# Getting started

## About this User Guide

This is the **Xperia™ Z5 Dual** User guide for the **Android™ 6.0** software version. If you're not sure which software version your device is running, you can check it via the Settings menu. For more information about software updates, see *Updating your device* on the 137 page.

[To check the current software version of your device](#)

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **About phone** > **Android™ version**.

## Overview

- |                                      |                                       |
|--------------------------------------|---------------------------------------|
| 1. Charging light/Notification light | 10. Strap hole                        |
| 2. Front camera lens                 | 11. Main Wi-Fi/Bluetooth antenna area |
| 3. Ear speaker                       | 12. Main camera lens                  |
| 4. Proximity/Light sensor            | 13. Camera light                      |
| 5. Power key/Fingerprint Sensor*     | 14. GPS antenna area                  |
| 6. Volume/Zoom key                   | 15. Second microphone                 |

| 8. Main microphone/Speaker           | 17. Second Wi-Fi antenna area         |
| 9. Charger/USB cable port            | 18. Nano SIM/Memory card slot cover   |
|                                      | 19. NFC™ detection area               |

## Assembly

- ! Your device supports genuine nano SIM cards only. Inserting an unsupported SIM card (including larger SIM cards or SIM cards cut to nano SIM card size) may permanently damage your SIM card or device. Sony does not warrant and will not be responsible for any damage caused by use of unsupported or modified SIM cards.

- ! Make sure you place the nano SIM card (or cards) in the nano SIM card holder before inserting the nano SIM card (or cards) into the device. Also, don't confuse the nano SIM card slot with the memory card slot.

### To Insert the Nano SIM Cards

- ! If you insert the nano SIM card while the device is powered on, the device restarts automatically.
- 1 Open the cover for the nano SIM card and memory card slots.
  - 2 Using a fingernail or other similar object, drag the nano SIM card holder out.
  - 3 Place the nano SIM card (or cards) in the relevant nano SIM card slot (or slots) in the holder, then re-insert the holder.
  - 4 Close the cover.
- ! Be sure to re-insert the nano SIM card holder in the correct orientation. When you drag the holder out to insert the nano SIM card, do not turn the holder around.

### To Insert a Memory Card

- 1 Open the cover for the nano SIM card and memory card slots.
  - 2 Insert the memory card into the memory card slot, then close the cover.
- 💡 Be sure to insert the memory card in the correct orientation.

### To Remove the Nano SIM Card

- 1 Open the cover for the nano SIM card and memory card slots.
- 2 Using a fingernail or other similar object, drag out the nano SIM card holder.
- 3 Remove the nano SIM card (or cards) in the relevant nano SIM card slot (or slots) in the holder, then re-insert the holder.
- 4 Close the cover.

### To Remove the Memory Card

- 1 Turn off the device and open the cover for the nano SIM card and memory card slots.
- 2 Push the memory card inward, then release it quickly.
- 3 Close the cover.

- 💡 You can also remove the memory card without turning the device off in step 1. To use this method, you must first unmount the memory card under **Settings** by tapping **Storage** > **Unmount SD card**.

## Screen protection

- ! Before using your device, remove the transparent protection film by pulling up on the protruding tab.

It is recommended to protect your device with a Sony-branded screen cover or protector intended for your Xperia™ model. The use of third party screen protection accessories may prevent your device from working by covering sensors, lenses, speakers, or microphones and it can invalidate the warranty.

## Starting Your Device for The First Time

The first time you start your device, a setup guide opens to help you configure basic settings, sign in to some accounts, and personalize your device. For example, if you have a Google™ account, you can sign in to it here and get set up right away.

### To turn on the device

- 1 Press and hold down the power key  until the device vibrates.
- 2 Enter your SIM card PIN when requested, and then tap .
- 3 Wait a while for the device to start.

### To Turn off the Device

- 1 Press and hold down the power key  until the options menu opens.
- 2 In the options menu, tap **Power off**.

! It may take a while for the device to shut down.

## Why do I need a Google™ account?

Your Xperia™ device from Sony runs on the Android™ platform developed by Google™. A range of Google™ applications and services is available on your device when you purchase it, for example, Gmail™, Google Maps™, YouTube™ and the Play Store™ application, which gives you access to the Google Play™ online store for downloading Android™ applications. To get the most out of these services, you need a Google™ account. For example, a Google™ account is mandatory if you want to:

- Download and install applications from Google Play™.
- Synchronize email, contacts and the calendar using Gmail™.
- Chat with friends using the Hangouts™ application.
- Synchronize your browsing history and bookmarks using the Google Chrome™ web browser.
- Identify yourself as the authorized user after a software repair using Xperia™ Companion.
- Remotely find, lock or clear a lost or stolen device using the my Xperia™ or Android™ Device Manager services.

For more information about Android™ and Google™, go to <http://support.google.com>.

! It is crucial that you remember your Google™ account username and password. In some situations, you may need to identify yourself for security reasons using your Google™ account. If you fail to give your Google™ username and password in such situations, your device is locked. Also, if you have more than one Google™ account, make sure to enter the details for the relevant account.

### To Set up a Google™ Account on Your Device

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Accounts** > **Add account** > **Google**.
- 3 Follow the registration wizard to create a Google™ account, or sign in if you already have an account.

💡 You can also sign in to or create a Google™ account from the setup guide the first time you start your device. Or you can go online and create an account at [www.google.com/accounts](http://www.google.com/accounts).

### To remove a Google™ account

- 1 From your Home screen, tap .
- 2 Tap **Settings** > **Accounts** > **Google**.
- 3 Select the Google™ account that you want to remove.
- 4 Tap  > **Remove account**.
- 5 Tap **Remove account** again to confirm.

! If you remove your Google™ account, any security features that are linked to your Google™ account will no longer be available.

💡 If you are lending your device to someone to use for an extended period, it is recommended to remove your Google™ account from the device.

## Charging Your Device

Your device has an embedded, rechargeable battery that should only be replaced by Sony or an authorized Sony repair center. You should never try to open or take apart the device yourself. Opening the device can cause damage that voids your warranty.

The battery is partly charged when the device is shipped from the factory. Depending on how long your device was in the box before you purchased it, the battery level may be quite low. It is therefore recommended that you charge the battery for at least 30 minutes before starting up your device for the first time. You can still use your device while it is charging. To read more about how to improve the battery performance, see *Battery and power management* on the 31 page.

If your device gets exposed to water, wipe it dry with a microfiber cloth and shake the device at least 15 times with the USB port facing downward. Repeat the procedure if moisture is still visible in the USB port. Only insert the USB cable into the USB port after the port has completely dried.

### To dry the USB port

- 1 Using a microfiber cloth, wipe away any excess moisture from your device.
- 2 With the device held firmly and the USB port facing downward, shake the device vigorously at least 15 times.
- 3 If moisture is still visible in the USB port, shake the device again several times.
- 4 Use a microfiber cloth to wipe away any remaining moisture from the USB port.

### To charge your device

- 1 Plug the charger into a power outlet.
- 2 Plug one end of the USB cable into the charger (or into the USB port of a computer).
- 3 Plug the other end of the cable into the micro USB port on your device, with the USB symbol facing up. The notification light illuminates when charging begins.
- 4 When the device is fully charged, disconnect the cable from your device by pulling it straight outward. Make sure not to bend the connector.

💡 If the battery is completely discharged, it may take a few minutes before the notification light illuminates and the charging icon ⚡ appears.

### Battery notification light status

Green	The battery is charging and the battery charge level is greater than 90%
Red	The battery is charging and the battery charge level is less than 15%
Orange	The battery is charging and the battery charge level is less than 90%

# Device security

## Making sure your device is protected

You can prevent other people from using your device without your permission. For example, if your device is lost, stolen, or wiped, only someone with your Google™ account or screen lock information can use the device. To make sure that your device is protected, it is important that you set a secure screen lock and add your Google™ account on your device. It is crucial that you remember both your screen lock information and your Google™ account credentials. To make sure your device is protected, you can:

- Set a secure screen lock on your device, that is, a PIN, password, or pattern **or fingerprint** screen lock to prevent anyone from resetting your device. For more information, see *Screen Lock* on page 13 .
- Add a Google™ account to prevent others from using your device if it gets stolen and/or wiped. For more information, see *Why do I need a Google™ account?* on page 10 .
- Activate either the "Protection by my Xperia" or the Android™ Device Manager web service. Using one of these services, you can remotely locate, lock or erase a lost device. For more information, see *Finding a Lost Device* on page 21 .

## Verifying the ownership of your device

When your device is protected, you need to either unlock your screen with your PIN, password, pattern, **or fingerprint**, or enter your Google™ account information depending on the protection features you are using. Below are examples of protection features and some of the required credentials:

Factory Data Reset protection	You must unlock your screen before you are allowed to perform a Factory Data Reset.
Protection by my Xperia	If you remotely reset your device using this service, you must enter the username and password for a Google™ account associated with the service. The device must be connected to the Internet before the setup process can be completed. Otherwise, you will not be able to use your device after the reset.
Android™ Device Manager	If you remotely reset your device using this service, you must enter the username and password for a Google™ account. The device must be connected to the Internet before the setup process can be completed. Otherwise, you will not be able to use your device after the reset.
Software repair	If you use the Xperia™ Companion software to perform a software repair, you're asked to enter your Google™ account username and password when you start the device after the repair is complete.

- ! For Android™ Device Manager, it is necessary to enter information from a Google™ account. This can be any Google™ account which you have set up on the device. If you cannot provide the relevant account information during a setup process, you won't be able to use the device at all.

## Screen Lock

- ! Fingerprint functionality is not available in the US market.

There are several ways to unlock the screen. The security level of each lock type is listed below in order of weakest to strongest:

- **Swipe**
  - no protection, but you have quick access to the Homescreen.
- **Pattern**
  - draw a simple pattern with your finger to unlock your device.
- **PIN**
  - enter a numeric PIN of at least four digits to unlock your device,
- **Password**
  - enter an alpha-numeric password to unlock your device.
- **Fingerprint**

– place your registered finger on the power key to unlock your device

- ! It is very important that you remember your screen unlock pattern, PIN, or password. If you forget this information, it may not be possible to restore important data such as contacts and messages.
- ! If you have set up a Microsoft® Exchange ActiveSync® (EAS) account on your Xperia™ device, the EAS security settings may limit the lockscreen type to only a PIN or password. This occurs when your network administrator specifies a specific lockscreen type for all EAS accounts for enterprise security reasons. Contact the network administrator of your company or organization to check what network security policies are implemented for mobile devices.

#### To create a screen lock pattern

- 1 From your Homescreen, tap .
  - 2 Find and tap **Settings** > **Security** > **Screen lock** > **Pattern**.
  - 3 Follow the instructions on your device.
- ! If your lock pattern is rejected five times in a row when you try to unlock your device, you must wait 30 seconds and then try again.

#### To change screen lock type

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Security** > **Screen lock**.
- 3 Follow the instructions in your device and select another screen lock type.

#### To change the screen lock pattern

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Security** > **Screen lock**.
- 3 Draw your screen unlock pattern.
- 4 Tap **Pattern** and follow the instructions on your device.

#### To Create a Screen Lock PIN

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Security** > **Screen lock** > **PIN**.
- 3 Enter a numeric PIN, then tap **Continue**.
- 4 Re-enter and confirm your PIN, then tap **OK**.
- 5 Follow the instructions on your device.

#### To Create a Screen Lock Password

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Security** > **Screen lock** > **Password**.
- 3 Enter a password, then tap **Continue**.
- 4 Re-enter and confirm your password, then tap **OK**.
- 5 Follow the instructions on your device.

#### To activate the Swipe unlock function

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Security** > **Screen lock**.
- 3 Draw your screen unlock pattern, or enter your PIN or password if one of these screen lock types is enabled.
- 4 Tap **Swipe**.

### Fingerprint Unlock

- ! Fingerprint functionality is not available in the US market.  
You can use your fingerprint to quickly unlock your device. To use this feature, you need to register a fingerprint and enable this feature in the Fingerprint Manager first. For details on registering fingerprints, see *Fingerprint Manager* on page 15 .
- ! The PIN or password screen lock you set up serves as a backup unlock method if you enable the Fingerprint unlock option. Selecting other screen lock types will clear all fingerprint settings.

### To enable Fingerprint unlock

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Security** > **Fingerprint Manager**.
- 3 If needed verify your PIN or password.
- 4 Follow the instruction in your device to set up a fingerprint unlock pattern.

### To Unlock the Device Using your Fingerprint

- With the lockscreen active, place your finger on the power key so that the device can scan your fingerprint and unlock the screen. Be sure to use a finger that you have registered in Fingerprint Manager.
- ! If you fail to unlock the screen using your finger after five attempts, enter your backup PIN or password.

## Resetting a Forgotten Screen Lock

If you forgot your screen lock PIN, password, or pattern, you might be able to reset it using the Protection by my Xperia service. No content on your device is lost after you perform a screen lock reset using the Protection by my Xperia service.

To activate the Protection by my Xperia service, see *Finding a Lost Device* on the 21 page.

### To Reset the Screen Lock using Protection by my Xperia

- 1 Make sure you know your Google™ account username and password and that you have enabled the Protection by my Xperia service on your device.
  - 2 Go to *myxperia.sonymobile.com* using any Internet-connected device.
  - 3 Sign in using the same Google™ account you have set up on your device.
  - 4 Click the picture of your device under **Your devices**.
  - 5 Select **Lock** or **Change PIN2** to replace the current screen lock with a new PIN code.
  - 6 Follow the on-screen instructions provided by Protection by my Xperia.
- ! Depending on your security settings, your device may lock after a screen lock reset. You then need to enter your Google™ account username and password in order to use the device.

## Fingerprint Manager

Fingerprint Manager registers fingerprint information that can be used as an additional security method for unlocking your device or authenticating purchases. You are allowed to register a maximum of 5 fingerprints on your device.

### To register a fingerprint for the first time

- 1 From your Home screen, tap .
  - 2 Find and tap **Settings** > **Security** > **Fingerprint Manager**.
  - 3 Follow the on-screen instructions to complete fingerprint registration.
- ! If you have not set up a PIN or password as a Screen lock, Fingerprint Manager assists you with setting up a PIN or password as a security backup for your fingerprint. For more information on setting up a Screen lock, see *Screen Lock* on page 13 .
- 💡 The fingerprint sensor is on the power key and not on the screen of your device. Before using the Fingerprint sensor, make sure the sensor is clean and without any visible moisture

### To Register Additional Fingerprints

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Security** > **Fingerprint Manager**.
- 3 Tap  and then place your finger on the power key so that the device can scan your fingerprint and verify your identity. Be sure to use a finger that you have previously registered in Fingerprint Manager.
- 4 Follow the on-screen instructions to register an additional fingerprint.

### To delete a registered fingerprint

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Security** > **Fingerprint Manager**.
- 3 Tap the registered fingerprint, then tap **Delete** > **Yes, remove**.

### To Rename a Registered Fingerprint

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Security** > **Fingerprint Manager**.
- 3 Tap a registered fingerprint on the list and then enter a fingerprint name.
- 4 Tap **OK**.

## Unlocking Your Device Automatically

The Smart Lock feature makes unlocking your device easier by letting you set it to unlock automatically in certain situations. You can keep your device unlocked, for example, when it's connected to a Bluetooth® device or when you're carrying it with you.

To prepare your device to unlock automatically, you first need to perform the following steps in the order given:

- Make sure you have an active Internet connection, preferably a Wi-Fi® connection to limit data traffic charges.
- Make sure all your apps are updated using the Play Store™ application in order to ensure that the Google Play™ services app is updated. Having an up-to-date Google Play™ services app ensures that you can use the latest Smart Lock features.
- Enable Smart Lock.
- Set when you want your device to unlock automatically.

! The Smart Lock feature is developed by Google™ and the exact functionality may change over time due to updates from Google™.

! The Smart Lock feature may not be available in every market, country, or region.

### To Enable Smart Lock

- 1 Make sure you've set a pattern, PIN, or password for your screen lock.
- 2 From your Home screen, tap .
- 3 Find and tap **Settings** > **Security** > **Trust agents**.
- 4 Drag the slider beside **Smart Lock (Google)** to the right.
- 5 Tap the back arrow next to **Trust agents**.
- 6 Find and tap **Smart Lock**.
- 7 Enter your pattern, PIN, or password. You need to enter this screen lock every time you want to change your Smart Lock settings.
- 8 Select a Smart Lock type.

## Setting When to Keep the Device Automatically Unlocked

You can set Smart Lock to keep your device unlocked using the following settings:

- **Trusted devices** – keep your device unlocked when a trusted Bluetooth® device is connected.
- **Trusted places** – keep your device unlocked when you're in a trusted location.
- **On-body detection** – Keep your device unlocked when you're carrying your device with you.

You have to manually unlock your device when you don't use it for 4 hours and after you restart it.

## Connecting to Trusted Bluetooth® Devices

You can designate a connected Bluetooth® device as a "trusted" device and keep your Xperia™ device unlocked while it's connected to it. So if you have Bluetooth® devices you connect to regularly, for example, a car speaker or home entertainment system, a Bluetooth® watch, or a fitness tracker, you can add them as trusted devices and bypass the added security of a lockscreen to save time. This feature is suitable if you're normally

in a relatively secure place when you use these devices. In some cases, you may still need to manually unlock your device before a trusted device can be connected.

- ! It is not recommended to add devices that are constantly connected to your device as trusted devices, for example, Bluetooth® keyboards or cases.
- 💡 As soon as a trusted Bluetooth® device is switched off or moves out of range, your screen locks and you need your PIN, pattern, or password to unlock it.

#### To Add a Trusted Bluetooth® Device

- 1 Make sure your device is paired and connected to the Bluetooth® device you want to add as a trusted device.
- 2 In the Smart Lock menu, tap **Trusted devices**.
- 3 Tap **Add trusted device** > **Bluetooth**.
- 4 Tap a device name to select it from the list of connected devices. Only paired devices appear in this list.
- 5 Depending on the security of your connection, you may need to manually unlock your device before the trusted device can keep it unlocked.

#### To Remove a Trusted Bluetooth® Device

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Security** > **Smart Lock** > **Trusted devices**.
- 3 Tap the device you want to remove.
- 4 Tap **Remove trusted device**.

### Making Sure You're Secure when Using Trusted Devices

Different Bluetooth® devices support different Bluetooth® standards and security capabilities. There's a chance someone could keep your Xperia™ device unlocked by imitating your Bluetooth® connection, even if your trusted device is no longer nearby. Your device is not always able to determine whether your connection is secure from someone trying to imitate it.

When your device can't determine that you're using a secure connection, you'll get a notification on your Xperia™ device and may need to manually unlock it before the trusted device can keep it unlocked.

Bluetooth® connectivity range can vary depending on factors like the model of your device, the connected Bluetooth® device, and your environment. Depending on these factors, Bluetooth® connections can work over distances of up to 325 feet (100 meters). If someone takes your Xperia™ device while it's near a trusted device, they may be able to access your Xperia™ device if the trusted device has unlocked it.

### Connecting to Trusted Places

When the Trusted places feature is set up, the lockscreen security on your Xperia™ device gets disabled when you are in a designated trusted location. For this feature to work, you must have an Internet connection (preferably over Wi-Fi®) and allow your device to use your current location.

To set up trusted places, first make sure high-accuracy location mode or battery-saving location mode is enabled on your device before you add home or custom locations.

- ! The exact dimensions of a trusted location are an estimate and may extend beyond the physical walls of your home or other area you have added as a trusted location. This feature can keep your device unlocked within a radius of up to 260 feet (80 meters). Also, be aware that location signals can be replicated or manipulated. Someone with access to specialized equipment could unlock your device.

#### To Add Your Home Location

- 1 Make sure location mode is turned on and you are using either the **High accuracy** or **Battery saving** setting.
- 2 From your Home screen, tap .
- 3 Find and tap **Settings** > **Security** > **Smart Lock** > **Trusted places** > **Home**.
- 4 Tap **Turn on this location**.

### To Edit Your Home Location

- 1 Make sure location mode is turned on and you are using either the **High accuracy** or **Battery saving** setting.
  - 2 From your Home screen, tap .
  - 3 Find and tap **Settings > Security > Smart Lock > Trusted places**.
  - 4 Select your home location.
  - 5 Tap **Edit**.
  - 6 In the search bar, enter the location you want to use as your home location.
-  If your home has multiple buildings at the same address, the trusted place you want to add might be different from the actual address. To ensure better location accuracy, you can add the actual location of your home within the building complex as a custom place.

### To Remove Your Home Location

- 1 Make sure location mode is turned on and you are using either the **High accuracy** or **Battery saving** setting.
- 2 From your Home screen, tap .
- 3 Find and tap **Settings > Security > Smart Lock > Trusted places > Home**.
- 4 Tap **Turn off this location**.

## Using Custom Locations

You can add any location as a trusted, custom place where your device can remain unlocked.

### To Add a Custom Place

- 1 Make sure location mode is turned on and you are using either the **High accuracy** or **Battery saving** setting.
- 2 From your Home screen, tap .
- 3 Find and tap **Settings > Security > Smart Lock > Trusted places**.
- 4 Tap **Add trusted place**.
- 5 To use your current location as a trusted, custom place, tap **Select this location**.
- 6 Alternately, to enter another location, tap the magnification glass icon and type the address. Your device searches for the entered location. To use the suggested address, tap the address.
- 7 To fine-tune the location, tap the back arrow next to the address, then drag the location pin to the desired location and tap **Select this location**.

### To Edit a Custom Place

- 1 Make sure location mode is turned on and you are using either the **High accuracy** or **Battery saving** setting.
- 2 From your Home screen, tap .
- 3 Find and tap **Settings > Security > Smart Lock > Trusted places**.
- 4 Select the place you want to edit.
- 5 Tap **Edit address**.
- 6 To enter another location, tap the magnification glass icon and type the address. Your device searches for the entered location. To use the suggested address, tap the address.
- 7 To fine-tune the location, tap the back arrow next to the address, then drag the location pin to the desired location and tap **Select this location**.

### To Remove a Custom Place

- 1 Make sure location mode is turned on and you are using either the **High accuracy** or **Battery saving** setting.
- 2 From your Home screen, tap .
- 3 Find and tap **Settings > Security > Smart Lock > Trusted places**.
- 4 Select the place you want to remove.
- 5 Tap **Delete**.

## Keeping Your Device Unlocked while You're Carrying It

Using the On-body detection feature, you can have your device stay unlocked when you have it on you, for example, if you're carrying it in your hand, pocket, or bag. The accelerometer in your device keeps your device unlocked when it senses that it's being carried. The device locks when the accelerometer detects that the device has been put down.

- ! The On-body detection feature can't distinguish whose body is connected. If you give your device to someone else while it's unlocked using On-body detection, your device may stay unlocked for the other user. Keep in mind that On-body detection as a security feature is less secure than a pattern, PIN, or password.

### To enable On-body detection

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Security** > **Smart Lock** > **On-body detection**.
- 3 Drag the slider beside **Off** to the right, then tap **Continue**.

## Using On-body Detection

When you use the On-body detection feature, you need to be aware of the following behaviors:

- When your device senses that it's on your body, it stays unlocked after you unlock it.
- Any time you put your device down and it senses that it's no longer on your body, your device locks automatically.
- After you put your device down, for example, if you place it on a table, your device can take up to one minute to lock.
- After you get into a car, bus, train, or other land vehicle, your device can take between 5 and 10 minutes to lock.
- Note that when you get on an airplane or a boat (or other non-land-based vehicles), your device may not lock automatically, so be sure to lock it manually if needed.
- When you pick up your device again or get out of the vehicle, just unlock it once and your device then stays unlocked for as long as you have it on you.

### To turn off On-body detection

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Security** > **Smart Lock** > **On-body detection**.
- 3 Drag the slider beside **On** to the left.

## SIM card protection

You can lock and unlock each SIM card that you use in your device with a PIN (Personal Identity Number). When a SIM card is locked, the subscription linked to the card is protected against misuse, meaning that you have to enter a PIN every time you start your device.

If you enter the PIN incorrectly more times than the maximum number of attempts allowed, your SIM card will become blocked. You then need to enter your PUK (Personal Unblocking Key) and a new PIN. Your PIN and PUK are supplied by your network operator.

### To set up a SIM card lock

- 1 From the Homescreen, tap .
- 2 Find and tap **Settings** > **Security** > **Set up SIM card lock**.
- 3 Select a SIM card.
- 4 Mark the **Lock SIM card** checkbox.
- 5 Enter the SIM card PIN and tap **OK**. The SIM card lock is now active and you will be prompted to enter this lock every time you restart the device.

### To remove a SIM card lock

- 1 From the Homescreen, tap .
- 2 Find and tap **Settings** > **Security** > **Set up SIM card lock**.
- 3 Select a SIM card.
- 4 Unmark the **Lock SIM card** checkbox.
- 5 Enter the SIM card PIN and tap **OK**.

### To change the SIM card PIN

- 1 From the Home screen, tap .
- 2 Find and tap **Settings** > **Security** > **Set up SIM card lock**.
- 3 Select a SIM card.
- 4 Tap **Change SIM PIN**.
- 5 Enter the old SIM card PIN and tap **OK**.
- 6 Enter the new SIM card PIN and tap **OK**.
- 7 Retype the new SIM card PIN and tap **OK**.

### To unlock a blocked SIM card using the PUK code

- 1 Enter the PUK code and tap .
- 2 Enter a new PIN code and tap .
- 3 Re-enter the new PIN code and tap .

-  If you enter an incorrect PUK code too many times, you need to contact your network operator to get a new SIM card.

## Using Multiple SIM Cards

Your device works with one or two SIM cards inserted. You get incoming communication to both SIM cards and you can select which number you want to place outgoing communication from. Before you can use both SIM cards, you need to enable them and select which SIM card will handle data traffic.

You can forward calls that come in on SIM card 1 to SIM card 2 when SIM card 1 is unreachable, and vice versa. This function is called Dual SIM reachability. You must enable it manually. See *Forwarding Calls* on page 68 .

### To Enable or Disable the Use of Two SIM Cards

- 1 From the Home screen, tap .
- 2 Find and tap **Settings** > **Dual SIM settings**.
- 3 Drag the sliders beside SIM1 and SIM2 to the right or left.

### To rename a SIM card

- 1 From the Home screen, tap .
- 2 Find and tap **Settings** > **Dual SIM settings**.
- 3 Select a SIM card and enter a new name for it.
- 4 Tap **OK**.

### To Select the SIM Card that Handles Data Traffic

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Dual SIM settings** > **SIM card for data traffic**.
- 3 Select the SIM card you want to use for data traffic, then tap **OK**.

-  For higher data speeds, select the SIM card that supports the fastest cellular network, such as 3G or LTE.

## Finding the identification number of your device

Your device has a unique ID (identification) number. On your device, this number is referred to as the IMEI (International Mobile Equipment Identity). You should keep a copy of this number. You may require it, for example, when you access the Xperia™ Care support service and need to register your device. Also, if your device is stolen, some

network providers can use this number to stop the device from accessing the network in your country.

- ! For devices with two SIM cards, there are two IMEI numbers, one for each SIM card slot.

#### To view your IMEI numbers on the label tray

- 1 Open the cover for the nano SIM and memory card slot.
- 2 Place a fingernail or other object with a long, fine tip under the edge of the label tray, then drag the tray outwards. The IMEI numbers are displayed on the label tray.

- 💡 To view the IMEI numbers, you can also open the phone dialer and enter **\*#06#**.

#### To view your IMEI numbers via the device settings

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **About phone** > **Status**.
- 3 Select the SIM card, then scroll to **IMEI** to view the **IMEI** number.

## Finding a Lost Device

If you have a Google™ account, the “Protection by my Xperia” web service can help you locate and secure your device if you ever lose it. If you have activated this service on your device, you can:

- Locate your device on a map.
  - Sound an alert, even if the device is in Do not disturb mode.
  - Remotely lock the device and make the device display your contact details to anyone who finds it.
  - Remotely clear the internal and external memory of the device as a last resort.
- ! The “Protection by my Xperia” service may not be available in all countries or regions.
  - ! If you’ve cleared the internal memory of the device using the “Protection by my Xperia” web service, you must sign in to a Google™ account that was previously synced on this device the next time you turn on the device.

### To Activate the Protection by my Xperia Service on Your Device

- 1 Make sure you have an active data connection.
  - 2 From your Home screen, tap .
  - 3 Find and tap **Settings** > **Security** > **Protection by my Xperia** > **Activate**.
  - 4 Mark the checkbox to agree with the terms and conditions of using the Protection by my Xperia service, then tap **Accept**.
  - 5 If prompted, sign in to your Google™ account, or create a new one if you don't have one.
  - 6 Enable location services on your device if this function is not already enabled.
- ! To verify that the Protection by my Xperia service can locate your device after you activate the service, go to [myxperia.sonymobile.com](http://myxperia.sonymobile.com) and sign in using the Google™ account that you have set up on your device.
- ! If you are using a device with multiple users, note that the Protection by my Xperia service is only available to the user who is logged in as the owner.

### Finding a lost device using Android™ Device Manager

Google™ offers a location and security web service called Android™ Device Manager. You can use it in parallel with, or as an alternative to, the my Xperia service. If you lose your device, you can use Android™ Device Manager to:

- Find and show where your device is located.
- Ring or lock your device, erase everything on it, or add a phone number to the lock screen.

For additional information about Android™ Device Manager, go to [www.support.google.com](http://www.support.google.com).

- ! Android™ Device Manager does not work if your device is turned off or if it does not have a connection to the Internet. The Android™ Device Manager service may not be available in all countries or regions.

