and hold down the power key.
2. In the menu that opens, tap Restart, then tap OK to confirm. The device restarts automatically.

**To force the device to shut down**

1. Remove the back cover.
2. Using the tip of a pen or a similar object, press the OFF button.

- Do not use overly sharp objects that could damage the OFF button.

**To perform a factory data reset**

- To avoid permanent damage to your device, do not restart your device while a reset procedure is underway.

1. Before you start, make sure to back up any important data that is saved on the internal memory of your device to a memory card or other non-internal memory.
2. From your Homescreen, tap .
3. Find and tap Settings > Backup & reset > Factory data reset.
4. To delete information, such as pictures and music, from your internal storage, mark the Erase internal storage checkbox.
5. Tap Reset phone.
6. If required, draw your screen unlock pattern, or enter your screen unlock password or PIN to continue.
7. To confirm, tap Erase everything.

- Your device does not revert to an earlier software version of Android™ when you perform a factory data reset.

- If you forget your screen unlock password, PIN or pattern, you can use the device repair feature in Xperia™ Companion to erase the security layer. You need to provide your Google account login details to perform this operation. By running the repair feature, you reinstall software for your device and you may lose some personal data in the process.

**To repair the device software using Xperia™ Companion**

- Before performing a software repair, make sure you know your Google™ credentials. Depending on your security settings, you may need to enter them in order to start up the device after a software repair.
Follow the instructions that appear on the screen to reinstall the software and complete the repair.

Recycling your device
Got an old device lying around the house? Why not recycle it? By doing so, you will help us reuse its materials and components, and you’ll protect the environment, too! Find out more about the recycling options in your region at www.sonymobile.com/recycle.

Limitations to services and features
Some of the services and features described in this User guide are not supported in all countries/regions or by all networks and/or service providers in all areas. Without limitation, this applies to the GSM International Emergency Number, 112. Please contact your network operator or service provider to determine availability of any specific service or feature and whether additional access or usage fees apply. Use of certain features and applications described in this guide may require access to the Internet. You may incur data connection charges when you connect to the Internet from your device. Contact your wireless service provider for more information.