### To activate Android™ Device Manager

- 1 If you are using a device with multiple users, make sure that you are logged in as the owner.
- 2 Make sure that you have an active data connection and that location services are enabled.
- 3 From your Home screen, tap .
- 4 Find and tap **Google** > **Google Settings** > **Security**.
- 5 Drag the sliders beside **Remotely locate this device** and **Allow remote lock and erase** to the right.
- 6 If prompted, agree to the terms and conditions by tapping **Activate**.
- 7 To verify that Android™ Device Manager can locate your device after you activate the service, go to [www.android.com/devicemanager](http://www.android.com/devicemanager) and sign in using your Google™ account.

# Learning the basics

## Using the touchscreen

### Tapping

- Open or select an item.
- Mark or unmark a checkbox or option.
- Enter text using the on-screen keyboard.

### Touching and holding

- Move an item.
- Activate an item-specific menu.
- Activate selection mode, for example, to select several items from a list.

## Pinching and spreading

- Zoom in or out on web pages, photos, and maps, and when you're taking photos or shooting videos.

## Swiping

- Scroll up or down a list.
- Scroll left or right, for example, between Home screen panes.

## Flicking

- Scroll quickly, for example, in a list or on a web page. You can stop the scrolling movement by tapping the screen.

## Locking and Unlocking the Screen

When your device is on and left idle for a set period of time, the screen darkens to save battery power and locks automatically. This lock prevents unwanted actions on the touchscreen when you are not using it. When you buy your device, a basic screen swipe lock is already set. This means you have to swipe upward on the screen to unlock it. You can change the security settings later and add other kinds of locks. See *Screen Lock* on the 13 page.

### To activate the screen

- Briefly press the power key .

### To lock the screen

- When the screen is active, briefly press the power key .

## Homescreen

The Home screen is the starting point for using your device. It's similar to the desktop on a computer screen. Your Homescreen can have up to seven panes, which extend beyond the regular screen display width. The number of Homescreen panes is represented by a series of dots at the lower part of the Homescreen. The highlighted dot shows the pane that you are currently in.

- 1 Introduction to Xperia™ widget – Tap to open the widget and select a task, such as copying content from your old device or setting up Xperia™ services
- 2 Dots – Represents the number of Homescreen panes

### To go to the Home screen

- Press .

### To browse the Home screen

## Home screen panes

You can add new panes to your Home screen (up to a maximum of seven panes) and delete panes. You can also set the pane that you want to use as the main Home screen pane.

### To add a pane to your Homescreen

- 1 Touch and hold an empty area on your Home screen until the device vibrates.
- 2 To browse the panes, flick all the way to the right or left, then tap .

### To Delete a Pane from your Homescreen

- 1 Touch and hold any area on your Homescreen until the device vibrates.
- 2 Flick left or right to browse to the pane you want to delete, then tap  in the top-right corner of the pane.

## Homescreen Settings

### To Adjust the Size of Icons on Your Homescreen

- 1 Touch and hold any area on your Homescreen until the device vibrates, then tap .
- 2 Tap **Icon size**, then select an option.

## Application screen

The Application screen, which you open from the Homescreen, contains the applications that come pre-installed on your device as well as applications that you download.

### To view all applications on the Application screen

- 1 From your Home screen, tap .
- 2 Flick left or right on the Application screen.

### To Open an Application from the Application Screen

- When the Application screen is open, flick left or right to find the application, and then tap the application.

### To Search for an Application from the Application Screen

- 1 When the Application screen is open, tap .
- 2 Enter the name of the application you want to search for.

### To Arrange Applications on the Application Screen

- 1 When the Application screen is open, tap .
- 2 Tap **Sort apps**, then select an option.

### To add an application shortcut to the Home screen

- 1 On the Application screen, touch and hold an application icon until it becomes selected, then drag the icon to the top of the screen. The Home screen opens.
- 2 Drag the icon to the desired location on the Home screen, then release your finger.

### To Move an Application on the Application Screen

- 1 When the Application screen is open, tap .
- 2 Make sure **Own order** is selected under **Sort apps**.
- 3 Touch and hold the application until it becomes selected, then drag it to the new location.

### To uninstall an application from the Application screen

- 1 Touch and hold any area on the Application screen until the device vibrates. All applications that can be uninstalled are then indicated by .
- 2 Select the application that you want to uninstall, then tap **Delete**.

## Navigating Applications

You can navigate between applications using the navigation keys, the favorites bar, and the recently used applications window, which lets you switch easily between all recently used applications. The navigation keys are the Home key, the Recent apps key, and the Back key. Some applications get closed when you press the Home key  to exit, while others are paused or continue to run in the background. If an application is paused or running in the background, you can continue where you left off the next time you open the application.

- 1 Recently used applications window – Open a recently used application
- 2 Favorites bar – Use a shortcut to access applications or widgets
- 3 Recent apps key – Open the recently used applications window and the favorites bar
- 4 Home key – Exit an application and go back to the Homescreen
- 5 Back key – Go back to the previous screen within an application or close the application

### To open the recently used applications window

- Press .

### To Close All the Recently Used Applications

- Tap  and then tap .

### To open a menu in an application

- While using the application, press .
- ! A menu is not available in all applications.

## Small apps

Small apps are miniature apps that run on top of other applications on the same screen, to enable multi-tasking. For example, you can have a webpage open showing details of currency exchange rates, and then open the Calculator small app on top of it and perform calculations. You can access your small apps via the favorites bar. To download more small apps, go to Google Play™.

### To open a small app

- 1 To make the favorites bar appear, press .
  - 2 Tap the small app that you want to open.
- 💡 You can open several small apps at the same time.

### To close a small app

- Tap  on the small app window.

### To download a small app

- 1 From the favorites bar, tap , then tap  and tap .
- 2 Search for the small app that you want to download, then follow the instructions to download it and complete the installation.

### To move a small app

- When the small app is open, touch and hold the top left corner of the small app, then move it to the desired location.

### To minimize a small app

- When the small app is open, touch and hold the top left corner of the small app, then drag it to the right edge or to the bottom edge of the screen.

### To rearrange the small apps in the favorites bar

- Touch and hold a small app and drag it to the desired position.

### To remove a small app from the favorites bar

- 1 Touch and hold a small app, then drag it to .
- 2 Tap **OK**.

### To restore a previously removed small app

- 1 Open the favorites bar, then tap .
- 2 Touch and hold the small app you want to restore, then drag it into the favorites bar.

### To add a widget as a small app

- 1 To make the favorites bar appear, press .
- 2 Tap  >  > .
- 3 Select a widget.
- 4 Enter a name for the widget, if desired, then tap **OK**.

## Widgets

Widgets are small applications that you can use directly on your Homescreen. They also function as shortcuts. For example, the Weather widget allows you to see basic weather information directly on your Homescreen. But when you tap the widget, the full Weather application opens. You can download additional widgets from Google Play™.

### To add a widget to the Home screen

- 1 Touch and hold an empty area on your Home screen until the device vibrates, then tap **Widgets**.
- 2 Find and tap the widget that you want to add.

### To resize a widget

- 1 Touch and hold a widget until it magnifies and the device vibrates, then release the widget. If the widget can be resized, for example, the Calendar widget, then a highlighted frame and resizing dots appear.
- 2 Drag the dots inward or outward to shrink or expand the widget.
- 3 To confirm the new size of the widget, tap anywhere on the Home screen.

### To move a widget

- Touch and hold the widget until it magnifies and the device vibrates, then drag it to the new location.

### To Remove a Widget

- Touch and hold the widget until it is selected, then drag it to **Remove from Home screen**.

## Shortcuts and folders

Use shortcuts and folders to manage your applications and keep your Home screen tidy.

- 1 Access an application using a shortcut
- 2 Access a folder containing applications

### To add an application shortcut to your Home screen

- 1 Touch and hold an empty area on your Home screen until the device vibrates and the customization menu appears.
  - 2 In the customization menu, tap **Apps**.
  - 3 Scroll through the list of applications and select an application. The selected application gets added to the Home screen.
- 💡 In step 3, alternatively, you can tap **Shortcuts** and then select an application from the list available. If you use this method to add shortcuts, some of the applications available allow you to add specific functionality to the shortcut.

### To Move an Item on the Homescreen

- Touch and hold the item until it is selected, then drag the item to the new location.

### To Remove an Item from the Homescreen

- Touch and hold the item until it becomes selected, then drag the item to **Remove from Home screen** at the top of the screen.

### To Create a Folder on the Homescreen

- Touch and hold an application icon or a shortcut until it is selected, then drag and drop it on top of another application icon or shortcut.

### To Add Items to a Folder on the Homescreen

- Touch and hold an item until it is selected, then drag the item to the folder.

### To rename a folder on the Home screen

- 1 Tap the folder to open it.
- 2 Tap the folder's title bar to show the **Folder name** field.
- 3 Enter the new folder name and tap **Done**.

## Background and Themes

You can adapt the Homescreen to your own style using wallpapers and different themes.

### To change your Home screen wallpaper

- 1 Touch and hold an empty area on your Home screen until the device vibrates.
- 2 Tap **Wallpapers** and select an option.

### To set a theme

- 1 Touch and hold an empty area on your Home screen until the device vibrates.
- 2 Tap **Themes**.
- 3 Select an option and follow the instructions in your device.

! When you change a theme, the background also changes in some applications.

## Battery and power management

Your device has an embedded battery. You can keep track of your battery consumption and see how much power applications are using. You can remove apps and activate **Battery saver** to get more out of your battery. You can also view an estimate of how much battery time is left and adjust your settings to improve performance and make your battery last longer.

### To view your battery consumption and estimated battery time

- 1 From your Home screen, tap **⋮**.
- 2 Find and tap **Settings > Battery usage**. An overview appears showing battery usage data and an estimated battery time.
- 3 Review the information, then proceed as required, for example, uninstall an application or restrict its usage.

### To view how much battery power applications use

- 1 From your Home screen, tap **⋮**.
- 2 Find and tap **Settings > Apps**.
- 3 Select an application and review its battery consumption via **App info > Battery usage**.

## Taking a screenshot

You can capture still images of any screen on your device as a screenshot. Screenshots you take are automatically saved in Album.

### To Take a Screenshot

- 1 Press and hold down the power key until a prompt window appears.
  - 2 Tap  $\square$ .
- 💡 You can also take a screenshot by pressing and holding down the power key and volume down key at the same time. Once the screenshot is captured, you can release the keys.

### To view your screenshot

- Drag the status bar fully downwards, then tap the screenshot you want to view.
- 💡 You can also view your screenshots by opening the Album application.

## Recording your screen

You can use the screen recording feature to capture videos of what's happening on your device's screen. This feature is useful, for example, when you want to create tutorials or record videos of you playing a game on your device. Recorded video clips are automatically saved in Album.

### Shortcuts and folders overview

- |   |   |
|---|---|
| 1 | Minimize/Restore the screen recording window          |
| 2 | Record your screen                                    |
| 3 | Record your screen when the front camera is activated |
| 4 | Record your screen with audio                         |
| 5 | Access the screen recording settings                  |
| 6 | Close the screen recording window                     |

### To record your screen

- 1 Press and hold down the power key until a prompt window appears.
- 2 Tap  $\square$ .
- 3 After the screen recording window opens, tap  $\odot$ . The record screen function starts and a timer button is displayed.
- 4 To stop the recording, tap the timer button, then tap  $\square$ .

### To record your screen when the front camera is activated

- 1 When the screen recording window opens, tap  $\text{📷}$ . A window opens showing a viewfinder for the front camera.
- 2 To start recording your screen and video captured by the front camera, tap  $\odot$ .
- 3 To stop recording, tap the timer button, then tap  $\square$ .
- 4 To close the front camera viewfinder window, tap  $\text{📷}$ .

### To view recent screen recordings

- Drag the status bar downward, then tap to view the most recent recordings of your screen.
- 💡 You can also view your screen recordings in the Album application.

## Notifications

Notifications inform you of events such as new messages and calendar notifications as well as activities in progress, such as file downloads. Notifications appear in the following places:

- The status bar
- The Notification panel
- The lockscreen

### To open or close the Notification panel

- 1 To open the Notification panel, drag the status bar downward.
- 2 To close the Notification panel, drag the panel upward.

### To Take Action on a Notification in the Notification Panel

- Tap the notification.

### To dismiss a notification from the Notification panel

- Place your finger on a notification and flick left or right.

### To Expand a Notification on the Notification Panel

- Drag the notification downward.

! Not all notifications are expandable.

### To Clear all Notifications from the Notification Panels

- Tap .

### To Take Action on a Notification from the Lockscreen

- Double-tap the notification.

### To dismiss a notification from the lockscreen

- Place your finger on the notification and flick left or right.

### To Expand a Notification on the Lockscreen

- Drag the notification downward.

! Not all notifications are expandable.

## Managing Notifications on the Lockscreen

You can set up your device so that only selected notifications get displayed on your lockscreen. You can make all notifications and their content accessible, hide sensitive content for all notifications or specific apps, or choose not to show any notifications at all.

## To Select the Notifications to Display on the Lockscreen

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Sound & notification** > **When device is locked**.
- 3 Select an option.

## Notification Display Options on the Lockscreen

<b>Show all notification content</b>	Get all notifications on the lockscreen. When you have this setting turned on, keep in mind that all content (including the content of incoming emails and chats) will be visible on your lockscreen unless you designate the relevant apps as <b>Hide sensitive content</b> in the <b>App notifications</b> settings menu.
<b>Hide sensitive notification content</b>	You must have a PIN, password, or pattern set up as your screen lock in order for this setting to be available. <b>Contents hidden</b> is displayed on the lockscreen when sensitive notifications arrive. For example, you'll get a notification for an incoming email or chat, but the content won't be visible on your lockscreen.
<b>Don't show notifications at all</b>	You won't get any notifications on the lockscreen.

## Setting the Notification Level for an App

You can set different notification behaviors for individual applications. For example, you can block all email notifications, prioritize Facebook™ notifications, and make the content of messaging notifications invisible on the lockscreen.

### To Set the Notification Level for an App

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Sound & notification** > **App notifications**.
- 3 Select the app you want to change the notification settings for.
- 4 Drag the relevant slider to the right.

## Notification levels and options for specific applications

<b>Block all</b>	Never show notifications for the selected app.
<b>Treat as priority</b>	Receive the selected app's notifications when Do not disturb is set to Priority only.
<b>Allow peeking</b>	Let the selected app emphasize certain notifications by sliding them briefly into view on the current screen.

## Notification Light

The notification light informs you about battery status and some other events. For example, a flashing white light means there is a new message or a missed call. The notification light is enabled by default but can be disabled manually.

- ! When the notification light is disabled, it only lights up when there is a battery status warning, such as when the battery level falls below 15 percent.

### To Enable the Notification Light

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Sound & notification**.
- 3 Drag the slider beside **Notification light** to the right.

## Icons in the status bar

### Status icon

	No SIM card
	Signal strength
	No signal
	Roaming
	Sending and downloading LTE data
	Sending and downloading GPRS data
	Sending and downloading EDGE data
	Sending and downloading 3G data
	Sending and downloading mobile data
	A Wi-Fi® connection is enabled and data is being transmitted
	A Wi-Fi® connection is enabled but there is no Internet connection. This icon can also appear when you are trying to connect a secured Wi-Fi® network. After successful login, the exclamation mark disappears. In places where Google™ is blocked, for example, China, the exclamation mark may appear even when the device is connected to a Wi-Fi® network and there is a working Internet connection
	Battery status
	The battery is charging
	Battery saver is activated
	Airplane mode is activated
	The Bluetooth® function is activated
	SIM card 1 is inserted
	SIM card 2 is inserted
	The microphone is muted
	The speakerphone is on
	Do not disturb mode is activated
	Allow exceptions in Do not disturb mode
	Vibrate mode
	An alarm is set
	GPS is activated
	Synchronization is ongoing
	Problem with sign-in or synchronization
	The Hearing aid function is activated

! Depending on your service provider, network and/or region, the functions or services represented by some icons in this list may not be available.

## To Manage Status Bar Icons

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Display** > **System icons**.
- 3 Mark the checkboxes for the system icons that you want to appear in the status bar.

## Notification Icons

	New text message or multimedia message
	Missed call
	Call on hold
	Call forwarding is turned on
	New voicemail message
	New email message
	Downloading data
	Uploading data
	Cellular data is disabled
<input checked="" type="checkbox"/>	Perform a basic setup of your device
	A software update is available
	System updates are available
	Downloading system updates
	Tap to install the downloaded system updates
	Ultra STAMINA mode is activated
	Noise canceling is on
	Screenshot captured
	A new Hangouts™ chat message has arrived
	Video chat with friends using the Hangouts™ application
	Upcoming calendar event
	A small app is running
	Smart Connect is activated
	A song is playing
	The radio is playing
	The device is connected to a computer via a USB cable
	Internal storage is 75% full. Tap to transfer data to the memory card
	Warning
	More (undisplayed) notifications

- ! Not all icons that may appear on your device are listed here. These icons are for reference purposes only, and changes may be made without notice.

## To block an application from sending notifications

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Sound & notification** > **App notifications**.
- 3 Select an application.
- 4 Drag the slider beside **Block all** to the right.

## Applications Overview

-  Use the Alarm & clock application to set various kinds of alarms.
-  Use your web browser to navigate and view web pages and manage bookmarks, text and images.
-  Use the Calculator application to perform basic calculations.
-  Use the Calendar application to keep track of events and manage your appointments.
-  Use the camera to take photos and record video clips.
-  Use the Contacts application to manage phone numbers, email addresses, and other information related to your contacts.
-  Access your downloaded applications, documents, and pictures.
-  Use the Email application to send and receive emails through both private and corporate accounts.
-  Use the Facebook™ application to engage in social networking with friends, family members, and coworkers around the world.
-  Browse and listen to FM radio stations.
-  Use the Album application to view and work with your photos and videos.
-  Use the Gmail™ application to read, write, and organize email messages.
-  Search for information on your device and on the web.
-  View your current location, find other locations, and calculate routes using Google Maps™.
-  Use the Play Store™ application to download free and paid applications for your device.
-  Use the Messaging application to send and receive text and multimedia messages.
-  Use the Video application to play videos on your device and share content with your friends.
-  Use the Music application to organize and play music, audio books and podcasts.
-  View news stories from Socialife.
-  Use the Weather application to view weather forecast.
-  Make phone calls by dialing the number manually, or by using the smart dial function.
-  Optimize settings to suit your own requirements.
-  Use the Hangouts™ application to chat with friends online.
-  Identify music tracks that you hear playing in your surroundings, and get artist, album, and other info.

-  Use YouTube™ to share and view videos from around the world.
-  Use the Smart Connect™ application to set what happens in your device when you connect or disconnect an accessory.
-  The Xperia™ Movie Creator automatically creates short videos of around 30 seconds in length using existing photos and videos. The application automatically determines the timeline to create its movie.
-  Use the Lifelog application to automatically log events about your daily life. For example, you can set goals and track your progress in achieving them or bookmark special moments.
-  Use the Support application to access user support on your device. For example, you can access a User guide, troubleshooting information, plus tips and tricks.

! Some applications are not supported or listed by all networks and/or service providers in all areas.

# Downloading applications

## Downloading applications from Google Play™

Google Play™ is the official online Google store for downloading applications, games, music, movies, and books. It includes both free and paid applications. Before you start downloading from Google Play™, make sure that you have a working Internet connection, preferably over Wi-Fi® to limit data traffic charges.

- ! To use Google Play™, you need to have a Google™ account. Google Play™ may not be available in all countries or regions.

### To download an application from Google Play™

- 1 From the Home screen, tap .
  - 2 Find and tap **Play Store**.
  - 3 Find an item you wish to download by browsing categories, or by using the search function.
  - 4 Tap the item to view its details, and follow the instructions to complete the installation.
- ! Some applications may need to access data, settings and various functions on your device in order to work properly. Only install and give permissions to applications that you trust. You can view the permissions granted to a downloaded application and also change their status by tapping the application under **Settings > Apps**.

## Downloading applications from other sources

When your device is set to allow downloads from sources other than Google Play™, you can download applications directly from other websites by following the relevant download instructions.

- ! Installing applications of unknown or unreliable origin can damage your device. Only download applications from reliable sources. Contact the application provider if you have any questions or concerns.
- ! If you are using a device with multiple users, only the owner, that is, the primary user, can allow downloads from sources other than Google Play™. Changes made by the owner affect all other users.

### To allow downloading of applications from other sources

- 1 From your Home screen, tap .
  - 2 Find and tap **Settings > Security**.
  - 3 Drag the slider beside **Unknown sources** to the right.
  - 4 Tap **OK**.
- ! Some applications may need to access data, settings and various functions on your device in order to work properly. Only install and give permissions to applications that you trust. You can view the permissions granted to a downloaded application and also change their status by tapping the application under **Settings > Apps**.

# Internet and networks

## Browsing the web

The Google Chrome™ web browser for Android™ devices comes pre-installed in most markets. Go to <http://support.google.com/chrome> and click the "Chrome for Mobile" link to get more detailed information about how to use this web browser.

### To browse with Google Chrome™

- 1 From your Home screen, tap .
- 2 Find and tap .
- 3 If you are using Google Chrome™ for the first time, select to either sign in to a Google™ account or browse with Google Chrome™ anonymously.
- 4 Enter a search term or web address in the search and address field, then tap **Go** on the keyboard.

## Internet and MMS settings

To send multimedia messages, or to access the Internet when there is no available Wi-Fi® network, you must have a working mobile data connection with the correct Internet and MMS (Multimedia Messaging Service) settings. Here are some tips:

- For most mobile networks and operators, Internet and MMS settings come preinstalled on your device. You can then start using the Internet and send multimedia messages right away.
- It is possible to download these settings via Wi-Fi®.
- You can manually add, change or delete Internet and MMS settings on your device at any time. If you change or delete an Internet or MMS setting by mistake, download the Internet and MMS settings again.
- If you cannot access the Internet over a mobile network or if multimedia messaging is not working, even though the Internet and MMS settings have been downloaded successfully to your device, refer to the troubleshooting tips for your device at [www.sonymobile.com/support/](http://www.sonymobile.com/support/) for network coverage, mobile data, and MMS issues.
- If Battery saver mode is activated to save power, all mobile data traffic gets paused when the screen is off. If this causes connection problems, try excluding some applications and services from being paused, or deactivate Battery saver mode temporarily.
- If you are using a device with multiple users, only the owner, that is, the primary user, can download Internet and messaging settings from the Settings menu, but the downloaded settings are applicable to all users.

### To download Internet and MMS settings

- 1 From your Home screen, tap .
  - 2 Find and tap **Settings > More > Internet settings**.
  - 3 Tap **Accept**. Once the settings have been downloaded successfully,  appears in the status bar and mobile data traffic is turned on automatically.
- ! If the settings cannot be downloaded to your device, check the signal strength of your mobile network. Move to an open location free from obstructions or get close to a window and then try again.

### To add Internet and MMS settings manually

- 1 From your Home screen, tap .
- 2 Find and tap **Settings > More > Mobile networks**.
- 3 Select a SIM card.
- 4 Tap **Access Point Names > +**.
- 5 Tap **Name** and enter a name as desired.
- 6 Tap **APN** and enter the access point name.
- 7 Enter all other information as required. If you don't know what information is required, contact your network operator for more details.
- 8 When you're done, tap ; then tap **SAVE**.

### To view the downloaded Internet and MMS settings

- 1 From your Home screen, tap .
  - 2 Find and tap **Settings** > **More** > **Mobile networks**.
  - 3 Select a SIM card.
  - 4 Tap **Access Point Names**.
  - 5 To view more details, tap any of the available items.
- ! If you have several available connections, the active network connection is indicated by a marked button .

## Wi-Fi®

Use Wi-Fi® connections to surf the Internet, download applications, or send and receive email. Once you have connected to a Wi-Fi® network, your device remembers the network and automatically connects to it the next time you come within range.

Some Wi-Fi® networks require you to log in to a web page before you can get access. Contact the relevant Wi-Fi® network administrator for more information.

Available Wi-Fi® networks may be open or secured:

- Open networks are indicated by  next to the Wi-Fi® network name.
  - Secured networks are indicated by  next to the Wi-Fi® network name.
- 💡 Some Wi-Fi® networks do not show up in the list of available networks because they do not broadcast their network name (SSID). If you know the network name, you can add it manually to your list of available Wi-Fi® networks.

### To Turn on Wi-Fi®

- 1 From your Home screen, tap .
  - 2 Find and tap **Settings** > **Wi-Fi**.
  - 3 Tap the on-off switch to turn on the Wi-Fi® function.
- ! It may take a few seconds before Wi-Fi® is enabled.

### To Connect to a Wi-Fi® Network Automatically

- 1 From your Home screen, tap .
  - 2 Find and tap **Settings** > **Wi-Fi**.
  - 3 Tap the on-off switch to turn on the **Wi-Fi** function. All available Wi-Fi® networks are displayed.
  - 4 Tap a Wi-Fi® network to connect to it. For secured networks, enter the relevant password.  is displayed in the status bar once you are connected.
- 💡 To search for new available networks, tap ; then tap **Refresh**. If you cannot connect to a **Wi-Fi** network successfully, refer to the relevant troubleshooting tips for your device at [www.sonymobile.com/support/](http://www.sonymobile.com/support/).

### To Add a Wi-Fi® Network Manually

- 1 From your Home screen, tap .
  - 2 Find and tap **Settings** > **Wi-Fi**.
  - 3 Tap  > **Add network**.
  - 4 Enter the **Network name (SSID)** information.
  - 5 To select a security type, tap the **Security** field.
  - 6 If required, enter a password.
  - 7 To edit some advanced options such as proxy and IP settings, mark the **Advanced options** checkbox and then edit as desired.
  - 8 Tap **Save**.
- ! Contact your Wi-Fi® network administrator to get the network SSID and password.

## Increasing Wi-Fi® signal strength

- There are a number of things you can do to increase the strength of a Wi-Fi® signal:
- Move your device closer to the Wi-Fi® access point.

- Move the Wi-Fi® access point away from any potential obstructions or interference.
- Don't cover the Wi-Fi® antenna area of your device (the highlighted area in the illustration).

## Wi-Fi® settings

When you are connected to a Wi-Fi® network or when there are Wi-Fi® networks available in your vicinity, it is possible to view the status of these networks. You can also enable your device to notify you whenever an open Wi-Fi® network is detected.

If you are not connected to a Wi-Fi® network, your device uses a cellular data connection to access the Internet (if you have set up and enabled a cellular data connection on your device). By adding a Wi-Fi® sleep policy, you can specify when to switch from Wi-Fi® to cellular data.

### To Enable Wi-Fi® Network Notifications

- 1 Turn on Wi-Fi®, if it is not already on.
- 2 From your Home screen, tap .
- 3 Find and tap **Settings** > **Wi-Fi**.
- 4 Tap  > **Advanced**.
- 5 Drag the slider beside **Network notification** to the right.

### To view detailed information about a connected Wi-Fi® network

- 1 From the Home screen, tap .
- 2 Find and tap **Settings** > **Wi-Fi**.
- 3 Tap the Wi-Fi® network that you are currently connected to. Detailed network information is displayed.

### To add a Wi-Fi® sleep policy

- 1 From the Home screen, tap .
- 2 Find and tap **Settings** > **Wi-Fi**.
- 3 Tap , then tap **Settings** > **Keep Wi-Fi on during sleep**.
- 4 Select an option.

## WPS

WPS (Wi-Fi® Protected Setup) is a wireless networking standard that helps you establish secure wireless network connections. If you have little background knowledge of wireless security, WPS makes it easy for you to set up Wi-Fi Protected Access (WPA) encryption to secure your network. You can also add new devices to an existing network without entering long passwords.

Use one of these methods to enable WPS:

- Push button method – simply push a button on a WPS-supported device, for example, a router.
- PIN method – your device creates a random PIN (Personal Identification Number), which you enter on the WPS-supported device.

### To Connect to a Wi-Fi® Network Using a WPS Button

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Wi-Fi**.
- 3 Turn on Wi-Fi® if it is not already on.
- 4 Tap  > **Settings** > **WPS Push Button**, then press the WPS button on the WPS-supported device.

### To Connect to a Wi-Fi® Network Using a WPS PIN

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Wi-Fi**.
- 3 Turn on Wi-Fi® if it is not already on.
- 4 Tap  > **Settings** > **WPS PIN Entry**.
- 5 On the WPS-supported device, enter the PIN that appears on your device.

## Sharing your mobile data connection

You can share your mobile data connection with other devices in several ways:

- **USB tethering**
  - share your mobile data connection with a single computer using a USB cable.
- **Bluetooth® tethering**
  - share your mobile data connection with up to five other devices via Bluetooth®.
- **Portable Wi-Fi® hotspot**
  - share your mobile data connection simultaneously with up to 10 other devices, including devices that support WPS technology.

### To Share Your Data Connection Using a USB Cable

- 1 Deactivate all USB cable connections to your device.
  - 2 Using the USB cable that came with your device, connect your device to a computer.
  - 3 From your Home screen, tap .
  - 4 Find and tap **Settings** > **More** > **Tethering & portable hotspot**.
  - 5 Drag the slider beside **USB tethering** to the right, then tap **OK** if prompted.  is displayed in the status bar once you are connected.
  - 6 To stop sharing your data connection, drag the slider beside **USB tethering** to the left or disconnect the USB cable.
- ! You cannot share your device's data connection and SD card over a USB cable at the same time.

### To share your mobile data connection with another Bluetooth® device

- 1 Make sure that your device and the Bluetooth® device are paired with each other and that mobile data traffic is activated on your device.
  - 2 **Your device:** From your Home screen, tap .
  - 3 Find and tap **Settings** > **More** > **Tethering & portable hotspot** and then drag the slider beside **Bluetooth tethering** to the right.
  - 4 **Bluetooth® device:** Set up the device so that it obtains its network connection using Bluetooth®. If the device is a computer, refer to the relevant instructions to complete the setup. If the device runs on the Android™ operating system, tap the settings icon beside the name of the device that it is paired with under **Settings** > **Bluetooth** > **Paired devices**, then mark the **Internet access** checkbox.
  - 5 **Your device:** Wait for  to appear in the status bar. Once it appears, the setup is complete.
  - 6 To stop sharing your mobile data connection, drag the slider beside **Bluetooth tethering** to the left.
- ! The **Bluetooth tethering** function is turned off every time you turn off your device or turn off the Bluetooth® function.
- 💡 For more information about pairing and turning on mobile data traffic, see *To pair your device with another Bluetooth® device* on page 122 and *To add a virtual private network* on page 46 .

### To Use Your Device as a Portable Wi-Fi® Hotspot

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **More** > **Tethering & portable hotspot**.
- 3 Tap **Portable Wi-Fi hotspot settings** > **Configure Wi-Fi hotspot**.
- 4 Enter the **Network name (SSID)** information.
- 5 To select a security type, tap the **Security** field. If required, enter a password.
- 6 Tap **Save**.
- 7 Tap , and drag the slider beside **Portable Wi-Fi hotspot** to the right.
- 8 If prompted, tap **OK** to confirm.  appears in the status bar once the portable Wi-Fi® hotspot is active.
- 9 To stop sharing your data connection via Wi-Fi®, drag the slider beside **Portable Wi-Fi hotspot** to the left.

### To Allow a WPS-Supported Device to Use Your Cellular Data Connection

- 1 Ensure your device is functioning as a portable Wi-Fi® hotspot.
- 2 From your Home screen, tap .
- 3 Find and tap **Settings** > **More** > **Tethering & portable hotspot** > **Portable Wi-Fi hotspot settings**.
- 4 Drag the slider beside **Discoverable** to the right.
- 5 Under **Configure Wi-Fi hotspot**, make sure your portable hotspot is secured by a password.
- 6 Tap **WPS Push Button**, then follow the relevant instructions. Alternately, tap  > **WPS PIN Entry**, then enter the PIN that appears on the WPS-supported device.

### To rename or secure your portable hotspot

- 1 From the Home screen, tap .
- 2 Find and tap **Settings** > **More** > **Tethering & portable hotspot**.
- 3 Tap **Portable Wi-Fi hotspot settings** > **Configure Wi-Fi hotspot**.
- 4 Enter the **Network name (SSID)** for the network.
- 5 To select a security type, tap the **Security** field.
- 6 If required, enter a password.
- 7 Tap **Save**.

## Controlling data usage

You can keep track of the amount of data transferred to and from your device over your mobile data or Wi-Fi® connection during a given period. For example, you can view the amount of data used by individual applications. For data transferred over your mobile data connection, you can also set data usage warnings and limits to avoid additional charges.

- ! Adjusting data usage settings can help you keep greater control over data usage but cannot guarantee the prevention of additional charges.

### To turn data traffic on or off

- 1 From your Home screen, tap .
  - 2 Find and tap **Settings** > **Data usage**.
  - 3 Select the SIM card that you use for data traffic.
  - 4 Drag the slider beside **Mobile data traffic** to turn data traffic on or off.
- 💡 When data traffic is turned off, your device can still establish Wi-Fi®, NFC and Bluetooth® connections.

### To Set a Data Usage Warning

- 1 Make sure cellular data traffic is turned on.
- 2 From your Home screen, tap .
- 3 Find and tap **Settings** > **Data usage**.
- 4 Select a SIM card.
- 5 To set the warning level, drag the warning line to the desired value. You receive a warning notification when the amount of data traffic approaches the level you set.

### To Set a Cellular Data Usage Limit

- 1 Make sure cellular data traffic is turned on.
  - 2 From your Home screen, tap .
  - 3 Find and tap **Settings** > **Data usage**.
  - 4 Select a SIM card.
  - 5 Drag the slider beside **Set mobile data limit** to the right, then tap **OK**.
  - 6 To set the cellular data usage limit, drag the data limit line to the desired value.
- ! Once your cellular data usage reaches the set limit, cellular data traffic on your device gets turned off automatically.

### To Control the Data Usage of Individual Applications

- 1 From your Home screen, tap .
  - 2 Find and tap **Settings** > **Data usage**.
  - 3 Tap the application you want to control, then drag the slider beside **Restrict app background data** to the right and tap **OK**.
  - 4 To access more specific settings for the application (if available), tap **App settings** and make the desired changes.
- 💡 The performance of individual applications may be affected if you change the related data usage settings.

### To Check Your Data Usage

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Data usage**.
- 3 Tap , then tap **Show Wi-Fi**.
- 4 To view information about the amount of data transferred via Wi-Fi®, tap the **Wi-Fi** tab.
- 5 To view information about the amount of data transferred via cellular data connection, tap the **Mobile** tab.

## Selecting a SIM card for data traffic

Either of the two SIM cards inserted in your device can handle data traffic, but only one SIM card can be selected to handle data at any given time. You can select the SIM card to use for data traffic during the initial setup of your device, or you can select or change it later via the Settings menu.

### To change the SIM card used for data traffic

- 1 From your Home screen, tap .
  - 2 Find and tap **Settings** > **Dual SIM settings** > **SIM card for data traffic**.
  - 3 Select the SIM card you want to use for data traffic, then tap **OK** to confirm.
- 💡 For higher data speeds, select the SIM card that supports the fastest mobile network, for example, 3G or LTE.

## Selecting mobile networks

Your device supports the use of two different networks at the same time. You can select from the following network mode combinations when two SIM cards are inserted in your device:

- One LTE network and one GSM network
- One WCDMA network and one GSM network
- Two GSM networks

For each SIM card, you can set your device to switch automatically between mobile networks depending on which mobile networks are available where you are. You can also manually set your device to use a particular mobile network mode for each SIM card, for example, WCDMA or GSM.

Different status icons are displayed in the status bar depending on the type or mode of network that you are connected to. Refer to *Status icon* on page 35 to see what the different status icons look like.

#### To select a network mode

- 1 From your Home screen, tap .
- 2 Find and tap **Settings > More > Mobile networks**.
- 3 Select a SIM card.
- 4 Tap **Preferred network type**, then select a network mode.

#### To select another network manually

- 1 From your Home screen, tap .
- 2 Find and tap **Settings > More > Mobile networks**.
- 3 Select a SIM card.
- 4 Tap **Network operators**.
- 5 Tap **Search mode**, then select **Manual**.
- 6 Select a network.

- ! If you select a network manually, your device will not search for other networks, even if you move out of range of the manually selected network.

#### To Activate Automatic Network Selection

- 1 From your Home screen, tap .
- 2 Find and tap **Settings > More > Mobile networks**.
- 3 Select a SIM card.
- 4 Tap **Network operators**.
- 5 Tap **Search mode**, then select **Automatic**.

## Virtual private networks (VPNs)

Use your device to connect to virtual private networks (VPNs), which allow you to access resources inside a secured local network from a public network. For example, VPN connections are commonly used by corporations and educational institutions for users who need to access intranets and other internal services when they are outside of the internal network, for example, when they are traveling.

VPN connections can be set up in many ways, depending on the network. Some networks may require you to transfer and install a security certificate on your device. For detailed information about how to set up a connection to your virtual private network, contact the network administrator of your company or organization.

- ! If you are using a device with multiple users, you may need to log in as the owner, that is, the primary user, to adjust the settings for VPN.

#### To add a virtual private network

- 1 From your Home screen, tap .
- 2 Find and tap **Settings > More > VPN**.
- 3 Tap **+**.
- 4 Select the type of VPN to add.
- 5 Enter your VPN settings.
- 6 Tap **Save**.

#### To connect to a virtual private network

- 1 From your Home screen, tap .
- 2 Find and tap **Settings > More > VPN**.
- 3 In the list of available networks, tap the VPN you want to connect to.
- 4 Enter the required information.
- 5 Tap **Connect**.

### To disconnect from a virtual private network

- 1 Drag the status bar downwards.
- 2 Tap the notification for the VPN connection to turn it off.

# Synchronizing data on your device

## Synchronizing with Online Accounts

Synchronize your device with contacts, email, calendar events, and other information from online accounts, for example, email accounts such as Gmail™ and Exchange ActiveSync, Facebook™, Flickr™, and Twitter™. You can synchronize data automatically for such accounts by activating the auto-sync function. Or you can synchronize each account manually.

### To Set Up an Online Account for Synchronization

- 1 From your Home screen, tap .
- 2 Tap **Settings** > **Accounts** > **Add account**, then select the account you want to add.
- 3 Follow the instructions to create an account, or sign in if you already have an account.

### To synchronize manually with an online account

- 1 From your Home screen, tap  > **Settings** > **Accounts**.
- 2 Under **Accounts**, tap the name of the account that you want to synchronize with. A list of items appears showing what can be synchronized with the account.
- 3 Tap the items that you want to synchronize.

### To remove an online account

- 1 From your Home screen, tap  > **Settings** > **Accounts**.
- 2 Under **Accounts** tap the name of the account that you want to remove.
- 3 Tap , then tap **Remove account**.
- 4 Tap **Remove account** again to confirm.

## Synchronizing with Microsoft® Exchange ActiveSync®

If your company uses a Microsoft Exchange ActiveSync account, you can access your corporate email messages, calendar appointments, and contacts directly on your device. After setup, you can find your information in the **Email**, **Calendar** and **Contacts** applications.

### To Set Up an EAS Account for Synchronization

- 1 Be sure to have your domain and server details available (as provided by your corporate network administrator).
  - 2 From your Home screen, tap .
  - 3 Tap **Settings** > **Accounts** > **Add account** > **Exchange ActiveSync**.
  - 4 Enter your corporate email address and password.
  - 5 Tap **Next**. Your device begins to retrieve your account information. If a failure occurs, enter the domain and server details for your account manually and then tap **Next**.
  - 6 Tap **OK** to allow your corporate server to control your device.
  - 7 Select a synchronization method, a synchronization interval, and what data you want to sync with your device, such as contacts and calendar entries.
  - 8 Tap **Next**, then select the way to receive a notification when you receive new mail.
  - 9 Tap **Next** again. Enter a name for the corporate account, then tap **Finish setup**.
  - 10 If prompted, activate the device administrator to allow your corporate server to set certain security rules on your device, such as disabling voice recording and using storage encryption. Otherwise, the account setup fails.
- ! When you change the login password for an EAS account on your computer, you have to log in again to the EAS account on your device.

#### To change the settings of an EAS account

- 1 From your Home screen, tap .
- 2 Tap **Email**, then tap .
- 3 Tap **Settings** and select an EAS account, then change the settings of the EAS account as desired.

#### To set a synchronisation interval for an EAS account

- 1 From your Home screen, tap .
- 2 Tap **Email**, then tap .
- 3 Tap **Settings** and select an EAS account.
- 4 Tap **Check frequency** > **Check frequency** and select an interval option.

#### To Remove an EAS Account

- 1 From your Home screen, tap  > **Settings** > **Accounts**.
- 2 Under **Accounts**, tap **Exchange ActiveSync**, then select the EAS account you want to remove.
- 3 Tap , then tap **Remove account**.
- 4 Tap **Remove account** again to confirm.

# Basic settings

## Accessing settings

View and change settings for your device from the Settings menu. The Settings menu is accessible from both the Application screen and the Quick settings panel.

### To open the device settings menu from the Application screen

- 1 From your Home screen, tap .
- 2 Tap **Settings**.

### To view information about your device

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **About phone**.

### To Activate the Screen Using Tap to Wake Up Mode

- 1 Be sure that Tap to Wake Up mode is turned on. To turn it on, tap **Settings** > **Display**, then drag the slider beside **Tap to wake up** to the right.
- 2 Double-tap the screen.

### To open the Quick settings panel

- Using two fingers, drag the status bar downward.

### To Select which Settings to Display on the Quick Settings Panel

- 1 Using two fingers, drag the status bar downward, then tap .
- 2 In the bar at the top of the screen, touch and hold the icon for the quick setting you want to add, then drag and drop it in the lower part of the screen.

### To Rearrange the Quick Settings Panel

- 1 Using two fingers, drag the status bar downward, then tap .
- 2 Touch and hold an icon, then move it to the desired position.

## Volume settings

You can adjust the ringtone volume for incoming calls and notifications as well as for music and video playback.

### To adjust the ringtone volume with the volume key

- Press the volume key up or down.

### To Adjust the Media Playing Volume with the Volume Key

- When playing music or watching video, press the volume key up or down, even when the screen is locked.

### To Turn On Vibrate Mode

- Press the volume key down or up until  appears.

### To adjust the volume levels

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Sound & notification**.
- 3 Drag the volume sliders to the desired positions.

- ! You can also press the volume key up or down, then after tapping the downward arrow, tap  to adjust the ringtone, media playback or alarm volume levels separately.

### To Set Your Device to Vibrate for Incoming Calls

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Sound & notification**.
- 3 Drag the slider beside **Also vibrate for calls** to the right.

### To set a ringtone

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Sound & notification** > **Phone ringtone**.
- 3 Select a SIM card.
- 4 Select an option from the list or tap **+** then tap  and select a music file that is saved to your device.
- 5 To confirm, tap **Done**.

### To select the notification sound

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Sound & notification** > **Notification sound**.
- 3 Select an option from the list or tap **+** then tap  and select a music file that is saved to your device.
- 4 To confirm, tap **Done**.

-  Some applications have their own specific notification sounds, which you can select from the application settings.

### To Enable Touch Tones

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Sound & notification** > **Other sounds**.
- 3 Drag the sliders beside **Dialpad tones** and **Touch sounds** to the right.

## Do not disturb mode settings

You can set your device to Do not disturb mode and decide how long your device will be in Do not disturb mode manually. You can also preset when your device will be in Do not disturb mode automatically.

**No time limit** Keep the device silent until you manually turn the sound back on.

**For one hour** Keep the device silent for one hour. You can tap the minus and plus icons to adjust the duration.

### To Activate Do Not Disturb Mode

- 1 Press the volume key down until  appears.
- 2 Select a time interval.

### To Quickly Shift Between Do Not Disturb/Vibrate/Sound Mode

- 1 Press the volume key down or up until ,  or  appears.
- 2 Tap , , or  to quickly shift between Do not disturb/Vibrate/Sound mode.

### To Schedule Do Not Disturb Mode Time Intervals

- 1 Press the volume key down until  appears.
- 2 Tap .
- 3 Find and tap **Days** and mark the checkboxes for the relevant days, then tap **Done**.
- 4 To adjust the start time, tap **Start time** and select a value, then tap **OK**.
- 5 To adjust the end time, tap **End time** and select a value, then tap **OK**. Your device stays in Do not disturb mode during the selected time interval.

## Setting Exceptions for Do Not Disturb Mode

You can select which types of notifications are allowed to sound in Do not disturb mode and you can filter exceptions based on who the notifications come from. The most common types of exceptions include:

- Events and reminders
- Calls
- Messages
- Alarms

#### To Allow Exceptions to Sound in Do Not Disturb Mode

- 1 Press the volume key down until  appears.
- 2 Drag the slider beside **Allow exceptions** to the right.

#### To Set Notifications as Exceptions in Do Not Disturb Mode

- 1 Press the volume key down until  appears.
- 2 Tap .
- 3 Under **Exceptions in Do not disturb mode**, drag the relevant sliders to the right.

#### To Associate Exceptions with Specific Contact Types

- 1 Press the volume key down until  appears.
- 2 Tap .
- 3 Find and tap **Calls/messages from**.
- 4 Select an option.

#### To Allow Alarms to Sound in Do Not Disturb Mode

- 1 Press the volume key down until  appears.
- 2 Drag the slider beside **Allow alarm** to the right.

#### To Allow Exceptions to Sound during a Preset Do Not Disturb Mode Time Interval

- 1 Press the volume key down until  appears.
- 2 Tap .
- 3 Drag the slider beside **Exceptions** to the right.

## Screen settings

#### To Adjust the Screen Brightness

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Display** > **Brightness level**.
- 3 Drag the slider to adjust the brightness.

 Lowering the brightness level increases battery performance.

#### To Set the Screen to Vibrate on Touch

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Sound & notification** > **Other sounds**.
- 3 Drag the slider beside **Vibrate on touch** to the right. The screen now vibrates when you tap soft keys and certain applications.

#### To adjust the idle time before the screen turns off

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Display** > **Sleep**.
- 3 Select an option.

 To turn off the screen quickly, briefly press the power key .

## Smart backlight control

The smart backlight control keeps the screen on as long as the device is held in your hand. Once you put down the device, the screen turns off according to your sleep setting.

### To Turn on the Smart Backlight Control Function

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Display** > **Smart backlight control**.
- 3 Drag the slider to the right.

## Screen Pinning

Use screen pinning to set your device to display only the screen for a specific application. For example, if you are playing a game and you accidentally touch the Home navigation key, the screen pinning feature prevents the active game app screen from being minimized. You can also use this feature when you lend your device to another person to make it harder for them to access more than one application. For example, you can lend your device to somebody to take a photo and pin the screen to the Camera application so that the person can't easily use other apps such as Email.

- ! Screen pinning is not a security feature and does not fully prevent other users from unpinning a screen and accessing your device. To protect your data, you should set up your device to request a screen lock PIN, password, or pattern before someone can unpin the screen.

### To Activate Screen Pinning

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Security** > **Screen pinning**.
- 3 Drag the slider to the right.
- 4 If you haven't set up a pattern, PIN, or password screen lock on your device, drag the slider beside **Lock device when unpinning** to the right, then select an option. If you already have a screen lock enabled, then drag the slider to activate the relevant security option after you activate screen pinning.

- 💡 A pattern, PIN, or password is not mandatory for screen pinning to work.

### To Pin a Screen

- 1 Make sure screen pinning is activated on your device.
- 2 Open an app and go to the screen you want to pin.
- 3 Tap .
- 4 To display the screen pinning icon , swipe upward.
- 5 Tap .
- 6 In the pop-up window that appears, tap **Got it**.

### To Unpin a Screen

- 1 On the pinned screen, touch and hold  and  at the same time.
- 2 Release both buttons.

- 💡 If you selected a security option when you activated the screen pinning function, you have to enter your pattern, PIN, or password to unlock the device before the screen can be unpinned.

## Application settings

Some apps will ask for permissions once you start using them. You can allow or deny permissions individually for each app, either from the Settings menu or from the Permission confirm dialog. Permission requirements depend on the app's design.

### Allowing or denying permissions

You can choose whether to allow or deny permissions when the dialog is shown. If you have used another Android version previously, most apps will have already been granted the necessary permissions.

### To allow a permission

- 1 To allow a permission, tap **Allow**.
- 2 When the confirm dialog appears for the second time, you can choose the **Never ask again** option if you wish.
- 3 A dialog will also explain why the app needs the permissions and what it uses them for specifically. To dismiss this dialog, tap **OK**.

### To deny a permission

- To deny a permission, tap **Deny** when the dialog is shown.
- 💡 Some applications can still be used even if you have denied permissions.

## Critical permissions

Some permissions are mandatory for apps to work as intended. In such cases, a dialog will inform you.

### To allow critical permissions

- 1 To allow a permission, tap **Continue** > **App info** > **Permissions**.
  - 2 Find the critical permission you need.
  - 3 Drag the slider to the right.
- ! You can also manage permissions in **Settings** > **Apps**. Tap an app and change the permissions as desired.

### To configure applications

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Apps** > .
- 3 Select a configuration option, for example **App permissions**, then choose an application that you want to configure.

## Application linking

Your device can determine the default app to handle a particular web link. This means that if the link is set, you don't need to select an app each time you open a link. You can change the default app any time you want.

### To manage app links from the Settings menu

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Apps**.
- 3 Tap  and find **App links**.
- 4 Select the app for which you want to set the supported links.
- 5 Set the **App links** property to **Open in this app** option.

## Resetting Your Applications

You can reset an application or clear application data if your application stops responding or causes issues with your device.

### To Reset Application Preferences

- 1 From your Home screen, tap .
  - 2 Find and tap **Settings** > **Apps**.
  - 3 Tap , then tap **Reset app preferences**.
- ! Resetting application preferences does not delete any application data from your device.

### To clear application data

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Apps**.
- 3 Select an application or service, then tap **Storage** > **CLEAR DATA**.

! When you clear application data, data for the selected application is deleted from your device permanently. The option to clear application data is not available for all applications or services.

### To clear application cache

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Apps**.
- 3 Select an application or service, then tap **Storage** > **CLEAR CACHE**.

! The option to clear the application cache is not available for all applications or services.

### To clear the application default setting

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Apps**.
- 3 Select an application or service, then tap **Open by default** > **CLEAR DEFAULTS**.

! The option to clear the application default setting is not available for all applications or services.

## Daydream

Daydream is an interactive screen saver that automatically displays colors, photos or a slideshow while your device is docked or charging and the screen is idle.

💡 On a device with multiple users, each user can have individual Daydream settings.

### To Activate the Daydream Screen Saver

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Display** > **Daydream**.
- 3 Drag the slider to the right.

### To Select Content for the Daydream Screen Saver

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Display** > **Daydream**.
- 3 Drag the slider to the right.
- 4 Select what you want to display when the screen saver is active.

### To Set when the Daydream Screen Saver Starts

- 1 From your Homescreen, tap .
- 2 Find and tap **Settings** > **Display** > **Daydream**.
- 3 Drag the slider to the right.
- 4 To activate the Daydream screen saver immediately, tap ; then tap **Start now**.
- 5 To set automatic activation options, tap ; then tap **When to daydream**, and select an option.

## Language settings

You can select a default language for your device and change it again at a later time. You can also change the writing language for text input. See *Personalizing the On-Screen Keyboard* on page 62 .

### To change the language

- 1 From the Home screen, tap .
  - 2 Find and tap **Settings** > **Language & input** > **Language**.
  - 3 Select an option.
  - 4 Tap **OK**.
- ! If you select the wrong language and cannot read the menu texts, find and tap . Then select the text beside  and select the first entry in the menu that opens. You can then select the language you want.

## Date and time

You can change the date and time on your device.

### To Set the Date Manually

- 1 From the Home screen, tap .
- 2 Find and tap **Settings** > **Date & time**.
- 3 Drag the slider beside **Automatic date & time** to the left.
- 4 Tap **Set date**.
- 5 Scroll up and down to select the desired date.
- 6 Tap **OK**.

### To Set the Time Manually

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Date & time**.
- 3 Drag the slider beside **Automatic date & time** to the left.
- 4 Tap **Set time**.
- 5 Select the relevant hour and minute values.
- 6 Tap **OK**.

### To Set the Time Zone

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Date & time**.
- 3 Drag the slider beside **Automatic time zone** to the left.
- 4 Tap **Select time zone**.
- 5 Select an option.

## X-Reality™ for mobile

Sony's X-Reality™ for mobile technology improves the viewing quality of photos and videos after you take them, giving you clearer, sharper and more natural images. X-Reality™ for mobile is turned on by default, but you can turn it off if you want to reduce battery consumption.

### To turn on X-Reality™ for mobile

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Display** > **Image enhancement**.
- 3 Tap the **X-Reality for mobile** radio button if it is not already selected.

## Super-Vivid Mode

Super-Vivid mode enhances the color brightness and saturation of your photos and videos while you view them on your device.

### To turn on Super-vivid mode

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Display** > **Image enhancement**.
- 3 Tap the **Super-vivid mode** radio button if it is not already selected.

## Enhancing the Sound Output

You can enhance the sound of your device by manually enabling individual sound settings such as Equalizer and Surround sound. You can enable the Dynamic normalizer to minimize volume differences between songs or videos. You can also improve the quality of compressed music files to near high-resolution audio quality when you are using wired headphones.

### To enhance the sound output automatically

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Sound & notification** > **Audio settings**.
- 3 Drag the slider beside **ClearAudio+** to the right.

### To Adjust the Sound Settings Manually

- 1 From the Homescreen, tap .
- 2 Find and tap **Settings** > **Sound & notification** > **Audio settings**.
- 3 Drag the slider beside **ClearAudio+** to the left.
- 4 Tap **Sound effects** > **Equalizer**.
- 5 Adjust the sound settings by dragging the frequency band buttons up or down.

-  The manual adjustment of sound output settings has no effect on voice communication applications. For example, there is no change in the voice call sound quality.

### To Minimize Volume Differences Using the Dynamic Normalizer

- 1 From the Homescreen, tap .
- 2 Find and tap **Settings** > **Sound & notification** > **Audio settings**.
- 3 Drag the slider beside **Dynamic normalizer** to the right.

### To Upgrade the Quality of Compressed Music Files

- 1 From the Homescreen, tap .
- 2 Find and tap **Settings** > **Sound & notification** > **Audio settings**.
- 3 Drag the slider beside **DSEE HX** to the right.

-  This setting is only for wired headphones that support high-resolution audio.

## Noise cancellation

Your device supports noise canceling headsets. By using a noise canceling headset with your device, you can get much clearer audio quality when listening, for example, to music in a noisy environment, such as on a bus, a train or a plane. You can also use this feature to create a silent environment in which to study, work or read.

-  To ensure optimal performance, noise canceling headsets from Sony are recommended.

### To Use a Noise-Canceling Headset

- 1 Connect the noise-canceling headset to your device.
- 2 From your Homescreen, tap  > **Settings** > **Sound & notification** > **Accessory settings** > **Noise canceling**, then drag the slider beside **Noise canceling** to the right.
- 3 If you want **Noise canceling** to be enabled only during music or video playback or when the screen is active, drag the slider beside **Power save mode** to the right.
- 4 If you want **Noise canceling** to be enabled for as long as the headset is connected, drag the slider beside **Power save mode** to the left.

-  A noise-canceling headset may not be included with your device at purchase.

### To Adjust the Settings to the Noise Environment

- 1 Make sure a noise-canceling headset is connected to your device.
- 2 From your Homescreen, tap .
- 3 Find and tap **Settings** > **Sound & notification** > **Accessory settings** > **Noise canceling** > **Noise environment**.
- 4 Select the relevant noise environment type, then tap **OK**.

## Multiple User Accounts

Your device supports multiple user accounts so that different users can log in separately to the device and use it. Multiple user accounts work well in situations where you share the same device with other people or lend your device to someone to use for a while. The user who sets up the device for the first time becomes the owner of the device. Only the owner can manage the accounts of other users. Apart from the owner account, there are two different types of accounts:

- Regular User: This account type is suitable for someone who regularly uses your device.
  - Guest User: Enable the guest account option for someone who just wants to use your device temporarily.
- ! Some features are only available to the owner. For example, only the owner can allow downloads from sources other than Google Play™.

### About the Regular User Account

By adding Regular User accounts, you can allow different users to have different homescreens, wallpapers, and general settings. They also get separate access to applications and memory storage for files such as music and photos. You can add up to three regular user accounts on your device.

#### To add a regular user account

- 1 Make sure you are logged in as the owner, that is, the user who set up the device for the first time.
  - 2 From your Home screen, tap .
  - 3 Find and tap **Settings** > **Users** > **Add user or profile**.
  - 4 Tap **OK**. The new account is created.
  - 5 Tap **SET UP NOW**. The screen locks and an icon representing the newly added user appears in the top right corner.
  - 6 Unlock the screen by swiping upwards.
  - 7 Follow the on-screen instructions to set up the account for the user.
- 💡 In cases where the person using the new account wants to set up the account but is not available at the time, you can tap **NOT NOW** in step 5. When the user is ready, they can select **Users** under **Settings** and see the new account, which appears as **New user**. Just tap the account and follow the instructions to finish setting it up.
- 💡 You can also add a regular user account from the status bar on any screen. Just drag the status bar downwards using two fingers and tap the user icon, then tap **Add user**.

#### To Allow a Regular User to Make Phone Calls and Use SMS

- 1 Be sure you are logged in as the owner.
- 2 From your Homescreen, tap .
- 3 Find and tap **Settings** > **Users**.
- 4 Tap  beside the name of the relevant user, then drag the slider beside **Turn on phone calls & SMS** to the right.

#### To Delete a Regular User Account from Your Device

- 1 Be sure you are logged in as the owner.
- 2 From your Homescreen, tap .
- 3 Find and tap **Settings** > **Users**.
- 4 Tap  beside the name of the user you want to delete, then tap **Delete** > **Delete** > **Delete**.

## About the Guest User Account

If someone just wants to use your device temporarily, you can enable a guest account for that user. In Guest mode, your device starts up as a freshly installed system with only the preinstalled apps. Once your guest is finished using your device, you can wipe the session clean so that the next guest can start fresh. The Guest User account is preinstalled and cannot be deleted.

### To Activate the Guest User Account

- 1 Make sure you are logged in as the owner, that is, the user who set up the device for the first time.
  - 2 From your Homescreen, tap .
  - 3 Find and tap **Settings** > **Users** > **Guest**.
-  You can also activate the guest user account from the status bar on any screen. Just drag the status bar downward using two fingers and tap the user icon, then tap **Add guest**.

### To Allow the Guest User to Make Phone Calls

- 1 Be sure you are logged in as the owner.
- 2 From your Homescreen, tap .
- 3 Find and tap **Settings** > **Users**.
- 4 Tap  beside **Guest**, then drag the slider beside **Turn on phone calls** to the right.

### To clear the guest session data

- 1 Make sure you are logged in to the guest account.
  - 2 From your Home screen, tap .
  - 3 Find and tap **Settings** > **Users**.
  - 4 Find and tap **Remove guest**.
  - 5 Tap **Remove**.
-  You can also clear the guest session from the status bar on any screen as long as you are logged in to the guest account. Just drag the status bar downwards using two fingers and tap the user icon, then tap **Remove guest**.

## Switching between Multiple User Accounts

### To Switch between Multiple User Accounts

- 1 To view the list of users, drag the status bar downward using two fingers, then tap the user icon at the top right of the screen.
  - 2 Tap the icon representing the user account you want to switch to. The lockscreen for that user account appears.
-  When you switch to the guest account, tap **Start over** if you want to wipe the previous session, or tap **Yes, continue** to continue the previous session.
-  Each user can set their own lockscreen. See *Screen Lock* on the 13 page.

## Settings for Multiple User Accounts

There are three different types of settings on devices with multiple users:

- Settings that can be changed by any user but affect all users. Examples include language, Wi-Fi®, Airplane mode, NFC, and Bluetooth®.
- Settings that only affect an individual user account. Examples include automatic data syncing, screen lock, various accounts added, and wallpaper.
- Settings that are only visible to the owner but affect all users, such as VPN settings.

# Typing text

## On-Screen Keyboard

You can enter text with the on-screen QWERTY keyboard by tapping each letter individually, or you can use the Gesture input feature and slide your finger from letter to letter to form words. If you prefer to use a smaller version of the on-screen keyboard and input text using only one hand, you can activate the one-handed keyboard instead.

You can select up to three languages for text input. The Smart language detection feature detects the language you are using and predicts the words for that language as you type. Some applications open the on-screen keyboard automatically, such as email and text messaging applications.

- 1 Delete a character before the cursor.
- 2 Enter a carriage return or confirm text input.
- 3 Enter a space.
- 4 Personalize your keyboard. This key disappears after the keyboard is personalized.
- 5 Display numbers and symbols. For even more symbols, tap +=\$.
- 6 Switch between lower-case ⇩, upper-case ⇧, and caps ⇧. For some languages, this key is used to access extra characters in the language.

### To display the on-screen keyboard to enter text

- Tap a text entry field.

### To use the on-screen keyboard in landscape orientation

- When the on-screen keyboard is displayed, turn the device sideways.
- ! You may need to adjust the settings in some applications to enable landscape orientation.

### To enter text character by character

- 1 To enter a character visible on the keyboard, tap the character.
- 2 To enter a character variant, touch and hold a regular keyboard character to get a list of available options, then select from the list. For example, to enter "é," touch and hold "e" until other options appear, then, while keeping your finger pressed on the keyboard, drag to and select "é."

### To enter a period

- After you enter a word, double-tap the space bar.

### To enter text using the Gesture input function

- 1 When the on-screen keyboard is displayed, slide your finger from letter to letter to trace the word that you want to write.
- 2 After you finish entering a word, lift up your finger. A word suggestion appears based on the letters that you have traced.
- 3 If the word that you want does not appear, tap ✕ to see other options and select accordingly. If the desired option does not appear, delete the entire word and trace it again, or enter the word by tapping each letter individually.

### To Change the Gesture Input Settings

- 1 When the on-screen keyboard is displayed, tap [12!?](#).
- 2 Tap , then tap **Keyboard settings**.
- 3 To activate or deactivate the Gesture input function, drag the slider beside **Gesture input** to the on or off position.

### To use the one-handed keyboard

- 1 Open the on-screen keyboard in portrait mode, then tap [12!?](#).
  - 2 Tap , then tap **One-handed keyboard**.
  - 3 To move the one-handed keyboard to the left or right side of the screen, tap  or  accordingly.
-  To return to using the full on-screen keyboard, tap .

## Phonepad

The Phonepad is similar to a standard 12-key telephone keypad. It gives you predictive text and multi-tap input options. You can activate the Phonepad text input method via the keyboard settings. The Phonepad is only available in portrait orientation.

- 1 Choose a text input option. You can tap each character once and use word suggestions, or keep tapping the key until the desired character is selected.
- 2 Delete a character before the cursor.
- 3 Enter a carriage return or confirm text input.
- 4 Enter a space.
- 5 Display symbols and smileys.
- 6 Display numbers.
- 7 Change the character case and turn on the caps lock.

### To open the Phonepad for the first time

- 1 Tap a text entry field, then tap [12!?](#).
- 2 Tap , then tap **Keyboard settings**.
- 3 Tap **Portrait keyboard**, then select the **Phonepad** option.

### To Enter Text using the Phonepad

- When  appears in the Phonepad, tap each character key only once, even if the letter you want is not the first letter on the key. Tap and hold the candidates row to view more word suggestions and select a word from the list.
- When  appears in the Phonepad, tap the on-screen key for the character you want to enter. Keep tapping this button until the desired character is selected. Then do the same for the next character you want to enter, and so on.

### To enter numbers using the Phonepad

- When the Phonepad is displayed, tap [123](#). A Phonepad with numbers appears.

### To insert symbols and smileys using the Phonepad

- 1 When the Phonepad is displayed, tap . A grid with symbols and smileys appears.
- 2 Scroll up or down to view more options. Tap a symbol or smiley to select it.

## Entering text using voice input

When you enter text, you can use the voice input function instead of typing the words. Just speak the words that you want to enter. Voice input is an experimental technology from Google™, and is available for a number of languages and regions.

### To Enable Voice Input

- 1 When the on-screen keyboard is displayed, tap .
- 2 Tap , then tap **Keyboard settings**.
- 3 Drag the slider beside **Google™ voice typing key** to the right.
- 4 Tap  to save your settings. A microphone icon  now appears on your on-screen keyboard.

### To enter text using voice input

- 1 Open the on-screen keyboard.
  - 2 Tap . When  appears, speak to enter text.
  - 3 When you're done, tap  again. The suggested text appears.
  - 4 Edit the text manually if necessary.
-  To make the keyboard appear and enter text manually, tap .

## Editing text

You can select, cut, copy and paste text as you write. You can access the editing options by double-tapping the entered text. The editing options then become available via an application bar.

### Application bar

The following actions are available on the selected text:

- **Cut**
- **Copy**
- **Paste**
- **Share**
- **Select all**

-  The **Paste** option only appears when you have text saved on the clipboard.

### To select text

- 1 Enter some text, then double-tap the text. The word you tap gets highlighted by tabs on both sides.
- 2 Drag the tabs to the left or right to select more text.

### To edit text

- 1 Enter some text, then double-tap the entered text to make the application bar appear.
- 2 Select the text that you want to edit, then use the application bar to make your desired changes.

### To use the magnifier

- When you enter text, tap and hold on the text field to view the text magnified and to place the cursor where you want within the text field.

## Personalizing the On-Screen Keyboard

When entering text using the on-screen keyboard, you can access keyboard and other text input settings that help you, for example to set options for writing languages, text prediction and correction. You can get word suggestions for one language at a time by deactivating the Smart language detection feature.

The keyboard can use text that you have written in messaging and other applications to learn your writing style. There is also a Personalization guide that runs you through the

most basic settings to get you started quickly. You can select to use other keyboards and switch between keyboards. For example, you can select the Xperia™ Chinese keyboard or the Xperia™ Japanese keyboard.

#### To access the on-screen keyboard settings

- 1 When you enter text using the on-screen keyboard, tap .
- 2 Tap , then tap **Keyboard settings** and change the settings as desired.
- 3 To add a writing language for text input, tap **Writing languages** and mark the relevant checkboxes.
- 4 Tap **OK** to confirm.

#### To change the word suggestion settings

- 1 When you enter text using the on-screen keyboard, tap .
- 2 Tap , then tap **Keyboard settings** > **Word suggestions**.
- 3 Select an option.

#### To Change Writing Language Using the On-Screen Keyboard

- ! This feature is only available if you have added more than one input language and the Smart language detection feature is off, or if the languages that you selected include non-Latin languages.
- When you enter text using the on-screen keyboard, tap the writing language icon to switch between the selected writing languages. For example, tap  until the desired writing language appears.

#### To Change the Use My Writing Style Settings

- 1 When you enter text using the on-screen keyboard, tap .
- 2 Tap , then tap **Keyboard settings** > **Use my writing style** and select an option.

#### To Change the Smart Language Detection Settings

- ! Smart language detection is only available for Latin languages.
- 1 When the on-screen keyboard is displayed, tap .
  - 2 Tap , then tap **Keyboard settings**.
  - 3 To activate or deactivate the Smart language detection function, drag the slider beside **Smart language detection** to the on or off position.

#### To Select a Keyboard Layout Variant

- ! Layout variants for the on-screen keyboard may not be available for all writing languages. You can select different keyboard layouts for each writing language.
- 1 When you enter text using the on-screen keyboard, tap .
  - 2 Tap , then tap **Keyboard settings**.
  - 3 Tap **Writing languages**, then tap  beside a writing language.
  - 4 Select a keyboard layout variant.
  - 5 Tap **OK** to confirm.

#### To Select a Keyboard

- 1 When you enter text using the on-screen keyboard, tap  at the bottom-right of the screen.
  - 2 Select an option.
- 💡 To enable more keyboard options, tap **More keyboards**, then drag the relevant sliders to the right.

# Calling

## Making calls

You can make a call by manually dialing a phone number, by tapping a number saved in your contacts list, or by tapping the phone number in your call log view. You can also use the smart dial function to quickly find numbers from your contacts list and call logs by entering part of a contact number or name and selecting from the suggestions that appear. To make a video call, you can use the Hangouts™ instant messaging and video chat application on your device. See *Instant messaging and video chat* on page 81 .

1	View more options
2	Delete number
3	Dialpad
4	Call button

### To Open the Dialpad

- 1 From your Home screen, tap .
- 2 Find and tap .
- 3 If the dialpad does not appear, tap .

### To dial a phone number

- 1 Open the dialpad.
  - 2 Enter the phone number, then select a SIM card.
-  To delete a number entered by mistake, tap .

### To make a call using the smart dial function

- 1 Open the dialpad.
- 2 Enter letters or numbers that correspond to the contact you want to call. As you enter each letter or number, a list of possible matches appears.
- 3 Tap the contact that you want to call.
- 4 Select a SIM card.

### To make an international call

- 1 Open the dialpad.
- 2 Touch and hold 0 until a "+" sign appears.
- 3 Enter the country code, area code (without the initial zeros) and phone number, then select a SIM card.

### To add a direct dial number to your Homescreen

- 1 Touch and hold an empty area on your Home screen until the device vibrates and the customization menu appears.
- 2 In the customization menu, tap **Apps > Shortcuts**.
- 3 Scroll through the list of applications and select **Direct dial**.
- 4 Select the contact and the number that you want to use as the direct dial number.

## Showing or hiding your phone number

You can select to show or hide your phone number on call recipients' devices when you call them.

### To show or hide your phone number

- 1 From the Home screen, tap .
- 2 Find and tap **Settings > Call**.
- 3 Select a SIM card.
- 4 Tap **Additional settings > Caller ID**.

## Receiving calls

If you receive an incoming call when the device is in sleep mode or the screen is locked, the phone application opens in fullscreen format. If you receive an incoming call when the screen is active, the incoming call is displayed as a heads-up notification, that is, in a minimized window that floats at the top of whatever screen is open. When such a notification arrives, you can choose to answer the call and open the phone application screen, or you can reject the call and stay on the current screen.

### To Answer an Incoming Call when the Screen is Inactive

- Drag  to the right.

### To answer an incoming call when the screen is active

- In the heads-up notification that appears at the top of the screen, tap **ANSWER**.
- 💡 Instead of answering the call, you can go to the main phone application screen by tapping the upper part of the heads-up notification window. Using this method, you get more options to manage the call. For example, you can decide to reject the call with a message or forward the call to the answering machine.

### To reject an Incoming Call when the Screen is Inactive

- Drag  to the left.

### To reject an incoming call when the screen is active

- In the heads-up notification that appears at the top of the screen, tap **DECLINE**.
- 💡 Instead of rejecting the call, you can go to the main phone application screen by tapping the upper part of the heads-up notification window. Using this method, you get more options to manage the call. For example, you can decide to reject the call with a message or forward the call to the answering machine.

### To mute the ringtone for an incoming call

- When you receive the call, press the volume key.

## Using the answering machine

You can use the answering machine application in your device to answer calls when you are busy or miss a call. You can enable the automatic answering function and determine how many seconds to wait before the calls get answered automatically. You can also manually route calls to the answering machine when you are too busy to answer them. And you can access messages left on your answering machine directly from your device.

- ! Before using the answering machine, you must record a greeting message.

### To Record a Greeting Message for the Answering Machine

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Call**.
- 3 Select a SIM card.
- 4 Tap **Xperia™ Answering Machine** > **Greetings**.
- 5 Tap **Record new greeting** and follow the on-screen instructions.

### To Enable Automatic Answering

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Call**.
- 3 Select a SIM card, then tap **Xperia™ Answering Machine**.
- 4 Drag the slider beside **Answering Machine** to the right.

- 💡 If you don't set a time delay for the automatic answering of calls, the default value is used.

### To Set a Time Delay for Automatic Answering

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Call**.
- 3 Select a SIM card, then tap **Xperia™ Answering Machine**.
- 4 Tap **Pick up after**.
- 5 Adjust the time by scrolling up and down.
- 6 Tap **Done**.

### To Forward an Incoming Call to the Answering Machine

- When a call comes in, drag **Response options** upward, then select **Reject with Answering Machine**.
- 💡 When a call comes in, you can also just wait until the preset time delay elapses so the answering machine picks up the call automatically.

### To Listen to Messages on the Answering Machine

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Call**.
- 3 Select a SIM card.
- 4 Tap **Xperia™ Answering Machine** > **Messages**.
- 5 Select the voice message you want to listen to.

- 💡 You can also listen to answering machine messages directly from the call log by tapping .

## Rejecting a call with a text message

You can reject a call with a text message. When you reject a call with such a message, the message is automatically sent to the caller and stored in the Messaging conversation with the contact.

You can select from a number of predefined messages available on your device, or you can create a new message. You can also create your own personalized messages by editing the predefined ones.

### To reject a call with a text message

- 1 When an incoming call arrives, drag **Response options** upward, then tap **Reject with message**.
- 2 Select a predefined message or tap  and write a new message.

### To reject a second call with a text message

- 1 When you hear repeated beeps during a call, drag **Reject with message** upward.
- 2 Select a predefined message or tap  and write a new message.

### To edit the text message used to reject a call

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Call** > **General** > **Reject call with message**.
- 3 Tap the message that you want to edit, then make the necessary changes.
- 4 Tap **OK**.

## Smart call handling

You can handle incoming calls without touching the screen by turning on the Smart call handling function. Once activated, you can handle calls in the following way:

- Answer: bring the device to your ear.
- Reject: shake the device.
- Ringer off: place the device face down.

### To Turn On Smart Call Handling

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Call**.
- 3 Select a SIM card.
- 4 Tap **Smart call handling**.
- 5 Under **Smart call handling**, drag the slider to the right.

## Ongoing calls

- 1 SIM card indicator—displays the SIM card in use for the ongoing call
- 2 Enter numbers during a call
- 3 Turn on the loudspeaker during a call
- 4 Put the current call on hold or retrieve a call on hold
- 5 Make a second call
- 6 Mute the microphone during a call
- 7 End a call

### To change the ear speaker volume during a call

- Press the volume key up or down.

### To activate the screen during a call

- Briefly press .

## Using the call log

In the call log, you can view missed calls , received calls  and dialed calls .

### To Open the Call Log

- 1 From your Home screen, tap .
- 2 Find and tap .
- 3 If the call log does not appear, tap .

### To view your missed calls

- 1 When you have missed a call,  appears in the status bar. Drag the status bar downwards.
- 2 Tap **Missed call**.

### To Call a Number from Your Call Log

- Tap the number, then select a SIM card.
-  To edit the number before calling, touch and hold the number in the call log, then tap **Edit number before call**.

### To add a number from the call log to your contacts

- 1 Touch and hold a number displayed in the call log, then tap **Add to Contacts**.
- 2 Select an existing contact to which you want to add the number, or tap **Create new contact**.
- 3 Edit the contact details, then tap **SAVE**.

### To View Call Log Options

- When the call log is open, tap .
-  You can also access general call settings using the instruction above.

## Forwarding Calls

You can direct calls to a different recipient, such as another phone number, another device, or an answering service. You can also forward calls that come in on SIM card 1 to SIM card 2 when SIM card 1 is unreachable, and vice versa. This function is called Dual SIM reachability. You must enable it manually.

### To Forward Calls

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Call**.
- 3 Select a SIM card.
- 4 Tap **Call forwarding** and select an option.
- 5 Enter the number you want to forward calls to, then tap **Turn on**.

### To turn off call forwarding

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Call**.
- 3 Select a SIM card.
- 4 Tap **Call forwarding**.
- 5 Select an option, then tap **Turn off**.

### To Enable the Dual SIM Reachability Function

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Dual SIM settings** > **Dual SIM reachability**.
- 3 Under **Dual SIM reachability**, drag the slider to the right.
- 4 Follow the on-screen instructions to complete the procedure.

-  If the Dual SIM reachability function does not work after you enable it, check that you have entered the phone numbers correctly for each SIM card. In some cases, the numbers are detected automatically during setup. Otherwise, you are prompted to enter them manually.

## Restricting calls

You can block all or certain categories of incoming and outgoing calls. If you have received a PIN2 code from your service provider, you can also use a list of Fixed Dialing Numbers (FDNs) to restrict outgoing calls. If your subscription includes a voicemail service, you can send all incoming calls from a specific contact directly to voicemail. If you want to block a certain number, you can go to Google Play™ and download applications that support this function.

- 💡 FDN is not supported by all network operators. Contact your network operator to verify if your SIM card or network service supports this feature.

### To Block Incoming or Outgoing Calls

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Call**.
- 3 Select a SIM card.
- 4 Tap **Call Barring**, then select an option.
- 5 Enter the password and tap **Turn on**.

- ! When you set up call barring for the first time, you need to enter a password to activate the call barring function. You must use this same password later if you want to edit call barring settings.

### To enable or disable fixed dialing

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Call**.
- 3 Select a SIM card.
- 4 Tap **Fixed dialing numbers**.
- 5 Tap **Activate fixed dialing** or **Deactivate fixed dialing**.
- 6 Enter your PIN2 and tap **OK**.

### To access the list of accepted call recipients

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Call**.
- 3 Select a SIM card.
- 4 Tap **Fixed dialing numbers** > **Fixed dialing numbers**.

### To change the SIM card PIN2

- 1 From the Home screen, tap .
- 2 Find and tap **Settings** > **Call**.
- 3 Select a SIM card.
- 4 Tap **Fixed dialing numbers** > **Change PIN2**.
- 5 Enter the old SIM card PIN2 and tap **OK**.
- 6 Enter the new SIM card PIN2 and tap **OK**.
- 7 Confirm the new PIN2 and tap **OK**.

### To Send Incoming Calls from a Specific Contact Directly to Voicemail

- 1 From your Home screen, tap .
- 2 Find and tap .
- 3 Select the contact which you want to direct all incoming calls automatically to voicemail for.
- 4 Tap  > .
- 5 Mark the checkbox beside **All calls to voicemail**.
- 6 Tap **SAVE**.

## Multiple calls

If you have activated call waiting, you can handle multiple calls at the same time. When it is activated, you will be notified by a beep if you receive another call.

### To activate or deactivate call waiting

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Call**.
- 3 Select a SIM card.
- 4 Tap **Additional settings**.
- 5 To activate or deactivate call waiting, tap **Call waiting**.

### To answer a second call and put the ongoing call on hold

- When you hear repeated beeps during a call, drag  to the right.

### To reject a second call

- When you hear repeated beeps during a call, drag  to the left.

### To make a second call

- 1 During an ongoing call, tap . The call log is displayed.
- 2 Tap  to display the dialpad.
- 3 Enter the number of the recipient and tap . The first call is put on hold.

### To answer a third call and end the ongoing call

- When the third call comes in, tap **End current call and answer**.

### To reject a third call

- When the third call comes in, tap **Decline incoming call**.

### To switch between multiple calls

- To switch to another call and put the current call on hold, tap **Switch to this call**.

## Conference calls

With a conference or multiparty call, you can have a joint conversation with two or more people.

- ! For details about the number of participants that you can add to a conference call, contact your network operator.

### To Make a Conference Call

- 1 During an ongoing call, tap . The call log appears.
- 2 To display the dialpad, tap .
- 3 Dial the number of the second participant and tap . The first participant is put on hold temporarily.
- 4 To add the second participant to the call and start the conference, tap .
- 5 To add more participants to the call, repeat the relevant steps as described above.

### To have a private conversation with a conference call participant

- 1 During an ongoing conference call, tap **Manage conference**.
- 2 Tap the telephone number of the participant that you want to have a private conversation with.
- 3 To end the private conversation and return to the conference call, tap .

### To release a participant from a conference call

- 1 During an ongoing conference call, tap **Manage conference**.
- 2 Tap  next to the participant you want to release.

### To end a conference call

- During the call, tap .

## Voicemail

If your subscription includes a voicemail service, callers can leave voice messages for you when you can't answer calls. Your voicemail service number is normally saved on your SIM card. If not, you can get the number from your service provider and enter it manually.

### To Enter Your Voicemail Number

- 1 From the Home screen, tap .
- 2 Find and tap **Settings** > **Call**.
- 3 Select a SIM card.
- 4 Tap **Voicemail** > **Voicemail settings** > **Voicemail number**.
- 5 Enter your voicemail number.
- 6 Tap **OK**.

### To Call Your Voicemail Service

- 1 Open the dialpad.
  - 2 Touch and hold **1**, then select a SIM card.
-  The first time you call your voicemail number, your service provider's voicemail system normally prompts you to set up your voicemail. For example, you may be asked to record a greeting and set a password.

## Emergency calls

Your device supports international emergency numbers, for example, 112 or 911. You can normally use these numbers to make emergency calls in any country, with or without a SIM card inserted if you are within range of a network.

### To make an emergency call

- 1 Open the dialpad.
  - 2 Enter the emergency number, then select a SIM card.
-  You can make emergency calls even when no SIM card is inserted or when all outgoing calls are blocked.

### To Make an Emergency Call while the SIM Card Is Locked

- 1 Tap **Emergency call**.
- 2 Enter the emergency number and tap .

### To make an emergency call while the screen is locked

- 1 From the lock screen, drag the phone icon  to the right.
- 2 If the active screen lock type is **Swipe**, tap  to display the dialpad, then enter the emergency number and select a SIM card.
- 3 If your screen is locked with a pattern, PIN or password, tap **Emergency call**, then enter the emergency number and tap .

# Contacts

## Transferring contacts

There are several ways to transfer contacts to your new device. You can sync contacts from an online account or import contacts directly from another device.

### Transferring contacts using a computer

Xperia™ Transfer is an application that helps you to collect contacts from your old device and transfer them to your new device. Xperia™ Transfer, which you can access from within the Xperia™ Companion computer program, supports mobile devices that run on iOS/iCloud and Android™. If you are switching from an iOS device, the App Matching feature suggests the Android equivalents of your iOS apps.

To use Xperia™ Transfer, you need:

- An Internet-connected computer.
  - Your new Android™ device.
  - A USB cable for your new Android™ device.
  - Your old device.
  - A USB cable for your old device.
- 💡 You may not need your old device. For iOS devices, you can connect directly to iCloud or use a local backup. For previously owned Sony devices you can use local backups.

#### To transfer contacts to your new device

- 1 Search and download Xperia™ Companion (on a PC or Mac® computer) from <http://support.sonymobile.com/global-en/tools/xperia-companion> if the software is not already installed.
- 2 After successful installation, open the Xperia™ Companion software, then click *Xperia™ Transfer* and follow the relevant instructions to transfer your contacts.

### Transferring contacts using an online account

If you sync the contacts in your old device or your computer with an online account, for example, Google Sync™, Facebook™, or Microsoft® Exchange ActiveSync®, you can transfer your contacts to your new device using that account.

#### To synchronize contacts to your new device using a synchronization account

- 1 From your Home screen, tap , then tap .
  - 2 Tap , then tap **Settings > Accounts & sync**.
  - 3 Select the account that you want to sync your contacts with, then tap  > **Sync now**.
- ! You need to be signed in to the relevant sync account before you can sync your contacts with it.

### Other methods for transferring contacts

There are several other ways to transfer contacts from your old device to your new device. For example, you can copy contacts to a memory card, use Bluetooth® technology, or save contacts to a SIM card. For more specific information about transferring the contacts from your old device, refer to the relevant User guide.

#### To import contacts from a memory card

- 1 From your Home screen, tap , then tap .
- 2 Press , then tap **Import contacts > SD card**.
- 3 Select where to store your contacts.
- 4 Select the files that you want to import and tap **OK**.

### To import contacts using Bluetooth® technology

- 1 Make sure you have the Bluetooth® function turned on and that your device is set to visible.
- 2 When you are notified of an incoming file to your device, drag the status bar downward and tap the notification to accept the file transfer.
- 3 Tap **Accept** to start the file transfer.
- 4 Drag the status bar downward. When the transfer is complete, tap the notification.
- 5 Tap the received file.

### To import contacts from a SIM card

- ! You may lose information or get multiple contact entries if you transfer contacts using a SIM card.
- 1 From your Home screen, tap , then tap .
  - 2 Tap , then tap **Import contacts**.
  - 3 Select a SIM card.
  - 4 To import an individual contact, find and tap the contact. To import all contacts, tap **Import all**.

## Searching and viewing contacts

- 1 Search for contacts
- 2 View more options
- 3 Contacts, Favorites, and Groups tabs
- 4 Edit and view medical and emergency contact information
- 5 View contact details
- 6 Jump to contacts starting with the selected letter
- 7 Add a contact

### To search for a contact

- 1 From your Home screen, tap , then tap .
- 2 Tap  and enter a phone number, name, or other information in the **Search contacts** field. The result list is filtered as you enter each character.

### To select which contacts to display in the Contacts application

- 1 From your Home screen, tap , then tap .
- 2 Press , then tap **Filter**.
- 3 In the list that appears, mark or unmark the desired options. If you have synchronized your contacts with a synchronization account, that account appears in the list. To further expand the list of options, tap the account.

## Adding and editing contacts

### To Add a Contact

- 1 From your Home screen, tap , then tap .
  - 2 Tap .
  - 3 If you have synchronized your contacts with one or more accounts and you are adding a contact for the first time, you must select the account you want to add this contact to. Alternately, tap **No backup** if you only want to use and save this contact on your device.
  - 4 Enter or select the desired information for the contact.
  - 5 When you are done, tap **SAVE**.
- ! After you select a synchronization account in step 3, that account will show as the default account offered the next time you add a contact. When you save a contact to a particular account, that account will show as the default account to save to the next time you add a contact. If you have saved a contact to a particular account and want to change it, you need to create a new contact and select a different account to save them to.
- 💡 If you add a plus sign and the country code before a contact's phone number, you do not have to edit the number again when you make calls from other countries.

### To Edit a Contact

- 1 From your Home screen, tap , then tap .
  - 2 Tap the contact that you want to edit, then tap .
  - 3 Edit the desired information.
  - 4 When you are done, tap **SAVE**.
- ! Some synchronization services do not allow you to edit contact details.

### To Associate a Picture with a Contact

- 1 From your Home screen, tap , then tap .
  - 2 Tap the contact that you want to edit, then tap .
  - 3 Tap , then select a method for adding the contact picture and edit as desired.
  - 4 After you add the picture, tap **SAVE**.
- 💡 You can also add a picture to a contact directly from the **Album** application. If you want to add a picture that is saved to an online account, you must download the picture first.

### To personalize the ringtone for a contact

- 1 From your Home screen, tap , then tap .
- 2 Tap the contact that you want to edit, then tap .
- 3 Tap  > **Set ringtone**.
- 4 Select an option from the list or tap  to select a music file saved to your device, then tap **Done**.
- 5 Tap **SAVE**.

### To Delete Contacts

- 1 From your Home screen, tap , then tap .
- 2 Touch and hold the contact you want to delete.
- 3 To delete all contacts, tap the downward arrow to open the drop-down menu, then select **Mark all**.
- 4 Tap , then tap **Delete**.

### To Edit Contact Information about Yourself

- 1 From your Home screen, tap , then tap .
- 2 Tap **Myself**, then tap .
- 3 Enter the new information or make the changes you want.
- 4 When you are done, tap **SAVE**.

## To Create a New Contact from a Text Message

- 1 From your Home screen, tap , and then find and tap .
- 2 Tap the icon next to the phone number, and then tap **Save**.
- 3 Select an existing contact, or tap **Create new contact**.
- 4 Edit the contact information and tap **SAVE**.

## Adding medical and emergency contact information

You can add and edit ICE (In Case of Emergency) information in the Contacts application. You can enter medical details, such as allergies and medications that you are using, plus information about relatives and friends who can be contacted in case of an emergency. After setup, your ICE information can be accessed from the security lockscreen. This means that even if the screen is locked, for example, by a PIN, pattern, or password, emergency personnel can still retrieve your ICE information.

- 1 Go back to the main Contacts screen
- 2 View more options
- 3 Show your medical and personal information as part of the ICE information
- 4 Medical information
- 5 ICE contact list
- 6 Create new ICE contacts
- 7 Use existing contacts as ICE contacts

## To show your medical and personal information as part of the ICE information

- 1 From your Home screen, tap , then tap .
- 2 Tap **ICE – In Case of Emergency**.
- 3 Tap , then mark the **Show personal information** checkbox.

## To Enter Your Medical Information

- 1 From your Home screen, tap , then tap .
- 2 Tap **ICE – In Case of Emergency**.
- 3 Tap , then tap **Edit medical info**.
- 4 Edit the desired information.
- 5 When you are done, tap **SAVE**.

### To Add a New ICE Contact

- 1 From your Home screen, tap , then tap .
  - 2 Tap **ICE – In Case of Emergency**, then tap .
  - 3 If you have synchronized your contacts with one or more accounts and you are adding a contact for the first time, you must select the account you want to add this contact to. Alternately, tap **No backup** if you only want to use and save this contact on your device.
  - 4 Enter or select the desired information for the contact.
  - 5 When you are done, tap **SAVE**.
- ! The ICE contact must have at least a phone number which emergency personnel can call. If your device is locked by a security screen lock, emergency personnel can only see the phone number of the ICE contact, even if there is other information entered in the Contacts application about the contact.

### To Use Existing Contacts as ICE Contacts

- 1 From your Home screen, tap , then tap .
  - 2 Tap **ICE – In Case of Emergency**, then tap .
  - 3 Mark the contacts you want to use as ICE contacts.
  - 4 When you are done, tap **Done**.
- ! The ICE contacts you select must have a phone number emergency personnel can call, as a minimum. If your device is locked by a security screen lock, emergency personnel can only see the phone number of the ICE contacts, even if there is other information entered in the Contacts application about the contacts.

### To make your ICE information visible from the security lockscreen

- 1 From your Home screen, tap , then tap .
  - 2 Tap **ICE – In Case of Emergency**.
  - 3 Tap , then tap **Settings**.
  - 4 Mark the **ICE in lock screen** checkbox.
- ! Your ICE information is visible from the security lockscreen by default.

### To enable calls to ICE contacts from the security lock screen

- 1 From your Home screen, tap , then tap .
  - 2 Tap **ICE – In Case of Emergency**.
  - 3 Tap , then tap **Settings**.
  - 4 Mark the **Enable call in ICE** checkbox.
- ! Some service providers may not support ICE calls.

## Favorites and groups

You can mark contacts as favorites so that you can get quick access to them from the Contacts application. You can also assign contacts to groups, to get quicker access to a group of contacts from within the Contacts application.

### To mark or unmark a contact as a favorite

- 1 From the Home screen, tap , then tap .
- 2 Tap the contact you want to add to or remove from your favorites.
- 3 Tap .

### To View Your Favorite Contacts

- 1 From your Home screen, tap , then tap .
- 2 Tap **Favorites**.

### To Assign a Contact to a Group

- 1 In the Contacts application, tap the contact that you want to assign to a group.
- 2 Tap , then tap the bar directly under **Groups**.
- 3 Mark the checkboxes for the groups you want to add the contact to.
- 4 Tap **SAVE**.

## Sending contact information

### To Send Your Business Card

- 1 From your Home screen, tap , then tap .
- 2 Tap **Myself**.
- 3 Tap , then tap **Share**.
- 4 Select an available transfer method and follow the on-screen instructions.

### To Send a Contact

- 1 From your Home screen, tap , then tap .
- 2 Tap the contact whose details you want to send.
- 3 Tap , then tap **Share**.
- 4 Select an available transfer method and follow the on-screen instructions.

### To send several contacts at once

- 1 From your Home screen, tap , then tap .
- 2 Press , then tap **Mark several**.
- 3 Mark the contacts you want to send, or select all if you want to send all contacts.
- 4 Tap , then select an available transfer method and follow the on-screen instructions.

## Avoiding duplicate entries in the Contacts application

If you synchronize your contacts with a new account or import contact information in other ways, you could end up with duplicate entries in the Contacts application. If this happens, you can join such duplicates to create a single entry. And if you join entries by mistake, you can separate them again later.

### To link contacts

- 1 From your Home screen, tap , then tap .
- 2 Tap the contact that you want to link with another contact.
- 3 Press , then tap **Link contact**.
- 4 Tap the contact whose information you want to join with the first contact, then tap **OK** to confirm. The information from the first contact is merged with the second contact, and the linked contacts are displayed as one contact in the Contacts list.

### To separate linked contacts

- 1 From your Home screen, tap , then tap .
- 2 Tap the linked contact that you want to edit, then tap .
- 3 Tap **Unlink contact** > **Unlink**.

## Backing up Contacts

You can use a memory card, a SIM card, or a USB storage device to back up contacts. See *Transferring contacts* on page 72 for more information about how to restore contacts to your device.

### To export all contacts to a memory card

- 1 From your Home screen, tap , then tap .
- 2 Press , then tap **Export contacts** > **SD card**.
- 3 Tap **OK**.

### To export contacts to a SIM card

- ! When you export contacts to a SIM card, not all information may get exported. This is due to memory limitations on SIM cards.
- 1 From your Home screen, tap , then tap .
- 2 Press , then tap **Export contacts**.
- 3 Select a SIM card.
- 4 Mark the contacts you want to export, or tap **Mark all** if you want to export all your contacts.
- 5 Tap **Export**.
- 6 Select **Add contacts** if you want to add the contacts to existing contacts on your SIM card, or select **Replace all contacts** if you want to replace the existing contacts on your SIM card.

### To Export All Contacts to a USB Storage Device

- ! When you export contacts using this method, you must first connect your device to a USB storage device, such as a flash drive or an external hard drive, using a USB Host adapter cable. See *Connecting Your Device to USB Peripherals* on page 118 for more information about how to connect your device to a USB storage device.
- 1 From your Home screen, tap , then tap .
- 2 Tap , then tap **Export contacts** > **USB storage**.
- 3 Tap **OK**.

# Messaging and chat

## Reading and sending messages

The Messaging application shows your messages as conversations, which means that all messages to and from a particular person are grouped together. To send multimedia messages, you need the correct MMS settings on your device. See *Internet and MMS settings* on page 40 .

- ! The number of characters that you can send in a single message varies depending on the operator and the language you use. The maximum size of a multimedia message, which includes the size of added media files, is also operator dependent. Contact your network operator for more information.

- 1 Go back to the list of conversations
- 2 Call the message sender
- 3 View more options
- 4 Sent and received messages
- 5 Send a completed message using SIM card 2
- 6 Send a completed message using SIM card 1
- 7 Text entry field
- 8 Add attachments

### To Create and Send a Message

- 1 From your Home screen, tap , then find and tap .
  - 2 Tap .
  - 3 Enter the recipient's name or phone number, or other contact information that you have saved about the recipient, then select from the list that appears. If the recipient is not listed as a contact, enter the recipient's number manually.
  - 4 If you want to send a group message, repeat the procedure described above to add more recipients.
  - 5 Tap **Write message** and enter your message text.
  - 6 If you want to add an attachment, tap  and select an option.
  - 7 To send the message, tap .
- 💡 If you exit a message before sending, it gets saved as a draft. The conversation gets tagged with the word **Draft**.

### To Read a Received Message

- 1 From your Home screen, tap , and then find and tap .
  - 2 Tap the desired conversation.
  - 3 If the message is not yet downloaded, tap the message.
- 💡 All received messages are saved by default to the device memory.

### To Reply to a Message

- 1 From your Home screen, tap , then find and tap .
- 2 Tap the conversation containing the message.
- 3 Enter your reply and tap .

### To Forward a Message

- 1 From your Home screen, tap , then find and tap .
- 2 Tap the conversation containing the message you want to forward.
- 3 Touch and hold the message you want to forward, then tap **Forward message**.
- 4 Enter the recipient's name or phone number, or other contact information that you have saved about the recipient, then select from the list that appears. If the recipient is not listed as a contact, enter the recipient's number manually.
- 5 Edit the message, if necessary, then tap .

### To Save a File Contained in Received Message

- 1 From your Home screen, tap , and then find and tap .
- 2 If the message has not been downloaded yet, tap the message.
- 3 Touch and hold the file that you want to save, then select the desired option.

## Organizing your messages

### To delete a message

- 1 From your Home screen, tap , then find and tap .
- 2 Tap the conversation containing the message you want to delete.
- 3 Touch and hold the message you want to delete, then tap **Delete message** > **Delete**.

### To delete conversations

- 1 From your Home screen, tap , then find and tap .
- 2 Tap , then tap **Delete conversations**.
- 3 Mark the checkboxes for the conversations that you want to delete, then tap  > **Delete**.

### To Star a Message

- 1 From your Home screen, tap , then find and tap .
- 2 Tap the conversation you want to open.
- 3 Touch and hold the message you want to star, then tap **Add star**.
- 4 To unstar a message, touch and hold the starred message, then tap **Delete star**.

### To view starred messages

- 1 From your Home screen, tap , then find and tap .
- 2 Tap , then tap **Starred messages**.
- 3 All starred messages appear in a list.

### To search for messages

- 1 From your Home screen, tap , then find and tap .
- 2 Tap , then tap **Search**.
- 3 Enter your search keywords. The search results appear in a list.

## Calling from a message

### To Call a Message Sender

- 1 From your Home screen, tap , then find and tap .
- 2 Tap a conversation and tap , then select a SIM card.

### To Save a Sender's Number as a Contact

- 1 From your Home screen, tap , and then find and tap .
- 2 Tap the icon next to the phone number, and then tap **Save**.
- 3 Select an existing contact, or tap **Create new contact**.
- 4 Edit the contact information and tap **Save**.

## Messaging settings

### To Change Your Message Notification Settings

- 1 From your Home screen, tap , then find and tap .
- 2 Tap , then tap **Settings**.
- 3 To set a notification sound, tap **Notification sound**, then select an option or tap  and select a music file that is saved to your device.
- 4 To confirm, tap **Done**.
- 5 For other notification settings, drag the relevant sliders to the right or left.

### To Turn the Delivery Report Function On or Off for Outgoing Messages

- 1 From your Home screen, tap , then find and tap .
  - 2 Tap , then tap **Settings**.
  - 3 Drag the slider beside **Delivery report** to the right or left.
- ! After the delivery report function is turned on, a check mark is displayed in messages that have been successfully delivered.

## Instant messaging and video chat

You can use the Google Hangouts™ instant messaging and video chat application on your device to chat with friends who also use the application on computers, Android™ devices and other devices. You can turn any conversation into a video call with several friends, and you can send messages to friends even when they are offline. You can also view and share photos easily.

Hangouts™ requires Internet access and a Google™ account. Go to <http://support.google.com/hangouts> and click the "Hangouts on your Android" link to get more detailed information about how to use this application.

- ! The video call function only works on devices with a front camera.

### To use the Hangouts™ application

- 1 From your Home screen, tap .
- 2 Find and tap **Hangouts**.

# Email

## Setting up email

Use the email application in your device to send and receive email messages through your email accounts. You can have one or several email accounts at the same time, including corporate Microsoft Exchange ActiveSync accounts.

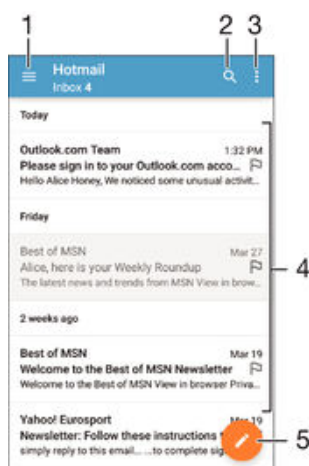

### To set up an email account

- 1 From your Home screen, tap .
  - 2 Find and tap **Email**.
  - 3 Follow the instructions that appear on the screen to complete the setup.
- 💡 For some email services, you may need to contact your email service provider for information on detailed settings for the email account.

### To add an extra email account

- 1 From your Home screen, tap .
- 2 Find and tap **Email**.
- 3 Tap , then tap **Settings** > **Add account**.
- 4 Enter the email address and password, then tap **Next**. If the settings for the email account cannot be downloaded automatically, complete the setup manually.
- 5 When you are finished, tap **Next**.

## Sending and Receiving Email Messages

- 1 View a list of all email accounts and recent folders
- 2 Search for email messages
- 3 Access settings and options
- 4 List of email messages
- 5 Write an email message

### To download new email messages

- When the email inbox is open, swipe downward on the message list.
- ! Before trying to download new email messages, make sure you have a working data connection. For more information about ensuring successful data connections, see *Internet and MMS settings* on page 40 .

### To Read Your Email Messages

- 1 From your Home screen, tap .
- 2 Find and tap **Email**.
- 3 If you are using several email accounts, drag the left edge of the screen to the right and select the account you want to check. If you want to check all your email accounts at once, drag the left edge of the screen to the right, then tap **Combined inbox**.
- 4 In the email inbox, scroll up or down and tap the email message that you want to read.

### To Create and Send an Email Message

- 1 From your Home screen, tap , then find and tap **Email**.
- 2 If you are using several email accounts, drag the left edge of the screen to the right and select which account you want to send the email from.
- 3 Tap , then type the recipient's name or email address and select one or more recipients from the drop-down list.
- 4 Enter the email subject and message text, then tap .

### To reply to an email message

- 1 In your email inbox, find and tap the message that you want to reply to, then tap **Reply** or **Reply all**.
- 2 Enter your reply, then tap .

### To Forward an Email Message

- 1 In your email inbox, find and tap the message that you want to forward, then tap **Forward**.
- 2 Enter the recipient's name or email address, then select one or more recipients from the drop-down list.
- 3 Enter your message text, then tap .

### To view an email message attachment

- 1 Find and tap the email message containing the attachment that you want to view. Email messages with attachments are indicated by .
- 2 After the email message opens, tap **Load**. The attachment starts to download.
- 3 After the attachment finishes downloading, tap **View**.

### To save a sender's email address to your contacts

- 1 Find and tap a message in your email inbox.
- 2 Tap the name of the sender, then tap **OK**.
- 3 Select an existing contact, or tap **Create new contact**.
- 4 Edit the contact information, if desired, then tap **Done**.

## Organizing your email messages

### To Sort Your Email

- 1 From your Home screen, tap .
- 2 Find and tap **Email**.
- 3 If you are using several email accounts, drag the left edge of the screen to the right and select the account with the emails you want to sort. If you want to sort email in all your email accounts at once, drag the left edge of the screen to the right, then tap **Combined inbox**.
- 4 Tap , then tap **Sort**.
- 5 Select a sorting option.

### To Search for Email

- 1 From your Home screen, tap , then find and tap **Email**.
- 2 If you are using several email accounts, drag the left edge of the screen to the right and select the account you want to search. If you want to search all your email accounts at once, drag the left edge of the screen to the right, then tap **Combined inbox**.
- 3 Tap .
- 4 Enter your search text, then tap  on the keyboard.
- 5 The search result appears in a list sorted by date. Tap the email message you want to open.

### To View All Folders for One Email Account

- 1 From your Home screen, tap , then find and tap **Email**.
- 2 Drag the left edge of the screen to the right, then select the account you want to check.
- 3 Under the account you want to check, select **Show all folders**.

### To delete an email message

- In your email inbox, flick the message that you want to delete to the right.

### To move an email message to another folder

- 1 In your email inbox, flick the message that you want to move to the left.
- 2 Tap **Move**, then select a folder.

## Email account settings

### To remove an email account from your device

- 1 From your Home screen, tap .
- 2 Find and tap **Email**.
- 3 Press , then tap **Settings**.
- 4 Select the account you want to remove.
- 5 Tap **Delete account** > **OK**.

### To change the inbox check frequency

- 1 From your Home screen, tap .
- 2 Find and tap **Email**.
- 3 Tap , then tap **Settings**.
- 4 Select the account for which you want to change the inbox check frequency.
- 5 Tap **Check frequency** > **Check frequency** and select an option.

### To set an Out of Office auto-reply in an Exchange Active Sync account

- 1 From your Home screen, tap , then find and tap **Email**.
- 2 Press , then tap **Settings**.
- 3 Select the EAS (Exchange Active Sync) account for which you want to set an Out of Office auto-reply.
- 4 Tap **Out of office**.
- 5 Drag the slider beside **Out of office** to the right to turn on the function.
- 6 If needed, mark the **Set time range** checkbox and set the time range for the auto reply.
- 7 Enter your Out of Office message in the body text field.
- 8 Tap **OK** to confirm.

## Gmail™

If you have a Google™ account, you can use the Gmail™ application to read and write email messages.

1 View a list of all Gmail accounts and folders

2 Search for email messages

3 List of email messages

4 Write an email message

### To Learn More About Gmail™

- When the Gmail application is open, drag the left edge of the screen to the right, and then find and tap **Help**.

# Music

## Transferring music to your device

There are different ways to transfer music from a computer to your device:

- For Windows® only: Connect the device and computer using a USB cable and then drag and drop the music files directly into the file manager application on the computer. See *Managing files using a computer* on page 139 .
  - If the computer is a PC, you can use the Media Go™ application from Sony and organize your music files, create playlists, subscribe to podcasts, and more. To learn more and download the Media Go™ application, go to <http://mediago.sony.com/enu/features>.
  - You can use the Xperia™ Companion software to transfer your media files between the computer and your device. To learn more and download Xperia™ Companion, go to [www.sonymobile.com/global-en/tools/xperia-companion](http://www.sonymobile.com/global-en/tools/xperia-companion).
- ! The Music may not support all music file formats. For more information about supported file formats and the use of multimedia (audio, image and video) files, download the White Paper for your device at [www.sonymobile.com/support](http://www.sonymobile.com/support).

## Listening to music

Use the Music application to listen to your favorite music and audio books.

- 1 Go to the Music home screen
- 2 Search all songs saved to your device
- 3 View the current play queue
- 4 Album art (if available)
- 5 Progress indicator – Drag the indicator or tap along the line to fast forward or rewind
- 6 Elapsed time of current song
- 7 Total time length of current song
- 8 Repeat all songs in the current play queue
- 9 Tap to go to the next song in the play queue  
Touch and hold to fast forward within the current song
- 10 Play or pause a song
- 11 Tap to go to the previous song in the play queue  
Touch and hold to rewind within the current song
- 12 Shuffle songs in the current play queue

## Music home screen

- 1 Drag the left edge of the screen to the right to open the Music home screen menu
- 2 Scroll up or down to view content
- 3 Play a song using the Music application
- 4 Play all songs in shuffle mode
- 5 Return to the music player screen

### To Play a Song Using the Music Application

- 1 From your Home screen, tap , then find and tap .
- 2 Drag the left edge of the screen to the right.
- 3 Select a music category.
- 4 Tap a song to play it.

- ! You might not be able to play copyright-protected items. Verify that you have the necessary rights for the material you intend to share.

### To Find Song-Related Information Online

- While a song is playing in the Music application, tap the Album art, then tap **More about this**.
- 💡 Online resources related to the song can include videos on YouTube™, song lyrics, and artist information on Wikipedia.

### To Edit Music Information

- 1 From the Music application, tap the Album art, then tap **Edit music info**.
- 2 Edit the information as desired.
- 3 When you are done, tap **Save**.

### To adjust the audio volume

- Press the volume key.

### To minimize the Music application

- When a song is playing, tap  to go to the Home screen. The Music application stays playing in the background.

### To open the Music application when it is playing in the background

- 1 While a song is playing in the background, tap the  to open the recently used applications window.
- 2 Tap the Music application.

## Music home screen menu

The Music home screen menu gives you an overview of all the songs on your device. From here you can manage your albums and playlists.

- 1 Return to the Music home screen
- 2 View the current play queue
- 3 Browse all artists
- 4 Browse all albums
- 5 Browse all songs
- 6 Browse your music library and filter by artist, album or song name
- 7 Browse all playlists
- 8 Play a shared music file on another device
- 9 View all subscribed or downloaded files in Podcast
- 10 Open the settings menu for the Music application
- 11 Open the support menu for the Music application

#### To open the Music homescreen menu

- 1 From your Home screen, tap , then find and tap .
- 2 Drag the left edge of the screen to the right.

#### To return to the Music homescreen

- When the Music homescreen menu is open, tap **Home**.
- When the Music homescreen menu is open, tap on the screen to the right of the menu.

#### To update your music with the latest information

- 1 From the Music home screen menu, tap **Settings**.
- 2 Tap **Download music info** > **Start**. Your device searches online and downloads the latest available album art and song information for your music.

#### To delete a song

- 1 From the Music homescreen menu, browse to the song that you want to delete.
- 2 Touch and hold the song title, then tap **Delete** in the list that appears.
- 3 Tap **Delete** again to confirm.

## Playlists

On the Music homescreen, you can create your own playlists from the music that is saved on your device.

#### To Create Your Own Playlists

- 1 From the Music homescreen, touch and hold the name of the album or song that you want to add to a playlist.
- 2 In the menu that opens, tap **Add to playlist** > **Create new playlist**.
- 3 Enter a name for the playlist and tap **OK**.

-  You can also tap the album art and then tap **Add to playlist** to create a new playlist.

### To play your own playlists

- 1 Open the Music homescreen menu, then tap **Playlists**.
- 2 Under **Playlists**, select the playlist that you want to open.
- 3 If you want to play all songs, tap **Shuffle all**.

### To Add Songs to a Playlist

- 1 From the Music homescreen, browse to the song or album that you want to add to a playlist.
- 2 Touch and hold the song or the album title, then tap **Add to playlist**.
- 3 Tap the name of the playlist you want to add the album or song to. The album or song is now added to the playlist.

### To remove a song from a playlist

- 1 In a playlist, touch and hold the title of the song that you want to delete.
  - 2 Tap **Delete from playlist**.
- ! You might not be able to delete a song that is saved on the memory card or on your device's internal storage.

### To delete a playlist

- 1 Open the Music homescreen menu, then tap **Playlists**.
- 2 Touch and hold the playlist that you want to delete.
- 3 Tap **Delete**.
- 4 Tap **Delete** again to confirm.

- ! You cannot delete smart playlists.

## Sharing music

### To share a song

- 1 From the Music homescreen, browse to the song or album that you want to share.
- 2 Touch and hold the song title, then tap **Share**.
- 3 Select an application from the list, then follow the on-screen instructions.

- 💡 You can also share albums and playlists in the same way.

## Enhancing the sound

### To improve the sound quality using the Equalizer

- 1 Open the Music home screen menu, then tap **Settings > Sound enhancements > Sound effects > Equalizer**.
- 2 To adjust the sound manually, drag the frequency band buttons up or down. To adjust the sound automatically, tap  and select a style.

### To turn on the Surround sound feature

- 1 Open the Music home screen menu, then tap **Settings > Sound enhancements > Sound effects > Surround sound (VPT)**.
- 2 Flick left or right to select a setting, then tap **OK** to confirm.

## Recognizing music with TrackID™

Use the TrackID™ music recognition service to identify a song you hear playing in your surroundings. Just record a short sample of the song and you'll get artist, title and album info within seconds. You can purchase songs identified by TrackID™ and you can view TrackID™ charts to see what TrackID™ users around the globe are searching for. For best results, use TrackID™ in a quiet area.

- 1 Create an online TrackID™ profile
- 2 View current music charts
- 3 View TrackID™ options
- 4 View the history of your previous searches
- 5 Identify the music that you are listening to

! The TrackID™ application and the TrackID™ service are not supported in all countries/regions or by all networks and/or service providers in all areas. TrackID™ can be connected to music streaming services if the streaming service is available in your country.

#### To Identify Music Using TrackID™ Technology

- 1 From your Home screen, tap .
  - 2 Find and tap **TrackID™**, then hold your device close to the music source.
  - 3 Tap . If the song is recognized by the TrackID™ service, the results appear on the screen.
-  To return to the **TrackID™** start screen, tap .

#### To View Artist Information for a Song

- 1 After a song is recognized by the **TrackID™** application, the result is displayed on the TrackID™ homescreen.
- 2 Scroll to the result you want to view and then tap to open it.

#### To Delete a Song from the Track History

- 1 Open the **TrackID™** application, then browse to the song that you want to delete.
- 2 Touch and hold the screen to make  appear.
- 3 Tap .

# FM radio

## Listening to the radio

The FM radio in your device works like any FM radio. For example, you can browse and listen to FM radio stations and save them as favorites. You must connect a wired headset or headphones to your device before you can use the radio. This is because the headset or headphones act as an antenna. After one of these devices is connected, you can then switch the audio to the speaker, if desired.

- 1 Favorites list
- 2 Radio on/off button
- 3 View menu options
- 4 Tuned frequency
- 5 Save or remove a channel as a favorite
- 6 Tuning dial
- 7 Frequency band – drag left or right to move between channels
- 8 Move up the frequency band to search for a channel
- 9 A saved favorite channel
- 10 Move down the frequency band to search for a channel

### To listen to the FM radio

- 1 Connect a headset or a set of headphones to your device.
  - 2 From your Home screen, tap .
  - 3 Find and tap **FM radio** . The available channels appear as you scroll through the frequency band.
- ! When you start the FM radio, available channels appear automatically. If a channel has RDS information, it appears a few seconds after you start listening to the channel.

### To move between radio channels

- Drag the frequency band left or right.

### To start a new search for radio channels

- 1 When the radio is open, press .
- 2 Tap **Search for channels**. The radio scans the whole frequency band, and all available channels are displayed.

### To switch the radio sound to the speaker

- 1 When the radio is open, press ⋮.
  - 2 Tap **Play in speaker**.
- 💡 To switch the sound back to the wired headset or headphones, press ⋮ and tap **Play in headphones**.

### To identify a song on the FM radio using TrackID™

- 1 While the song is playing on your device's FM radio, tap ⋮, then select **TrackID™**.
  - 2 A progress indicator appears while the TrackID™ application samples the song. If identification is successful, you are presented with a result or a list of possible results.
  - 3 To return to the FM Radio, tap ⏪.
- ! The TrackID™ application and the TrackID™ service are not supported in all countries/regions, or by all networks and/or service providers in all areas.

## Favorite radio channels

### To save a channel as a favorite

- 1 When the radio is open, navigate to the channel that you want to save as a favorite.
- 2 Tap ☆.
- 3 Enter a name and select a color for the channel, then press **Save**.

### To listen to a favorite radio channel

- 1 Tap ☰.
- 2 Select an option.

### To remove a channel as a favorite

- 1 When the radio is open, navigate to the channel that you want to remove.
- 2 Tap ★, then tap **Delete**.

## Sound settings

### To switch between mono and stereo sound mode

- 1 When the radio is open, press ⋮.
- 2 Tap **Enable stereo sound**.
- 3 To listen to the radio in mono sound mode again, press ⋮ and tap **Force mono sound**.

### To select the radio region

- 1 When the radio is open, press ⋮.
- 2 Tap **Set radio region**.
- 3 Select an option.

### To adjust the Visualizer

- 1 When the radio is open, tap ⋮.
- 2 Tap **Visualizer**.
- 3 Select an option.

# Camera

## Taking photos and recording videos

- 1 Front camera lens
- 2 Select capturing mode
- 3 Switch between the front and main camera
- 4 Zoom in or out
- 5 Camera key – Activate the camera/Take photos/Record videos
- 6 View photos and videos
- 7 Take photos or record videos
- 8 Go back a step or exit the camera
- 9 Capturing mode settings icon
- 10 Flash settings

### To Take a Photo from the Lockscreen

- 1 To activate the screen, briefly press the power key .
- 2 To activate the camera, touch and hold the camera icon , then drag it to the left.
- 3 After the camera opens, tap .

### To take a photo using the camera key

- 1 Activate the camera.
- 2 Press the camera key fully down.

### To take a photo by tapping the on-screen camera button

- 1 Activate the camera.
- 2 Point the camera toward the subject.
- 3 Tap the on-screen camera button . The photo is taken as soon as you release your finger.

### To take a selfie using the front camera

- 1 Activate the camera.
- 2 Tap .
- 3 To take the photo, press the camera key. The photo is taken as soon as you release your finger.

### To use the still camera flash

- 1 When the camera is open, tap .
- 2 Select your desired flash setting.
- 3 Take the photo.

### To use the zoom function

- When the camera is open, press the volume key up or down.
- When the camera is open, pinch in or pinch out on the camera screen.

### To record a video using the camera key

- 1 Activate the camera.
- 2 Swipe the screen to  Video mode.
- 3 To start recording a video, press the camera key.
- 4 To stop recording, press the camera key again.

### To record a video

- 1 Activate the camera.
- 2 Point the camera towards the subject.
- 3 To start recording, tap .
- 4 To pause when recording a video, tap . To resume recording, tap .
- 5 To stop recording, tap .

### To take a photo when recording a video

- To take a photo when recording a video, tap . The photo is taken as soon as you release your finger.

### To view your photos and videos

- 1 Activate the camera, then tap a thumbnail to open a photo or video.
- 2 Flick left or right to view your photos and videos.

### To delete a photo or recorded video

- 1 Browse to the photo or video that you want to delete.
- 2 Tap the screen to make  appear.
- 3 Tap .
- 4 Tap **Delete** to confirm.

## Face detection

You can use face detection to bring an off-center face into focus. The camera automatically detects up to five faces, indicated by white frames. A colored frame shows which face has been selected for focus. Focus is set to the face closest to the camera. You can also tap one of the frames to select which face should be in focus.

### To turn on face detection

- 1 Swipe the screen to select  **Manual** capturing mode.
- 2 Tap .
- 3 Find and tap **Focus mode** > **Face detection**.

### To take a photo using face detection

- 1 When the camera is open and **Face detection** turned on, point the camera at your subject. Up to five faces can be detected, and each detected face is framed.
- 2 Press the camera key halfway down. A colored frame shows which face is in focus.
- 3 To take the photo, press the camera key fully down.

## Using Smile Shutter™ to capture smiling faces

Use Smile Shutter™ technology to photograph a face just as it smiles. The camera detects up to five faces and selects one face for smile detection and auto-focus. When the selected face smiles, the camera automatically takes a photo.

### To turn on Smile Shutter™

- 1 Activate the camera.
- 2 Tap .
- 3 Find and tap **Smile Shutter** and select a smile level.

### To take a photo using Smile Shutter™

- 1 When the camera is open and Smile Shutter™ is turned on, point the camera at your subject. The camera selects which face to focus on.
- 2 The face selected appears inside a colored frame and the photo is taken automatically.
- 3 If no smile is detected, press the camera key to take the photo manually.

## Adding the geographical position to your photos

Turn on geotagging to add the approximate geographical location (a geotag) to photos when you take them. The geographical location is determined either by wireless networks or GPS technology.

When 📶 appears on the camera screen, geotagging is turned on but the geographical position has not been found. When 📍 appears, geotagging is turned on and the geographical location is available, so your photo can get geotagged. When neither of these two symbols appears, geotagging is turned off.

### To turn on geotagging

- 1 From your Home screen, tap .
- 2 Tap **Settings** > **Location**.
- 3 Tap the on-off switch.
- 4 Activate the camera.
- 5 Tap .
- 6 Find **Geotagging**. Drag the slider to the right.

## General camera settings

### Capturing modes

#### Superior auto

Optimize your settings to suit any scene.

#### Manual

Adjust camera settings manually.

#### Style portrait

Take photos with real-time portrait styles.

#### AR mask

Mask your face with features from the face of someone else to take fun selfies.

#### Face in picture

Take photos using the front and rear cameras at the same time.

#### Sound Photo

Take photos with background sound.

#### Multi camera

Record the same scene from multiple angles on a single screen.

#### 4K video

Take videos with 4K ultra-high definition.

#### Timeshift video

Take high frame-rate videos and apply slow-motion effects.

#### AR effect

Take photos or videos with virtual scenes and characters.

#### Creative effect

Apply effects to photos or videos.

#### Sweep Panorama

Take wide-angle and panoramic photos.

To learn more about how to take better photos, go to [support.sonymobile.com](http://support.sonymobile.com).

### To switch between capturing modes

- 1 Press and hold down the camera key.
- 2 Swipe the screen to the desired capturing mode.

## Superior auto

Superior auto mode detects the conditions you are shooting in and automatically adjusts the settings to ensure you take the best photo possible.

## Manual mode

Use Manual mode when you want to manually adjust your camera settings for photos and videos.

## AR effect

You can apply AR (augmented reality) effects to your photos or videos and make them more fun. When using the camera, this setting lets you integrate 3D scenes into your photos or videos. Just select the scene you want and adjust its position in the viewfinder.

## Creative effect

You can apply different effects on your photos or videos. Add a Nostalgic effect to make photos look older, or a Sketch effect for a more fun image.

## Sweep Panorama

You can take wide-angle and panoramic photos from the horizontal or vertical direction in an easy press-and-sweep motion.

### To take a panoramic photo

- 1 Activate the camera.
- 2 Swipe the screen to go to , then select .
- 3 To select a shooting direction, tap .
- 4 Press the camera key and move the camera slowly and steadily in the direction of movement indicated on the screen.

## Timeshift video

You can record video at the high frame rate of 120 frames per second and then apply effects so you can play back parts or all of the video in slow motion.

## Face in Picture

You can use the Face in Picture mode to turn on the front and main cameras at the same time, so you can take a photo of yourself together with the subject.

## Multi-Camera Mode

Multi-camera mode lets you take a photo that combines images from two different angles and devices. You see two images in the camera viewfinder of your device—one from your own camera and one from a connected Xperia™ device or a Sony camera that supports NFC and Wi-Fi Direct™ technology. You can then edit what you see in the viewfinder before taking a photo.

So if you're at a concert venue, for example, and you want to capture a photo that combines a view of the band from one angle and the audience from another, you can use multi-camera mode for the best effect.

You can set up multi-camera mode using NFC, which launches the pairing of the two devices using Wi-Fi Direct™ technology.

### To use Multi camera mode

- 1 Turn on the NFC functions on both devices that you want to connect.
- 2 Activate the camera on your device.
- 3 Swipe the screen to go to , then select .
- 4 On the screens of both devices, tap .
- 5 Touch the NFC detection areas of each device to one other. Both devices should now connect using Wi-Fi Direct™ technology.
- 6 Once the devices are connected, two images appear in the viewfinder of your device – one from the viewfinder of your camera and another from the viewfinder of the connected device.
- 7 To edit the images in your viewfinder, tap .
- 8 Edit the images as desired. For example, you can tap and hold an image and drag it to the other side of the viewfinder to change the order.
- 9 When you are finished editing and are ready to capture the final combined image, tap **Done** > .

## Style Portrait

You can use the Style Portrait feature to apply touch-up effects to portrait photos as you take them to ensure the best results. You can also use the **Magic beam** setting to add a spotlight pattern for eyes.

### To use the Style portrait feature

- 1 Activate the camera.
- 2 Swipe the screen to go to , then select .
- 3 To display all styles, tap the style name that is currently selected, for example, **Bubble**.
- 4 To add more styles, tap **More**.
- 5 Select the style that you want to apply, then tap  to take a photo.

### To use the Magic beam feature

- 1 Activate the camera.
- 2 Swipe screen to go to , then tap  > .
- 3 To apply an inside eye spotlight effect, select a customized pattern.

## AR Mask

Use the AR mask feature to mask a selfie of your face with facial features from another person or from an animal. For example, you can fuse your face with the face of a friend to make amusing hybrid selfies.

### To use the AR mask feature

- 1 Activate the camera.
- 2 Swipe the screen to go to , then select .
- 3 Point the camera towards a face, then select the mask that you want to apply.
- 4 To take a photo, first tap  to hide all masks, then tap .
- 5 To display all mask types again, locate a face in the colored frame that appears in your camera viewfinder, then tap .

## Downloading camera applications

You can download free or paid camera applications from Google Play™ or other sources. Before you start downloading, make sure that you have a working Internet connection, preferably over Wi-Fi® to limit data traffic charges.

### To download camera applications

- 1 Open the camera application.
- 2 Swipe the screen to go to , then tap .
- 3 Select the application that you want to download, and follow the instructions to complete the installation.

## Quick Launch

Use Quick launch settings to launch the camera when the screen is locked.

### **Launch only**

When this setting is activated, you can launch the camera when the screen is locked by pressing and holding down the camera key.

### **Launch and capture**

When this setting is activated, you can launch the camera and capture a photo automatically when the screen is locked by pressing and holding down the camera key.

### **Launch and record video**

When this setting is activated, you can launch the camera and start capturing video when the screen is locked by pressing and holding down the camera key.

**Off**

## Geotagging

Tag photos with details of where you took them.

## Touch capture

Identify a focus area, and then touch the camera screen with your finger. The photo is taken as soon as you release your finger.

## Grid Lines

Choose to turn on or turn off the grid lines in your camera viewfinder.

## Sound

Choose to turn on or turn off the shutter sound.

## Data storage

You can choose to save your data either to a removable SD card or to your device's internal storage.

### **Internal storage**

Photos or videos are saved on the device memory.

### **SD card**

Photos or videos are saved on the SD card.

## Touch Block

You can disable the touchscreen to avoid unintended touches when you are using the camera.

## Color and brightness

You can adjust color and brightness manually when the color and brightness settings icon  is displayed.

## White Balance

This setting, which is only available in **Manual** capturing mode, adjusts the color balance according to the lighting conditions. You can also adjust the exposure manually in the -2.0 EV to +2.0 EV range. For example, you can increase the image brightness or decrease the overall exposure by tapping the plus or minus controls accordingly when the white balance setting icon  is displayed.

### **Auto**

Adjusts the color balance automatically to suit the lighting conditions.

### **Incandescent**

Adjusts the color balance for warm lighting conditions, such as under light bulbs.

**Fluorescent**

Adjusts the color balance for fluorescent lighting.

**Daylight**

Adjusts the color balance for sunny outdoor conditions.

**Cloudy**

Adjusts the color balance for a cloudy sky.

## Still camera settings

### To adjust the still camera settings

- 1 Activate the camera.
- 2 To display all settings, tap .
- 3 Select the setting that you want to adjust, then edit as desired.

## Still camera settings overview

### Resolution

Choose between several resolutions and aspect ratios before taking a photo. A photo with a higher resolution requires more memory.

**23MP**

**5520×4140(4:3)**

23-megapixel resolution with 4:3 aspect ratio. Suitable for photos you want to view on non-widescreen displays or print in high resolution.

**20MP**

**5984×3366(16:9)**

20-megapixel resolution with 16:9 aspect ratio. Suitable for photos you want to view on widescreen displays.

**8MP**

**3264×2448(4:3)**

8-megapixel resolution with 4:3 aspect ratio. Suitable for photos you want to view on non-widescreen displays or print in high resolution.

**8MP**

**3840×2160(16:9)**

8-megapixel resolution with 16:9 aspect ratio. Suitable for photos you want to view on widescreen displays.

**3MP**

**2048×1536(4:3)**

3-megapixel resolution with 4:3 aspect ratio. Suitable for photos you want to view on non-widescreen displays or print in high resolution.

**2MP**

**1920×1080(16:9)**

2-megapixel resolution with 16:9 aspect ratio. Suitable for photos you want to view on widescreen displays.

### Self-Timer

With the self-timer you can take a photo without holding the device. Use this function to take self-portraits, or group photos where everyone can be in the photo. You can also use the self-timer if you want to avoid shaking the camera when taking photos.

**On (10 sec.)**

Set a 10-second delay from when you tap the camera screen until the photo is taken.

**On (2 sec.)**

Set a 2-second delay from when you tap the camera screen until the photo is taken.

**0.5 sec.**

Set a half-second delay from when you tap the camera screen until the photo is taken.

**Off**

The photo is taken as soon as you tap the camera screen.

## Smile Shutter™

Use the Smile Shutter™ function to determine what kind of smile the camera reacts to before taking a photo.

## Focus Mode

The focus function controls which part of a photo should be sharp. When continuous autofocus is on, the camera keeps adjusting focus so that the area within the focus frame stays sharp.

### Single autofocus

The camera automatically focuses on the selected subject. Continuous autofocus is on. Touch and hold the camera screen until the focus frame changes color, indicating that the focus is set. The photo is taken when you release your finger.

### Multi autofocus

The focus is automatically set on several areas of the image. Touch and hold the camera screen until the focus frame changes color, indicating that the focus is set. The photo is taken when you release your finger. Continuous autofocus is off.

### Face detection

The camera automatically detects up to five human faces, indicated by frames on the screen. The camera automatically focuses on the nearest face. You can also select which face to focus on by tapping it on the screen. When you tap the camera screen, a colored frame shows which face is selected and in focus. Face detection cannot be used for all scene types. Continuous autofocus is on.

### Touch focus

Touch a specific area on the camera screen to set the area of focus. Continuous autofocus is off. Touch and hold the camera screen until the focus frame changes color, indicating that the focus is set. The photo is taken when you release your finger.

### Object tracking

When you select an object by touching it in the viewfinder, the camera tracks it for you.

- ! This setting is only available in **Manual** capturing mode.

## HDR

Use the HDR (High Dynamic Range) setting to take a photo against strong backlight or in conditions where the contrast is sharp. HDR compensates for the loss of detail and produces a picture that is representative of both dark and bright areas.

- ! This setting is only available in **Manual** capturing mode.

## ISO

You can reduce image blurring caused by dark conditions or moving subjects by increasing the ISO sensitivity. Also, if you want to take a bright image even in dark conditions, you can set the ISO sensitivity to a higher value.

### Auto

Sets the ISO sensitivity automatically.

### 50

Sets the ISO sensitivity to 50.

### 100

Sets the ISO sensitivity to 100.

### 200

Sets the ISO sensitivity to 200.

### 400

Sets the ISO sensitivity to 400.

### 800

Sets the ISO sensitivity to 800.

### 1600

Sets the ISO sensitivity to 1600.

### 3200

Sets the ISO sensitivity to 3200.

- ! This setting is only available in **Manual** capturing mode.

## Metering

This function automatically determines a well-balanced exposure by measuring the amount of light striking the image you want to capture.

### **Center**

Measures the center of the image, and determines the exposure based on the brightness of the subject there.

### **Spot**

Adjusts the exposure in a very small part of the image that you want to capture.

### **Face**

Measures the amount of light on the face, and adjusts the exposure so that the face is neither too dark or too bright.

### **Multi**

Divides the image into multiple regions, and measures each region to determine a well-balanced exposure.

- ! This setting is only available in **Manual** capturing mode.

## Image stabilizer

When taking a photo, it can be difficult to hold the device steady. The stabilizer helps you by compensating for small movements of the hand.

- ! This setting is only available in **Manual** capturing mode.

## Preview

You can choose to preview photos just after you shoot them.

### **Unlimited**

The preview of the photo or video appears after you shoot it.

### **5 seconds**

The preview of the photo or video appears for 5 seconds after you shoot it.

### **3 seconds**

The preview of the photo or video appears for 3 seconds after you shoot it.

### **Edit**

The photo or video opens for editing after you shoot it.

### **Off**

The photo or video is saved after you shoot it, and no preview appears.

## Face Recognition

You can register faces in the Camera application so that the camera automatically focuses on these faces when they appear in the viewfinder.

## Flash

Use the flash to take photos when lighting conditions are poor or when there is a backlight. The following options are available when you tap the flash icon  on the camera screen:

### **Auto**

The camera automatically determines if the lighting conditions require the use of a flash.

### **Fill flash**

Use this setting when the background is brighter than the subject. This setting removes unwanted dark shadows.

-  **Red-eye reduction**  
Reduces the red color of eyes when taking a photo.
-  **Off**  
The flash is turned off. Sometimes photo quality can be better without the flash, even if lighting conditions are poor. Taking a good photo without using the flash requires a steady hand. Use the self-timer to avoid blurred photos.
-  **Flashlight**  
The flash light is turned on when you take photos.

## Scene selection

Use the Scene selection feature to quickly set up the camera for common situations using pre-programmed scenes. The camera determines a number of settings for you to fit the selected scene, ensuring the best possible photo.

- SCN Off**  
The Scene selection feature is off and you can take photos manually.
-  **Soft skin**  
Take photos of faces using an enhanced beauty effect.
-  **Soft snap**  
Use for shooting photos against a soft background.
-  **Anti motion blur**  
Use for minimizing camera shake when shooting a slightly dark scene.
-  **Landscape**  
Use for landscape photos. The camera focuses on distant objects.
-  **Backlight correction HDR**  
Use to improve details in high contrast shots. The built-in backlight correction analyzes the image and automatically adjusts it to give you a perfectly lit shot.
-  **Night portrait**  
Use for portrait photos taken at night or in poorly lit environments. Due to the long exposure time, the camera must be held still or placed on a stable surface.
-  **Night scene**  
Use when taking photos at night or in poorly lit environments. Due to the long exposure time, the camera must be held still or placed on a stable surface.
-  **Hand-held twilight**  
Use for taking hand-held low-light photos with reduced noise and blur.
-  **High sensitivity**  
Use for taking photos without a flash under low light conditions. Reduces blur.
-  **Gourmet**  
Use for shooting food arrangements in bright color.
-  **Pet**  
Use for taking photos of your pet. Reduces blur and red eyes.
-  **Beach**  
Use for taking photos of seaside or lakeside scenes.
-  **Snow**  
Use in bright environments to avoid overexposed photos.
-  **Party**  
Use for indoor photos in poorly lit environments. This scene picks up indoor background lighting or candlelight. Due to the long exposure time, the camera must be held still or placed on a stable surface.
-  **Sports**  
Use for taking photos of fast-moving objects. Short exposure time minimizes motion blurring.
-  **Document**  
Use for photos of text or drawings. Gives the photo increased, sharper contrast.
-  **Fireworks**  
Use for taking photos of fireworks in all their glory.

! This setting is only available in **Manual** capturing mode.

## Video camera settings

### To adjust the video camera settings

- 1 Activate the camera.
- 2 Swipe to .
- 3 To display settings, tap .
- 4 Select the setting that you want to adjust, then make your changes.

## Video camera settings overview

### Video resolution

Adjust the video resolution for different formats.

#### **Full HD (30 fps)**

**1920×1080(16:9)**

Full HD (Full High Definition) format with 30 fps and 16:9 aspect ratio.

#### **Full HD (60 fps)**

**1920×1080(16:9)**

Full HD (Full High Definition) format with 60 fps and 16:9 aspect ratio.

#### **HD**

**1280×720(16:9)**

HD (High Definition) format with 16:9 aspect ratio.

#### **VGA**

**640×480(4:3)**

VGA format with 4:3 aspect ratio.

#### **MMS**

Record videos suitable for sending in multimedia messages. The recording time of this video format is limited so that video files can fit in a multimedia message.

## Self-Timer

With the self-timer, you can record a video without holding the device. Use it to record group videos where everyone can be in the video. You can also use the self-timer if you want to avoid shaking the camera when recording videos.

#### **On (10 sec.)**

Set a 10-second delay from when you tap the camera screen until the video begins to record.

#### **On (2 sec.)**

Set a 2-second delay from when you tap the camera screen until the video begins to record.

#### **0.5 sec.**

Set a half-second delay from when you tap the camera screen until the video begins to record.

#### **Off**

The video begins to record as soon as you tap the camera screen.

## Smile Shutter™ (video)

Use the Smile Shutter™ function to determine what kind of smile the camera reacts to before recording a video.

## Focus mode

The focus setting controls which part of a video-recorded subject should be sharp. When continuous autofocus is on, the camera keeps adjusting focus so that the area within the white focus frame stays sharp.

#### **Single autofocus**

The camera automatically focuses on the selected subject. Continuous autofocus is on.

#### **Face detection**

The camera automatically detects up to five human faces, indicated by frames on the screen. The camera automatically focuses on the nearest face. You can also select which face to focus on by tapping it on the

screen. When you tap the camera screen, a yellow frame shows which face is selected and in focus. Face detection cannot be used for all scene types. Continuous autofocus is on.

#### **Object tracking**

When you select an object by touching it in the viewfinder, the camera tracks it for you.

## Metering

This function automatically determines a well-balanced exposure by measuring the amount of light striking the image you want to capture.

#### **Center**

Measures the center of the image, and determines the exposure based on the brightness of the subject there.

#### **Spot**

Adjusts the exposure in a very small part of the image that you want to capture.

#### **Face**

Measures the amount of light on the face, and adjusts the exposure so that the face is neither too dark or too bright.

#### **Multi**

Divides the image into multiple regions, and measures each region to determine a well-balanced exposure.

! This setting is only available in **Manual** capturing mode.

## SteadyShot™

When recording a video, it can be difficult to hold the device steady. The stabilizer helps by compensating for the small movements of your hand.

#### **Intelligent active**

Activate to remove the overall and detailed camera shakes.

#### **Standard**

Activate to remove the high-frequency camera shakes.

#### **Off**

The stabilizer is turned off.

## Microphone

Select whether to pick up the surrounding sound when recording videos.

## Preview

You can choose to preview videos just after you shoot them.

#### **On**

The preview of the video appears after you shoot it.

#### **Edit**

The video opens for editing after you shoot it.

#### **Off**

The video is saved after you shoot it, and no preview appears.

## Flashlight

Use the flash light to record videos when lighting conditions are poor or when there is a backlight. The video flash icon  is only available on the video camera screen. Note that the video quality can sometimes be better without a light even if lighting conditions are poor.

**On**

**Off**

## Scene selection

The Scene selection feature helps you to quickly set up the camera for common situations using preprogrammed video scenes. Each scene setting is designed to produce the best quality video possible in a specific recording environment.

### **SCN Off**

The Scene selection feature is off and you can shoot videos manually.

### **Soft snap**

Use for shooting videos against soft backgrounds.

### **Landscape**

Use for videos of landscapes. The camera focuses on distant objects.

### **Night scene**

When turned on, light sensitivity is increased. Use in poorly lit environments. Videos of fast-moving objects may get blurred. Hold your hand steady, or use a support. Turn off night mode when lighting conditions are good, to improve the video quality.

### **Beach**

Use for videos of seaside or lakeside scenes.

### **Snow**

Use in bright environments to avoid overexposed videos.

### **Sports**

Use for videos of fast-moving objects. Short exposure time minimizes motion blurring.

### **Party**

Use for indoor videos in poorly lit environments. This scene picks up indoor background lighting or candlelight. Videos of fast-moving objects may get blurred. Hold your hand steady, or use a support.

# Photos and videos in Album

## Viewing Photos and Videos

Use the Album application to view photos and play videos you've taken with your camera, or to view similar content you've saved to your device. All photos and videos are displayed in a chronologically ordered grid.

- 1 Tap the icon to open the Album homescreen menu
- 2 View a slideshow of all images or just the ones you've added to your favorites
- 3 Drag the left edge of the screen to the right to open the Album homescreen menu
- 4 The date range of items in the current group
- 5 Tap a photo or video to open it in full-screen view
- 6 Scroll up or down to view content

### To view photos and videos

- 1 From your Home screen, tap .
  - 2 Find and tap **Album**.
  - 3 Tap a photo or video that you want to view. If prompted, tap  > **Video** > **JUST ONCE**.
  - 4 Flick left to view the next photo or video. Flick right to view the previous photo or video.
-  If the screen orientation does not change automatically when you turn your device sideways, activate the **Auto-rotate screen** button under **Settings** > **Display** > **Screen rotation**.

### To change the size of the thumbnails

- When viewing thumbnails of photos and videos in Album, spread two fingers apart to zoom in, or pinch two fingers together to zoom out.

### To zoom a photo

- When you are viewing a photo, spread two fingers apart to zoom in, or pinch two fingers together to zoom out.

### To watch a slideshow of your photos

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap  > **Slideshow** to start playing all the photos in an album.
- 2 Tap a photo to end the slideshow.

### To play a video

- 1 In Album, find and tap the video that you want to play.
- 2 Tap , then tap **Video > JUST ONCE**.
- 3 If the playback controls are not displayed, tap the screen to display them. To hide the controls, tap the screen again.

### To pause a video

- 1 When a video is playing, tap the screen to display the controls.
- 2 Tap .

### To fast forward and rewind a video

- 1 When a video is playing, tap the screen to display the controls.
- 2 Drag the progress bar marker left to rewind, or right to fast forward.

### To adjust the volume of a video

- Press the volume key.

## Sharing and Managing Photos and Videos

You can share photos and videos that you've saved on your device. You can also manage them in different ways. For example, you can work with photos in batches, delete photos and link them to contacts. If you have lots of photos saved on your device, it's a good idea to routinely transfer them to a computer or to an external storage device in order to avoid any inadvertent loss of data. Doing so also frees up more space on your device. See *Managing files using a computer* on the 139 page.

- ! You might not be able to copy, send, or transfer copyright-protected items. Also, some items may not send if the file size is too large.

### To share a photo or video

- 1 In Album, find and tap the photo or video that you want to share.
- 2 Tap the screen to display the toolbars, then tap .
- 3 Tap the application that you want to use to share the photo, then follow the steps to send it.

### To use a photo as a contact picture

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap  > **Use as > Contact picture**.
- 2 Select a contact, then edit the photo as desired.
- 3 Tap **Save**.

### To use a photo as wallpaper

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap  > **Use as > Wallpaper**.
- 2 Follow the instructions on the screen.

### To rotate a photo

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap .
- 2 Tap **Rotate**, then select an option. The photo is saved in the new orientation.

### To delete a photo or video

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap .
- 2 Tap **Delete**.

### To Work with Batches of Photos or Videos in Album

- 1 When viewing thumbnails of photos and videos in Album, touch and hold an item until it's highlighted.
- 2 Tap other desired items to select and work with them. If you want to select all items, tap , then tap **Select all**.
- 3 Use the tools in the toolbar to work with your selected items.

## Analyzing photos with faces in Album

You can analyze any photos on your device that feature people's faces. Once activated, the photo analysis feature stays on, and new photos get analyzed as they are added. After running an analysis, you can then group all photos of the same person in one folder.

### To turn on the photo analysis feature

- 1 From your Home screen, tap .
- 2 Find and tap **Album**.
- 3 Drag the left edge of the Album home screen to the right, then tap **Faces**. All photos on your device get analyzed and grouped in the Unnamed faces folder.

### To name a face

- 1 In the **Faces** tile, tap the **Unnamed faces** folder, then browse to the **Other faces** folder and choose the face that you want to name.
- 2 Tap **Add name**.
- 3 Type a name, then tap **Done** > **Add as new person**.

### To edit a face name

- 1 When you are viewing a face in full-screen view, tap the screen to display the toolbars, then tap  > **Edit name tags**.
- 2 Tap **OK**.
- 3 Tap the name of the face that you want to edit.
- 4 Edit the name, then tap **Done** > **Add as new person**.

## Editing photos with the Photo editor application

You can edit and apply effects to original photos that you've taken with your camera. For example, you can change the light effects. After you save the edited photo, the original unchanged version of the photo remains on your device.

### To edit a photo

- When you are viewing a photo, tap the screen to display the toolbars, then tap .

### To crop a photo

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap .
- 2 If prompted, select **Photo editor**.
- 3 Tap  > **Crop**.
- 4 Tap **Crop** to select an option.
- 5 To adjust the crop frame, touch and hold the edge of the crop frame. When the circles at the edges disappear, drag inward or outward to resize the frame.
- 6 To resize all sides of the crop frame at the same time, touch and hold one of the four corners. When the circles at the edges disappear, drag the corner accordingly.
- 7 To move the crop frame to another area of the photo, touch and hold inside the frame, then drag it to the desired position.
- 8 Tap .
- 9 To save a copy of the photo as you cropped it, tap **Save**.

### To Apply Special Effects to a Photo

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap .
- 2 If prompted, select **Photo editor**.
- 3 Tap , then select an option.
- 4 Edit the photo as desired, then tap **Save**.

### To Improve a Photo Using Advanced Settings

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap .
- 2 If prompted, select **Photo editor**.
- 3 Tap , then select an option.
- 4 To save a copy of the edited photo, tap **Save**.

### To Adjust the Light Settings for a Photo

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap .
- 2 If prompted, select **Photo editor**.
- 3 Tap , then select an option and edit as desired.
- 4 To save a copy of the edited photo, tap **Save**.

### To Set the Saturation Level of Colors in a Photo

- 1 When you are viewing a photo, tap the screen to display the toolbars, then tap .
- 2 If prompted, select **Photo editor**.
- 3 Tap , then select an option.
- 4 To save a copy of the edited photo, tap **Save**.

## Editing videos with the Video editor application

You can edit videos that you've taken with your camera. For example, you can trim a video to the desired length or adjust the speed of a video. After you save the edited video, the original unchanged version of the video remains on your device.

### To Trim a Video

- 1 In Album, find and tap the video that you want to play.
- 2 Tap the screen to display the toolbars, then tap  > **Trim**.
- 3 To move the trim frame to another part of the timeline, touch and hold the edge of the trim frame and drag it to the desired position, then tap **Apply**.
- 4 To save a copy of the trimmed video, tap **Save**.

### To Adjust the Speed of a Video

- 1 In Album, find and tap the video that you want to play.
- 2 Tap the screen to display the toolbars, then tap  > **Speed**.
- 3 Select an option, then touch and hold the edge of the timeline and drag it to the desired position and tap **Apply**.
- 4 To save a copy of the edited video, tap **Save**.

## Hiding photos and videos

You can hide any photos and videos from the Album homescreen. Once photos and videos are hidden from the Album homescreen, they can only be viewed from the Hidden folder.

### To hide a photo or video

- 1 In Album, find and tap the photo or video that you want to hide.
- 2 Tap the screen to display the toolbars, then tap .
- 3 Tap **Hide** > **OK**.

### To view your hidden photos and videos

- 1 In Album, drag the left edge of the Album homescreen to the right, then tap **Hidden**.
- 2 Tap a photo or video to view it.
- 3 Flick left to view the next photo or video. Flick right to view the previous photo or video.

## To unhide a photo or video

- 1 In Album, drag the left edge of the Album homescreen to the right, then tap **Hidden**.
- 2 Tap a photo or video that you want to unhide.
- 3 Tap the screen to display the toolbars, then tap .
- 4 Tap **Don't hide**.

## Album home screen menu

Through the Album home screen menu you can browse to all your photo albums, including photos and videos taken by your device's camera using special effects, as well as content that you share online via services such as PlayMemories Online, Picasa™ and Facebook. Once you are logged in to such services, you can manage content and view online images. From the Album application, you can also add geotags to photos, perform basic editing tasks, and use methods such as Bluetooth® wireless technology and email to share content.

- 1 View photos and videos using the PlayMemories Online service
- 2 Return to the Album application home screen to view all content
- 3 View your favorite photos and videos
- 4 View all videos saved to your device
- 5 View your photos on a map or in Globe view
- 6 View photos and videos that you have hidden from view
- 7 View all photos and videos taken by your device's camera using special effects
- 8 View all photos and videos saved to your device in different folders
- 9 View all photos with faces
- 10 View photos and videos on devices in the same network
- 11 Open the settings menu for the Album application
- 12 Scroll up or down to view content
- 13 Open web support

! The PlayMemories Online service is not available in all countries or regions.

## Viewing your photos on a map

Adding location information to photos is referred to as geotagging. You can view and tag your photos on a map and show friends and family where you were when you took a particular photo. See *Adding the geographical position to your photos* on page 95 for more information.

- 💡 If you have turned on location detection and activated geotagging in the camera, you can tag your photos directly for map viewing at a later stage.

- 1 View geotagged photos in Globe view
- 2 Search a location on the map
- 3 View menu options
- 4 Double tap to zoom in. Pinch to zoom out. Drag to view different parts of the map
- 5 A group of photos and/or videos geotagged with the same location
- 6 Thumbnails of the selected group of photos and/or videos. Tap an item to view it in full screen

💡 If several photos were taken at the same location, only one of them appears on the map. The total number of photos appears in the top right corner, for example, . To view all photos in the group, tap the cover photo and then tap one of the thumbnails at the bottom of the screen.

#### To Add a Geotag to a Photo

- 1 When you are viewing a photo, tap the screen to display the toolbars.
- 2 Tap ; then tap **Add geotag** to open the map screen.
- 3 Tap on the map to set the location for the photo.
- 4 To reset the location for the photo, tap the new location on the map.
- 5 When you are done, tap **OK**.

#### To view geotagged photos on a map

- 1 From your Home screen, tap .
- 2 Find and tap **Album**.
- 3 Drag the left edge of the Album home screen to the right, then tap **Places**.
- 4 Tap the photo that you want to view on a map.

#### To view geotagged photos on a globe

- 1 From your Home screen, tap .
- 2 Find and tap **Album**.
- 3 Drag the left edge of the Album homescreen to the right, then tap **Places** > .
- 4 Tap the photo that you want to view on a globe.

#### To change the geotag of a photo

- 1 When viewing a photo on the map in Album, touch and hold the photo until its frame turns blue, then tap the desired location on the map.
- 2 Tap **OK**.

#### To change the map view

- When viewing the map in Album, tap ; then select **Classic view** or **Satellite view**.

# Videos

## Watching videos in the Video application

Use the Video application to play movies and other video content that you've saved or downloaded to your device. The Video application also helps you get poster art, plot summaries, genre info, and director details for each movie. You can also play your movies on other devices that are connected to the same network.

- ! Some video files may not be playable in the Video application.

- 1 Tap the icon to open the Video home screen menu
- 2 Display the most recently played video
- 3 Drag the left edge of the screen to the right to browse all downloaded and saved videos
- 4 View all videos saved to your device
- 5 View online videos
- 6 Tap to play saved or downloaded video files
- 7 View menu options of a video
- 8 Scroll up or down to view content

- ! Sony Entertainment Network with PS Video is not available in every market. Additional terms and conditions apply.

### To play a video in Video

- 1 From your Home screen, tap , then find and tap **Video**.
- 2 Find and tap the video that you want to play. If the video is not displayed on the screen, drag the left edge of the screen to the right to open the Video homescreen menu, then find and tap the video that you want to play.
- 3 To display or hide the controls, tap the screen.
- 4 To pause playing, tap . To resume playing, tap .
- 5 To rewind, drag the progress bar marker to the left. To fast forward, drag the progress bar marker to the right.

### To play a video on an external device

- 1 When the video is playing, tap the screen to display all the controls.
- 2 Tap  > **Throw**.
- 3 Select an external device on which to play the video. If there is no external device available, follow the on-screen instructions to add one.

### To change settings in Video

- 1 From your Home screen, tap , then find and tap **Video**.
- 2 Tap  > **Settings**, then change the settings as desired.

### To change the sound settings while a video is playing

- 1 While a video is playing, tap the screen to display the controls.
- 2 Tap  > **Sound settings**, then change the settings as desired.
- 3 When you're finished, tap **OK**.

### To Share a Video

- 1 When a video is playing, tap , then tap **Share**.
- 2 Tap the application that you want to use to share the selected video, then follow the relevant steps to send it.

## Transferring video content to your device

Before you start using the Movies application, it's a good idea to transfer movies, TV shows and other video content to your device from other devices, such as a computer. There are several ways to transfer your content:

- For Windows® only: Connect your device to a computer using a USB cable and drag and drop the video files directly using the file manager application on the computer. See *Managing files using a computer* on page 139 .
- If you have a PC or an Apple® Mac® computer, use Xperia™ Companion to organize content and transfer video files to your device.

## Managing video content

### To get movie information manually

- 1 Make sure that your device has an active data connection.
- 2 When a video is playing, tap the screen to display the controls.
- 3 Tap  > **Information**.
- 4 Tap  > **Search for info**.
- 5 In the search field, enter keywords for the video, then tap the confirm key on the keyboard. All matches are displayed in a list.
- 6 Select a search result, then tap **Done**. The download of the information begins.

! You can get information about newly added videos automatically every time the Video application opens if you activate the **Get video details** button under Settings.

💡 If the downloaded information is not correct, search again using different keywords.

### To clear information about a video

- 1 When a video is playing, tap the screen to display the controls.
- 2 Tap  > **Information**.
- 3 Tap  > **Clear info**.

### To delete a video

- 1 From your Home screen, tap , then find and tap **Video**.
- 2 Drag the left edge of the screen to the right to open the Video homescreen menu, then browse through the different categories to the video file that you want to delete.
- 3 Touch and hold the video thumbnail, then tap **Delete** from the list that appears.
- 4 Tap **Delete** again to confirm.

## Movie Creator

The Xperia™ Movie Creator automatically creates short videos of around 30 seconds in length using existing photos and videos. The application automatically determines the timeline to create its movie. For example, it could take a selection of photos and videos

from a Saturday afternoon outing or from a random seven-day period and create a movie for you. When this highlight-style movie is ready, you get notified. You can then edit it as desired. For example, you can edit the title, delete scenes, change the music, or add more photos and videos.

#### To open Movie Creator

- 1 From your Home screen, tap .
- 2 Find and tap **Movie Creator**.

! If no photos or videos are saved on your device, no functionality is available when you open the Movie Creator application.

#### To turn off Movie Creator notifications

- 1 From your Home screen, tap .
- 2 Find and tap Movie Creator.
- 3 Tap , then tap Settings and deactivate Notifications.

#### To disable Movie Creator

- 1 From your Home screen, tap .
- 2 Find and tap **Settings > Apps**.
- 3 Find and tap **Movie Creator > DISABLE**.

## PS Video Service

Use the PS Video service to buy and rent movies or TV shows that you can view not only on your Android™ device, but also on a PC, PlayStation® Portable (PSP®), PlayStation® 3, PlayStation® 4, or PlayStation® Vita. Choose from the latest Hollywood releases, action movies, comedies, classics, and a range of other categories.

You need to create a Sony Entertainment Network account if you want to buy or rent movies through the PS Video service. If you already have a PlayStation® network account, then you can use that account instead.

- ! If you are using a device with multiple users, you must log in as the owner, that is, the primary user, to use the PS Video service.
- ! Sony Entertainment Network with PS Video is not available in every market. Additional terms and conditions apply.

#### To Get Started with PS Video

- 1 From your Home screen, tap .
- 2 Find and tap , then follow the on-screen instructions to get started with PS Video.

# Connectivity

## Mirroring the Screen of Your Device on a TV Using a Cable

You can connect your device to a compatible TV set using an MHL cable and mirror the screen of your device on the TV screen.

💡 MHL and HDMI™ cables and adaptors are sold separately.

! Sony does not guarantee that all types of MHL and HDMI™ cables and adaptors are supported by your device.

### To view content from your device on a TV which supports MHL input

- 1 Connect your device to the TV using an MHL cable. **MHL** appears in your device's status bar after a connection is established.
- 2 The TV displays the screen of your device.

! If your device fails to detect the display that is connected to the MHL cable, reconnect the MHL cable and tap **Settings > Device connection > USB Connectivity > Detect USB device**.

### To View Content from Your Device on a TV Which Supports HDMI™ Input

- 1 Connect your device to an MHL adaptor, and connect the adaptor to a powered USB port.
- 2 Connect the adaptor to a TV using a HDMI™ cable. **MHL** appears in your device's status bar after a connection is established.
- 3 The TV displays the screen of your device.

### To View Help About Using a TV Remote Control

- 1 While your device is connected to the TV set, drag the status bar downward to open the Notification panel.
- 2 Tap **MHL connected**. The MHL settings appear on the TV screen.
- 3 Select **Remote control usage**.

! You can select **Video Output Size** to adjust the size of the output on the TV screen. If the TV already has an auto-scaling option enabled, this setting does not appear under the MHL settings.

💡 You can also press the yellow button on the TV remote control to open the Notification panel.

### To Disconnect Your Device from a TV Set

- Disconnect the MHL cable or the MHL adaptor from your device.

## Mirroring the screen of your device wirelessly on a TV

You can use the Screen mirroring feature to show the screen of your device on a TV or other large display without using a cable connection. Wi-Fi Direct™ technology creates a wireless connection between the two devices, so you can sit back and enjoy your favorite photos from the comfort of your couch. You can also use this feature to listen to music from your device via the TV's speakers.

! When using screen mirroring, the image quality may sometimes be negatively impacted if there is interference from other Wi-Fi® networks.

### To mirror the screen of your device on a TV screen

- 1 TV: Follow the instructions in the User guide of your TV to turn on the screen mirroring function.
- 2 Your device: From your Home screen, tap .
- 3 Find and tap **Settings** > **Device connection** > **Screen mirroring**.
- 4 Tap **Start**.
- 5 Tap **OK** and select a device.

! Your TV must support screen mirroring based on Wi-Fi CERTIFIED Miracast™ for the functionality to work. If your TV does not support screen mirroring, you may need to purchase a wireless display adapter separately. Also, when using screen mirroring, do not cover the Wi-Fi antenna area of your device.

### To stop screen mirroring between devices

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Device connection** > **Screen mirroring**.
- 3 Tap **Disconnect**, then tap **OK**.

## Sharing Content with DLNA Certified™ Devices

You can view or play media content saved to your device on other devices such as a TV or a computer. These devices must be on the same wireless network and can be Sony TVs or speakers, or products that are DLNA Certified™ by the Digital Living Network Alliance. You can also view or play content from other DLNA Certified™ devices on your device.

After you set up media sharing between devices, you can listen to music files stored on your home computer from your device or view photos taken with your device's camera on a large-screen TV, for example.

### Playing files from DLNA Certified™ devices on your device

When you play files from another DLNA Certified™ device on your device, this other device acts as a server. In other words, it shares content over a network. The server device must have its content sharing function enabled and give access permission to your device. It also must be connected to the same Wi-Fi® network as your device.

#### To play a shared music track on your device

- 1 Make sure the devices that you want to share files with are connected to the same Wi-Fi® network as your device.
- 2 From your Home screen, tap , then find and tap .
- 3 Drag the left edge of the Music home screen to the right, then tap **Home network**.
- 4 Select a device from the list of connected devices.
- 5 Browse the folders of the connected device and select the track that you want to play. Once selected, the track starts playing automatically.

#### To Play a Shared Video on Your Device

- 1 Make sure the devices that you want to share files with are connected to the same Wi-Fi® network as your device.
- 2 From your Home screen, tap , and then find and tap **Video**.
- 3 Drag the left edge of the Video homescreen to the right, then tap **Home network**.
- 4 Select a device from the list of connected devices.
- 5 Browse the folders of the connected device and select the video that you want to play.

#### To view a shared photo on your device

- 1 Make sure the devices that you want to share files with are connected to the same Wi-Fi® network as your device.
- 2 From your Home screen, tap , then find and tap **Album**.
- 3 Drag the left edge of the Album home screen to the right, and tap **Home network**.
- 4 Select a device from the list of connected devices.
- 5 Browse the folders of the connected device and select a photo to view it.

## Playing files from your device on DLNA Certified™ devices

Before you can view or play media files from your device on other DLNA Certified™ devices, you must set up file sharing on your device. The devices that you share content with are called client devices. For example, a TV, computer or tablet can act as client devices. Your device works as a media server when it makes content available to client devices. When you set up file sharing on your device, you must also give access permission to client devices. After you do so, such devices appear as registered devices. Devices that are waiting for access permission are listed as pending devices.

### To set up file sharing with other DLNA Certified™ devices

- 1 Connect your device to a Wi-Fi® network.
- 2 From your Home screen, tap , then find and tap **Settings** > **Device connection** > **Media server**.
- 3 Drag the slider beside **Share media** to the right.
- 4 Use your computer or other DLNA™ client devices on the same Wi-Fi® network to connect to your device.
- 5 A notification appears in the status bar of your device. Open the notification and set access permissions for each client device attempting to connect to your device.

! The steps for accessing media on your device using a DLNA™ client differ between client devices. Refer to your client device User guide for more information. If your device is inaccessible to a client on the network, check if your Wi-Fi® network is working.

💡 You can also access the **Media server** menu from certain applications like Music, Album or Video by dragging the left edge of the application's home screen to the right and then tapping **Settings** > **Media server**.

### To stop sharing files with other DLNA Certified™ devices

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Device connection** > **Media server**.
- 3 Drag the slider beside **Share media** to the left.

### To set access permissions for a pending device

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Device connection** > **Media server**.
- 3 Select a device from the **Pending devices** list.
- 4 Select an access permission level.

### To change the name of a registered device

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Device connection** > **Media server**.
- 3 Select a device from the **Registered devices** list, then select **Change name**.
- 4 Enter a new name for the device.

### To change the access level of a registered device

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Device connection** > **Media server**.
- 3 Select a device from the **Registered devices** list.
- 4 Tap **Change access level** and select an option.

### To get help with sharing content with other DLNA Certified™ devices

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Device connection** > **Media server**.
- 3 Tap  and then tap **Help**.

## Displaying Files on Another Device using Throw

Using DLNA™ technology, you can push or “Throw” media content from your device to another device connected to the same Wi-Fi® network. The receiving device must be able to function as a Digital Media Renderer (DMR) device and play content received

from your device. A TV that supports DLNA™ or a PC running Windows® 7 or later are examples of DMR devices.

- ! The steps for playing shared media may vary depending on the client device. Refer to the user guide of the DMR device for more information.
- ! Content secured with Digital Rights Management (DRM) cannot be played on a Digital Media Renderer device using DLNA™ technology.

#### To Display Photos or Videos on a Client Device using Throw

- 1 Make sure that you have correctly set up the DMR or DLNA™ client device and that it is connected to the same Wi-Fi® network as your device.
  - 2 From your Home screen, tap .
  - 3 Find and tap **Album**.
  - 4 Browse and open the photos or videos you want to view.
  - 5 Tap the screen to display the toolbar, then tap  and select the device you want to share your content with.
  - 6 To stop sharing the photo or video to a client device, tap  and select **Disconnect**.
-  You can also share a video from the Video application on your device by tapping the video and then tapping .

#### To play a music track on a client device using Throw

- 1 Make sure that you have correctly set up the DMR or DLNA™ client device and that it is connected to the same Wi-Fi® network as your device.
- 2 From your Home screen, tap , then find and tap .
- 3 Select a music category and browse to the track that you want to share, then tap the track.
- 4 Tap  and select a client device to share your content with. The track starts playing on the device that you select.
- 5 To disconnect from the client device, tap .

## Connecting Your Device to USB Peripherals

You can use a USB host adapter to connect your device to USB accessories such as USB mass storage devices and USB mice. If the USB device has a micro USB connector, a USB host adapter is not necessary.

- ! This device has a capless USB port. If your device gets exposed to water, ensure the USB port is completely dry before inserting a USB cable.
- ! USB host adapters are sold separately. Sony does not guarantee that all USB accessories are supported by your device.

#### To connect a USB accessory using a USB host adapter

- 1 Attach the USB Host adapter to your device, then connect the adapter to the USB accessory.
  - 2 From your Home screen, tap .
  - 3 Find and tap **Settings** > **Device connection** > **USB Connectivity** > **Detect USB device**.
-  Additional steps or software may be required to set up game controllers, USB audio and USB Ethernet accessories. Sony does not guarantee that all USB accessories are supported by your device.

### To access content on a USB mass storage device using a USB Host adapter

- 1 Attach the USB Host adapter to your device, then connect the adapter to the USB mass storage device.
- 2 From your Home screen, tap .
- 3 Find and tap **Settings** > **Device connection** > **USB Connectivity** > **Detect USB device**.
- 4 To access files and folders on the USB storage device, use a file manager app such as File Commander.

 You can also open the relevant media application on your device to view content directly. For example, you can open the Album application to view photos stored on USB mass storage devices.

### To disconnect a USB mass storage device

- 1 To open the Notification Panel, drag the status bar downward, then tap **USB storage connected**.
- 2 Tap **OK**.
- 3 Detach the USB Host adapter from your device.

### To connect a USB accessory using a micro USB connector

- 1 Attach the micro USB connector of the USB accessory to your device.
- 2 From your Home screen, tap .
- 3 Find and tap **Settings** > **Device connection** > **USB Connectivity** > **Detect USB device**.

 Sony does not guarantee that all USB accessories with a micro USB connector are supported by your device.

## Connecting Your Device to a DUALSHOCK™ Series Wireless Controller

You can play games stored on your device using a DUALSHOCK™ series wireless controller. You can also mirror your device on a TV or other display. For more information about Screen Mirroring, refer to the relevant section of the User guide.

### To connect a DUALSHOCK™4 wireless controller to your device

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Device connection** > **DUALSHOCK™ series**.
- 3 Tap **Pair controller**, then follow the on-screen instructions to complete the connection.

## NFC

Use Near Field Communications (NFC) to share data with other devices, such as a video, photo, web page address, music file or contact. You can also use NFC to scan tags that give you more information about a product or service as well as tags that activate certain functions on your device.

NFC is a wireless technology with a maximum range of one centimeter, so the devices sharing data must be held close to each other. Before you can use NFC, you must first turn on the NFC function, and the screen of your device must be active.

 NFC may not be available in all countries and/or regions. Some apps on compatible devices can use NFC when the device has no power. Note that not all devices support this feature.

### To Turn on the NFC Function

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **More**.
- 3 Tap the on-off switch beside **NFC**.

### To share a contact with another device using NFC

- 1 Make sure that both devices have the NFC function turned on, and that both screens are active.
- 2 To view contacts, go to your Home screen, tap , then tap .
- 3 Tap the contact that you want to share.
- 4 Hold your device and the receiving device back to back so that the NFC detection areas of each device touch each other. When the devices connect, a thumbnail of the contact appears.
- 5 Tap the thumbnail to start the transfer.
- 6 When the transfer is done, the contact information is displayed on the screen of the receiving device and is also saved on the receiving device.

### To Share a Music File with Another Device Using NFC

- 1 Make sure both your device and the receiving device have the NFC function turned on, and that both screens are active.
- 2 To open the Music application, tap , then find and tap .
- 3 Select a music category and browse to the track you want to share.
- 4 Tap the track to play it. You can then tap  to pause the track. The transfer works whether the track is playing or paused.
- 5 Hold your device and the receiving device back to back so that the NFC detection areas of each device touch each other. When the devices connect, a thumbnail of the track appears.
- 6 Tap the thumbnail to start the transfer.
- 7 When the transfer is done, the music file plays immediately on the receiving device. At the same time, the file is saved on the receiving device.

### To share a photo or video with another device using NFC

- 1 Make sure that both devices have the NFC function turned on, and that both screens are active.
- 2 To view photos and videos in your device, go to your Home screen, tap , then find and tap **Album**.
- 3 Tap the photo or video that you want to share.
- 4 Hold your device and the receiving device back to back so that the NFC detection areas of each device touch each other. When the devices connect, a thumbnail of the track appears.
- 5 Tap the thumbnail to start the transfer.
- 6 When the transfer is done, the photo or video is displayed on the screen of the receiving device. At the same time, the item is saved on the receiving device.

### To Share a Web Address with Another Device Using NFC

- 1 Be sure both devices have the NFC function turned on, and both screens are active.
- 2 From your Home screen, tap .
- 3 To open the web browser, find and tap .
- 4 Load the webpage you want to share.
- 5 Hold your device and the receiving device back to back so that the NFC detection areas of each device touch each other. When the devices connect, a thumbnail appears.
- 6 Tap the thumbnail to start the transfer.
- 7 When the transfer is done, the webpage is displayed on the screen of the receiving device.

## Scanning NFC tags

Your device can scan various kinds of NFC tags. For example, it can scan embedded tags on a poster, on a billboard advertisement, or beside a product in a retail store. You can receive additional information, such as a web address.

### To scan an NFC tag

- 1 Make sure your device has the NFC function turned on and that the screen is active.
- 2 Place your device over the tag so that the NFC detection area touches it. Your device scans the tag and displays the content collected. Tap the content of the tag to open it.

### Connecting to an NFC compatible device

You can connect your device to other NFC compatible devices produced by Sony, such as a speaker or a headphone. When establishing this kind of connection, refer to the User guide of the compatible device for more information.

- ! You may need to have Wi-Fi® or Bluetooth® activated on both devices for the connection to work.

## Bluetooth® Wireless Technology

Use the Bluetooth® function to send files to other Bluetooth®-compatible devices, or to connect to handsfree accessories. Bluetooth® connections work better within 10 meters (33 feet), with no solid objects in between. In some cases you have to manually pair your device with other Bluetooth® devices.

- ! Interoperability and compatibility among Bluetooth® devices can vary.
- ! If you are using a device with multiple users, each user can change the Bluetooth® settings, and the changes affect all users.

### To Turn on the Bluetooth® Function

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Bluetooth**.
- 3 Tap the on-off switch beside **Bluetooth** so the Bluetooth® function is turned on. Your device is now visible to nearby devices and a list of available Bluetooth® devices appears.

### Naming your device

You can give your device a name. This name is shown to other devices after you have turned on the Bluetooth® function and your device is set to visible.

### To Give Your Device a Name

- 1 Be sure the Bluetooth® function is turned on.
- 2 From your Home screen, tap .
- 3 Find and tap **Settings** > **Bluetooth**.
- 4 Tap  > **Rename this device**.
- 5 Enter a name for your device.
- 6 Tap **Rename**.

### Pairing with another Bluetooth® device

When you pair your device with another device, you can, for example, connect your device to a Bluetooth® headset or a Bluetooth® car kit and use these other devices to share music.

Once you pair your device with another Bluetooth® device, your device remembers this pairing. When pairing your device with a Bluetooth® device, you may need to enter a passcode. Your device will automatically try the generic passcode 0000. If this does not work, refer to the user guide for your Bluetooth® device to get the device passcode. You

do not need to re-enter the passcode the next time you connect to a previously paired Bluetooth® device.

- ! Some Bluetooth® devices, for example, most Bluetooth® headsets, require you to both pair and connect with the other device.
- ! You can pair your device with several Bluetooth® devices, but you can only connect to one Bluetooth® profile at the same time.

### To pair your device with another Bluetooth® device

- 1 Make sure the device you want to pair with has the Bluetooth® function activated and is visible to other Bluetooth® devices.
- 2 From your device's Home screen, tap .
- 3 Find and tap **Settings** > **Bluetooth**.
- 4 Drag the slider beside **Bluetooth** to turn on the Bluetooth® function. A list of available Bluetooth® devices appears.
- 5 Tap the Bluetooth® device you want to pair with.
- 6 Enter a passcode, if required, or confirm the same passcode on both devices.

### To connect your device to another Bluetooth® device

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Bluetooth**.
- 3 Tap the Bluetooth® device you want to connect to.

### To Unpair a Bluetooth® Device

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Bluetooth**.
- 3 Under **Paired devices**, tap  beside the name of the device you want to unpair.
- 4 Tap **Forget**.

## Sending and receiving items using Bluetooth® technology

Use Bluetooth® technology to share items with other Bluetooth® compatible devices such as phones or computers. You can send and receive the following kinds of items:

- Photos and videos
- Music and other audio files
- Web pages

### To send items using Bluetooth®

- 1 **Receiving device:** Make sure the Bluetooth® function is turned on and that the device is visible to other Bluetooth® devices.
- 2 **Sending device:** Open the application which contains the item that you want to send, and scroll to the item.
- 3 Depending on the application and on the item that you want to send, you may need to, for example, touch and hold the item, open the item, and press . Other ways to send an item may exist.
- 4 Select **Bluetooth**.
- 5 Turn on Bluetooth® if you are asked to do so.
- 6 Tap the name of the receiving device.
- 7 **Receiving device:** If asked, accept the connection.
- 8 **Sending device:** If asked, confirm the transfer to the receiving device.
- 9 **Receiving device:** Accept the incoming item.

### To receive items using Bluetooth®

- 1 Make sure that the Bluetooth® function is on and is visible to other Bluetooth® devices.
- 2 The sending device now starts sending data to your device.
- 3 If prompted, enter the same passcode on both devices, or confirm the suggested passcode.
- 4 When you are notified of an incoming file to your device, drag the status bar downward and tap the notification to accept the file transfer.
- 5 Tap **Accept** to start the file transfer.
- 6 To view the progress of the transfer, drag the status bar downward.
- 7 To open a received item, drag the status bar downward and tap the relevant notification.

### To view files you have received using Bluetooth®

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Bluetooth**.
- 3 Press  and select **Show received files**.

# Smart apps and features that save you time

## Controlling Accessories and Settings with Smart Connect™

Use the Smart Connect™ application to set what happens in your device when you connect or disconnect an accessory. For example, you can decide to always start the FM radio application when you connect a headset.

You can also set Smart Connect™ to read out incoming text messages. Or you can use the application to set a specific action or a group of actions to launch on your device at certain times of the day. For example, when you connect your headset between 7 am and 9 am, you can decide that:

- the FM radio application starts;
- your favorite social networking app opens, for example, Facebook;
- the ring volume is set to vibrate.

With Smart Connect™, you can also manage accessories such as Xperia™ SmartTags or a watch from the Sony SmartWatch series. Refer to the User guide of the specific accessory for more information.

- ! If you are using a device with multiple users, you must log in as the owner, that is, the primary user, to use the Smart Connect™ application.

1 Tap to display available accessories

2 Add an accessory or an event

3 View menu options

4 Tap to display all events

5 Tap to activate an event

6 Tap to view details of an event

### To Create a Smart Connect™ Event

- 1 From your Home screen, tap , then find and tap **Other** > .
  - 2 If you are opening Smart Connect™ for the first time, tap **OK** to close the introduction screen.
  - 3 On the **Events** tab, tap **+**.
  - 4 If you are creating an event for the first time, tap **OK** again to close the introduction screen.
  - 5 Add conditions you want to trigger the event under. A condition could be the connection with an accessory, or a specific time interval, or both.
  - 6 Tap **→** to continue.
  - 7 Add what you want to happen when you connect an accessory, and set other settings as desired.
  - 8 Tap **→** to continue.
  - 9 Set an event name, then tap **Finish**.
-  To add a Bluetooth® accessory, you have to first pair it with your device.

### To Edit a Smart Connect™ Event

- 1 Start the Smart Connect™ application.
- 2 On the **Events** tab, tap an event.
- 3 If the event is switched off, drag the slider to the right to turn it on.
- 4 Tap **Edit event**, then adjust the settings as desired.

### To Delete an Event

- 1 Start the Smart Connect™ application.
  - 2 On the **Events** tab, touch and hold the event you want to delete, then tap **Delete event**.
  - 3 Tap **Delete** to confirm.
-  You can also open the event you want to delete, then tap  > **Delete event** > **Delete**.

### To Set Smart Connect™ to Read out Incoming Text Messages

- 1 Start the Smart Connect™ application.
  - 2 Tap , then tap **Settings**.
  - 3 Mark the checkbox beside **Text to speech**, then confirm activation, if necessary.
-  If this feature is turned on, all incoming messages are read aloud. To protect your privacy, you may need to turn off this feature if you are using your device in a public place or at work, for example.

## Managing Accessories

Use the Smart Connect™ application to manage a range of smart accessories you can connect to your device, including Xperia™ SmartTags, a SmartWatch series watch, or a wireless headset from Sony. Smart Connect™ downloads any necessary applications and also finds third-party applications, when available. Previously connected accessories are shown in a list that allows you to get more information about the features of each accessory.

### To Pair and Connect an Accessory

- 1 Start the Smart Connect™ application. If you are opening Smart Connect™ for the first time, tap **OK** to close the introduction screen.
- 2 Tap **Accessories**, then tap **+**.
- 3 Turn on the Bluetooth® function if it is not already on, then tap the name of the accessory that you want to pair and connect with.
- 4 If required, enter a passcode, or confirm the same passcode on both your device and the accessory.

### To Adjust the Settings for a Connected Accessory

- 1 Pair and connect the accessory with your device.
- 2 Start the Smart Connect™ application.
- 3 Tap **Accessories**, then tap the name of the connected accessory.
- 4 Adjust the desired settings.

## Using your device as a fitness hub with ANT+™

You can use your device with health and fitness products that also support ANT+™ technology. For example, if you go running with an ANT+™ compatible heart rate monitor and a foot pod (to measure pace and distance), you can collect all the data from the run on your device. You can then analyze your performance and see how you can improve.

You can download a range of applications from Google Play™ that support ANT+™ sport, fitness, and health devices. For information about ANT+™ compatible products, go to [www.thisisant.com/directory](http://www.thisisant.com/directory).

## Using your device as a wallet

Use your device as a wallet to pay for goods without reaching for your real wallet. All of your installed payment services are put together to be viewed and managed. Note that when making a payment, you must first turn on the NFC function before your device touches a card reader. For more information about NFC, see *NFC* on page 119 .

- ! NFC-initiated payments are only supported when an NFC-enabled SIM card is inserted in SIM card slot 1 (the lower SIM card slot). Also, mobile payment services may not yet be available in your region.

### To manage payment services

- 1 From your Home screen, tap .
- 2 Find and tap **Settings > Tap & pay**. A list of payment services appears.
- 3 Manage the payment services as desired, for example, change your default payment service.

# Travel and maps

## Using Location Services

Location services allow applications such as Maps and the camera to use information from mobile and Wi-Fi® networks as well as Global Positioning System (GPS) information to determine your approximate location. If you're not within a clear line of sight of GPS satellites, your device can determine your location using the Wi-Fi® function. And if you're not within range of a Wi-Fi® network, your device can determine your location using your mobile network.

In order to use your device to find out where you are, you need to enable location services.

- ! You may incur data connection charges when you connect to the Internet from your device.

### To Enable or Disable Location Services

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Location**, then tap the on-off switch accordingly to enable or disable location services.
- 3 If you selected to enable location services in step 2, tap **Agree** to confirm.

## Improving GPS accuracy

The first time you use the GPS function in your device, it can take 5 to 10 minutes for your location to be found. To help the search, make sure you have a clear view of the sky. Stand still and don't cover the GPS antenna (the highlighted area in the image). GPS signals can pass through clouds and plastic, but not through most solid objects such as buildings and mountains. If your location isn't found after a few minutes, move to another location.

## Google Maps™ and navigation

Use Google Maps™ to track your current location, view real-time traffic situations, and receive detailed directions to your destination.

The Google Maps™ application requires an Internet connection when used online. You may incur data connection charges when you connect to the Internet from your device. To get more detailed information about how to use this application, go to <http://support.google.com> and click the "Maps for mobile" link.

- ! The Google Maps™ application may not be available in every market, country, or region.

### To Use Google Maps™

- 1 From your Home screen, tap .
- 2 Find and tap **Google** > **Maps**.

## Using data traffic when traveling

When you travel outside of your home mobile network, you may need to access the Internet using mobile data traffic. If so, you need to activate data roaming on your device.

You may incur additional charges when you activate data roaming. It is recommended to check the relevant data transmission charges in advance.

- ! If you are using a device with multiple users, you may need to log in as the owner, that is, the primary user, to activate or deactivate data roaming.

#### To activate data roaming

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **More** > **Mobile networks**.
- 3 Select a SIM card.
- 4 Drag the slider beside **Data roaming** to the right.

- ! You can't activate data roaming while mobile data traffic is turned off.

## Using your device with a car infotainment system

Connect your device to a MirrorLink™ certified car infotainment system using a USB cable to, for example, use a navigation app or play music from your device while driving. When connected, you can navigate the apps using the car infotainment system controls.

- ! Some applications may not be available during MirrorLink™ connection. Also, protected data, such as videos that are strictly protected under Digital Rights Management (DRM), is not made available via MirrorLink™.

#### To connect your device to a car infotainment system

- Connect your device and the car infotainment system using a USB cable. The screen of your device appears on the screen of the infotainment system.
- ! You may need to start MirrorLink™ manually if the connection between your device and the infotainment system is not established automatically.

#### To start MirrorLink™ manually

- 1 Make sure that your device is connected to the car infotainment system using a USB cable.
- 2 From your Home screen, tap .
- 3 Find and tap **Settings** > **Xperia™ Connectivity** > **MirrorLink™**.
- 4 Tap **Start MirrorLink™**, then tap **OK**.
- 5 If the connection still fails, tap **Network address** to change to another network address in case the same network address is being used by other services such as Bluetooth® and Wi-Fi®, and then try again.

## Airplane mode

In Airplane mode, the network and radio transceivers are turned off to prevent disturbance to sensitive equipment. However, you can still play games, listen to music, watch videos and other content, as long as all this content is saved on your memory card or internal storage. You can also be notified by alarms, if alarms are activated.

- 💡 Turning on Airplane mode reduces battery consumption.

### To Turn on Airplane Mode

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **More**.
- 3 Drag the slider beside **Airplane mode** to the right.

# Calendar and alarm clock

## Calendar

Use the Calendar application to manage your time schedule. If you have signed in to and synchronized your device with one or several online accounts that include calendars, for example, your Google™ account or Xperia™ with Facebook account, then calendar events from these accounts will also appear in the Calendar application. You can select which calendars you want to integrate into the combined Calendar view.

When an appointment time approaches, your device plays a notification sound to remind you. Also,  appears in the status bar.

- 1 Select a view type and the calendars that you want to view
- 2 Return to the current date
- 3 Access settings and other options
- 4 Flick left or right to browse more quickly
- 5 Selected date
- 6 Agenda for the selected day
- 7 Add a calendar event

### To Create a Calendar Event

- 1 From your Home screen, tap , then tap **Calendar**.
- 2 Tap .
- 3 If you have synchronized your calendar with one or more accounts, select the account you want to add this event to. If you only want to add this event on your device, tap **Device calendar**.
- 4 Enter or select the desired information and add attendees to the event.
- 5 To save the event and send out invites, tap **Save**.

### To view a calendar event

- 1 From your Home screen, tap , then tap **Calendar**.
- 2 Tap the event you want to view.

### To View Multiple Calendars

- 1 From your Home screen, tap , then find and tap **Calendar**.
- 2 Tap , then mark the checkboxes for the calendars you want to view.

### To zoom the calendar view

- When the **Week** or the **Day** view is selected, pinch the screen to zoom in.

### To display national holidays in the Calendar application

- 1 From your Home screen, tap , then tap **Calendar**.
- 2 Tap , then tap **Settings**.
- 3 Tap **National holidays**.
- 4 Select an option, or a combination of options, then tap **OK**.

### To Display Birthdays in the Calendar Application

- 1 From your Home screen, tap , then tap **Calendar**.
- 2 Tap , then tap **Settings** > **Birthdays**.
- 3 Drag the slider beside **Birthdays** to the right.

### To Display Weather Forecasts in the Calendar Application

- 1 From your Home screen, tap , then tap **Calendar**.
- 2 Tap , then tap **Settings**.
- 3 Tap **Weather forecast**, then drag the slider beside **Weather forecast** to the right.
- 4 If location services are disabled, tap **Home location**, then search for the city you want to add.

-  For more information about how to enable location services, see *Using Location Services* on the 127 page.

### To change weather forecast settings in the Calendar application

- 1 From your Home screen, tap , then tap **Calendar**.
- 2 Tap , then tap **Settings**.
- 3 Tap **Weather forecast**.
- 4 Adjust the settings as desired.

## Alarm and Clock

You can set one or several alarms and use any sound saved on your device as the alarm signal. The alarm does not sound if your device is turned off.

The alarm time format displayed is the same as the format you select for your general time settings, for example, 12-hour or 24-hour.

- 1 Access the alarm homescreen
- 2 View a world clock and adjust settings
- 3 Access the stopwatch function
- 4 Access the timer function
- 5 View options
- 6 Open date and time settings for the clock
- 7 Turn an alarm on or off

### To Set a New Alarm

- 1 From your Homescreen, tap .
- 2 Find and tap **Clock**.
- 3 Tap .
- 4 Tap **Time** and select the desired value.
- 5 Tap **OK**.
- 6 If desired, edit other alarm settings.
- 7 Tap **Save**.

### To snooze an alarm when it sounds

- Tap **Snooze**.

### To Turn Off an Alarm When It Sounds

- Drag  to the right.

 To turn off a snoozed alarm, you can drag down the status bar to open the Notification panel, then tap .

### To Edit an Existing Alarm

- 1 Open the Alarm & Clock application, then tap the alarm you want to edit.
- 2 Make the desired changes.
- 3 Tap **Save**.

### To turn an alarm on or off

- Open the Alarm & clock application, then drag the slider next to the alarm to the on or off position.

### To delete an alarm

- 1 Open the Alarm & clock application, then touch and hold the alarm that you want to delete.
- 2 Tap **Delete alarm**, then tap **Yes**.

### To Set the Sound for an Alarm

- 1 Open the Alarm & clock application, then tap the alarm you want to edit.
- 2 Tap **Alarm sound** and select an option, or tap  and select a music file.
- 3 Tap **Done**, then tap **Save**.

 For more information about how to adjust the alarm volume levels, see *Volume settings* on page 50 .

### To Adjust the Volume Level for an Alarm

- 1 Open the Alarm & clock application, then tap the alarm you want to edit.
- 2 Drag the volume slider under **Alarm volume** to the desired position.
- 3 Tap **Save**.

### To Set a Recurring Alarm

- 1 Open the Alarm & Clock application, then tap the alarm you want to edit.
- 2 Tap **Repeat**.
- 3 Mark the checkboxes for the relevant days, then tap **OK**.
- 4 Tap **Save**.

### To Activate the Vibrate Function for an Alarm

- 1 Open the Alarm & Clock application, then tap the alarm you want to edit.
- 2 Mark the **Vibrate** checkbox.
- 3 Tap **Save**.

### To Set the Side Keys Behavior

- 1 Open the Alarm & clock application, then select the alarm you want to edit.
- 2 Tap **Side keys behavior**, then select the desired behavior of side keys when they are pressed during the alarm.
- 3 Tap **Save**.

# Accessibility

## Magnification Gestures

Magnification gestures allow you to zoom in on parts of the screen by tapping an area of the touchscreen three times in succession.

### To enable or disable Magnification gestures

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Accessibility** > **Magnification gestures**.
- 3 Tap the on-off switch.

### To Magnify an Area and Pan Across the Screen

- 1 Ensure **Magnification gestures** is enabled.
- 2 Tap an area three times, and then hold and drag your finger across the screen.

## Large Text

You can enable the Large Text option to increase the default size of text displayed on your device.

### To enable or disable Large text

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Accessibility**.
- 3 Drag the slider next to **Large text**.

## Color Correction

The Color correction setting adjusts how colors are displayed on the screen for users who are color blind or have difficulty distinguishing between colors.

### To enable Color correction

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Accessibility** > **Color correction**.
- 3 Tap the on-off switch.
- 4 Tap **Correction mode**, then select the appropriate color sensitivity.

! Color correction is currently an experimental feature and may affect device performance.

## Hearing Aid Compatibility

The hearing aid compatibility option ensures that audio from your device works with standard hearing aids.

### To enable or disable hearing aid compatibility

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Call** > **General**.
- 3 Drag the slider beside **Hearing aids** to the desired setting.

## TalkBack

TalkBack is a screen reader service for visually impaired users. TalkBack uses spoken feedback to describe any events or actions performed on your Android device. TalkBack describes the user interface and reads out software errors, notifications, and messages.

### To enable TalkBack

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Accessibility** > **TalkBack**.
- 3 Tap the on-off switch and then tap **OK**.

! To change speech, feedback and touch preferences for TalkBack, tap **Settings**.

💡 TalkBack launches a tutorial immediately after you enable the feature. To exit the tutorial, tap the **Exit** button twice.

### To disable TalkBack

- 1 From your Home screen, double-tap .
- 2 Find and double-tap **Settings** > **Accessibility** > **TalkBack**.
- 3 Double-tap the on-off switch and then double-tap **OK**.

## TTY (Teletypewriter) Mode

The TTY (Teletypewriter) feature on your device allows people who are deaf, hard of hearing, or who have speech or language disabilities to communicate using a TTY device or a relay service.

### To enable TTY mode

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Call** > **General** > **TTY mode**.
- 3 Select the applicable TTY mode.

## Slow Talk

The Slow talk feature slows down the speech of the other party while you are on a call.

### To Enable or Disable Slow Talk

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Call** > **General**.
- 3 Drag the slider beside **Slow talk** to the on or off position.

# Support and maintenance

## Support for your device

Use the Support application in your device to search a User guide, read troubleshooting guides, and find information about software updates and other product-related information.

### To Access the Support Application

- 1 From your Home screen, tap .
  - 2 Find and tap , then select the required support item.
- ! For the best available support, we recommend connecting to the Internet when using the Support application.

## Help in menus and applications

Some applications and settings have help available in the options menu, which is normally indicated by  in the specific applications.

## Help us improve our software

You can enable the sending of usage info from your device so that Sony Mobile can receive anonymous bug reports and statistics that help improve our software. None of the information gathered includes personal data.

### To allow the sending of usage info

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **About phone** > **Usage info settings**.
- 3 Mark the **Send usage info** checkbox if it is not already marked.
- 4 Tap **Agree**.

## Computer Tools

There are a number of tools available to help you connect your device to a computer and manage content such as contacts, movies, music, and photos.

- ! This device has a capless USB port. If your device gets exposed to water, ensure the USB port is completely dry before inserting a USB cable.

## Xperia™ Companion

Xperia™ Companion is a computer software with a collection of tools and applications you can use when you connect your device to a computer. With Xperia™ Companion, you can:

- Update or repair your device's software.
- Transfer content from your device using Xperia™ Transfer.
- Back up and restore content on your computer.
- Sync multimedia content – camera content, music and playlists between your device and computer.
- Browse files on your device.

To use Xperia™ Companion, you need an Internet-connected computer running one of the following operating systems:

- Microsoft® Windows® 7 or later
- Mac OS® X 10.8 or later

You can download Xperia™ Companion at <http://support.sonymobile.com/global-en/tools/xperia-companion>.

## Media Go™ for Microsoft® Windows®

The Media Go™ application for Windows® computers helps you transfer photos, videos and music between your device and a computer. To read more about how to use the Media Go™ application, go to <http://mediago.sony.com/enu/features>.

To use the Media Go™ application, you need one of these operating systems:

- Microsoft® Windows® 10
- Microsoft® Windows® 8 / 8.1
- Microsoft® Windows® 7
- Microsoft® Windows Vista®

## Updating your device

You should update the software on your device to get the latest functionality, enhancements and bug fixes in order to ensure optimal performance. When a software update is available,  appears in the status bar. You can also check for new updates manually.

The easiest way to install a software update is to do it wirelessly from your device. However, some updates are not available for wireless download. You then need to use the Xperia™ Companion software on a PC or on an Apple® Mac® computer to update your device.

For more information about software updates, go to [www.sonymobile.com/update](http://www.sonymobile.com/update).

- ! If you are using a device with multiple users, you must log in as the owner, that is, the primary user, to update the device.
- ! Insufficient remaining storage capacity may prevent updates. Ensure you have sufficient storage capacity before attempting to update.

### To check for new software

- 1 If you are using a device with multiple users, make sure you are logged in as the owner.
  - 2 From your Home screen, tap .
  - 3 Find and tap **Settings** > **About phone** > **Software Update**.
- ! If no new software is available, it's possible that you may not have enough free memory on your device. If your Xperia™ device has less than 500 MB of free internal memory (device memory) available, you do not receive any information about new software. The following notification appears in the Notification panel to warn of the lack of storage space:  
**Storage space running out. Some system functions may not work.**  
If you receive this notification, you must free up internal memory (device memory) before you can get notifications about new software being available.

### To download and install a system update

- 1 If you are using a device with multiple users, make sure you are logged in as the owner.
- 2 From your Home screen, tap .
- 3 Find and tap **Settings** > **About phone** > **Software Update**.
- 4 If a system update is available, tap **Download** to download it to your device.
- 5 When the download is finished, tap **Install** and follow the on-screen instructions to complete the installation.

### To Download and Install a System Update from the Notification Panel

- 1 If you are using a device with multiple users, be sure you're logged in as the owner.
- 2 Drag the status bar downwards to open the Notification panel.
- 3 Scroll down and select the desired system update, then tap **Download**.
- 4 When the download is finished, open the Notification panel again if it is closed, then tap **Install** and follow the on-screen instructions to complete the installation.

## Updating your device using a computer

You can download and install software updates on your device using a computer with an Internet connection. You need a USB cable and a PC or an Apple® Mac® computer running the Xperia™ Companion software.

- 💡 If you don't have the Xperia™ Companion software installed on the relevant computer, connect your device to the computer using a USB cable and follow the on-screen installation instructions.

### To update your device using a computer

- 1 Make sure you have the Xperia™ Companion software installed on your PC or Apple® Mac® computer.
  - 2 Using a USB cable, connect your device to the computer.
  - 3 **Computer:** Launch the Xperia™ Companion software. After a few moments, the computer detects your device and searches for new software.
  - 4 **Computer:** If a new software update is detected, a popup window appears. Follow the on-screen instructions to run the relevant software updates.
- ! When you connect the device to the computer via a USB cable, you are prompted to install the software, or cancel, unless you have previously selected **Do not show again**.

## Memory and Storage

Your device has different types of memory and storage options.

- The **eMMC (embedded multimedia controller) memory**, which consists of the system memory and the internal storage, is about **32 GB**. The system memory is used for the Android™ operating system and for most pre-installed applications. The internal storage is used to store downloaded or transferred content along with personal settings and data. Some examples of data stored to the internal storage are alarm, volume and language settings; email; bookmarks; calendar events; photos; videos and music.
- You can use a removable **memory card** with a storage capacity of up to **200 GB** to get more storage space. Media files and some apps (with their data) can be moved to this type of memory to free up internal storage. Some apps, such as the Camera app, can save data directly to a memory card.
- The **dynamic memory (RAM)** is about **3 GB** and cannot be used for storage. RAM is used to handle running applications and the operating system.
- ! You may have to purchase a memory card separately.
- 💡 Read more about the use of memory in Android™ devices by downloading the white paper for your device at [www.sonymobile.com/support](http://www.sonymobile.com/support).

## Improving Memory Performance

The memory in your device tends to fill up as a result of normal usage. If the device starts to slow down, or applications suddenly shut down, you should consider the following:

- Always have more than **500 MB** of free internal storage available.
- Close down running applications that you are not using.
- Clear the memory cache for all applications.
- Uninstall downloaded applications that you don't use.
- Move applications to the memory card if the internal storage is full.
- Transfer photos, videos, and music from the internal memory to the memory card.

- If your device can't read content on the memory card, you may need to format the card. Note that all content on the card gets erased when you format it.
- ! If you are using a device with multiple users, you must log in as the owner, that is, the primary user, to be able to perform certain actions, such as transferring data to the memory card and formatting the memory card.

#### To view the memory status

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Storage**.

#### To view the amount of free and used RAM

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Apps**.

#### To clear the cache memory for all applications

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Storage**.
- 3 Tap **Internal storage** > **Cached data** > **OK**.

- ! When you clear the cache memory, you don't lose any important information or settings.

#### To transfer media files to the memory card

- 1 Make sure you have a memory card inserted in your device.
- 2 From your Home screen, tap .
- 3 Find and tap **Settings** > **Storage** > **Transfer data to SD card**.
- 4 Mark the file types you want to transfer to the memory card.
- 5 Tap **Transfer**.

#### To move apps to the memory card

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Apps**.
- 3 Select the app that you want to move, then tap **Storage**, then under Storage used tap **Change** > **SD Card** > **Move**.

- ! Some apps cannot be moved to the memory card.

#### To stop applications and services from running

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Apps**.
- 3 Select an application or service, then tap **FORCE STOP** > **OK**.

#### To format the memory card

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **Storage** > **Erase SD card**.
- 3 To confirm, tap **Erase SD card** > **Erase everything**.

- ! All content on the memory card gets erased when you format it. Be sure to make backups of all data that you want to save before formatting the memory card. To back up your content, you can copy it to a computer. For more information, see *Managing files using a computer* on the 139 page.

## Managing files using a computer

Use a USB cable connection between a Windows® computer and your device to transfer and manage your files. Once the two devices are connected, you can drag and drop content between your device and the computer, or between your device's internal storage and SD card, using the computer's file explorer.

If you have a PC or an Apple® Mac® computer, you can use Xperia™ Companion to access the file system of your device.

## Backing up and restoring content

Generally, you should not save photos, videos and other personal content solely on the internal memory of your device. If something should happen with the hardware, or if your device is lost or stolen, the data stored on its internal memory is gone forever. It is recommended to use the Xperia™ Companion software to make backups which save your data safely to a computer, that is, an external device. This method is especially recommended if you are updating your device software to a newer Android version.

Using the Backup & Restore application, you can make a quick online backup of basic settings and data with your Google™ account. You can also use this application to back up data locally, for example, to the SD card in your device or to an external USB storage device.

- ! It is very important that you remember the password that you set when you make a data backup. If you forget the password, it may not be possible to restore important data such as contacts and messages.

### Backing up data to a computer

Use the Xperia™ Companion software to back up data from your device to a PC or an Apple® Mac® computer. These backup applications let you back up the following types of data:

- Contacts and call logs
- Messages
- Calendar
- Settings
- Media files such as music and videos
- Photos and images

#### To back up your data using a computer

- 1 Make sure that the Xperia™ Companion software is installed on the PC or Apple® Mac® computer.
- 2 Connect your device to the computer using a USB cable.
- 3 **Computer:** Open the Xperia™ Companion software. After a few moments, the computer detects your device.
- 4 Select **Backup** on the main screen.
- 5 Follow the on-screen instructions to back up data from your device.

#### To restore your data using a computer

- 1 Make sure that the Xperia™ Companion software is installed on the PC or on the Apple® Mac® computer.
- 2 Connect your device to the computer using a USB cable.
- 3 **Computer:** Open the Xperia™ Companion software.
- 4 Click **Restore**.
- 5 Select a backup file from the backup records, then tap **Restore** and follow the on-screen instructions to restore data to your device.

### Backing Up Data with the Xperia™ Backup & Restore Application

Using the Xperia™ Backup & restore application, you can make an online backup or a local backup of data. For example, you can back up data manually or turn on the automatic backup function to save data periodically.

The Xperia™ Backup & restore application is recommended for backing up data before you do a factory data reset. With this application you can back up the following types of data to an online account, an SD card, or an external USB storage device that you have connected to your device using a USB host adapter:

- Bookmarks
- Contacts and call logs
- Conversations
- Calendar data

- E-mail accounts
- Wi-Fi® networks
- Device settings
- Applications
- Xperia™ Home layout

#### To back up content to an online account

- 1 From your Home screen, tap .
- 2 Find and tap **Settings > Backup & reset**.
- 3 To enable the automatic backup function, tap **Automatic backup** and then tap the on-off switch.
- 4 To enable the manual backup function, tap **More > Manual backup**.
- 5 Under **Where to store files**, tap **Select storage > Online account**.
- 6 If prompted, tap **I agree**, then follow the on-screen instructions to sign in to your Google™ account.
- 7 Select the types of data to back up, then tap **OK**.

#### To Set Up the Automatic Backup Function

- 1 If you are backing up content to a USB storage device, make sure the storage device is connected to your device using a USB host adapter. If you are backing up to an SD card, make sure the SD card is properly inserted in your device. If you are backing up content to an online account, be sure you have signed in to your Google™ account.
- 2 From your Home screen, tap .
- 3 Find and tap **Settings > Backup & reset**.
- 4 Under **Xperia™ Backup & restore**, tap **Automatic backup**.
- 5 To enable the automatic backup function, tap the on-off switch.
- 6 Select a backup frequency, where to save backup files, the time to back up, and the types of data to back up.
- 7 To save your settings, tap .

#### To Back Up Content Manually

- 1 If you are backing up content to a USB storage device, make sure the storage device is connected to your device using a USB host adapter. If you are backing up to an SD card, make sure the SD card is properly inserted in your device. If you are backing up content to an online account, be sure you have signed in to your Google™ account.
- 2 From your Home screen, tap .
- 3 Find and tap **Settings > Backup & reset**.
- 4 Under **Xperia™ Backup & restore**, tap **More**.
- 5 Tap **Manual backup**, then select a backup destination and the data types that you want to back up.
- 6 Tap **Backup**.
- 7 After the data is backed up, tap **Finish**.

#### To Edit a Backup File

- 1 From your Home screen, tap .
- 2 Find and tap **Settings > Backup & reset**.
- 3 Under **Xperia™ Backup & restore**, tap **More**.
- 4 Tap **Edit backup file**, then select a backup source and the data types that you want to delete.
- 5 Tap **Delete data**.
- 6 Tap **OK** to confirm.
- 7 After the data is deleted, tap **Finish**.

### To Restore Backed-Up Content

- 1 If you are restoring content from a USB storage device, ensure the storage device is connected to your device using the USB Host adapter. If you are restoring content from an SD card, ensure the SD card is properly inserted in your device. If you are restoring content from an online account, make sure you have signed in to your Google™ account.
  - 2 From your Home screen, tap .
  - 3 Find and tap **Settings > Backup & reset**.
  - 4 Under **Xperia™ Backup & restore**, tap **Restore data**, and then select a restore source and the data types that you want to restore.
  - 5 Tap **Restore data**.
  - 6 After the content is restored, tap **Finish**.
- ! Remember that any changes you make to your data and settings after you create a backup, including any applications you download, get deleted during a restore procedure.

### Backing Up Data with the Google Backup & Restore Application

Using the Google Backup & restore application, you can back up data to a Google server. You can also turn on the automatic restore function to restore application data and settings when you reinstall an application.

With this application, you can back up the following types of data:

- Applications
- Bookmarks
- Wi-Fi® networks
- Other settings

### To back up data to an online account

- 1 From your Home screen, tap .
- 2 Find and tap **Settings > Backup & reset**.
- 3 Under **Google™ Backup & restore**, tap **Back up my data** and drag the slider to the right.

### To Enable Automatic Restore when you Reinstall an Application

- 1 From your Home screen, tap .
- 2 Find and tap **Settings > Backup & reset**.
- 3 Under **Google™ Backup & restore**, drag the slider beside **Automatic restore** to the right.

### Running Diagnostic Tests on Your Device

The Xperia™ Diagnostics application can test a specific function or run a full diagnostic test to check if your Xperia™ device is working properly.

Xperia™ Diagnostics can:

- Assess potential hardware or software issues on your Xperia™ device.
  - Analyze how well applications perform on your device.
  - Log the number of dropped calls during the previous 10 days.
  - Identify installed software and provide useful details about your device.
- 💡 The Xperia™ Diagnostics application is pre-installed on most Android™ devices from Sony. If the Diagnostics option is not available under **Settings > About phone**, you can download a light version using the Play Store™ application.

### To Run a Specific Diagnostic Test

- 1 From your Home screen, tap .
- 2 Find and tap **Settings > About phone > Diagnostics > Test**.
- 3 Select a test from the list.
- 4 Follow the instructions and tap **Yes** or **No** to confirm if a feature works.

### To Run all Diagnostic Tests

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **About phone** > **Diagnostics** > **Test** > **Run all**.
- 3 Follow the instructions and tap **Yes** or **No** to confirm if a feature works.

### To View Details about Your Device

- 1 From your Home screen, tap .
- 2 Find and tap **Settings** > **About phone** > **Diagnostics** > **Facts**.

## Restarting and resetting your device

You can force your device to restart or shut down in situations where it stops responding or won't restart normally. No settings or personal data get deleted.

You can also reset your device to its original factory settings. This action is sometimes necessary if your device stops functioning properly, but note that if you want to keep any important data, you have to first back up this data to a memory card or other non-internal memory. For more information, see *Backing up and restoring content* on page 140 .

If your device fails to power on or you want to reset your device's software, you can use Xperia™ Companion to repair your device. For more information on using Xperia™ Companion, see *Computer Tools* on page 136 .

- ! Your device may fail to restart if the battery level is low. Connect your device to a charger and try restarting again.
- ! If you are sharing a device with multiple users, you may need to log in as the owner, that is, the primary user, to reset your device to its original factory settings.

### To force your device to restart

- 1 Press and hold down the power key .
- 2 In the menu that opens, tap **Restart**. The device restarts automatically.

### To force the device to shut down

- 1 Open the cover for the nano SIM card and memory card slot.
- 2 Using the tip of a pen or a similar object, press and hold down the OFF button for a few seconds.
- 3 After your device emits a series of three quick vibrations, release the OFF button. The device turns off automatically.

- ! Do not use overly sharp objects that could damage the OFF button.

### To perform a factory data reset

- ! Before you start, make sure to back up any important data that is saved on the internal memory of your device to a memory card or other non-internal memory. Factory data reset will erase all data from your device's internal storage, and you will not be able to access the files on any of your encrypted SD cards again.
- ! To avoid permanent damage to your device, do not restart your device while a reset procedure is underway.

- 1 From your Home screen, tap .
  - 2 Find and tap **Settings** > **Backup & reset** > **Factory data reset**.
  - 3 Tap **Reset phone**.
  - 4 If required, draw your screen unlock pattern or enter your screen unlock password or PIN to continue.
  - 5 To confirm, tap **Erase everything**.
- ! Your device does not revert to an earlier software version of Android™ when you perform a factory data reset.
- ! If you forget your screen unlock password, PIN or pattern, you can use the device repair feature in Xperia™ Companion to erase the security layer. You need to provide your Google account login details to perform this operation. By running the repair feature, you reinstall software for your device and you may lose some personal data in the process.

### To repair the device software using Xperia™ Companion

- ! Before performing a software repair, make sure you know your Google™ credentials. Depending on your security settings, you may need to enter them in order to start up the device after a software repair.
- 1 Make sure that Xperia Companion is installed on your PC or Mac®.
  - 2 Open the Xperia™ Companion software on the computer and press **Software repair** on the main screen.
  - 3 Follow the instructions that appear on the screen to reinstall the software and complete the repair.

## Using your Device in Wet and Dusty Conditions

Your device is waterproof and protected against dust, so don't worry if you get caught in the rain or want to wash off dirt under a tap, but remember: all ports and attached covers should be firmly closed. You should not put the device completely underwater, or expose it to seawater, salt water, chlorinated water, or liquids like drinks. Abuse or improper use of the device will invalidate the warranty. The device has Ingress Protection rating IP65/68. For more info, see [www.sonymobile.com/waterproof](http://www.sonymobile.com/waterproof).

Your device has a capless USB port. The USB port must be completely dry before a cable can be connected for charging or data transfer. If your device gets exposed to water and the USB port gets wet, wipe the device dry with a microfiber cloth and shake it several times with the USB port facing downward. Repeat the procedure until no moisture is visible in the USB port.

Your warranty does not cover damage or defects caused by abuse or use of your device against Sony Mobile's instructions. For more information about the warranty, refer to the Important information, which can be accessed via [support.sonymobile.com](http://support.sonymobile.com) or via **Settings** > **About phone** > **Legal information**.

## Warranty, SAR, and Usage Guidelines

For information about warranty, SAR (Specific Absorption Rate), and safety guidelines, please read the **Important information** provided under **Settings** > **About phone** > **Legal information** on your device.

### Recycling your device

Got an old device lying around the house? Why not recycle it? By doing so, you will help us reuse its materials and components, and you'll protect the environment, too! Find out more about the recycling options in your region at [www.sonymobile.com/recycle](http://www.sonymobile.com/recycle).

## Limitations to services and features

Some of the services and features described in this User guide are not supported in all countries/regions or by all networks and/or service providers in all areas. Without limitation, this applies to the GSM International Emergency Number, 112. Please contact

your network operator or service provider to determine availability of any specific service or feature and whether additional access or usage fees apply.

Use of certain features and applications described in this guide may require access to the Internet. You may incur data connection charges when you connect to the Internet from your device. Contact your wireless service provider for more information.

## Legal information
